MALTESE CROSS TIRES

Strength
Endurance

Mileage -:- Economy -:- Satisfaction

All over Canada there are motorists who can not be satisfied with any other tires than

MALTESE CROSS TIRES

Those who know the painstaking care in preparation of material and who have seen the accurate skill of the individual Tire Builders realize that there could not possibly be anything in Tiredom better made than Maltese Cross Tires. Their road record is excellent. They are as trouble-free as any humanly made Tire can be. More than ever before will their mileage record increase, owing to certain improvements this year in the tire and in the tread.

A Case of Satisfaction

A new 50-battery shipping case for Reliable Batteries.

This is our new, convenient shipping case which is bound to prove popular. Holds fifty batteries and will be made up of single or assorted types —Ignition, Regular and Telephone, as desired.

You will find the new case a great boon, if you require a rush order of fast-selling types, or to supplement your regular barrel order.

Dealers supplying a limited demand can now order in quantities suitable to their trade.

Only a small additional charge—one cent per battery—over the barrel-lot price is made when shipments of Reliable Batteries are ordered in these cases.

Reliable Batteries and Flashlights are justly popular with dealers. The handsome metal "Reliable" Flashlight cases, enamelled in colors, are a distinct advance in Flashlight case-making.

Your jobber can supply you—communicate with him.

"Reliable" Selling Helps

Strong, consistent advertising in leading magazines, farm papers, newspapers and motor papers is telling your customers of the merits of "Reliable" Batteries.

An attractive four-color window card to hitch your store up to our advertising as a "Reliable" store.

If you are sending circulars to prospective purchasers of "Reliable" Batteries and Flashlights, write for sample of beautiful four-color circular.

You Might As Well Have What Your Customers Want When They Want It

Right now most of them are thinking of the Spring "Clean Up" or housecleaning.

That means they'll need Tubs and Pails and Washboards and Milk Pails and Barrel Tops and—

Ten chances to one they'll want them made of

EDDY'S INDURATED FIBREWARE

Because for some time past we've been carrying on a most extensive educational advertising campaign showing the advantage of this ware over all others.

Look over your stock to-day and figure out your needs for the coming season.

Eddy's Indurated Fibreware and Eddy's Matches are a pretty good combination to carry.

The E. B. Eddy Co., Limited

Hull, Canada

Brantford Asphalt Slates in big demand

The output of Brantford Asphalt Slates in 1917 was double 1916—1918 double 1917. This indicates that there is a big, growing market for this artistic, durable, fire-resistant roofing.

Progressive hardware dealers who push the sale of Brantford Asphalt Slates will find it a very profitable line. In fact, there are good profits to be made in the entire line of Brantford Roofing—

Asphalt, Rubber, Crystal, Leatheroid and Standard Mohawk in rolls—Asphalt Slates in individual size shingles, and the Asphalt Slab Slate, which is four shingles in one—and Climax Sheathing Paper, a big seller.

The hardware dealer can meet every roofing requirement with this line of nationally advertised, first quality roofing.

The "1900" Cataract Electric Washer

With the addition of our two newest and greatest models, the "1900" line is complete.

The Washers the Women Want

The articles that are in demand are the profitable ones, from the Hardware Man's standpoint. Those that are hard to sell—the unknown ones—prove less lucrative, in the long run.

It's Profits That You Want

and you can get them from "1900" Washers.

For more than twenty years we have been making and selling nothing but washing machines—the very best that can be made. Our whole attention has been centred on "1900" Washers, on perfecting and developing new models.

The "1900" Cataract Electric Washer

These most modern washers, as well as the other "1900" machines—the Gravity, Water Power and Gasoline Motor Washers—are sold everywhere through our extensive advertising, which is the largest publicity campaign conducted for washing machines in Canada. Inquiries in large numbers result from this advertising, and these inquiries are turned over to such "1900" dealers as have proven their worth in their different territories.

The "1900" Agitator Electric Washer

If there is no one selling "1900" Washers in your territory there is a chance for you. Make use of it by writing to-day to the wholesale department.

TWIST DRILLS — REAMERS — WRENCHES — HAMMERS

OUR METAL HENS

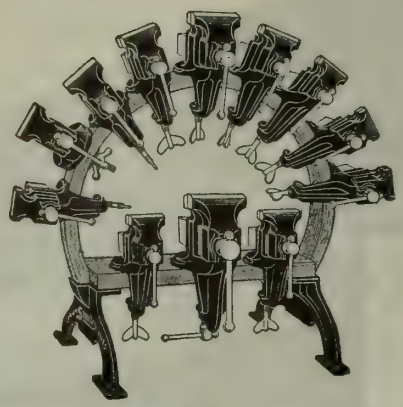
These Cycle Incubators are a wonderful invention. Users have remarkable success with them. Hatch 50 eggs at one time, and brood the chicks in brooder underneath. The one lamp will hatch a batch and brooder a batch at the same time. One gallon of oil will run it for the entire hatch.

An ideal specialty for Spring window display, and leader for poultry supplies.

An unsolicited testimonial:—

Victoria, B.C., April 6, 1919.

Having bought one of your Cycle Brooder Hatchers, I wish to let you know they are a remarkable machine as my FIRST experience with it has been very successful in getting a chick for every fertile egg, and I might say they seem to be thoroughly enjoying themselves in the Brooder.



(Signed) T. A. CROSBY.

We can ship promptly small or large orders. Now is the time to buy, the hatching season being over by the end of June.

Have you seen our simplified poultry hoppers and founts? Write us to-day.

ADVERTISING to be successful does not necessarily have to produce a basketful of inquiries every day.

The best advertising is the kind that leaves an indelible, ineffaceable impression of the goods advertised on the minds of the greatest possible number of probable buyers, present and future.

Good Men

DO you need the services of a good retail salesman, traveller, or manager? The best of them read HARDWARE AND METAL each week from cover to cover. Incidentally they also note the condensed ads. in the "Wanted" section. You can use space in this section at a cost of two cents per word for the first insertion, and one cent a word for subsequent insertions. Add five cents for box number or address.

THE SIGN THE WORLD KNOWS

Throughout the world the red Gargoyle commands respect.

The people of every civilized country know that it is the mark of genuine expertness, of highest quality, in lubrication.

The red Gargoyle means accuracy and dependability in lubrication. Because, Gargoyle Mobiloils, when used as specified by the Charts of Recommendations, which represent the professional advice of the Manufacturers of Gargoyle Mobiloils, give the user maximum lubricating efficiency.

Dealers who display this red Gargoyle, and sell Gargoyle Mobiloils according to the Charts of Recommendations, have the confidence of every motorist—and this confidence is extended to every department of the dealer's business.

Is the red Gargoyle in front of your shop?

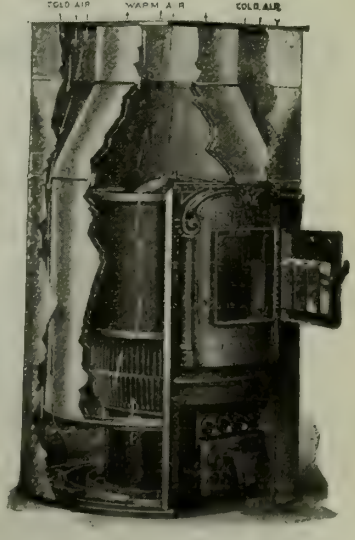
A Wider Furnace Market Comes with the PIPELESS Hecla Furnace

YOU have known all about Clare Bros.' products, Mr. Dealer, for a great number of years. Perhaps you have sold them—at any rate you know just how good any bearing Clare Bros.' name is. Particularly you know about the "Hecla" furnace with all its exclusive patented features that make it the easiest furnace to sell in Canada.

A Hecla PIPELESS Furnace

Imagine, a furnace with all the superior qualities of the "Hecla"—Circular Waterpan—Steel Ribbed Firepot—dust and gas-proof Fused Joints—with the added advantages of having no pipes.

In the "Hecla" Pipeless Furnace this principle of pipeless heating has been so scientifically applied that it **will** heat the building—even the furthermost corners of it—comfortably and uniformly. The volume of cold and warm air has been proportioned with such exacting care, a circulation is set up that heats the room farthest away simultaneously and at the same temperature as the room nearest the furnace. That this pipeless furnace is altogether good is proven by the fact that it is simply our "Hecla" furnace modified to pipeless heating needs.



A Wonderful Opportunity

Think of the tremendous field this perfected furnace has. It has no limitations. A pipeless furnace that **does** heat properly is very desirable for any building. And it is easy to instal. The furnace is complete in itself. No pipes to make except the smoke pipe—no elbows to cut—and only one register. No large number of men is necessary to instal the "Hecla" Pipeless.

You will find an easy sale for this furnace. Particularly in houses with no furnace piping. In churches—one-roomed schools, halls, etc. In buildings with hot water or steam heat it will supply the circulation so necessary to health. And with these heating systems it supplies warmth in spring and fall, when only temporary heat is needed. Houses with little head room in the cellar should instal a pipeless. Every one of these places means a sale for you. Think of the number you could dispose of immediately.

Get more information about the "Hecla" Pipeless Furnace. Write to-day for free catalogue. Read all about them and get them on your floor. There are a few territories still open for agents. Ask for information regarding an appointment.

We now have a most comprehensive booklet on the Hecla Pipeless Furnace ready. Write for a supply of these to distribute to your prospects.

Why It Pays!

ADVERTISING in HARDWARE AND METAL is economical because it reaches, and the advertiser only pays for, a circulation of tremendous buying power, which is always on the lookout for new lines and information regarding goods which are already in stock.

Manufacturers and wholesalers cannot afford to side-step the dealers. In nine cases out of ten, the customer accepts the retailer's recommendation.

MEAKINS BRUSHES

ARE BUILT FOR SERVICE

The productive life of any brush depends on quality of material and methods of manufacturing.
Our policy of using nothing but high-grade materials, together with the extraordinary care and attention we give to the making of our Brushes, has put them in the front rank of **"serviceable products."**
Meakins' Brushes give unusual service to the user and return splendid profits to the Dealer.
The bristles "cannot loosen." They are Rubberset. A feature that makes them easy to sell.

Write us for catalogue. Order through your jobber.

Competition Stimulates Sales

St. Thomas Hardware Firm Sells Forty-two Electric Washers in Four Months, Despite Efforts of a Hydro Shop and Another Hardware Firm Also Selling Electrics —Advertising, Window Displays and Demonstrations Big Helps in Building Business

FORTY-TWO sales of electric washers in four months in a city of eighteen thousand, in competition with a Hydro store, and at least one large retail hardware store. That is the record of the George A. McMurtry Co., of St. Thomas, Ont., and the sales campaign is still going strong. Someone has stated that competition is the life of trade, and judging by the competition there is in St. Thomas, Ont., in selling washing machines it would appear that there is quite a lot in the assertion. In considering the general situation it might be mentioned that the city, as far as the buying population is concerned, is made up very largely of railroad men, and highly paid railroad men at that. Four months ago the George A. McMurtry Co. decided that there was a chance to build up some business in the sale of electric washers and it started in to boost the line.

The above window display was used by the Geo. A. McMurtry Co., effectively to back its newspaper advertising, and helped materially in stimulating sales of electric washers.

Went After Business

Advertisements regarding the time and labor saving value of electric washers began to appear regularly, and the McMurtry Co. backed these up by window displays. The advertisements produced results and the sale of one machine very often meant the sale of one or two more, as women who had purchased began to tell their friends and neighbors about the way the washers worked.

"That is one of the secrets of the success we have met with," said Mr. McMurtry to HARDWARE AND METAL. "The first thing to do is to pick out a machine in which you have every confidence and that you feel you can honestly recommend to your customers. This applies to any line of goods, not only washers. If you have goods that you can enthuse over and guarantee to the limit there should be little trouble in selling them."

Lets Public Know

After getting the right sort of goods the next thing is to let the people know you have them. I have never been satisfied with an occasional advertisement. You have to keep at it to get results. In our campaign to sell electric washers we have had from three to four advertisements each week. Good advertising always produces results and when the advertisements are backed by window displays even better results are obtained.

One of the next best plans to boost business in electric washers is to hold demonstrations. At the first demonstration that was held in our store we offered a discount of $5 off any machines purchased during the demonstration. This brought results, not only selling a few electrics, but being the means of bringing a great number of people into our store who were never there before and among whom were a number of first-class prospects.

We study our customers and prospects closely, and aim not only to interest the women but their husbands as well. We try to show the women that the home is one of the most important institutions in life, and that to have a happy home a woman must have everything up to date. This means modern labor-saving equipment. We feature the point about why should men have all the modern labor saving appliances in their offices and stores or for their work. We emphasize the point that an electric washer is not only a big time saver, but a great labor saver and means the elimination of the drudgery that has made washing the bane of many women's lives. We believe there should be, and in the days to come will be, an electric washer in every home. To drive this idea home with men we tell them they do not give their wives a fair chance if they keep them washing clothes all day when for the expenditure of a few dollars they can instal an electric machine that will do all the work.

Produce Results

These arguments produce results, especially when backed up by an actual demonstration of the washer in action. We let prospective buyers, who are responsible, take the machines home and try them out, and frequently deliver three or four machines a day. As many of our customers are wives of railway men who only get paid once or twice a month it is frequently necessary to make arrangements for payment. We con-

sider cash as payment within thirty days. After that time an extra five dollars is added and the payments run $25 down and $10 a month. This is not only a profitable way of doing business but is a business getter, as it gives many people a chance to have an electric washer who would otherwise be unable to buy one.

The original of the above ad. occupied a space nine inches square. It proved very successful in bringing out a crowd among which were many prospective buyers.

Combination Affair

On Saturday, April 5, the firm held a combination demonstration at which electric washers were handled by a representative direct from the factory, while a gas burner, phonograph and vacuum cleaner were also shown. In the advertisement which was used to announce the demonstration the people were told that something was to be given away. This is nearly always an effective drawcard. In this case those who came to the store were given pop corn, which was popped over the gas burner. A number of sales were made, and a splendid list of prospects secured. These will be followed up carefully.

Just how effective the George A. McMurtry Co.'s sales efforts are may be gathered from the fact that washers were sold at their demonstration and a long list of prospects secured in spite of the fact that at the same time the Hydro shop was holding a demonstration of several lines of washers, vacuum cleaners, electric stoves and other appliances.

Keen Competition

To add to the keenness of the competition another large hardware firm put on its annual spring opening, featuring nine demonstrations. It is interesting to note, perhaps as a side issue, the aggressive manner in which these two St. Thomas hardware firms are going right after the electrical business in spite of the fact that the Hydro shop has the advantage of being operated by the public funds. The hardware men are not only going after the business but they are getting it.

After Accessories Too

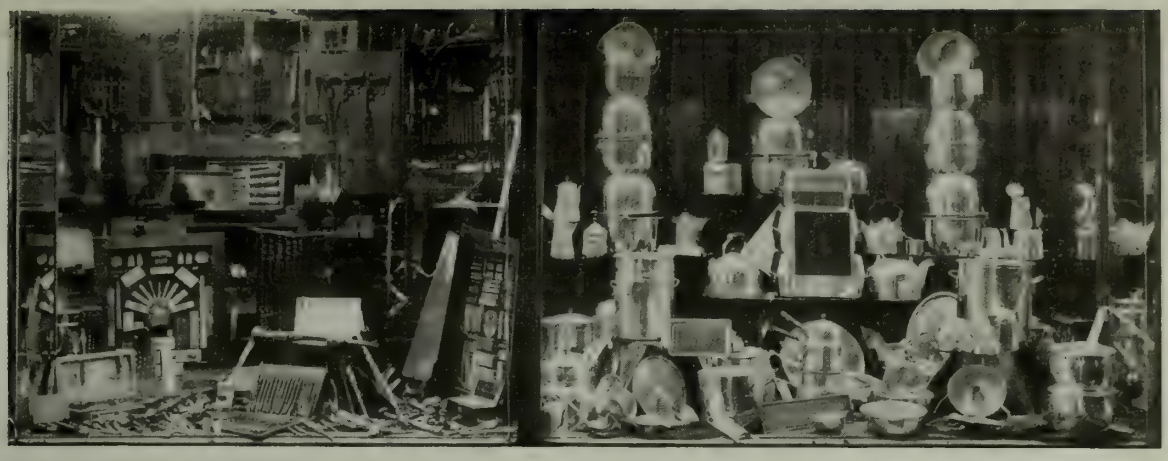
The George A. McMurtry Co. is not only building up a steadily increasing business in electric washers but its sales of auto accessories have been growing rapidly. The firm claims it has the largest and most complete stock of accessories in the city, and has adopted as the motto for its accessory department, both in the store and in its advertising, "A part for every Ford." Sales are increased by steady newspaper advertising backed by window displays. As will be seen from the illustration accompanying this article prices of everything shown in the window are marked plainly. The window displays are changed frequently and are always kept neat and attractive. As a result of advertising and window displays, and the service it has given, the firm has so impressed itself upon the minds of many car owners that when they want accessories they never think of going to a garage but head for the hardware store, because they know they can get what they require.

Displayed in Store

In the front of the store in a prominent place, accessories are displayed in a silent salesman. The stock is kept looking at its best. Right across from it are shown electric washers. These are frequently changed around but they are always kept right where customers cannot fail to see them. The window display shown in the illustration was arranged by R. R. Foster, of the firm.

Display in the store as well as in the windows is a feature that has brought big results. All along one side of the store are arranged shelves of aluminum and kitchen ware. In the stove selling season a display of heaters, and gas, electric, coal and wood stoves is to be seen in the store. The firm has sold as many as fifteen stoves in one day.

The paint department is another section that is a sales producer. The firm sells quantities of paint to house owners, and selis a lot wholesale also to the painters. Advertising in the newspapers backed by displays in the windows and in the store, has brought the sales alonz steadily.



One of the latest lines to be added to the stock is electric vacuum cleaners, and by going after business in this department in the same way they have gone after it in electric washers, paints, stoves and other goods, the firm expects to get the same results.

This shows a general type of advertisement used. The original was 4½ by 7½ inches. Seasonable lines are featured with a special section in which vacuum cleaners or electric washers are talked about every couple of days.

Window displays of auto accessories al ways result in increased sales says the proprietor of the Geo. A. McMurtry C o. The displays are changed frequently. Note that prices are given of everythin g shown.

A well arranged window display of tools always carries a strong appeal to a very large percentage of people and will result in direct increases in sales especially from now on when the building season is brisk. A window display of aluminum goods is also a sales producer and lends itself readily to making an attractive showing.

Keep Your Store Windows Attractive

Why the Usual Display Makes the Most Favorable Impression When it is Below the Level of the Prospective Customer's Eye — Importance of Always Keeping Windows Clean and Bright and Filled With Seasonable Goods

The question of the window base or floor is an important one. Shall it be high or low, flat or in graded elevations? It makes all the difference in the world in displaying goods whether they are properly shown or not. Some experts advise placing goods on the level of the eye. This means that the observer stands with chin horizontal and looks into the window and the goods are in line with his eyes. Rather high for most displays, is it not? And then, too, all people are not the same height.

Generally speaking the usual display makes the most favorable impression when it is from two to two-and-a-half feet below the level of the average person's eyes. This means that windows must be lowered, others raised.

Some One Responsible

Some one person of the store force should have charge of the property room and see that everything is kept clean and properly cared for when it is not in use. Colored papers and cloths for drapings should be wrapped and put in boxes, Christmas decorations stored and labelled so that they can be found when wanted, patriotic trimmings in a section by themselves. In this way there will be a continually increasing accumulation of window dressing supplies which can be used in endless variety.

Background Important

The window background is of equal importance with the arrangement of the floor. The background should not be so high as to cut off the view of the store within, nor to shut out light from the street. It cannot be eliminated altogether or the display will look vague and without beginning or end. Probably a background of three feet will give the most general satisfaction. Sometimes this will need to be built up higher for special displays, but rarely should it be lower. The background can be of oak panelling to match a polished hardwood base, wall boards, a curtain of some soft, neutral color on a rod, or any other preferred arrangement.

Make Goods Stand Out

The illumination should be such that the goods within the window are thrown into relief. Too often the light in the

The illustration shows a combination display either one of which carries a seasonable appeal. An attractively dressed window of paints, varnishes and brushes is especially timely just now and will boost sales in those lines. Note in the above display the appeal not only to the property owner but also the man who owns an auto.

store window dazzles the eye of the beholder, in place of being thrown directly upon the goods themselves. The light, however, should never be so bright as to be objectionable. A soft, clear glow is always better than a dazzle. The height, shape and location of the window will all govern its method of illumination.

Some General Rules

As for the dressing of the hardware window itself, it is impossible to lay down more than general rules.

1. The display should be seasonable.
2. It should be of a few closely related articles.
3. It should never confuse by a large showing of many things.
4. It should be changed at least once a week.
5. It should be planned for in advance at least six weeks.
6. The window should never be given to any concern for their use without reasonable compensation. It is the most valuable part of the store from a selling standpoint.

Keep Up to Date

7. The window should never give place for one hour to a program or announcement card which is out of date. It gives the bystander a very bad impression
8. Have a regular time for dressing the window.
9. Make some one person responsible for the doing of it and have him submit his plans to the proprietor for approval before the work is begun.
10. Co-relate the window display and the newspaper advertising.
11. Goods which are marked with a price bring more business than those without the price.
12. Moving features operated by clock work or some other device very often attract trade.
13. No matter how beautiful a window may be it is not successful unless it sells goods.

Have Point of Contact

14. Objects may be used to attract attention, such as war souvenirs, etc., but they must have a point of contact with the articles displayed.
15. Keep track of the amount of goods sold of each kind displayed in the window while they are shown. This will give valuable selling hints as well.
16. Be sure to observe special holidays in the window trim. It marks a store as up-to-date.
17. Do not be satisfied with just "setting" things in the window. Arrange them so they will tell a story.
18. Study trade publications and other live windows for suggestions.
19. In dressing a window, put in goods just a little in advance of the season—but not too far.

You will be surprised how often people will come in in a month, six months, or or even long after, and say: "I saw such and such things in your windows a little while ago," not realizing just when it was. There is no doubt that well-dressed windows make lasting impressions of high selling value.

Study Your Windows

The window should be spotlessly clean and re-dressed at least once a week. Study your own windows with the idea of making the most of them. Sometimes a very little ingenuity will put a window all to the good.

There was an Eastern dealer whose hardware window was high, rather narrow and staring in appearance. He concentrated on the problem, and this is what he did.

He had a broad band of rich crimson two feet and a half deep, painted right across the top of that window. There was a gold band at either edge, outlined with black. On the red were the letters in gold and white "—— For Hardware." It showed up about ten times as well as his weather-beaten sign over the door, and really put his store on the map. You couldn't look up or down the street without seeing it first. It just demanded attention. Besides that, it lowered his window and gave it much better proportions.

Seeing how well this plan succeeded a hardware merchant in a nearby city lowered his own windows with a border of prism glass in leaded frames. The effect was very rich and the prism glass lighted up beautifully at night.

WANT EARLY CLOSING

The hardware dealers in Ottawa have petitioned the Board of Control to pass the necessary by-law closing all hardware stores in the city at seven o'clock every day in the week, including Saturday. The petition being signed by a sufficient number of dealers, the board will agree to go ahead with the necessary legal requirements.

Current Events in Photographs

SIR DAVID BEATTY IS NOW OUT OF WORK

It must seem rather strange for Admiral Beatty, after nearly five years of ceaseless night and day patrolling of the Atlantic to find himself out of a job. In the photo he is shown entering St. George's Hall at Liverpool with the Lord Mayor who presented him with the freedom of the city. The trim, natty uniform of the great leader of the Navy makes rather a striking contrast with that of the Lord Mayor.

A GOOD PLACE TO "REST UP"

A simple, bare room, this used to be. Now, with a few chairs and tables in it, and curtained windows, it makes a cozy club room where the men can come to eat their lunches, smoke, and have a game or two.

MAKING BORROWED IDEAS WORK

MY MERCHANDISING JOB TO-DAY

Take a Plan From a Manufacturer, Another From a Wholesaler; Combine Them and Make Them Yield a Profit in Retail Business —That Gives an Idea of How This Concern's Policy Works Out —A Number of the Plans, and the Results They Bring, Are Described Here by the Merchant Who Uses Them

By WALLACE J. STEBBINS
OF THE STEBBINS HARDWARE COMPANY

(Reproduced by courtesy of "System")

MY biggest job is carrying a notebook. At least, that is the part of my work that yields the biggest share of profits.

Into the notebook go all the good plans that I encounter. The only test that I apply before I write them down is: "Can we use it in our business?"

My brother keeps a similar notebook. And out of the two comes the grist of ideas which make our business progressively profitable.

We believe thoroughly in the value of the other fellow's idea. We seize every workable plan that comes our way; we never let go of it until we can supplant it with a better.

Unusual Conditions

In the next few months we expect to meet unusual conditions, and to overcome them—with the aid of our notebooks full of ideas. If you were to ask me what is my merchandising job to-day, I would answer: "Meeting the difficulties by the aid of the other man's ideas."

We do not always use the plan just as we find it; 9 times out of 10 we have to change it to suit our particular requirements. Often we combine outside ideas, change them a little, and evolve a result that pays us better than the original idea paid its originator. It does not follow that we have any special ingenuity; give nearly any business man something to start on and he can improve it, I believe. The out-of-the-ordinary part of our method is not that we improve the ideas, but that we deliberately accumulate them.

Rack for Mowers

Take, for instance, a comparatively small plan which we use in our business, a rack for lawn mowers. The floor space that a stock of lawn mowers requires for display in the average hardware store is out of all proportion to the sales and profits. Most merchants in our line of business realize this fact.

Several years ago there appeared in a trade paper a diagram of a wooden lawn-mower rack which had a good many advantages over the usual method of leaving on the floor. But the rack had a good many disadvantages; so we stowed the clipping away and waited.

A year or so after that I was on a hunt for ideas when I encountered an entirely different type of wooden lawn-mower rack in a Minnesota store. This too had its drawbacks.

Worked it Out

Off and on I gave a lot of study to the question of handling lawn-mowers during the next few months. Then one day I called in my assistant and gave him instructions to work out a rack that would serve our purpose. Pretty soon he had laid out plans for a rack that eliminated the flaws of the other two, and combined their good points; and for good measure it accommodates our weather strip stock. In the winter months the whole rack is given over to weather strips; in the spring these are pushed over to one side, a few more joints of pipe are screwed in,

and the rack displays 15 lawn-mowers as well as the weather-strips. That's what I mean by adopting the other fellow's ideas to your own needs and improving them.

Makes Many Notes

I mentioned that I saw the second type of rack while I was on a hunt for ideas. Perhaps that requires a word of explanation. My brother and I take frequent out-of-town trips, armed with a pencil, a carpenter's rule, and our old standby, a notebook. In the notebook we have already written down questions that we want to get answered. In it, as we visit other stores, go the answers; we make sketches of stockkeeping methods; we preserve small slips and price tags for future use by pasting them in; we accumulate dozens of good forms.

By the time we get back home we have more money-making plans than we can put to work in years. But that does not deter us from going in search of others in a few months. We usually get hold on each trip of at least one method that we instal at once and that one idea generally makes enough money for us in six months' use to pay for a dozen trips.

Can be Put to Work

We decided several years ago that we wanted to know how many customers one salesman should handle in a day. So we wrote to a number of concerns in our line of business and put the question down in our notebook for investigation on the next trip.

Some of the concerns we wrote to had never thought of keeping track of that point. But they started in right away and in a month or so supplied us with their figures; others answered at once. And about a week later my brother made a short trip.

Our collected figures showed that the salesmen of one concern were averaging 225 sales a day; another store was getting only 75; our figure of 125 seemed just about the average.

But we are not content to remain at the average figure in any branch of our business. We are constantly aiming for the best mark attainable—and these figures had just shown us that our facilities for serving customers quickly were not all they should be.

Not Completed

The results of that investigation are not yet completed. We are still improving our methods of display, re-arranging our stock, working out plans to save the salesman time. But right now in some of our departments each salesman makes sales to more than 225 customers every day; in others we have not been able, so far, to increase the figure beyond 175. But our average is close to 200, an increase of 60 per cent. that we can trace directly to our business habit of getting the other man's idea and putting it to work.

We accomplished this by making our sample displays easier to get at, and the stock more accessible. We have different methods in different departments.

Build the Futures

We build most of our unusual fixtures and devices in a little workroom that is tucked away in a corner of our third floor. Two men have the task of working out our new methods there. They will build, for instance, a new set of drawers to hold our padlocks. When the set is completed they tear out the old shelving and build in the new—while the store is closed, if possible. Thus when the salesmen of the department leave at 6 o'clock their stock is arranged by the old plan. When they return next morning at 8 it is in the new drawers, ready to sell.

Our store is constantly being remodeled, a little here and a little there. We are never satisfied with everything as it stands. We get used to a new method of sampling key-blanks, for instance. Then in perhaps two years we learn of another plan so much better than the one we are using that we have to substitute it, or else forgo a profit. Result? Out comes the old fixtures, in go the new. And by that time we have a plan for reorganizing the cutlery repair department.

Not all our plans require rebuilding or remodeling of the store, however. Often we change other parts of our business.

An Idea Brought In

Last summer I happened to pass through a city in the summer resort region of Michigan. From force of habit I called on the leading hardware merchant there. And from a few minutes' talk with him in his store I got a good idea for our business. It was just at time when Government supervision was beginning to direct all steel into essential channels. Hardware dealers were required to show that every pound of steel they sold was going into essential work. We had as yet not worked out a plan to supply us with information on which we could base this guarantee.

The Michigan merchant, however, had developed a pledge card which he made his customers sign before they obtained steel goods — a pledge that the goods which the customer bought at the time and all the goods that he might buy in the future would be used only in essential work. That card was exactly what we wanted.

Took it Bodily

We took it over bodily, and by the time the armistice was signed we had accumulated several thousand signed cards. The plan afforded us a definite proof that our goods were sold for essential use; if the customer violated his pledge no blame could attach to us.

A method that we have adopted within the last few weeks enables us to change our window display in about 20 minutes, except for the floor. If we change the floor trim it takes us about two hours. Perhaps what this means can best be explained by saying that one of our competitors has had his window empty for 10 days now; how much longer it will be before he has the job completed, I don't know. But I do know that he has lost several hundred dollars in sales if his windows are as valuable to him as ours are to us. We can sell six times as many of a given article at a fair profit by putting a sample in the window with a price-tag as we can sell at an actual loss by spending $100 in newspaper advertising.

THE MEN LEARN TO SELL HERE
New men start their selling behind this "kindergarten" counter, as Mr. Stebbens calls it. It quickly proves whether they "have the makings."

THE "NEW METHODS" WORKROOM
In this workshop two men are all the time building unusual fixtures and display devices, thus materializing in wood and metal the ideas that Mr. Stebbens and his brother borrow from other concerns.

HE HAD TO "HUNT AND ASK," FORMERLY—
The display cases shown here, used at one time by Mr. Stebbins, were time-consumers, as the salesman had to rummage through several drawers before he found what the customer wanted.

—BUT NOW IT'S IN PLAIN SIGHT
The same goods are now displayed this way. The customer selects from a sample board. The salesman instantly finds the stock in a numbered drawer right behind the board.

Change Quickly

We got from a Cincinnati merchant, who has back of his window made up in steps, the idea which enables us to change our window-trim so quickly. He dresses an extra set of steps, then tears out his previous window trim and substitutes the new one for it. The job takes about a day, and he loses the display value of the window for that length of time.

We have worked out a method of panels made up with a fine wire screen stretched on a frame. On this we fasten the velvet and then fasten the goods on the velvet by sewing it with fish line so that the netting supports the weight. The panels are interchangeable. Consequently we take out one panel and slip in the new display in about two minutes. Then we substitute the next panel, and the next. Our window is trimmed all the while; and in 20 minutes the whole display is changed.

The instances I have cited of borrowed ideas may tend to give the impression that we adopt only the methods of other hardware dealers. Not at all. A good many of our best plans have come from concerns in lines of business entirely different from our own, and some of these plans, so far as I know, have never been used in another hardware store.

Empioyees' Club

Take our employees' club, for example. For some time my brother and I had been wondering whether we might not work out a plan by which our men—there are only 50 of them—could have a club like the employees' clubs of some big corporations; and we mentally specified that we did not want a club just for the sake of having one but for the good of it. Finally we helped a few leaders among the men to organize a club, in the face of opposition from some of the other men.

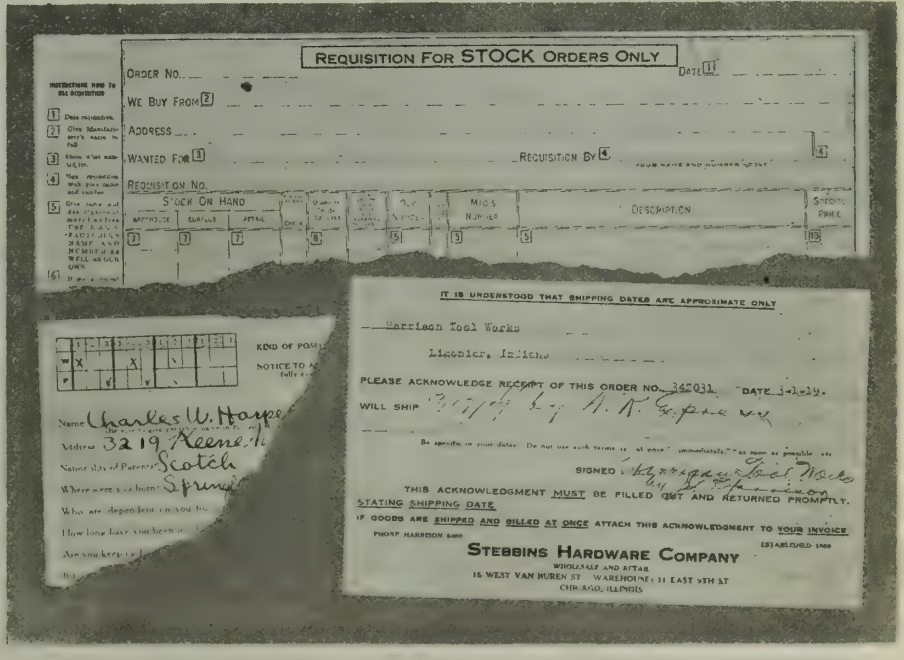
We have no space in our store for club meetings or anything not immediately concerned with the sale of hardware. So crowded are we, in fact, that our men had never had a place where they could eat the lunches they carried from home.

We turned over to the club a good-sized room which we rented in an office building nearby. Then we furnished it with a few folding chairs and a table or two. Within a day the men started eating their lunches there. Then they decided that a small gas stove would increase their comfort because it would enable them to have coffee with their lunches.

Fixed it Up

Pretty soon they built shelves in the coat locker and filled them with china and glassware enough to serve 50 people.

They bought curtains for the windows and carpets for the floor. They purchased table covers and checkerboards. They added a good-sized sum to a Christmas gift the firm made the club and bought a few big leather chairs. They have kept improving the club-room out of the dues of less than a cent and a half a day from each of 43 men.



The club has a dinner once a month; two of the men from the store slip over to the room about 4.30 in the afternoon and get the meal. They all sit down to the table as soon as the store closes. After dinner a few of the men wash the dishes, while the rest of them play cards and checkers, and smoke.

Only the Rent

The cost of the club to the firm is merely the rent of the room. The only rule we have made is that no gambling shall take place there. We leave to the men the enforcement of the single rule and are satisfied to leave to them the making of all other regulations. They make them, too; and one or two violators have been given good stiff, disciplinary treatment by the club officers.

Does the club pay us? I asked one of the men the other day how the other fellows felt about the club. "W. J.," he

EDITORIAL COMMENT

ONE of these fine mornings the world will awaken to read that a new feat has been accomplished and that a successful air flight has been made across the Atlantic.

* * *

THE successful business man facing a doubtful situation in general conditions sees all the more reason to hustle. He pushes harder for business and usually gets all he can handle.

* * *

CROP CONDITIONS GOOD

REPORTS from all parts of the country indicate that the wheat acreage this year will be very large. The unusual weather conditions have resulted in the winter wheat being in better shape now than for many seasons past. In many places in former years, as a result of heavy frosts and other climatic conditions, there had been a great deal of deterioration. This year the average condition of the crops up to the present time shows up most satisfactorily. All this means that there is likely to be a big demand for binder twine. From the West come reports that indicate heavy buying of farming implements and machinery in anticipation of handling big crops.

THE BUSINESS SITUATION

IT is important, in judging trade conditions to keep in mind the fact that the reduction in our business activity has been from a peak that, until the climax of the war, had never been attained. Relatively to the latter part of the war period, business is indeed being conducted on a restricted scale. Relatively to any other period, however, it is being conducted on a large scale, and though readjustment, with its great mass of conflicting elements, is in progress, we have evidence of a far more sane and orderly adjustment of affairs than many had hoped for.

From the angle of the money market, the demand for commercial funds has grown sufficiently less urgent, since the early part of the year, to bring about an easing of rates. General business throughout the country is sound and well sustained, and despite continued readjustment, it ought to be even better sustained when the present waiting attitude is abandoned by those people who think that prices of material and labor are higher than warranted, and are about to drop far down.

TAKING THE DISCOUNT

LOOKING at it in one way, two per cent. does not seem to be a matter of great consequence to the merchant, yet a cash discount taken on every available occasion will, in a year's business, amount to a very considerable sum and will prove a very comfortable nest egg to use in furthering the business. But this is not all. The merchant who takes his discounts regularly achieves a position with those he deals with that in itself is a valuable asset. To the wholesalers' credit man, the merchant who takes his discounts regularly stands out as a preferred risk. He shows himself alive to every opportunity, an aggressive, far-seeing, careful business man. This is a reputation that is worth earning. These are points worth pondering and to give added food for thought. Here is a table taken from the "Credit Men's Bulletin" that demonstrates very forcibly the actual money value of a habit of paying cash when applied to the year's purchases:

1%	ten days, net thirty days	18%
2%	ten days, net thirty days	36%
3%	ten days, net thirty days	54%
3%	spot cash, net thirty days	36%
5%	ten days, net thirty days	90%
6%	ten days, net thirty days	108%
8%	ten days, net thirty days	142%
2%	ten days, net sixty days	144%
3%	ten days, net sixty days	216%
2%	thirty days, net sixty days	24%
5%	thirty days, net four months	20%
3%	thirty days, net sixty days	36%

REMOVING EYESORES

THE council at Glencoe, Ont., has just passed a by-law which hardware dealers in many parts of the Dominion might urge their civic fathers to adopt, not only in the interests of business but of town improvement and reduction of fire hazard. In Glencoe there are some old buildings which not only detract from the appearance of the town but are in such a condition as to be unsafe, it is stated, and

a constant danger from fire and risk of accident. The council deeming it advisable in every way that these should be removed has passed a by-law giving itself power to "pull down or repair at the expense of the owner or owners thereof, any building, fence or structure, which, by reason of its ruinous or dilapidated condition, faulty structure or otherwise, is in an unsafe condition as regards danger from fire or risk of accident." The by-law is not only passed but it is to be strictly enforced, and it is expected that material benefit to adjoining properties will result, besides perhaps reducing insurance rates. There are hundreds, perhaps thousands of these old buildings in the various towns and villages of Canada. Many of them are too far gone to do anything with but tear down, but unless the councils take action such as was taken at Glencoe, the structures will remain until they either fall down or burn.

MUST MAINTAIN QUALITY

ADVERTISING a poor article is bad business at any time. People who are led to believe that they are getting something worth while in responding to an advertisement and then find out they have been fooled are not only disappointed but tell their experience to numerous friends. The public has learned that in the great majority of instances advertising is a protection to the buyer against inferior quality. When a firm advertises it calls sharp attention to the good points of its product, so that people who use what the advertiser sells are alert. They look out for and expect the advantages described in the advertising. The goods have to live up to the description, for if they fail to do so, the advertising will hurt more than help.

ARRANGING SETTLEMENTS

MAY Day is likely to see a great deal less trouble in the industrial world than many thought possible two weeks ago. Not for a long time had there been so many threats of strikes and demands upon employers. Many of these have been amicably arranged in the past few days, and others are in the process of adjustment that leaves room for every hope that strikes will be averted. From the standpoint of many retailers the settlement of the trouble between one of the express companies and its employees is especially gratifying. Hardware men and other merchants who had to depend largely upon this one line were seriously inconvenienced when the service was discontinued. The settlement of threatened troubles in the building trades in many parts of the Dominion is expected, and it is hoped that this may help in stimulating construction work. There is a lot of good business in these lines in sight but some of it has been held up until those who planned work are satisfied that if they start they will be able to finish.

WHAT OTHER EDITORS SAY

WHILE great care must be employed not to demoralize the labor situation, with all the dangers that would follow, still we believe the business situation is so sound, and so much enterprise and production work is waiting only for a chance to start on a sound and safe price basis, that if the price situation was allowed to take care of itself, and buyers knew that no artificial control was being exerted, prices would soon adjust themselves to actual conditions, and business would steadily increase in volume. Neither would the freedom of negotiation between buyer and seller lead to any severe declines, nor would labor be affected except favorably by increased employment. What we need is consumption, and it is knocking at the door eager to be taken care of. If prices are left to their natural course, as governed by cost, supply and demand, and Government efforts limited to the placing of generous orders for its requirements in an open market at the best prices obtainable, we predict that with very little temporary unsettlement the trade of the country would become very active, and in cases where values are below costs advances would follow. The demand for labor would be increased and the wages paid would be commensurate with the cost of living, and the improved position that the worker is to enjoy in the future.—"Steel and Metal Digest."

* * *

MORE than six months ago the City Hall decided to appoint a commission to provide more housing. At the time, Finance Commissioner Bradshaw stated that the commission would be appointed at once so that it would have its plans all ready to commence building in the spring. Spring is here and the commission, while tentatively named, has not been appointed, and the chances of a big building programme under civic auspices getting under way during the summer are becoming slim.

The city is faced with no more urgent problem at this time than the provision of houses for its citizens. At least five thousand more houses are needed for the population now in the city, and two to three thousand more will be required for the multitude of soldiers and their dependents who will arrive during the next three months. —Toronto "Star."

* * *

ADVERTISING is an evidence of community loyalty as well as good business.

Advertising will do more than build your business. It will build your community.

It will encourage the people in your community to buy at home more.

It will counteract the effect of outside advertising and keep so much more money in the district.

And your community, after all, is only the aggregation of yourself and the rest of us.

Advertising to-day is, therefore, the business and the patriotic duty of the business men in this community.

And the logical medium is your home paper, as it reaches every buyer in the whole district.—"The Commoner," Armstrong, B.C.

* * *

THE public is now floundering in a welter of opinion as to what is for the good of the country, whether a shake-out in values that will furnish a basis upon which market activity can develop, or the sustaining of prices until business is ready to go ahead on such prices. Is it for the good of the country that prices should be maintained or that they should be reduced? Rarely is the question put so baldly, yet nearly all discussion of economic conditions and business prospects revolves around this question even though it does not face it. It would be good if men would address themselves squarely to this question.—"The American Metal Market."

EVENTS IN THE TRADE

Business Changes

Rathwell, Sask.—W. L. Dawkins succeeds W. A. Caswell, hardware.

Lachine, Que.—J. A. Denault is negotiating sale to the LaSalle Hardware Co.

Shelburne, Ont.—J. A. Crawford has purchased the hardware business of D. F. Smith.

Beatty, Sask.—The Dafoe Hagglund Hardware and Supply Co. has purchased the business of A. C. Gerow.

Lougheed, Alta.—Messrs. Shouse & Newberry have purchased the Lougheed Hardware Co. from Messrs. Moss & Bullock.

Ayton, Ont.—T. N. Meyer & Son have dissolved partnership, T. N. Meyer taking over the business at Neustadt, Ont., and J. E. Meyer, the branch at Ayton.

New Firms

J. G. Tweddle, who recently purchased the hardware business of A. E. Nichols, at Fergus, Ont., is re-opening this week, having completed stocktaking.

Fire Losses

The premises of C. J. Wyers, hardware, Brandon, Man., were damaged by fire.

The mop factory of J. H. Hammond, at South Stukely, Quebec, was damaged by fire.

A loss of several thousand dollars was caused by fire and water in the premises of the Canadian Pneumatic Tool Co., Ltd., 345 Craig St., Montreal.

Obituary

The death occurred at Mount Dennis, Ont., of N. O. Ramsden, hardware.

The death occurred at New Liskeard, Ont., of Robert Gibson, for many years a member of the staff of the Taylor Hardware Co., at Cobalt, Ont.

John Lennox, aged 60, head of the firm of John Lennox & Co., Hamilton, Ont., trunks and leather goods was drowned on Wednesday at his summer home at the Beach, near Hamilton.

Personals

D. A. Macnab, of Orillia, Ont., was in Toronto on business during the week.

Armand Rivet has accepted a position with Fortier & Beauchesne, hardware and furniture, Sturgeon Falls, Ont.

Philip Lanthier hes resumed the position he held before going overseas as clerk in the Cochrane Hardware, Ltd., Sudbury, Ont.

Albert Michaud, of Adam & Michaud, Sudbury, has joined the firm of Michaud & Levesque, Sturgeon Falls, where he is employed in the hardware department.

E. V. A. Kennedy, of the Imperial Oil Co staff at Sarnia, Ont., has been aupoited treasurer. N. C. Copeman of the costs department is being transferred to Toronto.

Wilbert Lendon, son of H. Lendon, Leamington, Ont. has returned after serving for three years overseas with the Transport Corps.

Frederick Moore, general manager, Benjamin Moore & Co., West Toronto, left on Wednesday night for New York on a business trip.

E. F. Hibberd, general purchasing agent, Brandram-Henderson Ltd., Montreal, was in Toronto Wednesday and Thursday of this week on special business.

J. F. Sutherland, of St. Thomas, Ont., who enlisted in the 1st machine gun corps, and saw nearly four year service in France, is resuming his position with the George A. McMurtry Co.

Major Phillip Walker, of Walker's, Ltd., Winnipeg, has returned after being in France since 1914, and is now back at work.

Chas. R. Thompson, of the sales department of C. C. Craig Co., Winnipeg, has returned from Saskatoon, calling at the principal towns on his way back to Winnipeg.

F. A. Healey, a buyer in the hardware department of Revillon Freres, Edmonton, has left for Vancouver, where he has a position with the Pacific Roofing Company.

Prior to his departure from Sarnia, Ont., J. H. Archbold was the guest of honor at a banquet tendered him by the heads of the various departments of the Imperial Oil Co., and was presented with a handsome diamond stickpin. Mr. Archbold, who was assistant treasurer at the Sarnia offices, will be assistant auditor at the head office in Toronto.

Trade Notes

Trudeau and Lemay Foundry, Acton Vale, Quebec, have dissolved.

The Kelly Hardware Co., Ltd., has closed its business at Brandon, Manitoba.

S. B. Andrews, tinsmith, Minnedosa, Manitoba, has added a hardware stock to his other lines.

The plant of the Empire Paper Products Co., of Sombra, Ont., is being moved to Sarnia, Ont.

Wm. A. Dubuc has registered partnership in the W. A. Dubuc Hardware Co. at Fort Saskatchewan, Alberta.

G. T. Clarkson has been appointed interim liquidator of the Alloy Steel Works Ltd., Toronto, manufacturers of castings.

The Wilson Auto Specialties Co., formerly 20 John St. S., Hamilton, Ont., have moved their wholesale department to 17-19 Main St. East.

The Hampel Paper Box Co., of Brantford, Ont., has leased premises and will open a branch factory at Woodstock, Ont.

Canada Doors and Trim, Ltd., a new concern, has taken over the business of the Knight Bros. Mfg. Co., at Meaford, Ont. J. A. Sinclair, formerly with Seaman Kent Co., is manager.

Electrical Sales Engineers, Inc., and Koch & Sandidge, of Chicago, have been succeeded by Paul W. Koch & Co., 19 South Wells Street.

T. B. Chalk and J. R. Kennedy have leased the Barrett milling property at Port Hope, Ont., and will commence the manufacture of veneer.

George C. Kaitting, of Galt, Ont., has purchased the McKay Carding mill property at Galt, and will convert it into a factory for the manufacture of washing machines.

Speaking of business conditions, the John Stevens Co., Ltd., wholesale plumbing supplies, Winnipeg, stated that there had been a decided improvement shown during the past week, and if the same improvement continued for a month, business would be about normal again.

Montreal News

The M. Philbin Hardware Co., Montreal, is opening a branch store on Bleury Street.

Herman Croxall, of the National Hardware Co., Orillia, was in Montreal recently.

Mr. Richardson, of the Canadian Warren Axe and Tool Co., was in Montreal territory this week.

John A. Frazer, sales manager of Lewis Bros., Limited, Montreal, was in Ottawa this week.

The Bissell Carpet Sweeper Co. of Grand Rapids, was represented in Montreal recently by Chas. Bass.

G. R. Muzzy, representative for the Bemis and Call Hardware and Tool Company, was in Montreal this week.

Alfred Goyette, retail hardware dealer, Ontario Street, is opening a branch on St. Denis Street.

Jesse H. Stanton, of the Turner and Stanton Co., Norwich, Conn., makers of wire specialty goods, was in Montreal recently.

Winnipeg Notes

W. T. Parker, proprietor of the Wood Hardware Co., Regina, is in the city this week. He reports business in Regina is brisk in all seasonable lines, and is looking for a big year's business.

A. L. Fitzgerald, sales manager for Merrick-Anderson Co., has left for the West on a short business trip.

H. C. McIntyre, manager of the J. H. Ashdown Co's wholesale plumbing department, will leave shortly for a trip through the West, calling at the larger centres in Manitoba and Saskatchewan.

Maritime Notes

Alexander Fraser, sr., who for many years conducted a general store in Rexton, N.B., is dead at the age of eighty-seven years.

S. E. Elkin, M.P., managing director of the Maritime Nail Works, Ltd., St. John, was added to the directorate of the Nova Scotia Underwear Co., at the annual meeting held in Windsor, N.S.

The Rogers Hardware Co., of Charlottetown, P.E.I., has purchased a site and will erect a building, which will enable the firm to enlarge its stock of their present lines and add building hardware and farm machinerey.

The Maritime Foundry Co., Ltd., head office Chatham, N.B., and capital stock $45,000, has been incorporated on petition of A. S. Creighton and H. A. Powell, of St. John, and Chas. O. Morris, of Lancaster.

The newly-organized Retail Merchants' Association of Digby, N.S., has arranged for the observance of Thursday afternoon as a weekly half-holiday from May until September 30.

Incorporations

The Durham Flax Co., Ltd., head office Bowmanville, Ont., capital $40,000; plans to manufacture and deal in hemp, flax, twine and yarn.

Toronto Veneer Co., Ltd., head office Toronto, capital $100,000; plans to manufacture and deal in foreign and domestic veneers.

W. A. Burt, Ltd., capital $40.000, head office, Toronto; plans to manufacture and deal in batteries, battery lamps, battery supplies, auto accessories and motor supplies.

The J. C. Wilson Mfg. Co., Ltd., capital $200,000, head office Belleville, Ont.; plans to manufacture metal casings and carry on a general foundry business.

Perth Flax & Fibre Co., Ltd., capital $40,000, head office Stratford, Ont.; plans to deal in flax products.

Fauver Music Co., Ltd., head office Toronto, capital $40.000; plans to manufacture phonographs and musical instruments.

C. & W. Dolls & Pottery, Ltd., capital $50,000, head office Toronto; plans to manufacture and deal in dolls' heads, dolls and pottery.

Premier Retread Co., Ltd., capital $25,000, head office Toronto; plans to manufacture and deal in tires for autos, motorcycles and bicycles.

Sees High Prices for Some Time to Come; The Outlook in Great Britain

T. B. WILLIAMSON

Buyer, H. S. Howland Sons & Co., Ltd., Toronto, who has just returned from a trip to the Old Country.

T. B. WILLIAMSON, buyer, H. S. Howland, Sons & Co., Toronto, returned on Saturday last from a trip to the Old Country extending over several weeks.

While in Great Britain, Mr. Williamson took the opportunity of calling on many manufacturers and finds that readjustments to a peace basis, while coming around slowly, are coming surely.

"The outlook seems just a little uncertain," Mr. Williamson stated to HARDWARE AND METAL. "Manufacturers using steel are securing supplies in slightly increasing quantities from the Government, and in this respect are hopeful, but the element of greatest doubt to them now is that of labor. The demands being made are enormously high, and there seems no way out."

"Were a manufacturer to release one man to take on another at a lower figure, that would mean an immediate walk-out," Mr. Williamson continued. "There is also not one manufacturer who would take on a returned soldier at a wage less than that paid to men already employed, in spite of the fact that the soldier's producing power might be much less for some months, or perhaps a couple of years. These are elements which I believe are going to result in continued high prices, and, in many lines, increased prices for a very long time to come."

Mr. Williamson stated that when he was in England the situation looked pretty dark. Labor troubles were pronounced, and, owing to demobilization proceeding slower than some wished, there was a tendency to be restless under the delay; materials were not easy to get. "However, in going over the situation on my return on the boat, I couldn't get away from the fact that Great Britain invariably comes out on top. Their troubles are many, but that other countries will experience the same conditions with respect to labor is undoubtedly true. The manufacturers in Canada are getting a big export business now and watching their opportunities closely for a greater expansion in this connection, but it is true also that labor here is watching the situation in Great Britain and may be expected to institute demands that will be in line with their brothers overseas. In view of this, I am convinced that Great Britain is going through her worst period now, and that here, and in the United States, labor demands will be equally insistent and productive of higher wages. That means high prices for manufactured goods, and whereas there have been some revisions downward, and may be more, it seems quite evident some lines may react to higher levels again."

Offers Congratulations On Early Closing Move

It is not very often that a retail firm will devote its entire advertising space to a eulogy of a move adopted by other retailers, especially when the advertising space is three columns wide and eleven inches deep. In London, Ont., however, the drygoods firm of Smallman & Ingram recently gave its entire space to the following message:

CONGRATULATIONS

To Our Hardware Merchants

The announcement from the hardware merchants of London that they will in future close their respective places of business at 6 o'clock on Saturdays is too important a move to pass unnoticed by this store. We are pleased to have this opportunity to extend our congratulations to each and every hardware merchant in this city, at the same time feeling confident that every citizen of London will join with us in this and loyally support and commend you for the stand you have taken for shorter hours, bettering conditions both for for your employees and customers.

Hoping that your example will be quickly followed by all other branches of the retail trade, and that London will lead the way for shorter hours and better service.

We Congratulate You

Smallman & Ingram, some time ago in the face of all sorts of predictions as to what would happen, adopted an early closing policy, and it is stated that it has worked out most satisfactorily in every way.

Boosts Sales of Leather Goods by Monthly Window Displays

"IT is something that a hardware store does not usually carry. We have had the department here for two years now, and it has gone ahead by leaps and bounds," said the window dresser of the Ashdown Hardware Co., at Calgary, when a representative of HARDWARE AND METAL stepped in to compliment him on a fine window display of leather goods.

"I use the window every month for bags and leather goods, and we find the results very gratifying, as there is a difference at once in the sales. Of course, there is always a steady demand, but by drawing the attention of the public every month by means of an advertisement in the papers, backed by the window, people do not forget that we handle this line. The plan we follow is to put on a few lines at a special price, and that draws the trade in. It is, of course, up to the salesman after that. If the article the customer has seen in the window does not suit him, we can generally manage to sell him another line.

"Leather still remains very high, although the prices are guaranteed not to go down, and they may go up. However, that seems to make little difference. If a man needs a kit bag, he will pay the price asked."

Ashdown's keep their bag and trunk department on the top floor, but they take good care to see that it is brought regularly to the front by means of the store window, the great silent salesman of the mercantile world.

Says Cutlery Stocks In West Not Heavy

C. C. Craig has just returned to Winnipeg after a long trip through Western Canada. When seen by a representative of HARDWARE AND METAL he stated that it looked as though stocks of cutlery in Western Canada are not heavy, but that dealers, both retail and wholesale, have been holding off from buying, expecting deliveries would soon start from England, but so far indications of shipments to amount to anything from England had not been very marked, so that buying would soon have to begin with a rush.

Mr. Craig noticed that the holding off had been especially true in the case of pocket knives, but not so much in the case of razors, supplies of which have been coming from the United States, and have been very satisfactory.

A CHANGE AT JOHN WATSON'S

J. P. Ritchie, who has been assistant manager for the John Watson Manufacturing Co., Ltd., Winnipeg, for some years, is now in charge of that business. E. S. Strachan has severed his connection with that company, and is now manager of the Swedish Separator Co., in Western Canada. Mr. Ritchie states that the John Watson Co. are gradually working themselves out of a number of the lines which they have been handling in Western Canada, and will confine themselves more or less to their own lines in future.

JAMES McLARTY BACK

James McLarty, of Cunningham & McLarty, Macleod, Alta., called on the hardware trade while in Winnipeg enroute to his home, after being overseas for the past three years. Mr. McLarty was in the thick of the fight with the Princess Pats, but did not even get a scratch.

Mr. McLarty is well known in Manitoba, having been in the retail business in Killarney and at Homefield. Prior to going into business for himself, he was connected with the J. H. Ashdown retail store at Calgary, also with Marshall-Mitchell Hardware Co., Medicine Hat.

WILL MANAGE ACCESSORY DEPARTMENT

The J. H. Ashdown Hardware Co., Ltd., have appointed H. W. Bland manager for their automobile accessory department in their retail store on Main Street. He has been for the past two years in Ashdown's wholesale accessory department. For over four years Mr. Bland was with Michael Ert Co., Ltd., Winnipeg.

SEES BUSINESS IMPROVEMENT

E. P. Plewes, head of Plewes, Ltd., of Winnipeg, speaking to a representative of HARDWARE AND METAL, stated that he expected that business, which had been very quiet during the last few months, would come in a big rush. He stated that he found on other lines, which are now seasonable, that the sorting orders were never as large as they are at the present time, and he predicted that the same thing would happen with hardware.

ENTERTAIN MALE STAFF

Brandram-Henderson Ltd., Toronto, were the guests at a dinner tendered to the male employees of the company on Tuesday night of this week at the Carls-Rite Hotel. The dinner was held in the blue room of the hotel and the entire male staff from the office, manufacturing, shipping and stock departments was in attendance. After a splendid dinner the evening was filled in by interesting talks by the management and heads of the various departments.

MOVE TO NEW QUARTERS

The Ontario Oil & Turpentine Co. have moved to new quarters at 106-108 Vine Ave., West Toronto. The building is of steel and concrete construction and furnishes the company with what it is indicated are very desirable and commodious quarters. The company have purchased the present building, and with trackage right at the door, are, it is stated, in a favorable position to handle the increased business now being done.

Clerks' Association Has Over 200 Members

The St. John Hardware Clerk's Association, of St. John, N.B., has been organized with a charter membership of more than 200. The object is the promotion of social relations between clerks and better relations between employers and employees. Women clerks are included among the members. The officers are: president, Chas. O. Morris; vice-president, Harry D. Sullivan; secretary-treasurer, R. A. Willet, with a managing committee including one representative from each hardware establishment in the city.

The organization of a wholesale and retail clerks' association, taking in the various branches of trade in St. John, N.B., not otherwise organized, is progressing rapidly, and a committee is now at work on the constitution and by-laws. The association is open to women clerks as well as the men.

Retail store clerks of Glace Bay, N.S., have completed organization and have applied for a charter. Officers were elected as follows: president, B. H. Hill; vice-president, E. Hilton; treasurer, F. Wadden; secretary, A. Rideout; corresponding secretary, Miss A. McAdam. A committee of the new association is endeavoring to arrange for a general observance of Wednesday afternoon as a weekly half-holiday.

Favor Early Closing And Daylight Saving

Efforts of Secretary T. C. Ray, of the Border Cities' Retail Merchants' Association to ascertain the feeling of the members relative to the daylight saving and early closing indicate a decided majority in favor of the scheme. Postal cards were sent to every member of the organization, and of the 88 replies received, all but ten favored adoption of a general early closing.

OUTLOOK FOR LENSES

H. W. Bland, of J. H. Ashdown Hardware Co., Ltd., Winnipeg, discussing the future for no-glare lenses, stated that it all depended on what the Province of Manitoba did this summer. Last year the Government announced a no-glare law, and went to considerable expense in getting experts to find out which lenses complied with the law. As a result there was an unprecedented demand for lenses, and all the wholesale houses and retail stores were swamped with orders. If the law is in force again this year then the same thing is likely to happen. At present, however, the lense business is almost dead, and many of the wholesale houses are well stocked with supplies.

Modern Advertising is Bringing the People to the Retailer

A C. McQUISTION, of Philadelphia, advertising manager of the Westinghouse Co., gave a very interesting address Tuesday evening before the members of the Hamilton Advertising Club after their closing banquet of the season on, "The Uplifting Influence of Modern Advertising."

He pointed out that the antiquated buckboard idea of introducing and selling goods was a thing of the past and that instead of dragging a sewing machine, a vacuum cleaner, or cream separator around the country on the back of a buckboard as in days gone by, modern advertising was bringing the people to the retailer in quest of the goods advertised, and modern advertising was uplifting, creating a desire for better living, better homes, and better conditions, brought about by modern appliances.

He emphasized strongly the advisability of the merchant linking up with national advertising campaigns and "cashing in" on the efforts of the manufacturer to create a desire for his goods. He used as an illustration the high voltage feed wires running from the large power plants at Niagara Falls. "They're no good, absolutely useless, no matter how much energy is behind them," he said, "unless they are tapped and the various localities supplied with energy to operate appliances and to obtain light."

His contention is that national advertising is the high-feed wire, and that unless the merchant tapped it and completed the circuit, the greatest good was not obtained from the advertising, and that the merchant was losing a real opportunity if he did not take advantage of the desire created by such advertising effort.

As an instance he mentioned the programme that the electrical firms in the States outlined. They got together and arranged that whatever else they did they would advertise and push the sales of electric ranges in the month of May; electric irons in June, and electric fans during July, and so on. Each firm kept these goods before the buying public these months, and they urged the retailers to do the same. They urged them to display these lines in their windows and on their counters and to keep them before the public through their salesmen and the medium of the local newspapers. In this way there was a complete circuit and the full benefit of the money spent in advertising would be reaped by all.

In concluding, Mr. McQuistion related the case of the hardware dealer who took advantage of the season to lower his cost of doing business. He could see that it wasn't paying him to conduct his business along the lines which he was pursuing. His two auto trucks were kept busy running around with little orders here and there and he figured his trade didn't warrant that expense so he went about making a change. First he went over his books and picked out a list of good paying customers and then wrote to each somewhat to this effect:

"Dear Sir,—You name appears on our books as a customer, and we are glad it is there and hope you will feel free to order any time such lines as you may require and have them charged to your account. Spring is here and you no doubt wish to have things as beautiful as possible around your home and garden so we taken this opportunity to call your attention to a number of lines which may be of interest to you and may remind you of your needs.

"Kindly check over this list and mark the goods you require and we will have them delivered to you subject to your approval." A fair list of goods were mentioned including garden tools, hoe, rake, shovel, trowel, etc., seeds, paint, brushes etc.

This hardware dealer claimed that the results were worth the effort for the orders came in, and were delivered all at once, thus saving the delivery of many small orders, and the one auto did the work formerly requiring the two.

This is a suggestion which could be worked out in any hardware store, large and small, and especially during the spring and fall seasons.

CHARLES B. SEGER IS NEW PRESIDENT

At the annual meeting of the Canadian Consolidated Rubber Company held in Montreal on Tuesday, a number of changes in the executive were made. Charles B. Seger, president of the United States Rubber Company, which controls the Canadian enterprise, was elected president, and Sir Mortimer Davis and J. B. Waddell were added to the board of directors. W. A. Eden and Victor E. Mitchell, K.C., were elected vice-presidents. As announced in a previous issue of HARDWARE AND METAL, T. H. Rieder, formerly president and general manaer of the company, retires from both offices to become associated with another important enterprise locally.

The board of directors is now composed of: Charles B. Seger, president; Sir Mortimer B. Davis, Colonel Samuel P. Colt, Victor E. Mitchell, K.C., E. W. Nesbitt, M.P., W. A. Eden, R. E. Jamieson, J. B. Waddell, R. C. Colt, A. D. Thornton, H. Wellein, and Homer E. Sawyer, J. N. Gunn, E. S. Williams and Ernest Hopkinson, vice-presidents of the United States Rubber Company. Walter Binmore was appointed secretary; H. P. Nellis, assistant secretary; Hugo Weilein, treasurer, and J. P. B. Daigneau, assistant treasurer.

The Canadian Sanitas Co., Ltd., head office Montreal, capital $100.000; plans to carry on the business of chemists and oil and color men, making paints, varnishes and cements, also electrical, chemical and photographic equipment.

Fork Ferrules

Erie Basket Co., Ltd., Leamington, Ont.—Could you tell us who manufactures ferrules for hay forks, rakes, etc?

These are made by Welland Vale Mfg. Co., St. Catharines; Maple Leaf Harvest Tool Co., Tillsonburg, and you might try the McKinnon Industries, Ltd., St. Catharines. Manufacturers in the U.S. are M. F. Cahill, Boston, Mass., and the Union Fork & Hoe Co., Columbus, O. —Ed.

Electric Vacuum Sweeper

Bonthron & Drysdale, Hensall, Ont.—Kindly let us know if any firm in Ontario is handling the Apex Electric Vacuum Sweeper.

The Ontario representatives are McDonald & Willson, Ltd., Toronto.—Ed.

Clay Birds

W. W. Cooper Co., Ltd., Swuft Current, Sask.—We would like to know who makes the silver bird or white bird for target shooting, or anyone making clay birds for target shooting in Canada.

As far as we can learn the bulk of clay birds come from the Chamberlain Cartridge & Target Co., Cleveland, O. Our records do not show where these are manufactured in Canada as yet. Could any of our readers supply the information.—Ed.

TAKING CARE OF ORDERS

Montreal.—While the strike of the carters has been serious enough, involving as it does some 5,000 or 6,000 men, the hardware jobbers are making efforts to get shipments forward to the trade as quickly as circumstances will permit. Many have trucks of their own and men to run them. Trouble has been experienced in some instances in getting loads through to the depots and to the wharves, but with some police assistance difficulties have been overcome. The sympathy of the wharf and depot freight handlers is being sought, and they would add material difficulty to the present situation if they walked out. More money will probably satisfy the carters, and this may have to be given them. The trade may look confidently forward to the hardware jobbers taking care of orders with reasonable promptness if new difficulties do not arise.

CO-OPERATING WITH MERCHANTS

WINDSOR, ONT.—In response to an invitation extended to the Trades and Labor Council by the Border Cities' Retail Merchants' Association, F. J. Clancy has been appointed by the labor organization as a representative on the retailers' executive. Already he is taking an active part in the work, and this co-operation between the merchants and the labor council has already resulted, it is stated, in a better mutual understanding.

THE CLERKS DEPARTMENT

Edward Filene Tells What to Do When You Get a Good Idea

How to Hold the Right Kind of a "Pull" With the Boss—Ideas Which Develop Into Successful Work Are What Take a Man Along

EDWARD A. FILENE, president of the William Filene, Sons Company, one of Boston's largest retail firms, employing over 2,700 people, has some interesting ideas on "pull." In the *American Magazine*, he says:

Most people who are employed think that their advancement depends upon 'pull" with the boss. They are quite right; it does. Therefore they scheme about for methods by which to attract the attention of the boss, and thereby get a "pull." They are right again. You certainly cannot get a pull with the boss unless he knows you; and in a big place he is not likely to know you—at least not for a year or two—unless you attract his attention in some striking way.

Must Show It

It is all well enough to talk of advancing solely on merit; but I have yet to discover how an employer can ferret our merit unless its possessor shows it in some way. Faithful, plodding service is admirable, and it brings its faithful, plodding reward. Every employer likes to have some of the faithful, plodding kind. But unless he is a stupid employer he infinitely prefers the bright, active spirits who are willing to take any chance, and who express dissatisfaction with their present conditions and salary, not by mere grumbling, but by scheming and planning to make themselves more valuable.

So there really is a great deal to this matter of pull; the trouble comes in defining what "pull" is. It is a perfectly legitimate favoritism, if caused by a special mental alertness on the part of the person who is supposed to have the pull. It is not legitimate if founded on the boss's personal fancy or anything that comes under the general head of "boot-licking."

Most so-called pulls are legitimate. They are recognitions of good ideas and good work. Ideas which develop into successful work are what take a man along. They bring pull and advancement. The trouble is that very few people really know a good idea from a bad one; the failures in life are those who never learn to distinguish one from the other. They find that their ideas do not develop into successful work, and within a few years they are so disgusted that they stop having ideas. They are the people who have only "unlucky" days and who are always envying the "lucky" man.

Luck Is Chance

I found that this notion of "luck" prevailed so largely among our own employees that, instead of trying to say there's no such thing as luck—which isn't true, for there is—we put up a definition of luck. Here it is:

Luck is chance, and chance comes to everybody. When chance comes to the man who is ready for it, he is lucky.

Because the average man depends upon this element of chance to label his ideas as good or bad, he is likely to make a mistake and discard the good ideas instead of the bad ones.

I know this from an experience of many years. I have seen thousands of people come and go. I have seen youngsters rise quickly to responsible positions and high salaries; I have myself tried out hundreds of plans and ideas. I have seen some of them succeed and others fail, until finally it began to dawn on me that there were rules by which to separate the chaff of the bad ideas from the wheat of the good; and that the rules, although not infallible, will insure success about nine times out of ten—which is a good enough working average for anyone. They will save you a lot of the mortification which comes from offering what you think is a good idea, and which turns out to be nothing at all. No end of mighty bright boys have become wooden-headed because of the derision their first plans aroused. They were derided because they were formless; but these boys would not have left them formless if they had obeyed the first rule of all successful work. Here it is:

I. Make your plan in writing.

Almost everybody has a big idea once in his life. It may take the form of an invention; I have never heard of anyone who has not at some time in his life invented something. It may be a new way of doing the work in the store, or the office, or the factory. It may be a different method of selling.

Most of us carry our plans in our heads. At night, in bed, they seem particularly marvelous. Objections occur to us, but instantly the plan extends itself and overcomes the objections. The reason they seem so splendid and so adaptable to any emergency is that they have no real form. And that they have no real form shows up instantly when you try to put them down within the four corners of a sheet of white paper. The idea may be all right, but you will find that what you have of it is nothing more than the germ, until you have put it in definite form in a drawing or a paragraph.

Will Show Up

Then you know what you really have, and what you have forgotten to clinch. If it is a really good idea that will bear development the weak points will show up, and they can be strengthened. But if there is really nothing to the idea, that fact, too, will be apparent, and you can put away your dreams about being a world-beater on that particular thing, and go on to something else. An architect could not start to build a house with nothing more than a general notion of how he would like to have the facade look. Neither can you build for any successful work if you have nothing but a shapeless, spongy, unphrased "hunch."

II. Compare it with the methods of the most successful men.

It is a splendid thing to be a pioneer; but even pioneers do not hew a way through a dense thicket when they might as well travel the nearby broad road. The place for pioneering to begin is at the end of the established road. The real pioneers start where the others have left off. They either extend the old road or go over and prove the road which has already been built.

All of us are inclined to be conceited about our ideas. They strike us as being so very good that it is really unnecessary to look about and see what other people have done in the same line. This is a thoroughly unscientific method. Suppose you wanted to study electricity. You would either take a course in some technical institution or get hold of all the books you could find on the subject. Unless you were insane, you would not attempt to develop the whole subject for yourself from the very beginning. Schools and books exist for the sole purpose of being able quickly to give a line on what has gone before. But we seldom carry that thought into the examination of our own plans.

How It Worked

I recall the owner of a store who boasted to me that he had not been inside another store within fifteen years. He had been very successful in the past, but that remark made me pay particular attention to his future progress. Some time later he told me that he had decided not to bother with the popular trade, but to confine himself to select customers—which was only another way of saying, although he did not know it, that he had frozen and withered to such an extent that no one bothered to come into his place except those who had already got into the habit. He had erected barriers of conceit about himself; he called them "conservative methods." He had the frame of a business without the spirit, and I was not in the least surprised to learn within a very few years, that he had decided to retire.

All Must Study

No one is so brilliantly endowed by nature that he does not have to study eagerly. The most successful men—merchants, manufacturers, or followers of the professions—are keen students. They are always checking up on what others are doing. No matter how new and perfect you may think a plan or an idea is, someone, somewhere, will have in use something that you can profitably add to your plan. It may be the merest detail, but success is made up of details. And discovering the best details is only a matter of having the will to discover them.

I do not know of any present practice in the management of a business or of men and women which is not susceptible of very great improvement. For instance, present methods of distribution are thoroughly unscientific. It costs far too much to get goods from their raw state into the hands of the ultimate consumer. So far, nobody has discovered the best way to persuade people to work in groups to the best of their several abilities. In fact, we do not know how to work to the best of our *own* ability, which, probably, is the reason we cannot teach others to do so. Enormous prizes are awaiting those who can learn to manage men, who

can learn how to "army-ize"; that is, learn to mobilize and equip an industrial or commercial army which will really begin to express some of the latent powers that are in the individuals.

Many Opportunities

This may seem to be getting away from the idea of comparing your plan with the best standards and practices. I am only attempting to show that there are opportunities everywhere. Comparison saves unnecessary labor through duplication of effort. No life is long enough to start at the very beginning of any subject and work it all out.

Hundreds of plans have been submitted to me as new, when every one of them was either already in use in the store or had long since been tried and discarded. That same energy might as easily have been applied to improving existing practices, or to finding a new angle on those which had failed.

III. This is most important: Have your plan criticized in advance by those it will affect and by anyone else that can be helpful. Our plans are bound to be criticized, either before or after they are put in operation. If we have them criticized in advance, the chances are that they will be more favorably received, and even defended as their own ideas, by those upon whom they depend for success.

I mark this as most important of all, because more good plans fail from not taking into account the reaction on those affected than from any other reason. Criticism is not necessarily fault-finding; but *constructive* criticism is unknown to most people. If you say, "Give me your criticism on this," the hearer will understand you to mean, "What is the matter with this?" Then he will cudgel his brains to find something that he thinks is, or may be, wrong with it. He will try to find something to object to, simply because he wants to gain a reputation for sagacity. If he does this, meet his objections squarely; talk them over, and either make the changes he advises, or convince him that he is in error. If you do this tactfully you will have converted a "knocker" into a "booster." Henceforth the plan will be his baby, too.

Talk Over Plans

Talking over plans before putting them into execution is one of the secrets of successful management of employees. But, if employees only knew it, it is also one of the secrets of successful management of employers.

The boy in the ranks thinks he should take his idea directly to the head of the office. He is afraid that if he presents it to a superintendent, or a foreman, or anybody else near him, that person will steal the idea. So he tries to get attention at the top. If he does get that attention, the "top" will undoubtedly call into conference precisely the men whom the employee would not take into consultation. These men will even resent his having gone over their heads and, no matter how good the idea may be, they will probably oppose it. The boss will not care to put into effect anything that is actively opposed, and so the idea may be killed.

If, on the other hand, the boy had started with the subordinates and asked them, one by one, for advice about his idea, and made a few modifications to suit them, his plan would have been presented finally to the boss with the active co-operation and endorsement of all those affected.

The Difference

The difference between receiving and not receiving criticism and advice is the difference between success and failure. No plan is perfect, no invention is perfect. The incandescent light to-day is very different from the one Edison first put on the market. Look at a typewriter, a sewing machine, or any of the well-known inventions, and you will find that they are covered by dozens of patents, each representing an improvement on something which had gone before. The difference between democracy and autocracy is that, in the first method of government, plans are criticized in advance by those whom they will affect, while in autocracy they are not.

Would Lose Sales

Take an instance of this from the employer's standpoint. Women like to wear pretty dresses, which is a very natural and proper desire. Therefore, salesgirls like to wear pretty dresses. And, since they see more people in the store than anywhere else, they very naturally want to wear them while at work. But suppose a girl, very nicely dressed in violet, tried to sell a red dress; or suppose she wore an old rose waist, and tried to interest a customer in a green waist; would not the contrast be so disagreeable that the sale would be lost? And, of course, taste in clothes varies. Some girls like to be gaudy, and turn themselves out in execrable taste. How could such a girl sell a neat, well-made gown? That is the reason why department stores insist upon a uniformity in dress.

Saw the Point

We had this question up with the people in our own store. Some of them wanted to dress exactly as they pleased. Instead of simply postjng a notice that they would have to dress in a certain way, and letting it go at that, we called a mass meeting and told the girls exactly the reasons for uniform dress. They all receive commissions on sales. The moment they discovered that absolute freedom in dress might mean reduced sales *for them*, they were practically unanimous against this freedom. We told them to arrange the details themselves, and they turned out three or four styles in black and white which they found would not clash with the merchandise, and which yet gave enough choice of style to permit individuality. Where many had been rebelling against dress regulations, now they are unitedly in favor. Why? Because they saw the reason for the new regulation and had a hand in making it.

The point is that it is sensible and wise to have just as many people as possible feel that they have a part in a plan and some responsibility for its success.

IV. Put it into operation.

V. See that it keeps itself in operation until rescinded. Until your plan keeps in operation automatically you have not organized it.

These two rules represent separate actions, but they are governed by nearly the same principles. It is almost superfluous to say that no plan is complete until it is put into operation. But how many inventions are acclaimed as splendid achievements which are never really tried out, even on the smallest scale?

I have heard hundreds of people bemoan that they have never had a chance with their ideas, when they have never, as a matter of fact, taken their ideas beyond the nebulous stage. Putting an idea into operation is really a corollary to putting it in writing. You advance one step when you put your thoughts on paper; you then have the opportunity to see what is wrong, and as you advance through the stages of comparison and criticism you perfect the idea. But you cannot know all of the defects until you actually make a trial. If you are an employee and want to gain the right sort of pull, you will, after you have taken an idea through the preliminary stages, and are reinforced with outside criticism, ask to have your project given a fair trial first in a small way. It is always best to try out in a small way before plunging. This is merely common-sense, but the reply of the idea-holder is usually that he is no "piker," and wants his idea tested "right" or not at all.

An Exceptional Case

Some men do not hesitate to make sweeping changes, once they are convinced that an idea is sound. I know one manufacturer of international reputation who will spend hundreds of thousands of dollars on an idea, and then scrap it just as quickly if it proves wrong. He is an exceptional case, and probably much of his success is due not so much to his willingness to plunge as to his willingness to acknowledge that he is in error.

Once a plan is in effect—especially any plan that deals with human beings—it should be able, within a very short time, to operate almost automatically. If things will not go right without your personal attention, then the plan is defective. Business men or employees holding responsible positions will often make their plans depend upon their own personal motive force. Their business thus becomes like an inverted pyramid, with the point resting on their shoulders; they must support the whole structure. After a time the weight becomes too great and the back breaks under the strain.

Co-operation Counts

A really big thing cannot be planned to rest on one individual. Success with plans involving human beings is attained by letting everyone know all about the workings of the plan, so that each individual will supply some of the propelling force.

That is the idea of successful business on a big scale, and precisely the same principles work just as well with little everyday affairs.

There should be two sets of rules for doing every bit of work: The first are the major rules and are broad enough to take in almost any emergency. They are principles rather than rules. The second are the lesser rules, and they should not lightly be broken; but they are of convenience and to be treated as such. "Red tape" arises from mixing the important and the unimportant rules. And red tape is the fabric of the shroud of business.

Red tape is not the exclusive property of the Government; individuals often tie themselves inextricably in a mass of it. Their plans fail because they devote more attention to the observance of the non-essential than to the essential. This is particularly the case with the inexperienced; it is not a vice peculiar to any class or either sex.

VI. Keep the plan open to revision, but do not allow it to be changed except after the most careful reasoning.

This rule marks the difference between planning and mere opportunism. If one has carefully mapped out an idea, and finally put it into operation, the initial results are almost certain to be somewhat different from those which were expected. There will be an immediate demand for a change; more especially if the plan touches the habits of individuals. A carefully prepared plan should be abandoned only after reasoning just as careful as that which preceded it. The first flurry does not give facts enough on which to base anything.

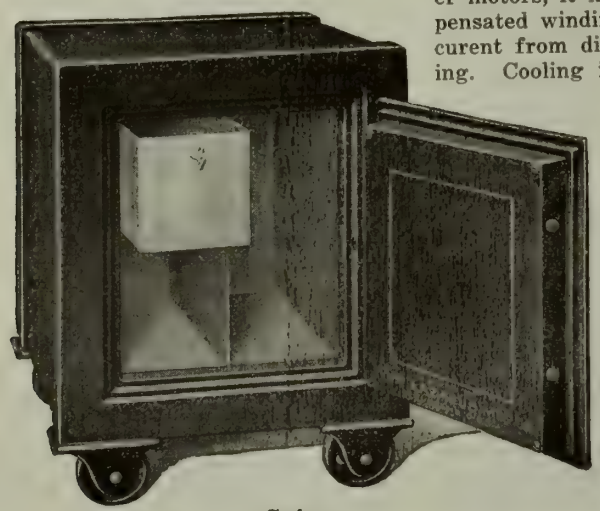
FAVOR COMPROMISE

Automobile manufacturers of the border cities, comprising Ford, Walkerville, Sandwich, Windsor and Ojibway, favor a compromise in British tariff regulations that will permit Canadian products, provided they are 66 2-3% of Canadian manufacture, to enter the British Isles.

A number of Canadian automobile factories are subsidiaries of United States concerns, and are utilized largely for assembling purposes, although recent activities indicate that in future more actual manufacturing will be done in the Dominion.

Under present regulations, United States automobiles and parts are not allowed in the British Isles, and well-founded rumors reaching the Border Chamber of Commerce are to the effect that British manufacturers are opposed to admitting even cars from Canada, provided less than eighty per cent. construction work is done in this country.

NEW HARDWARE GOODS



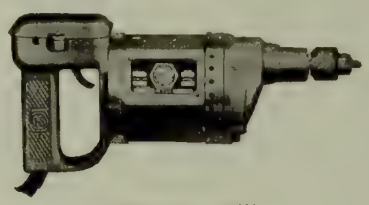
OFFERED TO CANADIAN HARDWAREMEN

NEW KASEMENT FEATURE

The Kasement Skrene Dore Company, 183 Church street, Toronto, have adopted a new feature in the form of full size window screens. This company makes up full size window screens on the Kasement principle and these, it is said, work out splendidly on windows, easy to put up and take down, and make it possible for householders to open their windows up from the bottom and down from the top, thereby getting a much better ventilation. On the new line the company is quoting to the hardware trade 17c per square foot for made-to-order screens with black wire, 20c with 14 mesh galvanoid wire and 36c with bronze wire. All under six inches counts as 6 inches, and all over 6 inches count as one foot. The company states that under this new plan all the hardware merchant has to do is send them the sizes and they make up the screens to order and ship them to the dealer who can turn them over to the householder. Complete details will be forwarded to the trade upon request.

LIBERTY SAFES

Liberty Safes, manufactured by the Lazarus Manufacturing Co., 750-800 Prospect Avenue, Cleveland, Ohio, are all constructed, it is stated, with interlocking door tongue. This, it is claimed, is a positive protection as even though the hinges of the door were blown off it would still be impossible, it is stated, to remove the door, as the tongue fits into the frame, rendering it as secure as the side walls. The steel walls and interior compartments, it is stated, are all electrically welded. The safes are finished in black enamel with a six color blended transfer design on the door. Each safe, it is stated, has a substantial combination lock, of which no two in a thousand, it is claimed, are alike. There is a special lock on the sub-treasury drawer. The approximate weight of the model shown in the illustration is 125 pounds. All the safes, it is stated, are mounted by means of a vane impeller mounted on the armature shaft, which causes a forced circulation of air all through the housing. The gears run in grease in a grease tight compartment like an automobile transmission.



Safe

ELECTRIC DRILL

The Black & Decker Mfg. Co., Baltimore, Md., have placed on the market two new models: a 3-16 in. and a 1-4 in. portable electric drill **with the pistol grip and trigger switch.**

These two models, it is stated, are one-hand drills, which is made possible

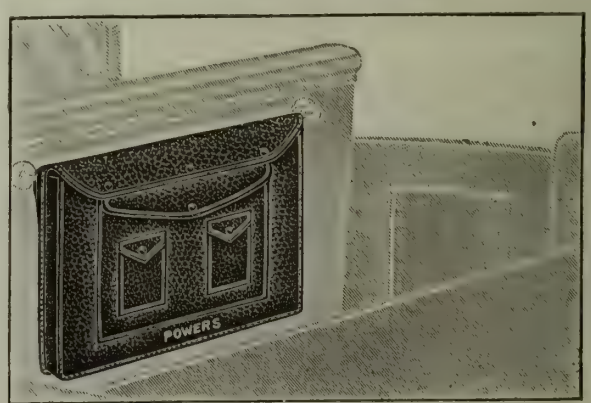
Electric Drill

by the pistol grip and trigger switch. This makes it possible, it is claimed, to handle the tool like an automatic pistol, the current being controlled by pulling the trigger without the necessity, it is stated, for changing the position of the hand holding the drill. In addition to the advantage of convenience, this control, it is stated, saves the breakage of drill bits so often caused by the drill sagging on the bit when the operator changes the position of his hands to switch off the current.

These two models have 1-6 horsepower motors, it is stated, with series compensated windings, and operates on any curent from direct to 60 cycle alternating. Cooling is arranged, it is stated,

FUEL SAVER AND HEAT INTENSIFIER

The Thermos fuel saver and heat intensifier, now offered to the trade by the Heating Specialty Co., 505 Queen St. W., Toronto, will, it is claimed save from 25 per cent, to 75 per cent. of the fuel bills.



It is stated that it is manufactured of heavy galvanized iron, and can be installed on any stove, range, furnace or boiler.

The saving is accomplished, it is claimed, by the retention of the combustible gases in the fire chamber, thus confining the heat in the furnace or boiler, thereby creating a hotter circulation of air or water.

It is further claimed that the smoke pipe remains comparatively cold, while an intense heat circulates through the register pipes or radiators.

ROBE RAIL POCKET

The Powers robe rail pocket, manufactured by the Powers Manufacturing Co. of Waterloo, Iowa, it is stated, is to an automobile what a desk is to an office or a bureau to a home. It furnishes a place for everything, it is stated, and is freely accessible at all times. The pocket, it is stated, is made of a good grade of artificial leather, double stitched and neatly bound around with artificial leather binding. There are snap buttons on each pocket, it is stated, and reinforced web straps on the back to hang to the robe rail. The size is 18 in. x 24 in.

Rail Pocket

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

AN important change has been made in galvanized sheets this week. Besides a decline of about 45c per 100 pounds, there is a revision in the differential between 10¾ oz. and 28 gauge, same being increased 10c. It is noted also that on 10¾ oz. and 28 gauge sheets, shipped 3 feet wide, that an extra of 20c per 100 pounds over 30 inch widths is now effective. Jobbers report splendid business being handled and anticipate present scale of prices should further increase volume of orders.

Revisions have been effected by manufacturers of building papers and sheathings, which provide for declines from former levels. It is intimated these are in line with prevailing costs to-day and that as far as can be seen, the present basis is lowest that will be reached for months to come if any change is possible during the year.

Linseed oil is soaring, following the substantial advances made in flax seed and prices are from 6c to 15c per gallon over figures in effect one week ago. The situation in the Argentine does not reveal any tendency towards marked improvement as yet, the movement of seed to United States ports being still held up. Crushers in the United States are anxious for seed and with the opening of navigation will be buying larger quantities of the Canadian product. The demand for home trade and for export is increasing, so all factors are combining to strengthen the position on oil. No relief from present price basis seems probable during the next month or so and even higher levels are a prospect.

Ingot metals show some changes, tin declining 3c per pound and lead coming down ¾c per pound. There is a fair amount of business being handled and the same is true of other metals as well. The easier feeling in tin and lead are responsible for declines which have been named on solder, prices on this commodity coming down from 2c to 3c per pound.

Many miscellaneous lines have been changed this week, among them being valves, sash weights, brass butts and lamp burners which have declined. Wire and wire products are down in some markets, too, along with bolts and nuts. Chair seats are higher and whip lashes have also advanced.

MONTREAL MARKETS

MONTREAL, April 24—Changes have been made on some lines and reductions are made effective for roofings and building papers of certain brands. Valves are down and so are sash weights. Clothes lines and picture wire have been lowered in price, and chain and lamp burners are down. Solder has declined three cents per pound and there is a revision downward in lead sheets. Old rubbers and pipe scrap have moved up a little and tires are down. The ingot markets are particularly quiet.

Roofing and Paper Are Marked Down

Montreal

ROOFING, BUILDING PAPER.—Reductions have been made in the prices on several lines of roofing and building paper. These prices apply to Montreal and territory served from here, and the new prices follow: Tarred felt, Red Star brand, 7 oz., $3.80; 10 oz. Bison, $3.80, and 16 oz. Buck, $3.80 per cwt. The old price was $4.10. Two-ply Red Star Brand ready roofing is reduced 5c per roll and is selling at $1.35 per roll for 2-ply, and $1.65 for 3-ply. Everlastic brand (rubber) roofing, 1-ply, is down 10c to $1.70 for 1-ply, and $2.00 for 2-ply, while 3-ply is down 5c to $2.35. Panamoid brand is lower by 10c per roll for one and two-ply to $1.60 and $1.85, respectively, while 3-ply is down 5c to $2.20.

Anchor brand dry sheathing is down 5c for No. 2 to 60c per roll, while heavy dry sheathing (straw) is reduced to $3.05 for Red Star brand, this being a reduction of 30c. Stag brand sheathing (Surprise) is down 5c to 66c per roll, while heavy tarred straw sheathing is reduced 30c for Scythe brand to 78c per roll. Everlastic slate surface roofing is down to $3.20 per roll in 100 roll lots, and $3.25 in 50 to 100 rolls, while less than 50 rolls are quoted at $3.30 per roll. The reduction is 15c per roll.

Valves Decline; Sash Weights, Too

Montreal

SASH WEIGHTS, VALVES.—Lower prices prevail for sash weights. These are quoted at $3.25 for solid pattern, and at $4.75 per cwt. for sectional.

Jenkins' Globe valves are now quoted at 17½ per cent. off list, and iron body gate at 30 per cent. off. Compression goods are selling under an increased discount, the new figure being 50 per cent. Standard Globe and Angle are quoted also at 23 per cent. discount, and "Emco" goods at 22 per cent.

Clothes Lines, Picture Wire Down

Montreal.

CLOTHES LINES, WIRE.—Declines have been effected for galvanized wire clothes lines. The basis on No. 18 gauge is as follows: Fifty foot, per dozen, $3.25; 100 foot, per dozen, $6.40; 1,000 foot per dozen, $64.00. The relative prices for 19 gauge are: $3.25, $5.40, and $54.00.

Picture wire, in both tinned and gilt styles, is reduced about 10 per cent.

Chain is Lower; Also Lamp Burners

Montreal.

CHAIN, BURNERS. — Reductions have been made in the prices of lamp and lantern burners. While net prices are not available, the reduction for lantern burners totals about 7½ per cent., and that for lamp burners about 25 per cent.

Electricweld chain is reduced in price, too, at least fireweld has been placed on the same price basis. The new prices are as follows: Proof firewelded and electricwelded coil chain, ⅛ inch, $18.05 per 100 lbs.; 3-16 in., $16.35; 1-4 in., $14.95; 5-16 in., $13.00; 3-8 in., $11.55; 7-16 in., $11.30; 1-2 in., $11.00; 5-8 in., $10.75; 3-4 in., $10.40. B.B.B. fireweld is also reduced and prices are: 1-4 in., $20.60; 5-16 in., $16.40; 3-8 in., $15.00; 7-16 in., $14.40; 1-2 in., $14.15; 5-8 in., $13.85; 3-4 in., $13.50; 7-8 in., $13.40; and 1 in., $13.30.

Hemp is Firm And Rope Held

Montreal

ROPE.—Hemp markets are holding firm and there are indications that they will so continue. This means that rope prices are likely to rule steady on the present basis, and, in any case, there is no change held in contemplation at this time. The jobbers report a fair business, but no large orders are received to speak of. Pure manila holds at 34c, British manila at 30c, and sisal at 27½c per pound base.

Summer Stoves and Wares Very Active

Montreal.

STOVES, WARES.—The movement of oil stoves, electric and gas ranges has begun in real earnest, and there is also a good prospect for the smaller stoves which will be wanted after moving day has subsided. There is likewise much activity in wares. Sales, reported by the jobbing trade, are very satisfactory, and this indicates that the retailers are doing well. The undertone on stoves is firm.

Movement Good On Gasoline; Oil

Montreal

GASOLINE, COAL OIL.—There is a good movement of gasoline, which increases as the roads improve. Prices have held without change, motor grade selling at 34c per gallon. Coal oil is steady and in seasonable demand, with prices ranging from 20 to 23c per gallon.

Nails and Wire Have Moved Some

Montreal.

NAILS, WIRE.—The movement is steady of nails and wire, though no large business is reported. The outlook is good, and confidence is expressed regarding building operations. This may be delayed somewhat, for uncertainties as to price-fixing will have to be dissipated before the people will build. Standard wire nails are selling at a base price of $4.75 per 100 pounds; cut nails are quoted $4.75, base, per 100 pounds.

Smooth steel wire is selling at $5 per 100 pounds base.

Steel and Iron Move Slowly

Montreal.

IRON AND STEEL.—Jobbers are continually making shipments of orders, which are received in a fairly satisfactory number. The quantities asked for are, however, small. None wish to secure supplies at present prices beyond their near needs, and it is apparent that little impetus will be given this business until price controversies are definitely settled in the United States.

Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75

Should Be Sales Of Steel Sheets

Montreal

SHEETS AND PLATES.—Supplies of galvanized and black sheets are satisfactory here, and there is no difficulty in filling orders. Prices have held without change, and the jobbers feel that present quotations are very close. There should be a larger movement, and this may show itself when navigation gets into full swing.

	Per 100 lbs.	
BLACK SHEETS—		
10 gauge	$5 40	$6 25
12 gauge	5 45	6 30
14 gauge	5 50	6 35

16 gauge		8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Solder is Down; Lead Sheets, Too

Montreal

LEAD PRODUCTS.—Lower prices are in effect for lead sheets. This is in accord with the last change made for pig lead. Traps and bends and lead wool hold at the same quotations. Solder is down three cents per pound all around. There is little movement and stocks are in good shape.

Lead pipe	0 11½

Old Pipe; Rubbers Up; Tires Down

Montreal

OLD MATERIALS.—The large operators in old material express confidence relative to immediate future business. At present, prices are a little better for pipe scrap, $9.00 to $10.00 being the price range here. Old rubbers, boots and shoes are up somewhat, and auto tires are down to 3c per pound. The big buyers of steel and iron scrap are still awaiting settlement of the steel controversy before they place orders.

Dealers' Buying Prices—		
Pipe scrap, ton	9 00	10 00
Stove plate, ton		15 00
No. 2 busheling		5 00

Heavy melting steel		10 00

Quiet Are All Ingot Markets

Montreal.

INGOT METALS.—There is really a very quiet condition in this market, and there is no feature to any item of outstanding interest.

COPPER.—Sales are limited to such quantities as are required for immediate use, and the price remains at 18c per pound.

TIN.—The price of 56c per pound, quoted last week, is still in effect. The selling is very confined and stocks are in good shape, considering the demand.

LEAD.—New York price on this still holds at a low figure, but, even so, there is a dull condition. Local price is unchanged, 6¾c to 7c per pound being quoted.

ANTIMONY. — Local interest lags. The price holds around 8½c per pound still, and while there is noted a larger interest in futures in the States, the situation there in spot stocks is quiet.

SPELTER.—While no change has been made in this market, the speculative elements in the States have been operating on a lower basis. Local basis is 8½c per pound, and this may be reduced later.

ALUMINUM.—The market is very

quiet, and there is really nothing new. Basis holds without change at 40c per pound.

PIG IRON.—Until there is some change made in the basis on the United States side of the line, prices here are unchanged and the quotation holds at $45 per ton.

TORONTO MARKETS

TORONTO, April 24.—Lower prices have been named this week on solder, valves, brass butts and at least one line of poultry netting. Coil chain has shown a revision upward. Ingot metals show some declines, tin and lead easing away this week. The markets otherwise are quite steady and no great change is looked for in the immediate future. Business shows a marked improvement this week and reports from all centres are most encouraging.

Poultry Netting Registers Decline

Toronto.

POULTRY NETTING—A revision downward has been made in galvanized poultry netting, American mesh, this now being quoted to the trade at a discount of 10%. A very fair movement to the retail channels has been in progress, it is stated.

Higher Chain Prices Named

Toronto.

COIL CHAIN.—Higher prices have been named in some quarters on coil chain, 3-16 inch x 5, $19.80 per 100 lbs.; prevailing read as follows: Proof coil chain 3-16 inch x 5 $19.80 per 100 lbs.; 3-16 inch $16.80; ¼ inch $15.00; 5-16 inch $12.90; 3-8 inch $11.40; 7-16 inch $11.10; ½ inch $10.80; 5-8 inch $10.50. The price on BB quality chain shows an extra of $1.80 per 100 lbs. over these figures and quotations on BBB quality chain are $2.50 per 100 lbs. extra on proof coil chain figures.

Brass Butts Show Substantial Decline

Toronto.

BRASS BUTTS—A substantial decline in the price of brass butts has been recorded. From a price determined by adding a percentage to the list, quotations have dropped to where a discount is now prevailing, the said discount being 15% from standard list.

New discounts issued on globe and check valves provide for a decline of 7½% from former figures.

More Activity in Nails; Wire Steady

Toronto.

NAILS, WIRE—More activity is shown in the business offering on nails, though the volume of orders is still small. Prices have held steadily without any change, wire nails being quoted at a base of $4.70 per 100 lbs. and cut nails at $4.75.

A better trade is shown in wire but it could be larger. Prices are unchanged, smooth steel wire holding at a base of $5.00 per 100 lbs.

Stoves Steady; Wares Holding

Toronto.

STOVES, WARES — The market seems to be somewhat steadier on stoves and ranges following last week's announcement on conditions surrounding the trade. Summer lines continue to go forward in fair quantities with prices steady and unchanged.

The sale of the various lines of wares has fallen off in the last few days but is causing no uneasiness. Reports from retail centres are encouraging as to the amount of business being done and this should reflect on jobbers' and manufacturers' sales later.

Coal Oil Moving; Gasoline Active

Toronto.

OILS, GASOLINE—Much activity is reported in sales of coal oil with prices holding at unchanged figures, 19½ to 22½c per gallon according to grade. Gasoline is selling very freely, the price remaining at 33c per gallon.

Lubricating oils are steady and an increased volume of business is reported, motor oils, tractor oils and in fact all lines reporting decided briskness.

Galvanized Sheets Under Revision

Toronto.

SHEETS, PLATES. — Galvanized sheets have come in for further revision this week, prices showing a decline of about 45c per 100 pounds. The differential between 10¾-oz. and 28-ga. sheets has been changed to 40c instead of 30c. It is also to be noted that 10¾-oz. and 28-ga. sheets, when shipped in widths of 3 feet, take an extra of 20c over prices listed below. There is no differential charged on other gauges. Black sheets remain steady and unchanged. Business is reported splendid and jobbers are well satisfied with volume of orders they are handling.

BLACK SHEETS.	Per 100 lbs.	
10 gauge	$5 00	$5 45
12 gauge	5 05	5 50
14 gauge	5 10	5 15
16 gauge	5 20	5 25
18-20 gauge	5 80	....
22-24 gauge	5 85	....
26 gauge	5 90	....
28 gauge	6 00	....
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 50	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS.		
10¾ oz.	$7 80	$8 25
U.S. 28	7 40	7 95
U.S. 26	7 10	7 65
22 and 24	6 95	7 50
18 and 20	6 80	7 35
16	6 65	7 20
12 and 14	6 50	7 10

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Iron and Steel Trade Steady

Toronto.

IRON AND STEEL—There seems to be quite a steady volume of orders coming for bar iron and steel. Individual orders are not so large but in the aggregate the total is very good. Prices show no change from following levels:

Common bar steel	4 25	4 50
Common bar iron	$4 25	$4 50
Refined iron	4 65	4 90
Angle base	4 50	4 75
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel, No. 10	4 50	4 75
Do., No. 12	4 75	5 00
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 90

Better Movement Corrugated Sheets

Toronto.

CORRUGATED SHEETS—There is a better feeling in manufacturing circles over actual business and outlook for business in corrugated sheets and kindred lines. Activity is being shown in eavetrough, conductor pipe, ridge roll and altogether the situation is satisfactory. Discount on the latter lines are shown in current market quotations; prices on corrugated sheets follow:

	Per 100 sq. ft.	
Corrugated Sheets—	Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Wrought Pipe Holds; Boiler Tubes, Too

Toronto.

WROUGHT PIPE, BOILER TUBES—There have been no new developments in the market on wrought pipe this week. A very fair amount of business is being done and prices hold at figures shown in current market quotations.

Boiler tubes seem to have steadied down after a period of many changes, and prices remain at levels shown below. Business is very good and stocks ample,

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00

3¼ inch	.....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

Solder Prices Revised Downward

Toronto.

LEAD AND ZINC PRODUCTS—Prices during the week as applied to solder show revision downward, the decline generally amounting to about 2c per lb. On the present basis guaranteed solder is quoted at 33c to 38c per lb.; strictly at 31c to 33c; commercial at 28c to 32c; wiping at 27½ to 29½c and wire at 34c to 40c.

No further change is shown in lead pipe or traps and bends. Business is considered very good.

Rope Unchanged; Twine Moving

Toronto.

CORDAGE, TWINE — There have been no new developments of a particularly interesting nature this week as related to rope. Sales are not being made in very large quantities. Prices remain at unchanged levels,, pure manila being quoted at 34c per lb. base; British manila at 30c; New Zealand hemp at 30c; sisal 27½ and sisal lath yarn 27½c.

It is indicated that some very nice export business for binder twine has been undertaken by Canadian manufacturers. Roumania is said to be the buyer and the quantity so far mentioned is between 10,00 and 1,500 tons.

Cement Steady; Plaster of Paris, Too

Toronto.

CEMENT, PLASTER OF PARIS—A steady market is shown in regard to cement. Dealers are experiencing quite a goodly amount of business and hope present activity is the forerunner of even larger sales. Prices hold at levels shown in current market quotations.

Plaster of Paris is active and sales are being made in good quantities. Prices have shown no change from figures shown in current market quotations.

Change Made in Sheathing Prices

Toronto.

SHEATHING.—Changes have been made this week in quotations on some lines of building papers and sheathing. The new prices named are declines, manufacturers indicating that the reduction is as great as prevailing costs of manufacture will allow. The manufacturers further state that "after a pretty thorough study of all conditions which affect, or are liable to affect this industry, and basing their opinion on probable manufacturing costs they do not see how any further reduction can possibly be looked for for several months to come, if indeed this year." Quotations named to-day are for tarred felt $3.75; dry sheathing No. 2 60c; Surprise sheathing 66c; dry straw $3.05; tarred sheathing No. 2 78c; tarred straw $3.20. No change is reported in ready-roofings.

Tin Goes Lower; Lead Down, Too

Toronto.

INGOT METALS—Changes this week are confined to tin, which is down 3c, and lead which has declined ¾c per lb. Business all the way through is considered good and present basis seems likely to hold for some little time.

COPPER—There is a fair amount of activity reported and whereas stocks are not heavy, there is sufficient to go around. The price holds at 18c per lb.

TIN—A decline of 3c per lb. has been recorded in this metal this week, bringing the quotation down to 57c per lb. Business is fairly good.

SPELTER—No new developments are reported in the market on spelter, price holding steadily at 8¼c to 8½c per lb.

LEAD—The market has eased away and the quotations are down ¾c from the figures of last week to 6½c per lb. Business is quite active and supplies ample.

ALUMINUM—There are no features of interest, nominally quotations being spoken of as ranging at 50c, with actual buyers able to contract at lower figures per lb.

ANTIMONY—The price of 8c per lb. still holds and trade is within rather narrow limits.

LONDON MARKETS

LONDON, April 24.—Lower prices have been named on sheet glue, brass valves and brass butts, while advances are shown in the prices issued on veneer chair seats and whip lashes. Linseed oil and turpentine are higher also. Business here continues good in spite of the unsettled weather. A splendid season is expected with the coming of warmer weather. Collections are good in London and district.

Whip Lashes Go Higher, Poultry Netting

London, Ont.

WHIP LASHES, NETTING.—Higher prices have been named this week on braided whip lashes. The new quotations now prevailing are for the 4-ft., $2.40 per doz.; 4½-ft. $2.70, and 5-ft., $3. An improved sale of poultry netting is reported. Prices are unchanged, the Canadian galvanized hexagon netting being quoted at 15 per cent. from list. Blue Ribbon poultry fence is steady at the following net prices per 10-rod roll: 24-in., $4.30; 36-in. $5.50; 48-in., $6.50; 60-in., $7.65; 72-in., $8.75.

Brass Butts Take New Discount

London, Ont.

BRASS BUTTS.—Lower prices have been named on brass butts this week. The narrow, middle and desk butts which have been selling at an advance of 40 per cent. on list are now reduced to 20 per cent. advance on list.

Advance in Veneer Chair Seats

London, Ont.

CHAIR SEATS.—Higher prices are being quoted this week on veneer chair seats. The figures now prevailing to the trade are: 14-in. $1.65 per doz.; 15-in., $1.85; 16-in., $2.10. A very good sale is reported.

Valves Decline; Spring Hinges Hold

London, Ont.

VALVES, SPRING HINGES.—A little lower price has been brought about on brass valves this week, the Standard being quoted at a discount of 23 per cent. off list and Jenkins' pattern at 22 per cent. off list. Sales of screen door spring

hinges are better and prices are steady at following figures on some of the more familiar lines: No. 20, $19.50 per gross pair; No. 7/11 loose pin, $20; No. 50, double acting, $5.45 per doz. pair; No. 192, offset, $2.25 per doz. pair; No. 2255, screen door sets, $3.25 per dozen.

Lawn Hose Remains Unchanged

London, Ont.

LAWN HOSE.—There has been no new feature of particular interest develop in the market on lawn hose. A little more activity is noted and prices remain steady at following figures: Corrugated, ½-in., 17½c per ft.; ⅝-in., 20½c; ¾-in., 23½c; 1 in., 35c. Less 5 per cent. in full reels of 500 feet. ½-in., 3 ply, 11½c per ft.; ⅝-in., 3 ply, 13½c; ¾-in., 3 ply, 15½c; ½-in., 4 ply, 13c; ⅝-in., 4 ply, 16c; ¾-in.. 4 ply, 17½c; ½-in., 5 ply, 14½c; ⅝-in. 5 ply, 17½c; ¾-in., 5 ply, 19½c.

Hose Fittings Holding Steadily

London, Ont.

HOSE FITTINGS.—Activity is becoming more apparent in hose fittings such as clamps, couplings, menders and nozzles. Prices remain steady and unchanged at following figures:

Galvanized Bands or Clamps.—½ inch, 35c dozen; ⅝ inch, 38c; ¾ inch, 38c; 1 inch, 60c; 1¼ inch, 95c; 1½ inch, $1.20.

Brass Hose Couplings.—½ inch, $1.70 dozen; ⅝ inch, $1.75; ¾ inch, $1.80; 1 inch, $3.50.

Cast Splicers or Menders.—½ inch, 50c dozen; ⅝ inch, 55c; ¾ inch, 60c; 1 inch. 80c.

Gem Hose Nozzles.—$6.50 dozen.

Fishing Tackle Moving; Wagons Too

London, Ont.

FISHING TACKLE, WAGONS.—The rivers and creeks in this district are full of pike this year, and the sale of fishing tackle has started out good. A big demand is reported for coaster wagons too, with prices remaining steady. The figures ruling on the Auto Wheel coaster wagon are: No. 00, $22.88 per dozen; No. 01, $45.04; No. 1, $54.34; No. 2, $60.06; No. 3, $66.50; No. 4, $75.79.

Rope Unchanged; Nails Holding

London, Ont.

NAILS. ROPE.—Prices on rope are unchanged this week, the basis being as follows, per pound: Pure manila, 34c; British manila, 30c; New Zealand hemp, 30c; sisal, 27½c. Nails are also steady with a little more business coming to hand. Wire nails are quoted at $4.70 per 100 pounds base and cut nails at $4.75; unchanged figures.

Sheet Glue Lower; White Lead in Oil

London, Ont.

SHEET GLUE, WHITE LEAD IN OIL.—Lower prices are in evidence this week on sheet glue. Quotations now prevailing are: Common broken, 16c per pound; ground glue, 16c; white glue, 26c. White lead in oil at $16.30 per 100 pounds in ton lots, and $16.65 in smaller quantities, show no change. More business is noticeable with opening up of painting season.

Linseed Oil Higher; Turpentine Too

London, Ont.

LINSEED OIL, TURPENTINE.—Higher prices are again in order on linseed oil. The flax market continues its upward trend and this can only mean one thing. Business is improving on linseed oil. Quotations appear below. Turpentine is moving forward in better quantities with prices up from levels shown last week. The price prevailing follows:

Linseed Oil—	Raw	Boiled
	Per Gal.	
1 to 2 bbls	$1 95	$1 98
3 to 5 bbls.	1 94	1 97
6 to 9 bbls	1 92	1 95

Less bbls. add 10 cents gal.

Turpentine—	Per Imp. Gal.
1 bbl. lots	$1 15
2 to 4 bbl. lots	1 14
5 gal. lots	1 25

WINNIPEG MARKETS

WINNIPEG, April 24.—Price changes during the week have again been very numerous and include many of the heavy hardware lines such as nails, barb wire, galvanized wire, staples, bale ties, annealed baling wire and coiled spring wire, solder, carriage bolts, machine bolts, plow bolts, tire bolts, elevator bolts, coach screws, wood screws and twist drills have also been revised and show reductions from former prices. Business is reported very brisk at present, many wholesalers working overtime to get out the orders, while the reductions in many of the staple lines is expected to greatly increase business, as high prices have been responsible to a certain extent for dealers holding off.

Twist Drills Register Declines

Winnipeg.

TWIST DRILLS—Following revised prices issued some time ago by the manufacturers, a reduction in twist drills is recorded during the week. Present figures show a drop of from 10 to 20 per cent. from former quotations. The discounts on the various lines are given herewith, together with net prices:

Bit Stock Drills: No. 108—Discount 45 per cent.

Net prices as follows: 3-32 inch, $1.50; ⅛ inch, $1.65; 5-32 inch, $1.90; 3-16 inch, $2.20; 7-32 inch, $2.50; ¼ inch, $2.75; 9-32 inch, $3.30; 5-16 inch, $3.85; 11-32 inch, $4.40; ⅜ inch, $4.70; 17-32 inch, $5.10; 7-16 inch, $5.75; 15-32 inch, $6.45; ½ inch, $7.15; 9-16 inch, $8.50; ⅝ inch, $9.90; ¾ inch, $13.20; ⅞ inch, $16.50 per dozen.

Blacksmith Drills: ½ inch Shank, No. 112—Discount 40 per cent.

Net prices as follows: 3-32 inch, 24c; ⅛ inch, 24c; 5-32 inch, 27c; 3-16 inch, 30c; 7-32 inch, 33c; ¼ inch, 36c; 9-32 inch, 39c; 5-16 inch, 42c; 11-32 inch, 45c; ⅜ inch, 48c; 13-32 inch, 51c; 7-16 inch, 54c; 15-32 inch, 57c; ½ inch, 60c; 17-32 inch, 63c; 9-16 inch, 66c; 19-32 inch, 72c; ⅝ inch, 78c; 21-32 inch, 84c; 11-16 inch, 90c; 23-32 inch, 96c; ¾ inch, $1.02; 25-32 inch, $1.08; 13-16 inch, $1.14; 27-32 inch, $1.20; ⅞ inch, $1.26; 29-32 inch, $1.32; 15-16 inch, $1.38; 31-32 inch, $1.44; 1 inch, $1.50; 33-32 inch, $1.56 each.

Taper Square Shank Drills: No. 104A—Discount, 12½ per cent.

Net prices as follows:—3-16 inch, 85c; ¼ inch, 88c; 5-16 inch, 96c; ⅜ inch, $1.05; 7-16 inch, $1.10; ½ inch, $1.15; 9-16 inch, $1.20; ⅝ inch, $1.25; 11-16 inch, $1.30; ¾ inch, $1.35; 13-16 inch, $1.55; ⅞ inch, $1.80; 15-16 inch, $2 each.

Jobbers' Drills: No. 105—Discount 40 per cent.

Net prices as follows:—3-32 inch, $1; ⅛ inch, $1.10; 5-32 inch, $1.15; 3-16 inch, $1.35; 7-32 inch, $1.65; ¼ inch, $1.95; 9-32 inch, $2.30; 5-16 inch, $2.60 per dozen.

Bit Stock Drills for wood: No. 109A—Discount 45 per cent.

Net prices as follows:—4-32 inch, $1.80; 5-32 inch, $1.95; 6-32 inch, $2.20; 9-32 inch, $2.75; 10-32 inch, $3.30; 12-32 inch; $3.85; 14-32 inch, $4.40 per dozen.

Lower Prices on Boiler Tubes

Winnipeg.

BOILER TUBES—New prices are just to hand covering boiler tubes which again register a slight decline. To-day's selling prices on the different sizes are as follows: 1½ inch 27c; 2 inch 27c; 2¼ inch 29c; 2½ inch 32c; 3 inch 38c; 4 inch 60c per foot.

Wire, Wire Products Reach Lower Levels

Winnipeg.

WIRE, WIRE PRODUCTS—The new prices set by the United States War Trade Board, together with the opening of navigation, which means lower tranportation rates—are responsible for the present reduction in the price of barb wire, nails, galvanized wire and kindred lines. This will mean a considerable saving to the building trades and other users. These reductions were predicted some time ago by HARDWARE AND METAL. New prices now ruling for shipment from Winnipeg and from the head of the lakes are as follows:

	Wpg.	Hd. of Lakes
Barb Wire, Lyman 4-point, spool	$4.65	$4.45
Do., Glidden, 2-point, spool	4.65	4.30
Do., Baker, 2-point, spool	4.55	4.20
Wire Nails, base	5.65	5.15
Fence staples, 100 lbs.	5.65	5.15
Plain galvanized wire, 9 Ga., 100 lbs.	5.50	5.00
Do., 12 Ga., 100 lbs.	5.65	5.15
Do., 13 Ga., 100 lbs.	5.75	5.25
Coiled spring wire, 9 Ga,, 100 lbs.	5.55	5.05
Do., 12 Ga., 100 lbs.	5.70	5.20
Bale ties, single loop, 9½ ft.	7.25	6.75
Do., Do., 10 ft.	7.25	6.75
Do., Do., 10½ ft.	7.25	6.75

Annealed wire (Winnipeg).—No. 9. $6: No. 10. $6.06; No. 11, $6.12; No. 12, $6.20; No. 13, $6.30; No. 14, $6.40; No. 15, $6.55; No. 16, $6.70 per 100 pounds.

Decline of 2c Noted in Solder

Winnipeg.

SOLDER.—Solder prices, which have been steadily decreasing for the past few weeks, again show a drop of 2c per lb., which makes to-day's selling price as follows: Full case lots 34c per lb.; less than case lots 35c per lb.

New Discounts Named on Bolts

Winnipeg.

BOLTS—As predicted by HARDWARE AND METAL, new prices are now effective covering all kinds of bolts. These show substantial reductions. New discounts ruling to-day are given herewith:

Carriage bolts, ⅜ and smaller, up to 6" long, 30%
Do., ⅜ and smaller, over 6" long.....15%
Do., 7-16 and larger, all lengths.....10%
Machine bolts, ⅜ and smaller, up to 4" long, 35%
Do., ⅜ and smaller, over 4" long.....20%
Do., 7-16 and larger, all lengths.....20%
Coach screws 45%
Plow bolts 25%
Elevator bolts 20%
Tire bolts 45%

Square Blank Nuts—Less than case lots—No. 1 x ¼ inch, $17 per 100 pounds; No. 2 x 5-16 inch, $15.50; No. 3 x ⅜ inch, $14; No. 4 x 7-16 inch, $13.20; No. 5 x ½ inch, $13.10; No. 7 x 9-16 inch, $12.60; No. 8 x ⅝ inch, $12.80; No. 10 x ¾ inch, $12.60.

Full case lots are $1 per 100 pounds less than these prices.

Hexagon Tapped Nuts—Less than case lots—No. 27 x ¼ inch, $26.50 per 100 pounds; No. 28 x 5-16 inch, $22; No. 29 x ⅜ inch, $18.60; No. 30 x 7-16 inch, $16.70; No. 32 x ½ inch, $16.35; No. 33 x 9-16 inch, $15.30; No. 35 x ⅝ inch, $15.30; No. 37 x ¾ inch, $14.75.

Full case lots are $1 per 100 pounds less than these prices.

Hexagon Blank Nuts—Less than case lots—No. 27 x ¼ inch, $24.25 per 100 pounds; No. 28 x 5-16 inch, $20.25; No. 29 x ⅜ inch, $17.25; No. 30 x 7-16 inch, $15.65; No. 31 x ½ inch, $15.60; No. 34 x ⅝ inch, $14.85.

Full case lots are $1 per 100 pounds less than these prices.

Linseed Oil Holds; Turpentine Firm

Winnipeg.

LINSEED OIL, TURPENTINE — Prices on linseed oil still hold firm on the local market at former quotations, with the usual spring demand. Prices are confirmed as follows: Raw linseed oil, $1.85 gal.; boiled, $1.88 gal. in single barrel lots.

Turpentine shows no change over former quotations and is selling to-day as follows: Barrels $1.25 gal.; ½ barrels $1.28 gal.; 5 gal. lots $1.30 gal.; 1 gal. lots $1.30 gal., plus the usual extras for containers.

Wood Screws Decline Substantially

Winnipeg.

WOOD SCREWS—Prices on wood screws, which have been firm for the past year or more, have been revised to lower levels during the week, showing a drop of from 10 to 15 per cent. To-day's ruling discounts are given as follows:

Flat Head Bright Screws 70%
Oval and Round Head 65%
Flat Head Brass 35%
Oval and Round Head 30%
Flat Head Bronze 25%
Oval and Round Head 22½%

Lower Prices on Galvanized Wire

Winnipeg.

GALVANIZED WIRE. — Reduced prices are just to hand covering plain galvanized wire, based on new costs for raw material. These show a substantial reduction over former quotations. New prices are as follows:

Plain Galvanized Wire.—0-9 ga., $5.50; 10 ga., $5.95; 11 ga., $6; 12 ga., $5.65; 13 ga., $5.75; 14 ga., $6.35; 15 ga., $6.50; 16 ga., $6.70 per 100 pounds.

Fifty Cent Drop in Black Sheets

Winnipeg.

BLACK SHEETS.—New prices have been named on black steel sheets showing a reduction of approximately 50c per 100 pounds. To-day's selling prices are as follows: 28-ga. $7.50; 26-ga. $7.40; 24-ga. $7.35; 22-ga. $7.35; 20-ga. $7.30; 18-ga. $7.30; 16-ga. $6.70; 14-ga. $6.60; 12-ga. $6.55; 10-ga. $6.50 per 100 pounds.

Blank and Tapped Nuts Down 50c to $1.00

Winnipeg.

BLANK, TAPPED NUTS.—Based on new prices from manufacturers the following reduction is now effective on blank and tapped nuts, showing a drop of from 50c to $1 per 100 pounds.

Square Tapped Nuts.—Less than case lots—No. 1 x ¼ inch, $18.75 per 100 pounds; No. 2 x 5-16 inch, $16.75; No. 3 x ⅜ inch, $14.85; No. 4 x 7-16 inch, $13.85; No. 6 x ½ inch, $13.55; No. 7 x 9-16 inch, $12.95; No. 8 x ⅝ inch, $13.05; No. 10 x ¾ inch, $12.75; No. 13 x ⅞ inch, $12.65; No. 16 x 1 inch, $12.65.

Full case lots are $1 per 100 pounds less than these prices.

PITTSBURGH MARKETS

PITTSBURGH, Pa., April 24.—The pig iron and steel markets have shown no improvement in the past week, but rather have grown quieter. There is universal complaint among steel producers as to the small amount of business they are receiving, their reference to market conditions suggesting the notion that they are booking practically no business at all. Cross questioning, however, develops the fact that they really are booking a moderate amount of business every day, the objectionable feature being that it is all for immediate shipment, evidencing no confidence in the future prices on the part of buyers, while the volume of business is quite insufficient to support present mill operations, which are predicated to a considerable extent upon old orders. While mills operated at an average of 77 per cent. during March they are operating only between 65 and 70 per cent. at present, and half or nearly half the production is against old orders.

In pig iron business is even lighter than in finished steel, but there is no complaint on the part of the merchant furnacemen. They recognize that conditions are not propitious, and are quite content to let matters work out. They have had very high costs, and costs are still quite high, and the merchant furnacemen recognize that the only way to get costs down is to have a period of relative idleness. An open market, which the steel producers seem to fear, has no terrors for the merchant furnacemen, since until the Government took control by reason of the war, pig iron always had an open market. The furnaces made money in one or two years out of three, and they are content to take an off period now.

Feeling Regarding Industrial Board

About few things is a wider difference of opinion expressed than about the operations, or perhaps failure to operate would be a better expression, of the Industrial Board at Washington. It will be recalled that the original program announced by Secretary of Commerce Redfield was that the industrial board would be set up for the purpose of restoring the play of the law of supply and demand, inflating prices, bringing buyer and seller together and starting business on the move. As to restoring the play of the law of supply and demand, what the board did was to set prices for the remainder of the year. As to deflating prices, it brought about reductions in steel prices averaging 9.4 per cent., leaving them 81 per cent. above the ten-year pre-war average, while copper had dropped to its pre-war average. As to bringing buyer and seller together, what the industrial board did was to reach an agreement with the sellers, the committee of the iron and steel industry, then tried to induce the railroad administration to endorse the prices and place orders, which the railroad administration refused to do, claiming first that the prices were unreasonably high, and secondly that the whole thing was illegal. The Navy Department opened bids for 20,000 tons of steel, after the industrial board's prices had been announced, and finding that they were all at the same prices returned the bids, on the basis that the law requires competitive bidding. With the railroad administration the industrial board got into a controversy, which has been given much space in the daily newspapers, while with the Navy Department it appears to have had no communication.

The curious thing about the situation is that the daily press despatches from Washington have been uniformly colored along the line that the railroad administration was wrong and the industrial board's efforts to help the country were being needlessly interfered with by the railroad administration. On the other hand, strangely enough, among the very people most interested in prices being maintained, namely the pig iron and steel producers, there has been a constantly growing feeling that the railroad administration is right. Of course, the producers are making no effort to advertise their attitude, but no difficulty is experienced in ascertaining that many of them hold this view.

It may be that these producers have turned against the industrial board simply because it has not succeeded. A more plausible theory, which, of course, it would be difficult to confirm specifically, is that the producers' real cause

of dissatisfaction is that the industrial board misrepresented its prospects of securing approval of the Department of Justice. This much is frankly admitted, that at one time the producers regarded it a settled fact that a system of steel price maintenance had been established, not with the Government as neutral in the matter, but with its active countenance and support. This view has, of course, been entirely dispelled by the Attorney-General stating flatly that he has not approved the plan and will not do so. The steel producers lose more by that than by the holding back of a few railroad orders, as there was not much business to be placed in any event.

The only thing that has kept the subject alive at all has been the fact that at the close of last week Secretary Redfield received a cable from the President, to whom both the industrial board and the railroad administration had made appeals, stating their respective viewpoints. The text was not made public, but one might reasonably infer that the President asked that the industrial board endeavor to offer better terms to the railroad administration. If the President had desired to instruct the railroad administration to accept the steel prices, as the industrial board had expressed hopes he would do, the cable presumably would have been sent to the railroad administration instead of to the other party in the controversy.

The steel market is telling its own story, however. Prices are being strictly maintained, indicating that while the producers have lately been talking much of prospects of an open market they are not yet ready to put such a thing into operation. The buyers are not taking hold, and evidently are waiting for lower prices, perhaps for various other things as well. Among middle interests, well trained in observing matters from a neutral viewpoint, there are predictions made that there will be further steel price reductions by about the middle of June. Whether there will simply be formal reductions or irregular reduction, with more or less of open market conditions, whatever that often-used term really means, is the chief matter of doubt.

There is no question that steel prices can be very greatly reduced without serious injury to producers. The small producers, who are given so much sympathy in the trade and daily press, are in many cases closed already, not because of high costs but because of lack of orders. The high costs frequently cited by large steel producers are due largely to the inclusion of overhead, which is very heavy at present because tonnage is so light. Undoubtedly the steel producers would not make their reductions now if they felt business would be greatly stimulated. Evidently they are not sanguine about the near future in business, but when the peace treaty is signed they may become more hopeful and be willing to make terms with buyers. Even if plans to do so were fully formulated no inkling of the fact would be allowed to leak out.

Pig iron presents theoretically an open market, but inquiry has been for such extremely small lots, generally carloads to 100 tons, that there has been no inducement thus far to quote cut prices. The furnaces will be glad to cut prices when actual demand develops, but by that time few will be in operation, and no great decline is to be expected, at least in the near future.

PRICE SITUATION UNSETTLED

The "Iron Trade Review," under date of April 24, says:

Fruitless weeks of waiting for Washington to put in working form its plan of general price readjustment have undone largely whatever recovery the iron and steel market previously had been able to attain. Now, with the failure of the stabilizing movement generally recognized, the industry finds itself obliged to make a fresh start on a lower plane of prices, with order books greatly depleted and with production still declining. Judge Gary's statement that the Government price plan is dead is accepted as a correct appraisal of the present state of affairs, and it is recognized as forecasting the immediate presence of an open market if it does not actually signalize the restoration of such conditions. Were it not that business is in such a contracted state the influence of the new market conditions probably would be more plainly apparent. While events continue to bring about an uncontrolled price situation, Government officials in response to several cablegrams from President Wilson are making renewed efforts to patch up an understanding between the Industrial Board and the Railway Administration. It is greatly doubted, however, that anything they can do will overcome the fatal lack of confidence that now marks the general attitude toward Government co-operation. New business in finished lines, generally speaking, is on a low basis of tonnage compared with mill capacity, yet the situation is a little better than the preceding week, when the market was extremely dull. The leading producer in the Chicago district has been entering new tonnage, about 25 per cent. of that being shipped. Mill activities in all lines largely come within the range of 50 to 60 per cent. There is nothing to show that price-cutting on mill products is becoming more extensive. The principal irregularities continue in such lines as rerolled bars, strip steel, etc. There are reports of a wide range of concessions in semi-finished steel, but these remain to be verified. Satisfaction among pig iron producers over the 20 cent reduction allowed in water freights on lake ore has been dimmed somewhat by a proposal to raise the unloading charge from 10 to 15 cents. Further sales of ore for the season have been made at the price of $5.55 net, at lower lake ports for Mesabi non-Bessemer. This price also has been applied to a contract previously negotiated in accordance with the provisional clause covering changes in freight. Pig iron production still is declining, as producers are extremely reluctant to pile iron at present costs. In the Mahoning and Shenango valleys, 21 out of 46 stacks now are out. Shipments by merchant furnaces show no improvement, and sales are light. Price shading on foundry iron up to $2 a ton has appeared in the East. Virginia iron is obtainable at 50 cents less. What a round tonnage would bring forth in practically any district, is an unsettled question, because such inquiry is lacking. Large sellers at Cleveland have decided to revise to the $26.75 basis such contracts as had been made subject to price change by Government agency.

SCORES NEWSPAPER WHICH FAVORED MAIL ORDER FIRM

The following editorial brief appeared in a recent issue of the Toronto Globe:

"The proposal to tax mail order houses doing business outside of municipal limits is a restriction on trade which the body of consumers in the country will not assent to."

The Tribune, of Welland, Ont., says in reply:

"It is but natural that the Globe should take an attitude of opposition to Welland's resolution—going out of the way to voice its opposition before the introduction of the resolution to the meeting. The Globe benefits to a large degree by the advertising of Toronto mail order houses, who to a large extent, cripple local trade by being allowed to do business here absolutely free of charge, while local merchants pay property, business and income taxes in proportion to the volume of their trade. The Globe is a consistent enemy of monopolies and combines, respecting railways and pork packers. But there consistency ends. The Globe, perhaps, loves not combines less but the T. Eaton Co. more.

"The mail order business is a withering force in small communities. They have an unfair advantage of local merchants who pay heavily for the privilege of doing business while the mail order merchant pays nothing. Local trade is cramped, stultified and weakened with the result that the money which should by all economic laws circulate here, being earned here, goes to Toronto or elsewhere. The community is thus weakened; and to the same extent to which Welland is weakened is the state weakened. The mail order business is absolutely wrong; and while the Globe's advocacy of tax exemption may profit the Globe it doesn't help the country any.

"And upon what ground does the Globe assert that the country consumers will not agree to the proposal? Country consumers, through their councils, tax country merchants, and as a tax on mail order business done in the township would enrich the township and reduce the tax rate, as well as put the mail order octopus on the same footing as the local merchant, we should think that rural consumers should welcome the tax, in spite of the Globe's none too disinterested advice to the contrary."

Training the Future Paint Dealer

There is More Money in Developing Young Men Than in Discouraging Them—Broad Gauge Principles of Bigger Business Can be Applied in the Small Store With Good Results

A PAINT dealer may have the best line of paints and varnishes that can be procured; he may have the most up-to-date and complete equipment and arrangement of his paint department; he may have the best selling location in his community, but without efficient sales help, he will lack the life-giving element that makes success.

Inasmuch as the boy is father to the man, so does the junior clerk beget the boss of to-morrow.

Equally true is the fact that the tree is inclined as the twig is bent. The boss of to-day has it in his hands to bend the twigs as he wills.

Sooner or later comes the day when the boss must relinquish the care and worry of the details of his business and leave them in the hands of a younger generation. What are you doing to fit someone on your staff to shoulder these responsibilities? Are you leaving it to chance, or are you fitting someone to take up these responsibilities?

Can You Do So?

You who have labored and sweated and worried through all the hazards of business until you have met the measure of success you feel is yours and you feel that you ought to loaf a bit and enjoy the good things of life; can you do so, feeling that there is someone who will do the things that ought to be done with the efficiency and initiative that characterized the making of your own success; or are you fettered to your business because you failed to provide a boss against the day when you wanted to get from under the load and join the other boys of 50 or 60 on the golf links?

Remember that in dealing with your staff, you are dealing with humans of all grades; some will never want to be much more than truck pushers; they will never of their own volition push themselves farther than they are pushed. They will reach their own level; but there is seldom a store but that has some junior clerk who is full of the same ambition that you had when in the hey-day of your activity.

Seek Inspiration

What inspiration towards initiative are you giving such a boy? If you don't provide it, he will seek employment with someone who will, and yours will be the loss both to-day and to-morrow, when you will need that boy's ambition to take care of your business.

Mr. Fallis of the Sherwin-Williams Company, struck a mighty important note at the recent convention of the Retail Hardware Association at Hamilton, when he said,—"The great crying need of the business world to-day is for capable men; teach your clerks capability, initiative and courtesy, and develop their latent energies."

Out of all the noise and debate that was made at this Convention about high prices, materials and scarcity of materials, there was sounded in this remark a truth that that was of more vital importance than prices. Materials galore or no materials at all; high prices or low prices, of what avail are they if the country lacks men capable of coping with the business conditions that arise?

He Wants to Grow

An ambitious boy enters your employ to get just as much out of the job as he can; just as you entered business to get as much out of it as you could; whether you keep a watchful eye on him or not, he is keeping an eye on you, as boss, to see whether you will give him his chance when the right time comes. When you get this kind of a boy, it is up to you as boss to play up to his ambition. He wants to grow into the right of having a bigger job just as naturally as he will grow into the privilege of wearing long trousers. The right kind of ambition knows that you are boss to-day. All that he asks is the privilege of growing into the job of being boss when you are through. These are the sort that become managers, or partners of bosses of to-morrow.

There is, in his ambition, a latent energy that can be developed to your advantage. If you don't take advantage of it, he will place himself with someone who will, which explains to some extent the seeming restlessness seen among boys who are coming on. Too often the boss is as much responsible for this shifting spirit as the boy himself.

A Great Problem

The development of capable young men is perhaps as great a problem in our reconstruction effort as any we have to face and yet what little importance is given to it in the constant discussions that are taking place.

The ambitious clerk seeks responsibility; he is keen to take upon his shoulders some task that embodies accomplishment. He is hungry for the opportunity to point out something worth while that he has conceived and accomplished.

There are many departments in a hardware store that

Continued on page 66

There's Something To A Name!

Every hardware dealer sells paint. Some more—some less.

The dealers handling "Moore's" are invariably selling more and more paint all the time. The name "Moore" is their assurance of increased paint sales.

A display of Moore's Paints and Varnishes in your window or on your shelves affords your prospect such a complete line of highest quality guaranteed paints and varnishes to choose from that an ultimate sale is always assured.

Moore's Paints dry hard but retain sufficient elasticity to prevent cracking or peeling. Thus they combine tip-top appearance with unbeatable wear.

The Moore Agency proposition will interest you. Write for particulars.

Benjamin Moore & Co., Ltd.

West Toronto

Ontario

offer the chance he is looking for. Perhaps none offer a better opportunity for this development along such lines than the paint department.

Gets Rid of Detail

Not so very long ago a sterling old hardware and paint retailer came to the advertising manager of a large paint manufacturer, and requested that he put down in writing some of the more outstanding selling arguments and uses for his lines of paints and varnishes. Said he: "You know, I'm getting to the stage where it isn't as easy for me to remember such details as it used to be, and I've got to have something handy to refer to when such customers ask me questions." The advertising man readily complied with his request; at the same time, diplomatically took the opportunity to advise that perhaps he would be farther ahead if he would hand over the details of his paint department to younger shoulders and more absorbing mental activity. The old man saw the point and concluded that life would be easier if he shoved such detail onto a younger man.

Train Young Men

Some day old-timers will have to relinquish the game and he might as well let youth share the benefit of his ripened experience. Even the man in his prime can leave himself free to branch out into other channels if he will train the young fellows to take the responsibility of detail efficiently into their own hands.

Paint and varnish selling has come to the stage where both technical knowledge, and a sense of service are requisite to its successful advancement. With the realization that paints and varnishes can minister to a fundamental economic need that is both national and individual, there is need for a fresh, ambitious viewpoint. Herein lies an immense opportunity for development for the ambitious sales clerk. It not ouly offers a chance for the development of the paint department, but it offers an opportunity for personal merchandising training and development as well.

Get Service Idea

One of the greatest needs for the advancement of retail paint and varnish selling is a further knowledge of what these products can do in service to the consumer. This implies more or less technical knowledge. What is not known by the "just average" clerk, would fill sufficient volumes to put a large sized crimp in Andrew Carnegie's library fund.

What can be learned about them would provide a lengthy course in home study by the ambitious young man anxious to fill in his off hours with self-improvement training, and it is the young man who does work on some plan of self-improvement who eventually gets ahead of others in the organization.

Sooner or later the old man must realize that his time for new tricks is past. His part is to pass judgment from his riper experience on the venture of the young man. He can restrain over-zealousness or encourage initiative and enterprise through the light of his own experience. The older man has neither the time nor the mental activity to concentrate on the detailed study that the younger man's mental activity is capable of. Why should he? To a certain degree he has an obligation to society which he must fulfill in the training of the younger man to take up his share of work when he is ready to lay it down.

Provide Incentive

And in this training, he can turn to profitable account, both the fresh mental and physical activity of the generation coming on. The truly ambitious boy oftentimes will find his own incentive and work towards it despite discouragements. It is infinitely better for the boss to provide an incentive by sharing the responsibility of his paint department. Make the younger man feel that he is something more than a cog in the machine, and he will more than make himself worth his salary.

While few stores are sufficiently large to delegate all of one man's time to the paint department, yet it may be made a starting point. Delegate the responsibility of your paint and varnish buying and selling to some one clerk under your own guidance. Watch his developments there, and when he is ready to graduate from that, add some other department to his responsibilities. There is a lot to learn in a paint department, and if it is mastered successfully it will show the young man's capacity for larger responsibility. With such an incentive before the right kind of boy, he is pretty sure to earn all he is paid for, and then some.

No matter what attitude the readers of this article may have towards the departmental stores, they have adopted

The Brush Department

Says Market Conditions Indicate Higher Prices for Brushes

World Demand for Bristles is Big Factor in the Situation—Russian Market Has Been Cleared of Raw Stock and China is Now Source of Supply

HIGHER prices for brushes are predicted by Dwight J. Reed, commissioner of the American Brush Manufacturers' Association, following a careful survey of market conditions. His report is as follows:

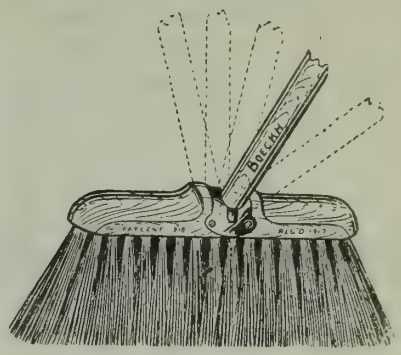
"A careful survey of the brush market made by the American Brush Manufacturers' Association develops the interesting fact that the prices quoted at this time are lower than they should be with raw material, particularly bristle, at the prices they command.

The Association's investigation develops the fact that most manufacturers bought their bristles last spring at prices ranging from $1.80 to $2.40 per lb. for fifty-five case assortments, and are now averaging their assortment cost at from $2 to $2.25 per lb. When these stocks are exhausted they cannot be replaced for less than $2.70 per lb., the price obtaining at this time.

It is apparent that there must be a material reduction in the Chinese bristle market before the prices at which manufacturers are figuring their bristle cost, i.e., $2 to $2.25 per lb., is reached. It therefore seems certain that American brush makers must increase the prices asked for their product and wait for a materially lower raw material market before lowering of prices will be possible.

The situation in Russia is so uncertain that it seems safe to state that the extreme prices at which Russian bristles are held will obtain for some time. This naturally will make an abnormal demand upon the Chinese market for long sizes of bristle.

All reports indicate positively that the Russian market has been cleared of raw stock. Some dealers have been forced to carry over into the new season orders which were contracted for 1918 delivery. Therefore, as soon as the season opens in China they will be compelled to rush into the market and get raw bristle. This will create a big demand and stiffen prices right at the beginning of the season.



Europe is also certain to be a heavy buyer this season and will help keep the price of all bristle up.

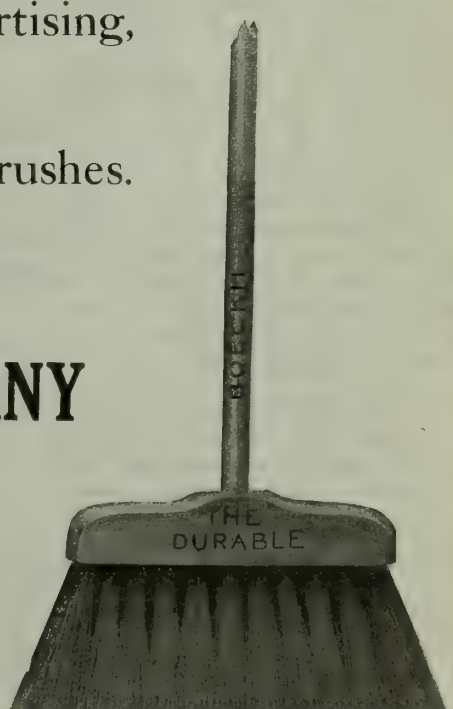
From the above facts the following is evident:

If the present prices in China continue brush manufacturers will be obliged to increase their selling prices when they replace their present stock of bristle.

Before a reduction can be made China prices must drop below the prices on which present brush costs are figured, and this is not at all likely to obtain this season, as all available information points to present Chinese quotations being maintained or advanced."

BOECKH'S HOUSEHOLD BRUSHES

The housewife is the one who knows what brand of brooms and brushes serve and pay her best, by ease in operation, length of service and maximum accomplishment. Experience teaches that



BOECKH'S HOUSEHOLD BRUSHES

are the best buy. They wear longer and work better than other makes.

You can safely recommend Boeckh's Brushes. The demand, created through their exceptional merits, and our extensive consumer advertising, makes for incessant sales.

Stock and display Boeckh's Household Brushes. It will pay you.

methods of developing and advancing their sales help, from which the smaller retail stores can take some lessons.

A departmental manager was up against the yearly problem of advancing his record over the previous year. It seemed to him that he had about exhausted every method that had been suggested or that he could devise,—till the the idea came that his staff could be of greater service to his customers by broadening their knowledge of paints and varnishes. He found that all of them needed larger knowledge of the make-up of paints and varnishes, as well as the broader idea of their use and application. He obtained several pamphlets which gave this information in condensed form. Each week he distributed one of these to each of his clerks. After he had distributed them, he gave each clerk a typewritten set of questions to answer, which were based on the facts given in these booklets. A monetary reward was given to the three turning in the best set of answers. As a result he found that his staff were giving his trade much better and more satisfactory service, with fewer complaints. Close checking of their sales records also revealed increased sales. Perhaps the most satisfactory result of this self-help incentive was the fact that he was able to pick out one young man for a more responsible position that he had in mind for some time.

Will Get Results

By directing the minds of your staff towards some definite goal with some incentive behind it, you can do more towards advancing the interests of your paint or any other department than if you attempt to keep all there is to know under your own hat and endeavor to direct your staff in their individual actions. Try and instil underlying principles in a broad way and then let them work out the details in their own individual way. The difference between the broad gauge store and the narrow gauge store is found in the fact that the former is made up of men capable of carrying out the big boss's ideas with initiative and enterprise and with an incentive before them, while the latter is a one man concern in which the boss is afraid to delegate responsibility to others; in consequence of which he cannot retain the man with ambition to do something on his own hook.

Is An Organizer

The big boss of the former is an organizer and director of capable men; the latter is continually handicapped by doing things that others ought to do for him. The big boss attracts ambitious men who make money for him. The small gauge store repels young men who might make money for it,—but can't.

There is more money in developing young men than in discouraging them. Look to the human element that comes under your control for your profits. Your store may be small but can be run on broad gauge principles towards bigger business. Train and keep the young men that will run it for you with big business ideas.

MAKING BORROWED IDEAS WORK

Continued from page 47

said earnestly, "if you tried to do away with the club you'd have three times as much opposition as you had from a few of us when you started the plan." To my mind that proves that the club has succeeded.

Must Fill In

The questions on the application we require a man to fill in when he asks us for a job are adopted from the application blanks of a great many concerns. They are so worded that we usually get the true answer—and not non-committal evasions. The methods of other concerns have shown us how to ask our questions to the best advantage.

Next time we have a lot printed, however we are going to revise some of the questions. A clothing manufacturer, we have found, asked them more skilfully; we are going to borrow parts of his phrasing.

In the upper left-hand corner of our blank—shown on page 47—is a little ruling headed "W" and "F" horizontally, and "1, 2, 3" over the vertical columns. In that ruling my brother and I put our personal impressions of the man. "F" is Fred, my brother; "W" is myself. Before either one of us hires a man he puts a check mark in the square to indicate whether he considers him first, second, or third-class and sends him to the other brother. I may judge a man 1; Fred may judge him 3. And if he does he passes him back to me to interview once more. This time I may come down to 2 and send him again to my brother. Eventually we agree in which class the man rightly belongs, and pay him accordingly.

Is Pretty Small

We do not pretend to be infallible; but the chance that we will both go wrong in judging a man is pretty small, experience has shown us. We usually get good men.

Another idea that we got from a concern in another line is the purchase order acknowledgment, reproduced on page 47. This is used by a big mail-order house. We made almost no change in the form, and adopted it as soon as it came to our attention. The sheet has a gummed edge by which we attach it to every order that goes out of our buying departments.

Since we started using it we have not had to depend on guesswork to give us delivery dates. The day after a supplier fails to make good his promise we follow him up; and to that form we attribute the fact that under the extraordinary difficult market conditions prevailing during the last two years we have had a fairly complete stock at all times—so near complete that not only other retail dealers but also even local jobbers continually come to us to get goods they cannot obtain elsewhere.

Send to Jobber

Occasionally when we haven't an article we send the customer to a jobber or a manufacturer to see if he can find there what he wants. This is, of course, a common practice in most retail and wholesale lines.

We used to have a lot of grief because of it, though. We would send a customer to a factory with an order on the supplier to sell him what he wished and charge it to our account. The customer would ask the price on the article; the manufacturer's salesman, thinking 10 per cent a handsome mark-up, would add 10 per cent. to the price he would charge us. And the goods would be charged to us at an actual loss over what it cost us to handle them on our books.

Bettered the Situation

Often as not, the manufacturer would invoice the goods to us, without mentioning that he had delivered them to one of our customers. As a result the customer was likely to escape all responsibility for his purchase. We had, you see, two distinct reasons why we did not like to send our customers to a supplier's showrooms.

Then about 18 months ago one of our executives went to a Chicago wholesale dry goods house to make a purchase for us. The wholesaler did not have the goods in stock, but sent our man to a manufacturer. The slip he gave him to show at the salesroom was so good that next day we had the printer make up some of them for us. The main difference between the form as we now use it and the slip that most concerns issue is that ours directs the supplier to show the goods and telephone us for an order number and price, while the ordinary slip is a purchasing order. We never lose a charge in this way any more. And we get a chance to set the selling price instead of depending on someone outside our organization to do it.

From Inside Too

But we do not get all our ideas from outside. We have been profitably shown from time to time that the steady flow of new ideas from the outside stimulates a similar flow from the inside. When men see improvements being made all the time they are likely to get the fever; once they are inoculated with the desire to introduce good ideas they are almost sure to produce something that pays in dollars and cents.

One of the most profitable methods we have of training our salesmen is starting them at what we term our kindergarten counter. This is the counter where we sell a thousand and one small items—nails, screws, hooks, bolts, and the like. This department is really a losing proposition, for a sale there rarely runs over 25 cents; more often the sale is 3 cents or 7 cents.

After a new employee has had his training in the stockroom we give him his selling tryout at this counter. If he can stand the gaff there, making peanut sales all day, he is not a floater, and in the

Varnish Service

Length of Service is the real measure of varnish value. It is the qualification that makes the most lasting appeal to the consumer. No matter how cheap varnishes are by the gallon, if they lack durability they are dear bargains, since it costs as much to apply a poor varnish as a good one.

Berry Brothers' varnishes, stains and enamels have an established reputation for producing handsome finishing effects that retain their beauty for many years. This long wearing period means economy.

Berry Brothers' label has for 61 years been accepted as the mark of efficient varnish service by discriminating buyers.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, April 24.—Changes of the week in paint markets are confined to a stiff advance of six to nine cents per gallon for linseed oil. Some look for seed to reach $4 per bushel in the immediate future, and the price to-day is very high. Turpentine is firmer. A car or two was received this week, and while the distribution of this will be quickly made, it will serve to help matters somewhat. Putty, white lead in oil and other lines are moving well. Mixed paint sales are large, and each week brings increased business.

Another Jump In Linseed Oil

Montreal

LINSEED OIL.—Another stiff advance is effected for linseed oil this week and there seems to be every evidence that seed prices will reach the $4 mark within a few days, if something unforeseen does not occur. At this writing, seed is selling at around $3.88 per bushel. The range of oil prices has advanced six to nine cents per gallon, and cheap oil does not seem likely. There is a fair movement.

One crusher looks for some English oil to reach the Canadian market in the immediate future. The "fixed" price of flax in the United Kingdom has prompted this, it is pointed out, this price being somewhat less than the present quotations made in this market.

Raw—		Imp. Gal.
1 to 4 bbls	$1 74	$1 77
5 to 9 bbls	1 72	1 73 1 76
10 to 2 5bbls	1 71	1 72 1 75

Boiled—		Imp. Gal.
1 to 4 bbls	$1 76½	$1 79½
5 to 9 bbls.	1 75½	1 74½ 1 78½
10 to 25 bbls.	1 73½	1 74½ 1 77½

Turpentine is $1.12; Still Lacking

Montreal

TURPENTINE.—Several jobbers are still unable to supply turpentine, although two carloads have been received this week. It has relieved the shortage to a limited extent, but the supply will not last long with the season opening, as it immediately will. Prices firmed to the extent of two cents per gallon, and there is no indication of lower prices. Increases are more likely.

Turpentine—		Imp. Gal.
1 to 4 barrels	....	$1 12
Small lots	$1 17	1 22

(Packages extra.)

Delivery of Putty Continues Good

Montreal

PUTTY.—A seasonably good movement of putty is made in this market, and there is a likelihood of this continuing in the coming weeks. Evidences are encouraging as relating to immediate future business. Some things have been conspiring to hold back operations, but with good weather conditions and a completing of plans for building, movement will increase.

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

White Lead Steady; Market Firm

Montreal

WHITE LEAD IN OIL.—There is a continuance of good business for white lead in oil, and the sales made are frequent rather than for heavy lots. At the same time the total volume is large, and much tonnage has been sent forward. Prices are firm under the advances made for linseed oil, and the following basis obtains in this market: Standard lead, five ton lots, $15.50 per 100 pounds; ton lots, $16; smaller quantities, $15.35.

Much Good Business For Paints, Etc.

Montreal

PAINTS, ETC.—Orders to the paint makers here are reported large, and the volume of business in prospect is big. A continuance of fine weather conditions is all that is now needed to make for a good season, and the time is really here when large operations will be begun. Reports indicate a beginning of new building in various parts of the country, and once this spirit is manifest, it will gain headway quickly.

TORONTO

TORONTO, April 24. — Higher prices on linseed oil have followed the sharp advances on flax seed and quotations are up from 6c to 15c per gallon over figures of last week. Turpentine remains in a firm position but there is no quotable change in the market here. Business is coming along very nicely, manufacturers of mixed paints and brushes being well pleased with volume of orders they are handling.

Linseed Oil Makes Big Gains

Toronto.

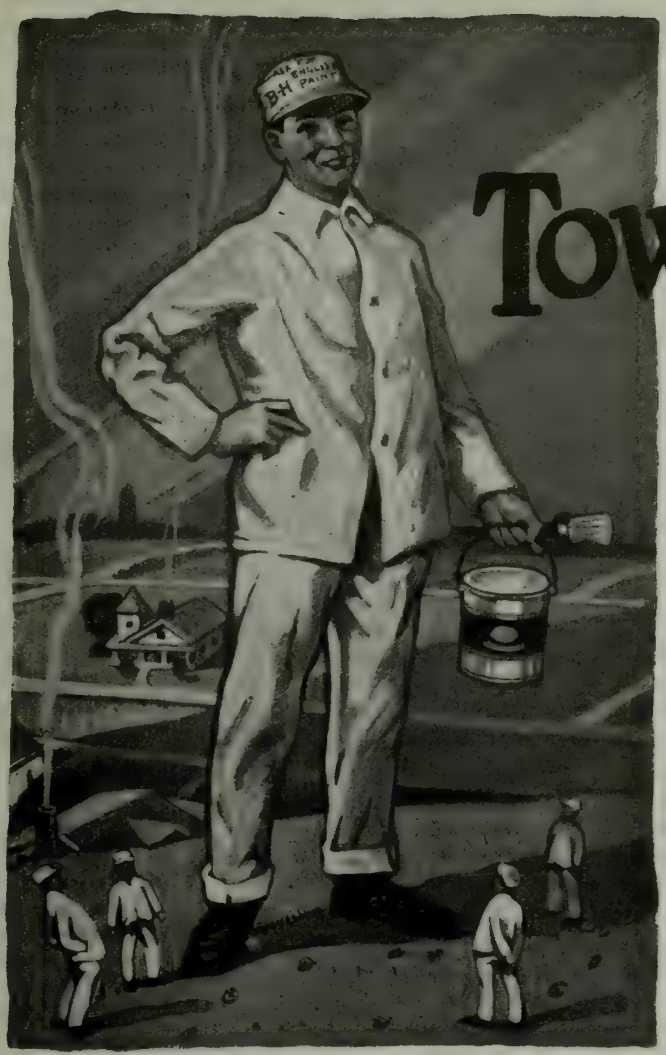
LINSEED OIL.—Big advances have been made in the prices of linseed oil this week following the substantial gains recorded in the flax seed markets. Tendencies of the seed market still seem upward and the outlook at present and for the next month is that prices will remain high. United States interests are buying oil and seed and there seems no immediate relief in sight from receipts of Argentine seed. There is some export business on linseed oil being done, too, from Canada, and with a very good demand locally the tendencies are all quite strong. A wide range of prices is shown this week, some factors selling raw oil at $2 per gallon in single barrel lots.

Linseed Oil		Raw	
1 to 2 barrels, gal.	$1 80	$1 95	$2 00
3 to 5 barrels, gal.	1 79	1 94	1 99
10 bbls. and over	1 77	1 92	1 97
		Boiled	
1 to 2 barrels, gal.	$1 82½	$1 98	$2 03
3 to 5 barrels, gal.	1 81½	1 97	2 02
10 barrels and over	1 79½	1 95	2 00

Prices shown are those ruling on Thursday of current week and subject to daily fluctuations of the market.

Turpentine Holds In Firm Position

Toronto.



TURPENTINE.—The market remains in a very firm position. Reports from the South indicate that receipts from the new crop are small and a very good demand is noted, both of which factors tend to strengthen the market. Locally supplies are very good and shipments are coming along quite satisfactorily. Prices here are:

Turpentine—	Imp. Gal.
1 barrel (barrel included)	$1.12-$1.15
2 to 4 barrels (barrel included)	1.11- 1.14
5 gallon lots	1.22- 1.25

Mixed Paint Business Good

Toronto.

MIXED PAINTS.—Business may be termed good in mixed paints and manufacturers are handling quite a large volume of orders. The undertone to the market is strong in view of the situation in linseed oil but no quotable changes are reported, the figures in current market quotations holding.

Towering High

above all other paint propositions—

Every B-H Agent realizes that he is in a position to offer his customers a "paint proposition" that his competitors have no means of equaling. He never has to say a word to his customers about B-H Quality—the Guarantee Label pasted on every can says it for him—and says it so emphatically as to place beyond all argument or doubt the goodness of

B-H "English" Paint

70% Pure White Lead
30% Pure White Zinc
100% Pure Paint

Consider first this outstanding fact of quality. Then consider the overwhelming superiority of the B-H publicity—which day by day is winning new converts to the use of B-H "English" Paint. Finally, bear in mind that you can sell this paint at as low a price as any other standard line and still make quite as much profit. All this means that the "profit and prestige" possibilities that go with B-H representation are such as to make our proposition tower high above any other paint representation ever offered to Canadian hardware dealers.

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

Activity In Brushes Noted

Toronto.

BRUSHES.—Manufacturers report a marked increase in the number of orders coming to hand—repeat business which usually comes at a little later date and which indicates that retailers must be getting the goods off their shelves early. Prices are firm and well maintained.

White Lead in Oil Holding Steadily

Toronto.

WHITE LEAD IN OIL.—The marked increase in linseed oil has tended to strengthen the market in white lead in oil although the price of the metal is lower. A better trade is being done with quotations unchanged, 5-ton lots being quoted at $15.80 per 100 pounds; 1-ton lots at $16.30 and less quantities at $16.65.

Glass Holds Firm; Putty Unchanged

Toronto.

GLASS, PUTTY.—The undertone to the glass market is firm and there is no indication of any immediate recession from present values. Stocks are ample for the demand but not heavy. Putty shows little of interest as yet. Prices are well maintained but orders are not very heavy.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

GLASS PRICES FIRM

According to those in close touch with the window glass situation there is no possibility of pre-war prices prevailing for some time. As far as Canada is concerned the supply will have to come from the United States, with no prospect of getting any from either England or Belgium. Manufacturers in the United States have placed their cards on the table with the Industrial Board at Washington, and the Board has publicly announced that if American dealers are hesitating over prices or expecting them to drop materially, their attitude in this connection should be dropped.

Ottawa Contractors Form Association

The Ottawa branch of the association of Canadian Building and Construction Industries came into existence at a meeting of the capital's contractors and supply dealers, held in the Chateau Laurier.

J. P. Anglin, president of the Association of Canadian Building and Construction Industries, outlined the aims and work of the association. Speaking on the increased cost in living and industries, he declared that since 1913 building costs, including supplies and labor, have only increased 57 per cent., which is relatively speaking, the lowest increase of any of the industries.

Other Increases

Statistics produced show that farm produce has increased 123 per cent.; clothing, 152 per cent.; drugs, 104 per cent.; and house furnishings, 133 per cent. In outlining the importance of an organization for contractors, Mr. Anglin stated that the building fraternity would eventually put themselves and their industries on the map. In the past years contractors had never been consulted by the Government on matters dealing with reconstruction and other important problems, and he stated that strong organization was the only means by which the fraternity would be able to command recognition. He outlined the propaganda scheme and voiced his approval of a standard form of contract, which would provide for labor troubles and arbitration clause.

Urges Co-operation

"If Canada is to get ahead in the next few years we will all have to work together for a maximum amount of production in all lines," he said. "As it is now, we are only getting about 25 per cent. efficiency, where it should be at least 50 per cent. We pay the men the wages they demand, but to increase our efficiency there must be some other incentive. Get your men to understand and take an interest in your business, and it will aid as a solution in solving the reconstruction problem."

Preliminary steps were taken by the contractors at the meeting to cope with any trouble that may arise with the building unions next month, which has been anticipated by many of the local contractors. A representative from each line of contractors and supply dealers was appointed on an executive committee who will interview the Minister of Labor on the labor question and appoint a council to meet representatives of organized labor to arrange a compromise should any trouble arise.

A. S. Clarson, general secretary of the Canadian association said that without efficient public and private education the corporation of contractors would easily wander into Bolshevism of industry. A primary duty of reconstruction is not only a better understanding between all builders and contractors, but towards better education. To this end they should have a representative sitting on every Government commission that may be appointed which has to do with repatriation, reconstruction, immigration or any other progressive movement that may arise along the lines of conservation of energy and ability. Public opening of tenders was another aim.

MAKING BORROWED IDEAS WORK

Continued from page 68

course of time he may become a good hardware salesman. We fill all vacancies in the other departments from kindergarten counter. And the comparatively low turnover of our salesmen is, we feel, largely due to the training and the test that they first get selling three bolts and five nails all day long.

Phones Stockroom

A good deal of our stock we must of necessity carry in our third floor stockroom, because keeping more than a sample on the selling floor requires too much space. When a salesman wants one of these items he telephones the stockroom and the merchandise is sent down on a dumb waiter.

The stockman can seldom tell offhand whether or not the item is in stock. And that used to mean that the salesman had to telephone upstairs again to find out what had happened to his order or else the stockman had to call him back to tell him.

One of our men, however, figured out a better method of handling this work. Now when the salesman calls up to order an item, the stockman writes his order on a small printed slip. If the goods are in stock the stockman puts the slip and the goods on the dumb waiter and sends them down. If they are not, he marks "o" on the slip to indicate "out," and sends the slip down the pneumatic tube, which runs beside the dumb waiter.

Saves His Time

Sonsequently when the salesman steps back to the dumb waiter he finds there either the goods or the slip. Less of his time has been wasted; and just one-half as many telephone connections to the stockroom are now made through our switchboard.

Some of our forms are of necessity rather complicated; and some of these complicated blanks must be filled out by employees who can not, perhaps, be expected to handle them always without an error. One of our more recent forms we have made as near foolproof, I am convinced, as any form can be made. The device that we use on this sheet is shown on page 000.

The various operations required in making out the sheet are numbered. The number of each operation is placed, surrounded by a heavy square, in the blank space where that operation is required. In the left-hand margin of the sheet the numbers are explained carefully. When the employee fills out this form he cannot go wrong if he follows directions which are constantly before your eyes.

That is a good form; but I have no doubt that before we have need for a reprint of it we shall have worked out several improvements. We seldom have a second edition of any form printed without making some change—in fact we are planning to use the little numbers on almost every form in our store. We seldom leave any method unchanged for more than a year or two.

The steady flow of new ideas is what makes our business earn bigger profits every day. And new ideas won't let us stand still.

P&L Dealers Have Steady Call For "61" Floor Varnish

WHY? Because it is advertised in a really *big* way. "61" Floor Varnish is a product which proved its quality *years ago!*

And "61" has gone right on giving just a little longer wear than we ever claimed for it; giving just a little better satisfaction than we ever said it would give.

What is the result?

Today dealers in all parts of the Country are reaping the harvest and profiting because their stores are identified with this steady-selling quality product — "61" Floor Varnish in Colors.

Are you one of these dealers?

If you're not, just jot down your name and address on the margin of this advertisement and mail it to us — we'll send you full particulars of our Introductory Assortment.

Does the Paint You Sell Make a Permanent Customer of Each Casual Buyer?

DOES it give such satisfaction that he will always return to you for that particular brand? Has it increased his faith in your store?

Does it cause him to look with more favor on your general line of goods which he has formerly bought from your opposition?

Remember every can of paint you sell is an advertisement for you and your store—good or bad according to the satisfaction it gives the buyer.

Paint is not a thing that can be used once and then forgotten. It stands in front of your customer's eyes day after day and month after month, and if it breaks down, chalks, scales off or fades he blames not only the brand but the store where he bought it.

Sell the best paint—it will pay you. Sell Lowe Brothers' Paint—with the quality in the can and the reputation behind it.

Lowe Brothers Paints

Have a reputation which proves a very valuable asset to every store which carries them.

They bring you that class of trade which every merchant prizes most highly—people who want the best and have the money to pay for it.

They draw to your store buyers you would not ordinarily expect to sell—people out of your territory—old customers of your competitors.

For Lowe Brothers' Paints are noted for their brilliant and permanent colors, their great spreading capacity, hiding power, easy working qualities and durability.

Write us for information about our special dealer's offer.

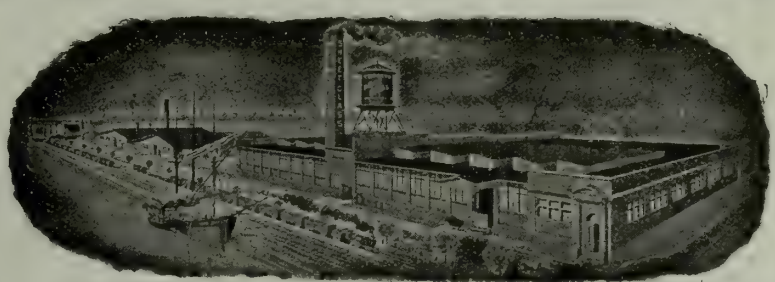
TRADE SIMMS SET IN RUBBER MARK

Profits From Your Painter Customers.

The Simms Set-in-Rubber Paint and Varnish Brushes have a setting that is absolutely proof against the action of acid, boiling water, alcohol, paint-remover, turpentine, etc.

The bristles are set to stay in FOREVER, by our exclusive patented process, whereby the bristles are set in vulcanized rubber and guaranteed to hold securely in the socket for all time.

Demanded of dealers all over the world. You will have **your** share of calls. See that you can fill them all.



Order a good supply to-day.

Used and recommended by the most progressive Physicians, Hospitals, Sanitariums, Convalescent Homes.

THE VIOLET RAY BENEFITS

by sending its irresistible, revitalizing powers through every nerve, cell, fibre and part of the body, even the heart being saturated.

The Branston Violet Ray reaches and heats the cause of disease, and so strikes at the very root of the disturbance.

The new book, Health Rays, tells all about these generators. ASK FOR IT.

GET OUR DEALER'S PROPOSITION.

GREAT WEST ELECTRIC COMPANY, LIMITED
WINNIPEG

Distributors of Laco Tungsten and Nitro Lamps

When you see the above Trade Mark on anything pertaining to Fishing Tackle you need have no hesitation in recommending it to your customers.

There is no possibility (except in a few articles) of prices for Fishing Tackle being reduced before next season, so that during the period of transition you would be well advised to place orders well ahead of your every-day requirements.

Orders for future delivery are now being booked, but owing to the great pressure we have had with Government work it will be some time yet before we are able to attain our pre-war output.

Our new General Catalogue is now in preparation, and we are placing on a Register the names of Fishing Tackle Dealers who will obtain a copy on publication. Have you sent in your name? If not, do so now.

In the meantime we invite and welcome your enquiries and will be pleased to quote you for anything we can supply. We are Wholesale only, and all enquiries from consumers direct are referred to the nearest retailer. We don't cut into his business.

Morris Carswell & Co., Ltd.
118 Howard Street, Glasgow, Scotland

MEHASCO

Another Mehasco Message

31

The popular Army Service khaki colored wagon with Rubber or Iron Tires in three sizes. No 79, 11" x 22", No. 80, 12" x 24", No. 81, 13" x 26". Other Steel Wagons are the Special, No. 59, 9 x 18; No. 61, 12 x 24; the Grey Artillery Car, No. 70, 12 x 24 and No. 72, 14 x 28; and No. 1½ Bent Rail Child's Wagon, 11 x 22.

The Auto Wheel Coaster Wagon is the most serviceable general purpose wagon on the market, has long roller bearings, steel axles, the spokes mitred to the hub, put up in corrugated cartons, each wagon guaranteed to carry 1140 lbs.

No. 01, 12" x 30" with 8-inch wheel; No. 2, 14" x 34" with 10-inch wheel; No. 4, 18" x 40", 12-inch wheel; No. 0, 12" x 28", with 6-inch wheel; No. 00, 12" x 28", with 6-inch wheel.

We have also a stock of Kiddie Kars and Boys' Velocipedes.

DOUGALL'S DA-COTE MOTOR CAR ENAMEL

RED
GREEN
CREAM
YELLOW
BROWN

BLUE
GREY
BLACK
WHITE
KHAKI

As a means of linking up your store with the motoring community of your town, there isn't a better product on the market to-day than DOUGALL'S DA-COTE.

Economical to the consumer, it ensures a steady flow of business your way. Giving, as it does, entire satisfaction to the user (even though he be a Simon-pure amateur painter), there are no come-backs nor disagreeable tangles for you to straighten out.

DOUGALL'S DA-COTE is a sure means of your building up a permanent, profitable trade. It's the Motor Car Enamel of to-day, easy to use, sure to satisfy, costs very little as compared with what garage painting charges usually are.

DOUGALL'S DA-COTE may be successfully used in repainting Motorcycles, Buggies, Baby Carriages, Velocipedes, etc.

Ten shades, including Black and White.

Color Cards and selling helps free for the asking.

Write us to-day.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND
A
ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Easy to put up and easy to take down

Guaranteed not to sag or warp

KASEMENT SKRENE DORES

Screen door season will soon be here. You will have to hurry and stock up in time for the summer trade. Right in line with the policy of always selling only the best merchandise in your store, it will pay you to investigate the sales-creating features of **"Kasement Skrene Dores."**

There are no other screen doors like them on the market to-day. The strongest and lightest made. A man weighing 200 pounds can swing on a **"Kasement"** door like a gate without damaging door or hardware.

They cost no more than any make of good door—wear longer, and are the cheapest in the end.

Fit perfectly even on a casement that's "out of line." May be hung in 15 minutes. Save time and labor. Made of selected B.C. Fir thoroughly air dried and excellent quality mesh wire cloth, black painted. Plain designs, neat, attractive and in a variety of finishes.

A complete set of nickel-plated "Kasement" hardware, packed in individual cartons, is furnished with each door.

OUR GUARANTEE

We guarantee "Kasement" Skrene Dores NOT TO SAG OR WARP OR PULL APART, and to give absolute satisfaction. We authorize dealers to refund purchase price if customer is not entirely satisfied.

Send in a trial order to-day or write for more complete information. "Kasement Skrene Dores" will satisfy your customers and you will make good profits selling them.

Any member of the family can skim clean and get the same results with a

SHARPLES
SUCTION-FEED CREAM SEPARATOR

There are no substitutes for Dairy Foods.

Turning a Sharples is as simple as winding a clock—any member of the family can do it. Little Mary, with her childish strength, can turn the Sharples bowl as slow as she pleases and get just as much butterfat as big, strong father. Same with the boys. If they want to hurry through they can speed it up or if they feel lazy-like and turn slowly, the Sharples will skim clean. And mother can turn the Sharples Separator at the speed which best suits her, and not have to worry about a hard fixed speed. Do you wonder that the Sharples Separator is considered one of the family in thousands of homes?

To skim clean at any speed is only **one** big advantage that no other separator but the Sharples Suction-feed offers. The knee-low tank does away with heavy lifting—the one-piece bowl, without discs or plates means easy cleaning—the once-a-month oiling system saves—these are all **exclusive** with Sharples.

Dealers: Get in on the Sharples Plan

Not every dealer is eligible, as the Sharples contract is not being "hawked around." But those who can qualify have a big advertising campaign (of which this "ad" is a part); a 100% American organization and factory to back them up, and the fairest, most profitable contract on the market.

Correspondence invited from professional dealers. Write to nearest branch.

The Sharples Separator Co.

West Chester, Pa.

Sharples Milker---the ONLY milker with a squeeze. Send for Catalogue.

Branches: Chicago, San Francisco, Toronto

"Over 2,425,000 Sharples Separators in daily use."

Do High Prices of Machine Tools Hinder Sales?

THE question asked of a considerable dealer in Toronto by THE FINANCIAL POST is answered by him in THE POST of March 8th, in part, as follows:

> "New lists that are coming out do not show concessions in prices. As long as firms can sell at the present prices there is not much chance for a lower level of values."

The rest of that article in THE POST is interesting, and here are some other extracts worth noting from POST items of this week:

Implement Manufacturers May Unite for Export Trade

"Representatives of the implement manufacturers have been at Ottawa in consultation with the Canadian Trade Commission to arrange for the pushing of their export business. What is likely to be proposed to them is that they should work in concert, and their orders abroad should be placed through a central selling body, the expenses of conducting which should be maintained by a pro rata tax on each member of the association. They will provide their own credits from a common fund, which can be created by contributions gauged according to the respective interests involved."

Steel Market Is Still Unsettled

Big American Interests Co-operating in Secretary Redfield's Plan

The talk of lower prices for steel continues in the market. It is a fact that the "set prices" of the war period have, in many ways, spoiled the trade for what has followed. When prices were fixed, buyers and sellers knew their ground for the coming three months. Not only so, but they were quite certain that when changes would be made they would not be radical, and would be in keeping with the cost of material and labor entering into the output.

Last week a number of prominent steel producers were meeting in New York, and according to the authorized version they "discovered" that George N. Peek, recently named by Secretary Redfield as chairman of "The Industrial Board of the Department of Commerce" was in town, and accordingly they invited him in to explain Secretary Redfield's plan for the deflation of war-time prices. Indications are that the steel producers are going to make a show of resisting the movement, but will gracefully yield at the last moment.—"The Financial Post," March 8, 1919.

Above is part of a front-page news item in THE POST of March 8th.

Latest Activities of Steel and Iron Using Interests

Stove Manufacturers Out For Export Trade

"The Canadian stove and enamelled ware manufacturers are making an aggressive effort to develop export business and to secure orders from Europe, Australia, New Zealand and South Africa. A. M. Smith, sales manager of the McClary Manufacturing Company, will, on behalf of the manufacturers, make a personal investigation of European prospects."

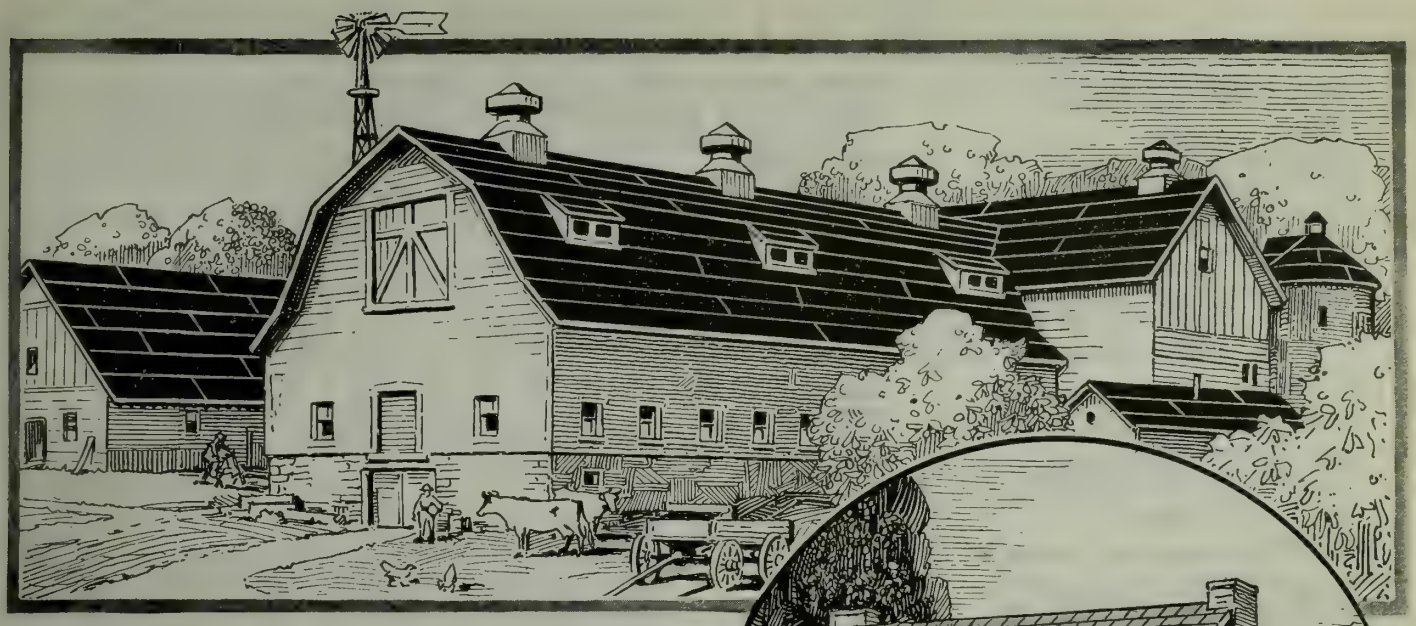
New Ship Repair Plant For Vancouver

"Seattle men propose to build at Vancouver, B.C., a steel dock of 25,000 tons, capable of handling the largest ships which make the Port of Vancouver. Embraced in the enterprise will be a shipbuilding and repair plant, the whole to cost in the neighborhood of $4,000,000."

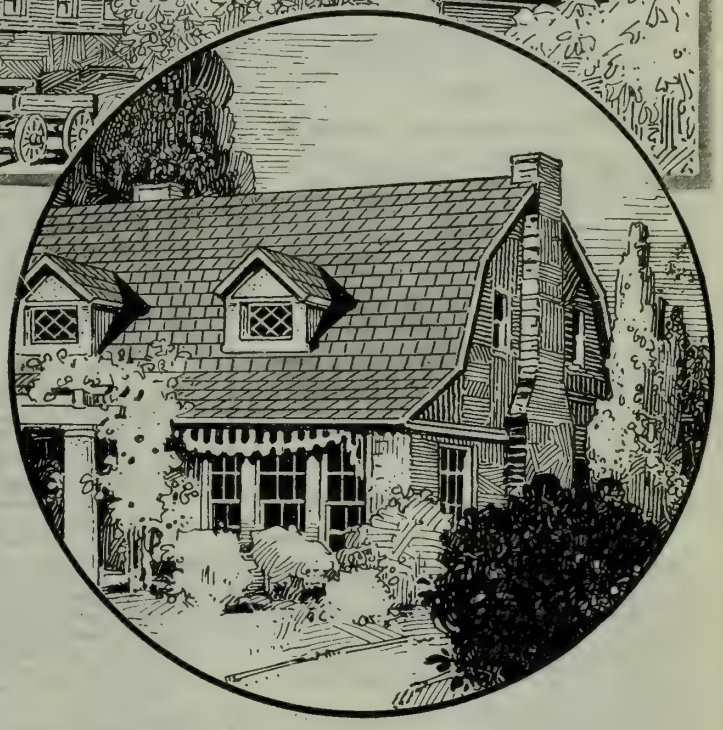
New Iron Industries For Border Cities

"Plans are being made for the location of a large malleable iron corporation with extensive connections in the United States, on the Windsor industrial site. Negotiations to this end have been pending for considerable time. Altogether, 12 large manufacturing firms with headquarters across the border are negotiating for sites in the Border Cities."

Business Building News Items Appear Each Week in *The Financial Post*



The above are only a few of the many subjects of real profit-making interest to Canadian men of affairs which have been dealt with by expert writers and editors in THE POST of March 8th. THE POST will keep you informed on Canadian business matters in a way unrivalled by any other publication. Send for a subscription to-day. The price is $3.00 per year, and you have only to fill in this form:



The MacLean Publishing Co.,
143-153 University Ave., Toronto.

Send me THE FINANCIAL POST every week till further ordered. I will pay subscription price, $3.00 per year, on receipt of bill, or you may draw on me for this.

Barrett Everlastic Roofings

EVERY one of the four types of Everlastic Roofings is backed by The Barrett Company with 60 years' experience in the roofing business. All styles are sold by dealers everywhere.

Everlastic Multi-Shingles (4-in-1)

The newest thing in roofing — *four shingles in one.* Tough, elastic, durable. Made of high-grade water-proofing materials and surfaced with real crushed slate in soft art-shades of red or green. When laid, Multi-Shingles look exactly like individual shingles and make a roof worthy of your finest buildings. They are weather- and fire-resisting to a high degree. Fast color; need no painting. Being four shingles in one, they save a great deal of time in laying and require fewer nails.

Everlastic Tylike Shingles

Made of the same material and with the same natural slate finish (red or green) as the Multi-Shingles described above, but made in individual shingles, sizes 8 x 12¾ inches. A finished roof of Tylike Shingles is far more beautiful than an ordinary shingle roof and in addition, costs less per year of service.

Everlastic Slate-Surfaced Roofing

The most beautiful and durable roll roofing made. Manufactured the same as the Everlastic Shingles described at the left, but comes in rolls. Surfaced with real crushed slate in soft shades of red or green. The slate not only makes a very handsome roof but one that is fire- and weather-resisting and very durable. This roofing requires no painting, as the colors are fast. Nails and cement included in each roll.

Everlastic "Rubber" Roofing

This is one of our most popular roofings. Thousands upon thousands of buildings all over the country are protected from wind and weather by Everlastic "Rubber" Roofing. It is tough, pliable, elastic and very durable, and the price is low. It is easy to lay, no skilled labor being required. Nails and cement are included in each roll. It is made of high-grade water-proofing materials and is particularly suitable for use on the farm, insuring dry, comfortable buildings under all weather conditions.

Write for free booklet. **For further details write nearest office for free illustrated booklet covering all these types of roofing**

Paint Insurance

M L QUALITY

Preach the gospel of **Paint Insurance** to your customers. It's the logical way to sell Paint.

MAPLE LEAF PAINTS

have the necessary decorative qualities, but that is not all. Their claim to superior quality is based on their extraordinary protective qualities. When applied to outdoor buildings they are the biggest factor in the reduction of deterioration, and that's real **paint insurance.**

There's money in selling **Maple Leaf** paint insurance. Write us for our proposition.

FOR WOOD-WORK

Make Business Hum

FOR FLOORS

There is nothing like being well stocked up in Sun Varnish Stains—particularly at this time of the year.

They bring you new customers—and bring back the old ones.

They transform shabby furniture, woodwork, floors and panelling—making them shine with gloss and smoothness.

Sun Varnish Stains

FOR FURNITURE

are invaluable in the housecleaning job. Permanent stains combined with durable varnish—in the popular hardwood imitations. They last long—are absolutely waterproof—can be used on the floors as well as on the best furniture.

FOR DOORS

Mighty good business-getters for you. There will be a large demand for them this Spring. Discretion suggests that you lay in an ample supply.

If you are not carrying CP Lines, write us for our special proposition to Agents. The sterling qualities of CP Lines are backed up by judicious and liberal advertising, and by the most complete line of sales-helps for the dealer that ingenuity can devise.

Get in Touch with Us—To-day.

Protect Your Reputation

Your reputation as a hardware dealer will depend much upon the quality and make of the hardware specialties you carry in stock. That is why it is essential in selling Garden and Lawn Hose, or Rubber Belting, that you sell dependable qualities or brands that have established a record for service.

In that respect, your reputation will be fully protected, if you buy and sell Dominion Rubber System Hose. These are always safe lines to put into stock. They carry the backing of the largest and oldest rubber manufacturing organization in Canada, and you can be absolutely sure of satisfactory service.

No. 300 Hose is the favorite. The material and workmanship are guaranteed. Its value is without equal.

If your stock of Lawn and Garden Hose is not complete, write to the nearest Dominion Rubber System service branch for prices.

HYSLOP BICYCLES

FRAME REINFORCEMENT IN SECTIONS

This illustration shows the great strength of the improved reinforced joint construction. Hyslop Bicycles are fitted with the fool-proof ONE-PIECE CRANK HANGER and a positive drive Eadie Coaster Brake. The parts are carefully tested and the bicycle is built to withstand the roughest road conditions.

The frames are of the latest racy, smart, attractive appearance which compels attention. You are passing up a sales opportunity if you fail to carry in stock a few of the 8 distinctive models in all sizes, 14 inch to 24 inch, and a variety of colors.

They SELL as easily as they RIDE.

4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

An ad for help in the Classified Advertising Section will bring the right kind of replies.

Try It Out.

Hardware and Metal

Classified Advertising Section

143-153 University Ave., Toronto

TRANSLATIONS

ENGLISH INTO FRENCH. COMMERCIAL, Financial and Technical Literature. Advertising booklets, catalogues, circulars, posters. Private correspondence. Manufacturers and Manufacturers' Agents desiring English to French translations will secure expert service at a moderate rate by addressing Leon A. Archambault, P.O. Box 135, Station B, Montreal.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are arctively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeping, please remit with copy, preferably by money order.

Every Hardwareman Should Know

O-Cedar Polish

Should experience the satisfaction of its USE

HAVE you ever **used** O-Cedar Polish?

Have you ever tried it on your automobile, piano, furniture or floors?

You cannot be as enthusiastic about O-Cedar Polish as this product calls for, unless you have seen with your own eyes, the wonderful results you can obtain from its use on your car or furniture.

IF your automobile or some treasured piece of fine furniture has acquired a dull and lifeless look, try some O-Cedar on it. Get a piece of cheese-cloth, wet it with water, wring it until moist, pour on O'Cedar Polish until cloth contains as much O-Cedar as water—then go over the surface to be cleaned. Note the soft, soapy lather—see how this lather cleans the surface and brings up the beautiful color or grain of the wood.

FINALLY polish with a dry piece of cheesecloth—note how easily the water and polish not used in bringing up the lustre are removed. Now rub the dry back of your hand across the surface—see what a dry, hard, surface you have—O-Cedar cannot collect dust.

After you have had the above experience, how can you keep from selling O-Cedar Polish to your customers?

SUMMER TOYS

Spring will soon be here. Before long the children will be out-doors again. Be sure you are stocked with a complete line of summer toys. Right now is the proper time to place your order. It will enable you to make a display of the new goods in time to capture some good business.

Sand Pails and Shovels

Here are two representative lines we manufacture:

Kiddies' Mechanical Humming Tops Finished in attractive colors, and whenever displayed result in an increase in sales. They should be ordered now, as the summer needs of your customers must be supplied soon.

Write for catalogue No. 44a, telling you all about Kiddies' toys.

Finished in attractive lithographed colours that delight the eyes of every child who sees them. Well made and extra strong.

The Thos. Davidson Mfg. Co., Limited, Toronto, Ont. Montreal, Que. Winnipeg, Man.

Sterling Spark Plugs

The Real Test

What a spark plug does in every-day use is the real test of its worth.

A practical plug—not a theoretical plug—is the kind that will keep your motor hitting on all cylinders.

Sterling Spark Plugs are practical plugs, made by a firm whose wide experience in the manufacture of gasoline engines has furnished first-hand information on spark plug requirements.

Sterling Spark Plugs were developed in actual service under most severe operating conditions and amply demonstrated their worth before being offered for public sale.

Test Sterling Plugs yourself—in your car—under actual conditions. That's a far better test than any laboratory test.

For sale by progressive garages and supply dealers everywhere.

"W & B" Nail Hammers have the true ring of the best drop forged steel.

They are not made under pressure, but are drop forged—

hard, dense, tough, true

Every "W & B" Hammer has all these necessary qualities:

it is accurately balanced;
it is carefully heat treated and tempered;
it has a straight grained white hickory handle;
it is the kind of tool the best workman likes.

All "W & B" Hammers of the same style are alike—in weight, finish, balance, design and serviceability.

Make your drive with "W & B" tools and you have sixty-five years of the most resourceful experience with you.

Is Your Bank Account Positively Protected?

IF a crook gets possession of your check, raises it to any amount you dare think of, and cashes it at the bank, what evidence have you to show that the fault is not yours?

Don't trifle with your bank account. You can get "standard protection"—for the first time at the ridiculously low cost of **$10.00,** the price of the

DIMUNETTE CHECK PROTECTOR

FOR PERSONAL AND BUSINESS USE

It is true, a Dimunette Check Protector may never save you a cent. And it may save you every dollar you're worth.

That's why the jobbers are co-operating to get every merchant to protect his bank account — to drive the check crooks away from the hardware trade.

Folks who hesitated to get check protection lost over $20,000,000 last year alone.

Get a demonstration at once. Ask the next jobber's representative who calls.

$10.00 Will buy "Standard Protection" for your bank account. That is the process by which the check paper is shred and impregnated with acid-proof ink. Standard protection HAS NEVER FAILED. It defies the wiles of every check crook.

4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

STEWART SHEEP-SHEARING MACHINE No. 9.

A Wonderful Seller Always

But especially so this year.

Tempted by the high prices of wool, and mutton, tens of thousands of farmers and stockmen have gone into sheep-raising in real earnest—for the first time in their lives.

And, old sheep-raisers have doubled and tripled the size of their flocks.

This means a tremendous increase in the demand for

Stewart No. 9 Ball Bearing Sheep-Shearing Machine

Have you increased your stocks of this machine in proportion to the increase in sheep-raising in your community?

If not, better wire your jobber (or wire us) for immediate shipment by express of your requirements, at list less 25%, list price, $19.00.

And don't let any sheep owner however small his flock, cheat himself out of 15% of his clip this year by using hand-shears!

The Stewart machine not only gets that extra 15% by clipping closer all over the animal, but it delivers the wool in more salable condition because it is free from the short-lengths that are always left by hand-shears.

Don't wait to send for our catalog but get your order in at once.

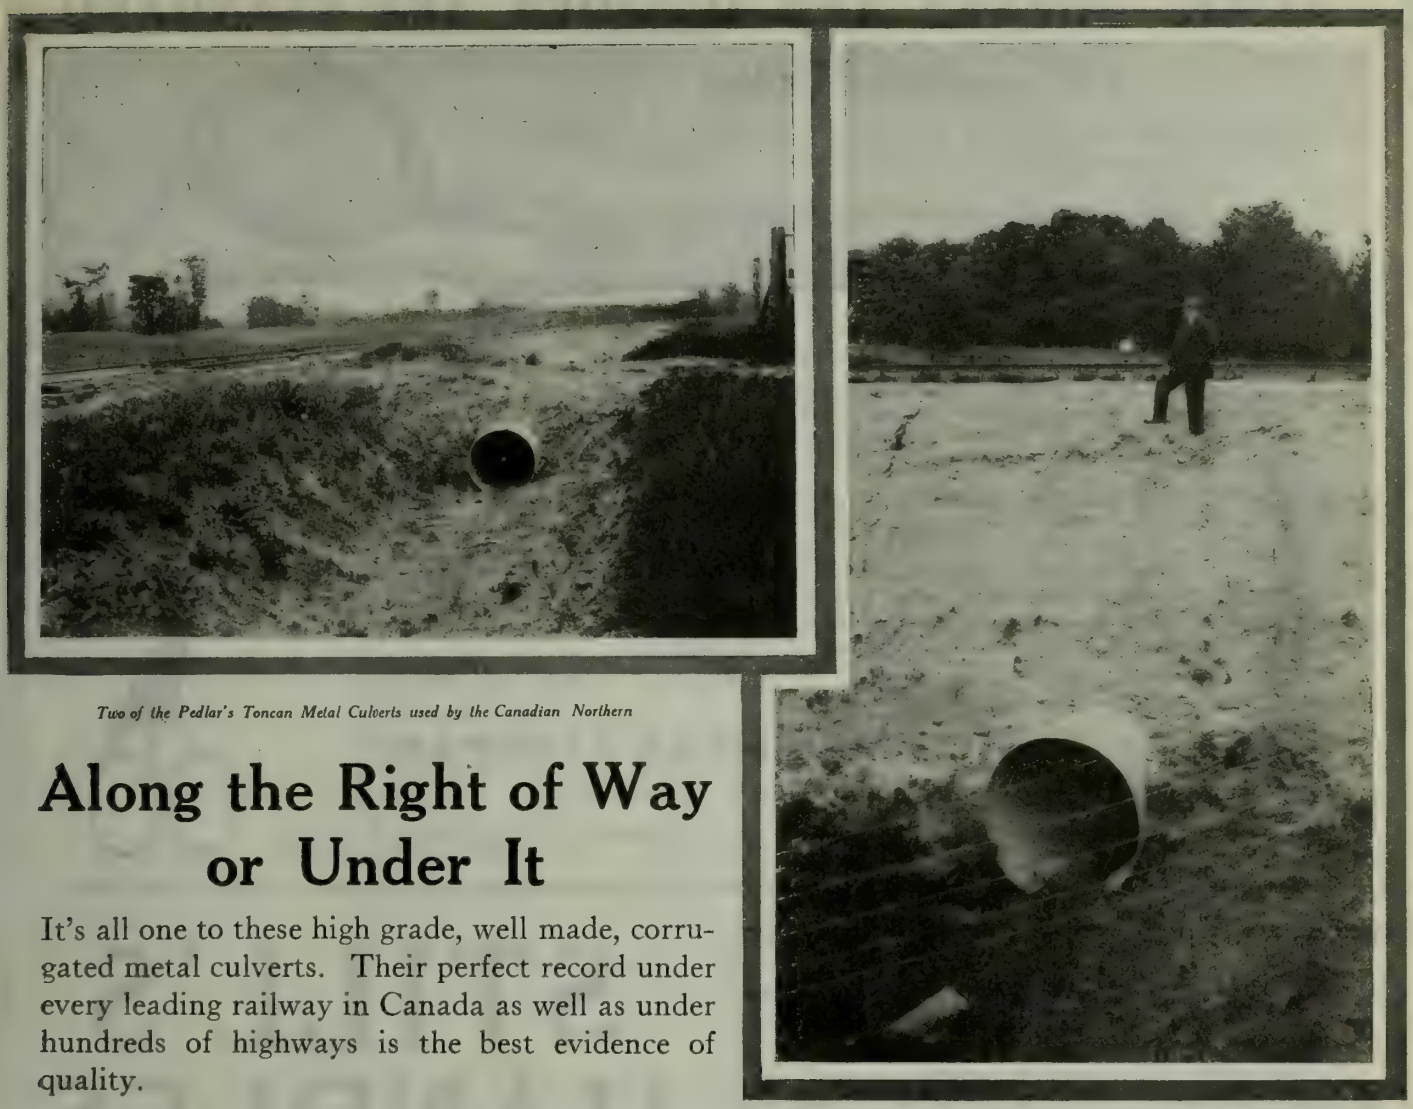
Here Is A Line That Is Growing In Demand

There has always been a need for a tough Kraft paper coated with asphalt to make it waterproof and durable. Therefore, when we put this paper on the market under the name

Climax Sheathing Paper

there was a demand waiting for it.

Climax is the ideal paper for damp-proofing, wind-proofing and insulating purposes. Architects and contractors recognize it as unexcelled for use between footing and foundation of buildings; between foundation and wall; between foundation exterior and the earth; below basement cement floors; underneath floors in houses; on walls before lath and plaster are put on.



Climax makes a building dry. It makes it cooler in summer and warmer in winter. It saves coal.

With the large number of uses of Climax Sheathing Paper—and its exceptional quality considering its low cost—there is a splendid opportunity for hardware dealers to build up a large trade for it in their localities. Our consumer advertising will assist them to increase their sales.

Stanley Tools

"ZIG ZAG" RULES

The term "ZIG ZAG" as applied to folding rules made of flexible wood is a trade-mark belonging to this Company.

They are made with two distinct types of joints, the Concealed Joint in which there is no hole through the wood, and the Rivet Joint in which the rivet is carried through both wood and joint. Both types contain a stiff spring which holds the rule rigid when open, even in the longest lengths.

Several other patented features add special value to the Stanley and Victor rules. Made in all standard lengths and finishes.

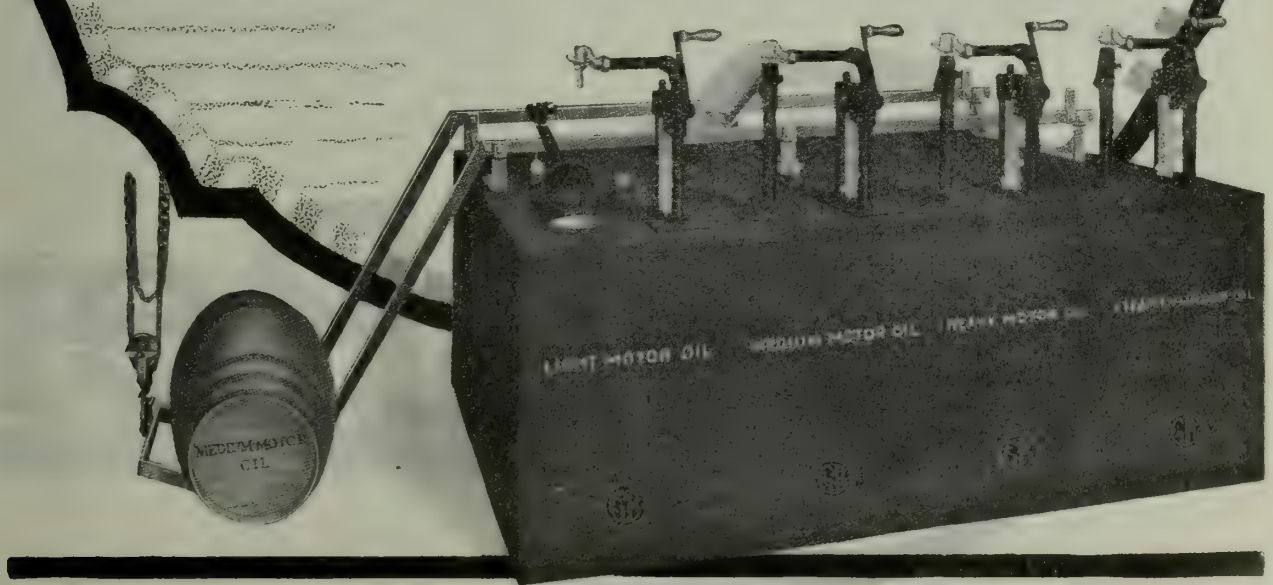
Cleaner Oil, Economically Handled
No Waste, More Profits.

This sums up the advantages of the dust and dirt-proof, leak and waste-proof battery of



GILBERT & BARKER
T-230-L Lubricating Oil Outfit

It replaces the fire risk, mess and waste of barrel storage, with safety, convenience and economy. The oil is kept absolutely clean and cannot evaporate. The modern hardware dealer is making additional profits catering to the automobile trade.

This outfit can be put in the rear of the store, quickly available to serve the auto trade with oil. A barrel track and chain hoist enables any man to drain a barrel with ease and despatch. It's such a good investment, making for such positive economy and additional profits from the handling of oils, that it soon pays for itself. At least this has been the experience of thousands of users.

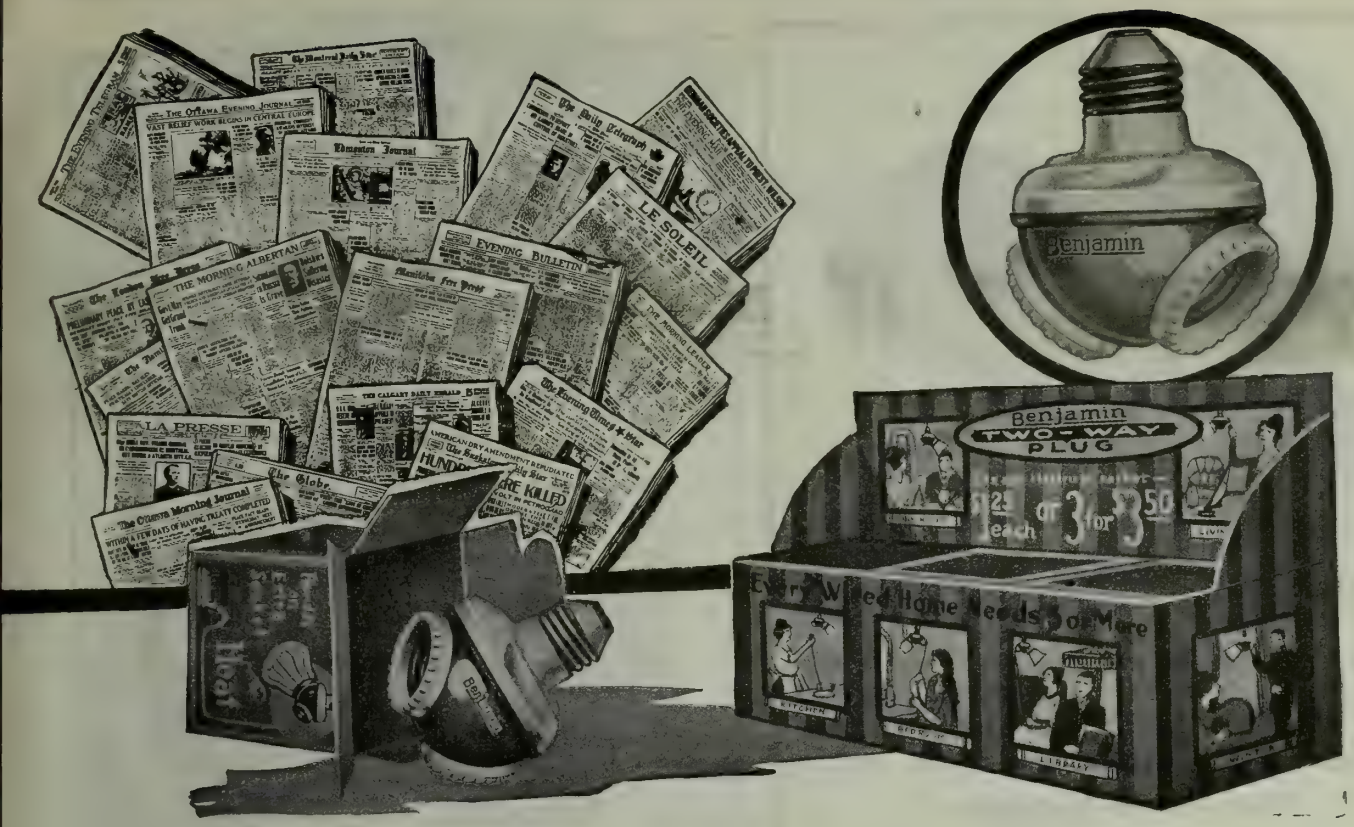
Salesmakers for Salesmen→



Benjamin Two-Way Plug

Advertising

EVERY salesman who is striving to increase his sales appreciates advertising co-operation. He appreciates even more a merchandising *idea* that has a real power to increase his sales of a product. This year's plans for advertising and merchandising the Benjamin Two-Way Plug mean easier and larger orders.

Ben

and Merchandising Plans

For instance, customers of all sizes and localities will respond quickly to the new self-selling "3 for $3.50" display carton. They will recognize the merits of the bigger, better campaign that is not only going to push Two-Way Plugs, but is planned to make the Benjamin name a household word. Newspapers all over Canada, will soon be emphasizing to the public the reasons why they *need* and should *insist* on *Benjamin Products.*

In addition there are display stands, folders, envelope stuffers, stickers and other sales helps, all supplied free of charge, for use in your store and distribution to your customers.

To merchants and salesmen—You can make profit out of this campaign for bigger sales by actively connecting up with our programme.

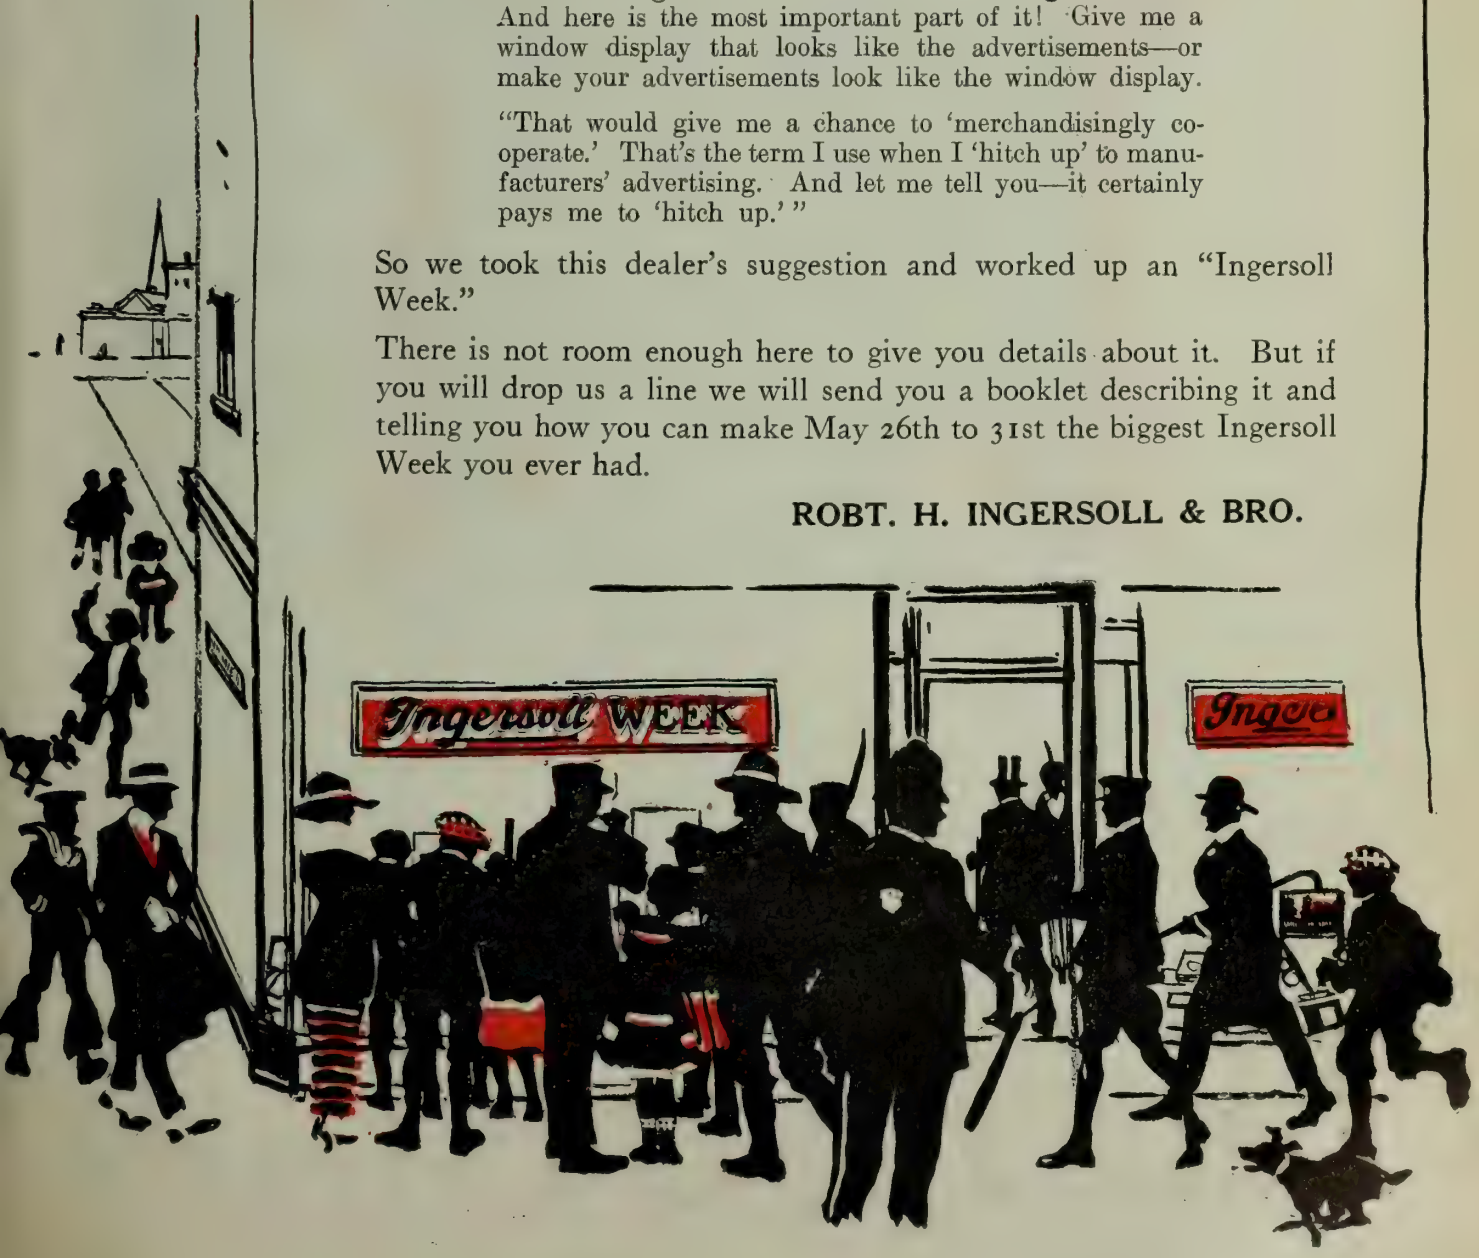
Ingersoll Week May 26-31

One of our customers is to be thanked for the "Ingersoll Week" Campaign.



This gentleman was in to see us not long ago, and after showing him a schedule of the advertising we had planned to cover the Dominion for this year, he said:

> "That looks good to me! But what I would like to see you do besides that is to have a real advertising 'smash' for one week or so, advertising in newspapers. Call it 'Ingersoll week.'
>
> "Run some good-sized advertisements during that week. And here is the most important part of it! Give me a window display that looks like the advertisements—or make your advertisements look like the window display.
>
> "That would give me a chance to 'merchandisingly co-operate.' That's the term I use when I 'hitch up' to manufacturers' advertising. And let me tell you—it certainly pays me to 'hitch up.'"

So we took this dealer's suggestion and worked up an "Ingersoll Week."

There is not room enough here to give you details about it. But if you will drop us a line we will send you a booklet describing it and telling you how you can make May 26th to 31st the biggest Ingersoll Week you ever had.

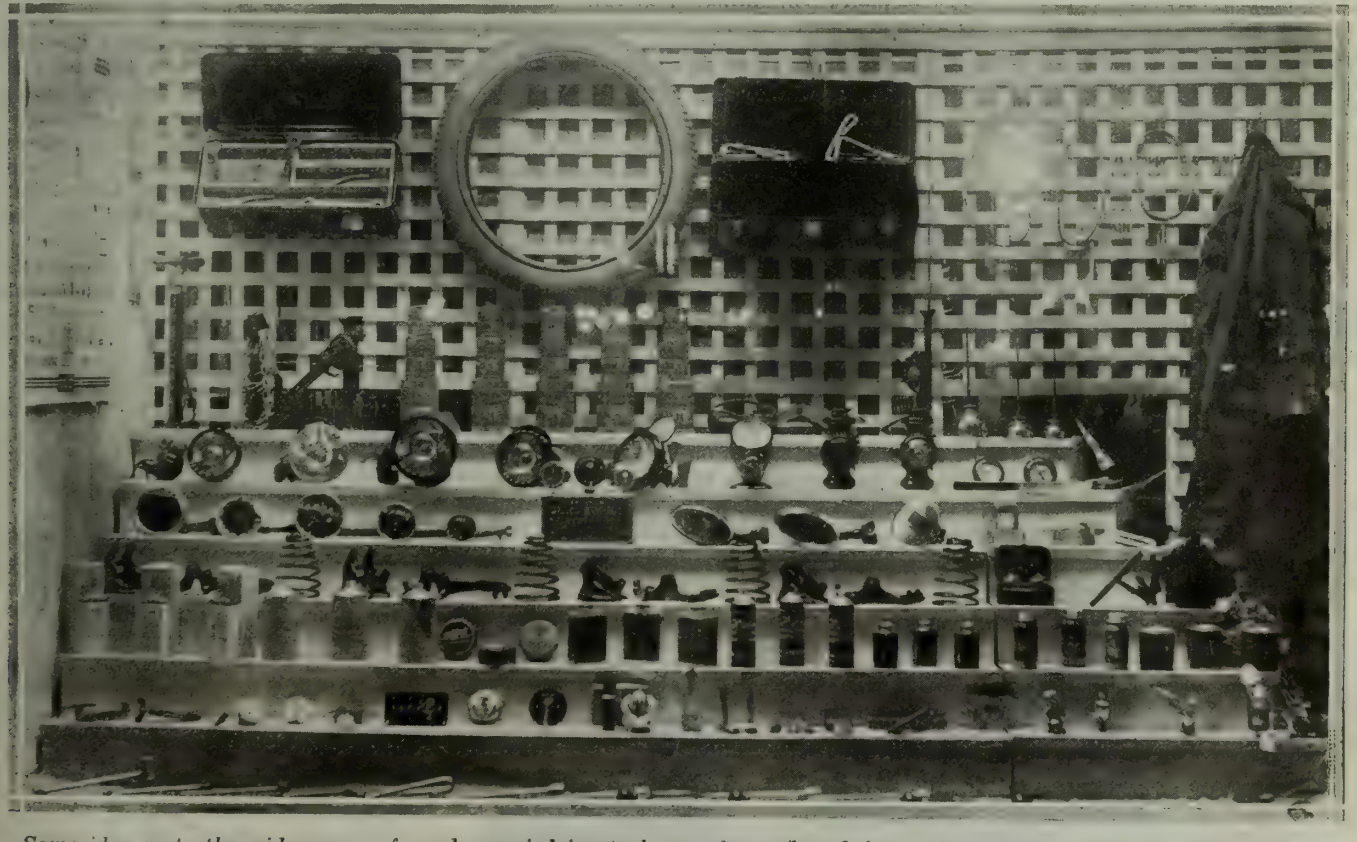
Building a New Business Leader

Development of Auto Accessory Department of Winnipeg Store Sounds Like Romance —From a Point of Little Interest to the Leading Line in the Store—Advertising and Displays Point to This Hardware Store as Headquarters for Motorists' Needs

THERE are probably many stories of development in business building which sound a note of romance, and were it possible to secure the story of how many hardware men, by their activities since the outbreak of war, built up a trade on the ashes of a former well-established business — well, there might be romance.

At any rate, the adaptability of the hardware merchant to changed conditions is no myth. This is shown by one Western merchant, W. A. Templeton, Winnipeg, who now rates as a motor accessory headquarters, whereas four or five years ago his activities were almost solely devoted to builders' hardware and lines related thereto.



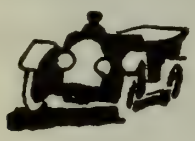
How It Started

It is not to convey the idea that the outbreak of the war found this business a weakling that the opening paragraph was written. However, by those merchants whose trade was largely derived from the building trades, it will be remembered what the war brought about. No building—no business, and it was to counteract this latter that W. A. Templeton started investigating the merits of the auto accessory field.

Carries the Stocks—Works

Asked as to how he had achieved such a success in the motor accessory business, Mr. Templeton replied: "I carry a well-assorted stock—one I claim second to none in the city—and mighty hard work." There is a good combination, but it has taken an awful lot of the latter—work—for him to be in the position where he can say the former.

Mr. Templeton had heard the call of the motorist in a slight way four or five years ago—he carried a few spark plugs, wrenches and some odd lines but it was not looked upon as the big field when other goods were moving so well. At



Some idea as to the wide range of goods carried in stock may be gathered from this window display. The idea of steps on which goods stand out has been found to work out splendidly. This is a window display in the store of W. A. Templeton, Winnipeg.

least, time was so consumed with other things that, perhaps, the proper consideration was not given to motor accessories—when the builders' hardware business fell away, something had to be done.

Outlook Was Not Bright

The position in which this merchant found himself was unlike many others. The store is located on Portage Ave., the big retail street, and whereas some business came from householders nearby, it was not large nor sustaining business, the store is not located in or adjoining

what might be called a residential district. There was no country trade such as might be experienced in smaller towns. Altogether the outlook was not one to encourage a natural-born pessimist and it might well have taken the cheer out of many an optimist. But it was not that way with the proprietor of this store. He decided his field was motor accessories and went to work.

Studied the Game

"And it has been hard work, too," Mr. Templeton stated. "I have read and studied and investigated. Any lines under new goods illustrated in HARDWARE AND METAL or shown in the advertising pages, I followed up. As a line was put on the market I got in touch with the manufacturers, ordered a sample, tried it out—if I felt it was a good line I arranged to stock it—if not I passed on to something else. It has been like that since I devoted so much of my time to auto accessories. The business has been a continual study and I am reaping the benefits to-day in a constantly-growing list of customers. My stock I have enlarged slowly as I felt my way. I might compare the early stages of the game to the first steps a youngster takes—they are slow and cautious, and it is some time before they feel sure enough to stand alone. That was my position but now I can say that I have a big business in auto accessories, developed from carrying a widely-assorted stock. Perhaps I might go further and say that there are more people think of Templeton's as a motor accessory headquarters than a hardware store. People know me now who had never heard of me four years ago; I advertise myself as 'Headquarters for Auto Accessories.'"

How It Has Helped

This careful consideration of each angle of the business, the knowledge of the goods he is selling, is a decided factor in the success of any merchant. No matter what it may be that he is selling, the man who knows can more often than not make the sale. The consumer likes to feel that back of the salesman is a knowledge of his needs and that he can depend on the salesman's say so. When this basis is established the customer comes back and it is from those that keep coming back that the success of the business is assured.

Newspapers — Windows — Interior — Service — A Hard Four to Beat

Perhaps the methods used by Mr. Templeton to develop business are not new with many merchants. He uses the daily paper to advertise in—he displays his goods in the windows—his store interior is arranged to appeal to the eye and for convenience sake, and he renders good service. Some merchants do one or perhaps two of these things and fail in others—some perhaps do all sometimes, but consistency has been a motto of the Templeton store and there is a great deal to be said for it.

Motor Accessory Headquarters

Take the case of newspaper advertising. Every day the daily papers are used to advertise some lines of goods—auto accessories practically always—on Fridays and Saturdays when special auto accessory editions of the papers are published, double space is used. Day after day, the fact that Templeton is headquarters for auto accessories is being published—that is the impression being made on the mind of the people and it is bringing the motorist in increasing numbers to the store. When he comes he finds many other lines associated with the hardware business there as well. In this way it is not only as a motor car owner that the customer comes back, but as a customer for other goods, too.

Changes Windows Often

Or it may be the windows that make the appeal. The displays are changed at least once a week. Auto accessories are displayed consistently. The goods are shown on what might be called a series of steps—the arrangement can be seen from the accompanying illustration—and in this way are up where people can't help but notice them as they walk past or even driving past in their cars. The arrangement is attractive—sales helps furnished by manufacturers are used if adaptable and every effort to direct attention to the goods is made.

From the Inside—What?

The newspaper advertising and window displays might be termed the outside forces at work to bring people into the store. What awaits them, then, when they do come inside? What appeal is made to keep the interest created by these outside factors? Neat show cases wherein the goods are shown — sample boxes, which, besides showing the goods, are easily accessible to serve the customer from and an interest in the customer's requirements. It may be said that interest in the customer's wants is always manifest, but it is not by any means. Customers enter many stores, ask for a spark plug or a wrench or some other article and perhaps hear the crisp reply: "We haven't got it"—just that and nothing else.

Satisfying the Customer

This is different from the Templeton method. While the representative of HARDWARE AND METAL was in the store a customer came in and asked for a certain type of spark plug. Mr. Templeton didn't have it, but he went and looked up a catalogue for this customer—found he couldn't secure it from that firm and suggested another type to the customer, one equally good and which would give every satisfaction. The customer took it, thanked Mr. Templeton for his trouble and though Mr. Templeton had never seen the man before he expects to see him again. This is the type of service which brings the customer back—showing an interest in his wants and being able to supply, if not the exact thing, something you know will give satisfaction and tend to make a permanent customer.

Tells How It Is Done

The question of selling automobile paint is another that might be mentioned here. Mr. Templeton has found this end of the business most satisfactory and one that is increasing rapidly. "I make it a special point to see that every customer buying paint understands its use." Mr. Templeton stated. "There is nothing can give dissatisfaction more quickly than failure in applying paint. It may be the customer's fault—usually is—but when our customer leaves he knows how to apply the paint to get results. If he follows the directions we give him we know he secures catisfaction—if he doesn't, and it's a poor job, he knows whom to blame and it is not us. It is by this care and attention to detail that I attribute our success in the auto accessory field. It is equally true of any other department, of course, but this latter is the one we have demonstrated it in so successfully the past couple of years."

While the representative of HARDWARE AND METAL was in the Templeton store there were twelve or fifteen customers come in. Of that number only two bought or wanted other than auto accessories. One man purchased a razor strop, another wanted to secure a duplicate of a door pull he had secured the day before. There would seem to be evidence that this store is an auto accessory headquarters.

An interesting point here might be that in connection with the location of the store. It is not right in the heart of the retail section, but a couple of blocks west. It is, however, in the heart of the automobile section in the form

Continued on page 55

Ammunition Reveals Firm Situation

Cartridge Manufacturer Says Present Basis Not Likely to be Lowered—Even With Some Materials Less Labor Costs More Than Offset These—Already Orders Promise a Busy Season

MANY have been deferring buying their needs of ammunition this year, even large jobbers, expecting that prices would be lower," said R. M. Watson, manager of the Dominion Cartridge Co., Ltd., Montreal, to HARDWARE AND METAL. "But there will be no lower prices as we view the situation. It will take a very substantial decline in the price of raw materials to make even a small change in our manufactured costs. For if there were lower prices on these materials to the extent of 20 per cent., by the time they were converted, the lower cost of the finished goods would probably not be more than two or three per cent. Wage costs are the big factor, and these seem bound to continue high."

Ammunition Not High

Mr. Watson expressed his conviction that ammunition prices were not high. "These are not nearly so much higher than they were before the war as some state them to be," said Mr. Watson. "When considering matters relative to price, these must be related to the changed wages and salaries which men are getting. Ammunition costs, on the average, have not increased with us more than 60%. while labor has been receiving much larger relative increases. And the prices on many other goods have increased to a greater extent, some of them being 150 per cent. higher than they were before the war."

Mr. Watson further pointed out that Canadians were in a more fortunate position with respect to prices than the user in the United States. Costs have soared there greatly.

It may be that many ammunition users will be more careful of the ammunition that they buy, Mr. Watson thinks. There has been quite a prodigal waste in the past, and much carelessness in this respect has been practised.

Early Buying Advised

"There is very little ammunition in the country," continued Mr. Watson. "This applies to stocks everywhere in Canada, and to jobbers as well as retailers. Stock has been permitted to run low, and there is really little or no surplus.

"At present we are working full time, and on actual orders. In fact we have had to make a division date in the matter of delivery. Orders that were in hand before March 3, will be delivered prior to July 1, or by that date, while those received after this time will have to wait until later, August and September, or perhaps later. Of course we can now confine all our effort to home business since the war."

Mr. Watson said that some jobbers were now placing orders who had been urged to buy long ago. He believed that there was wisdom in placing orders without delay. The manufacturer could not be expected to overtake orders at the eleventh hour, and, as Mr. Watson said, "We are working on actual orders now and will be for many months. It will be October or November before we can build up any surplus stocks."

Outlook Encouraging

"The indications are very promising for the coming season," said Mr. Watson. "We have already sold several car lots of 'trap loads' and orders are coming in right along. The sale of these shells has been greater in the past three months than it was for a long period through the war."

With the return of trap shooting, it is encouraging to note from the manufacturer's viewpoint that there will be larger sales of ammunition. Mr. Watson is sure that the boys who have been at the front will want to do some shooting in the field as well as at the traps. It will help to soothe their nerves. "Recently," said Mr. Watson, "a young man was here and had a little time to spare while waiting to leave Montreal. I suggested that he go out with me to the traps, and he did so. He seemed pleased with the afternoon's pleasure. Shortly after I received a letter from his father, stating that the lad was full of that afternoon's experience; it had been one of the best times that he had had in a long while. And I believe that this will apply to men generally who have been at the front, as this fellow had been during the war. Being used to the noise of guns will not have made them weary of the more cheerful pastime of field or trap shooting."

Other Important Factors

With the release of manufacturers from their war contracts, attention has been gradually directed to the regular business of making shells and cartridges for recognized use on a peace basis. In one important respect there has been great improvement, that of the availability of stocks. But, with shelves bare or almost bare, it has taken, and will take, a long time to overcome the shortage and to make this up to the jobbers and to the retailers.

But with the release from Government contracts and Government supervision, the manufacturer is still required to pay as much, and in some instances more, for all that goes into ammunition. For instance, felt wads have constantly increased in price, so that the cost today is 300 per cent. higher than before the war. This, Mr. Watson stated, has given some makers the idea of using paper wads, but he doubted if these would be satisfactory.

Wages have continued high, and this is one of the bigger factors offsetting the reductions made on a few items used in making shells. As all know, labor in a general way is staying at its high level, and in a majority of cases advances have had to be agreed to.

There is an apparent returning interest manifest in many places in shooting. Gun clubs are being reorganized and interest stimulated. Altogether a good season is in prospect. The dealer ought already to be figuring on his sales campaign for both sporting and paper shell ammunition. There will be lots of game, small and big, and interest can be created and fostered by the live hardware men.

Regina to Have R.M.A. Convention

Matters of Unusual Importance to be Discussed at This Session — The Reorganized Machinery of the Association Will be Fully Explained — Frank Stockdale, Merchandising Expert, Will Give Five Important Addresses

THE convention of the Retail Merchants' Association of Saskatchewan will be held this year on May 13, 14 and 15 at Regina, Sask. This is always one of the big events of the year among Western merchants, and this year promises to be an event of very unusual interest. The reorganization of the association, and the appointment of an eastern and western executive council, that took place at the recent session of the Dominion board, the details of which have not yet been made public, will be fully discussed by J. J. Polson, first vice-president of the Saskatchewan Association, and delegate to the Dominion board.

The address of the Dominion president, J. A. Banfield, will also be looked forward to with unusual interest.

The Frank Stockdale Lecture

One of the greatest attractions of the conventions will undoubtedly be the series of five addresses which are to be given by Frank Stockdale, the noted commercialist of Chicago, in connection with the short courses in retail merchandising which are this year being provided under the direction of the universities of Saskatchewan and Alberta, at the request of the Retail Merchants' Association that such a course should be established. All merchants who desire to know all that is worth knowing in connection with the successful operation of their business from every standpoint, will put aside every other engagement in order to attend the convention.

Will Also Speak at Alberta Convention

Following the convention at Regina Mr. Stockdale will go to Saskatoon, where he will deliver three lectures at the University of Saskatchewan on May 19th, 20th and 21st, and subsequently one at Prince Albert on May 22nd and North Battleford on May 23rd. He will subsequently proceed to Edmonton for a full course at that point in connection with the University of Alberta, and will afterwards proceed to Medicine Hat for the Alberta Provincial Convention on June 3, 4 and 5.

Proposed Trade Section Convention

Another important subject for discussion will be the proposed trade section conventions. In place of the annual convention at present held the proposal is made that each trade section of the association shall hold an annual convention on various dates throughout the year and probably at different points throughout the two provinces.

Proposed District Branches

One question of paramount interest to retailers will be the proposed formation of district branches of the association. The proposal is to divide the Province into districts, each district to embrace from 250 to 300 merchants, and to have a paid secretary who shall devote his whole time to looking after the interests of the members in his particular branch, including credit reports, collections, community building campaign and other matters.

On the Wednesday afternoon the annual meeting of the Retail Merchants' Mutual Fire Insurance Co., which has made rapid progress during the past year, will be held and very satisfactory reports of the year's business will be presented, and the company's future policy will be discussed.

Neither has the lighter side of convention work and attractions been forgotten. On Wednesday morning the delegates will have an opportunity of visiting the Imperial Oil plant, and in the evening a banquet will be tendered the delegates by the Regina branch of the R.M.A., when an address will be given by Premier Martin, followed by one of Mr. Stockdale's lectures on the important subject of "Protecting the home town front."

Transportation Arrangements

Arrangements have been made with the various railway companies as regards fares under the following conditions: Delegates can take single fare tickets going to the conventions, obtaining at the same time standard convention certificates, which must be presented to the secretary on arrival in Regina. Should there be one hundred or more delegates at the convention they will be able to obtain return tickets at three-fifths of the return fare, or if there are less than one hundred delegates present at four-fifths of the return fare, plus 25c validation fee. A simple calculation will show that except in the case of those residing at the greatest distance from Regina, it will amount to about the same as the ordinary return fare.

The full program is as follows:

PROGRAMME.

Tuesday Morning, May 13th.

9.00 o'clock—Delegates and visitors will call at the Convention Hall for the purpose of registering and receiving their badges.

10.00 o'clock—Convention Hall—Opening Session.
Address of welcome by His Worship Mayor Black.
President's Address.
Treasurer's Address.
Secretary's Report.
Report of Dominion Convention by J. J. Polson of Regina.
Appointment of Resolutions Committee.

Tuesday Afternoon, May 13th.

2.00 o'clock—Convention Hall. Receiving Resolutions and consideration of same.

4.00 o'clock—Address by the Dominion President, J. A. Banfield, of Winnipeg.

Tuesday Evening, May 13th.

8.00 o'clock—Convention Hall. Address by Frank Stockdale, Retail Commercialist of Chicago. Subject: "Some After-the-War Problems." Discussion.

Wednesday Morning, May 14th.

10.00 o'clock—(a) Discussion of Proposed Trade Section Conventions. (The different Sections of Trade would hold separate conventions, instead of one General Convention, as at present.)
(b) Formation of District Branches. (It is proposed that the province be divided into districts, each containing 250 to 300 merchants—each district to have a paid Secretary, to devote his entire time to looking after the interests of the members in his particular branch, including credit reports, collections, community building campaign, and other matters.)

Resolutions.

11.00 o'clock—Visit to the Imperial Oil Plant.

Wednesday Afternoon, May 14th.

2.00 o'clock—Convention Hall. Annual Meeting of Retail Merchants' Mutual Fire Insurance Company.
Reading of Minutes.
President's Report, including financial statement.
Election of two Directors.
Address by A. E. Fisher, Superintendent of Insurance for the Province of Saskatchewan.
Discussion on future policy of Company.

4.00 o'clock—Address by Frank Stockdale, of Chicago. Subject, "Meeting To-day's Competition."

5.30 o'clock—Nomination of Officers for the ensuing year.

Wednesday Evening, May 14th.

8.00 o'clock—Banquet, tendered by the Regina Branch of the Retail Merchants' Association.
Address by Premier Martin.
Lecture by Frank Stockdale, of Chicago. Subject, "Protecting the Home Town Front."

Thursday Morning, May 15th.

10.00 o'clock—A moving picture entitled, "The Troubles of a Merchant," will be shown at the Allen Theatre.

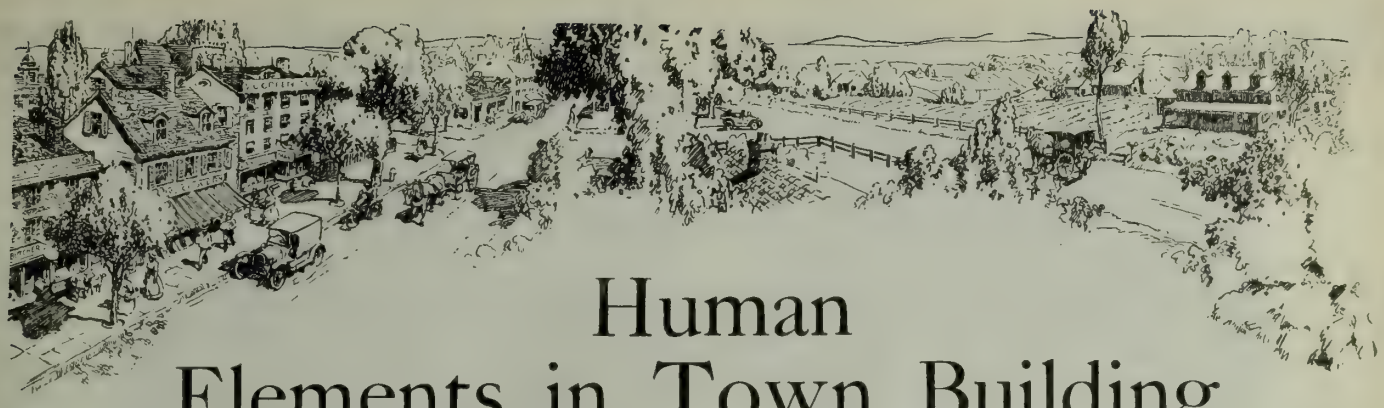
Thursday Afternoon, May 15th.

2.00 o'clock—Election of Officers for the ensuing year.

2.30 o'clock—Address by Frank Stockdale, of Chicago. Subject, "Sales People of To-day and To-morrow."

4.00 o'clock—Questions and New Business.

Thursday Evening, May 15th.



8.00 o'clock—Address by Frank Stockdale, of Chicago. Subject. "Opportunities in Retail Advertising."
Convention closes.

MOVE TO NEW QUARTERS

The British Aluminium Co., Ltd., Toronto, have removed their office and warehouse premises. The new Canadian headquarters of the company will now be located at the Purman Building, 265 Adelaide Street W., Toronto, where larger quarters are available.

In addition to this extension the company here is augmenting its staff by the addition of E. T. Driver, B.Sc., who will soon take up the position of technical adviser.

Speaking on business conditions, Ernest V. Pannell, of the British Aluminium Co., Ltd., said in part: "Business in general is rapidly adjusting itself to the conditions of peace, and we find every day a stronger demand for aluminum to be used in the manufacture of kitchen utensils and specialties, the construction of automobile bodies and parts, and for wire and cable and other uses in the electrical field."

Human Elements in Town Building

By A. H. Melville, Madison, Wisconsin. Chief Bureau of Civics and Commerce and Associate Professor of Business Administration, University of Wisconsin.

IN the discussion of problems of town building, problems that are being considered by many municipalities at the present time, there are material considerations to be taken into account without doubt, but above these factors is the far greater factor of the men behind the cities. The accompanying address that strongly urges these points was delivered at the Second Annual Short Course on Merchandising held at the University of Manitoba, Winnipeg, in February of this year.

A TOWN is just as large as the territory it draws business from. No longer can a city hide behind the cloak of its city limits and say—I am not interested in anything except what is within my gates. City limits are only boundaries for municipal government. In building a city, therefore, we must recognize in a constructive way the interests of all the people we serve in commerce, in trade, in agriculture, in recreation, in matters of health. I believe it was the veteran Cyrus McCormick who recently remarked to a group of bankers and business men that the prosperity of farmers in their community is the measure of their sales in business, and the late Theodore Roosevelt, who recently writing in connection with the League of Nations, said: "If this old world of ours is going to be a good place for some of us to live in, it has got to be a pretty good place for all of us to live in."

Our civic, commercial and educational interests are so interwoven and interlocked that we can scarcely consider the welfare of one line of business without reckoning with all the others. If we have factories with efficient working men, they must have sanitary, cleanly homes to live in. They must have recreation for themselves and their families. If we have progressive, contented, satisfied farmers, good farming implements, markets to care for their grain, and modern stores to take care of their household needs are implied.

The Human Touch

In this busy hurly-burly world of ours, this age of wireless telegraph, 100 miles an hour automobiles, 70 miles an hour trains, fast aeroplanes, 90 miles an hour business and three editions a day newspapers, men are losing the personal contact of man to man and the human interest that goes with it. We rush hurriedly to business in the morning and back again at night, to committee meetings, speaking for a moment first with this man and then with that man, but never knowing really the man with whom we meet and deal. We are busy in our stores, we cannot cultivate friendship of our customers. The other day, to my surprise, I learned that a prominent man with whom I have been sitting on committees lived only a stone's throw from my own door. The magic touch of personal interest so common a few years ago seems gradually to be slipping away. And yet, if we are to build our cities constructively, not for to-day or to-morrow, but for years to come, we must know the men who live in them and their capabilities, **for it is men who make cities.**

The other day some misguided man in Minnesota caused the failure of a chain of fourteen banks. The newspapers heralded it half way across the continent. Not a few people immediately said to themselves, "I wonder if my bank where I do my business is safe? How about my savings and earnings, are they all right?" and again we see how interdependent business is and how much the success or failure of one unit affects all the others. And not only that, but it affects the town or city in which the failure takes place and its reputation, for cities have a reputation and character just as individuals and firms have.

Now towns are competing with one another for business just as business men in the same line of business compete with one another. A town is known by the reputation of its business men, by the reputation of its schools, by its libraries, by its health, by its recreation facilities and judged accordngly. If we are to build a town, we must know its resources and liabilities. We must take stock of what it has to offer to the people who live there and who come there to trade, just as the merchant takes stock every so often to see what he has and what he is out of that he must supply. We must analyze our own community critically, face the facts and act according to what the analysis shows. One town is short a good retail store, another a blacksmith shop, another a good hotel.

A Need for Executive Action

A meeting of this kind here to-night fifteen years ago would have been absolutely impossible. Business men did not get together then as now. They feared each other and were not willing to trust their competitors. Perhaps they did not realize the necessity for collective action. No town, or city, or community can be really and truly prosperous and contented unless the people get together frequently in social intercourse and exchange ideas and opinions on matters of public interest and business. Rome and Greece had their public forums at Rome and Athens where the wise and unwise gathered together and debated matters of public policy. For centuries 2,500 to 3,000 years ago this custom prevailed, and who shall say they were not the most progressive cities of their age? The creed of the Athenian youth, the free born British youth can be proud of to-day:

"I am a citizen of no mean city.

"I will never bring dishonor or disgrace upon my city, nor desert my suffering comrades in the ranks.

"I will fight for the sacred ideals and standards of my city both alone and with many. I will respect and obey her laws and seek to impose a like obedience and respect upon the part of those above us who are prone to annul them or set aside. Thus in all ways will I seek to transmit my city, not only not less, but greater, more beautiful and better than it was transmitted to us."

The winning of the world war is the finest example of collective co-operative effort that is recorded in history. One nation could not win the war. Nor could two nations. It took the combined effort of all the liberty loving nations directed under central leadership to strike the blow at militarism which has made the world safe for Democracy. The fruits of the victory we shall enjoy and shall we not carry this lesson of constructive co-operation into our constructive city building?

Two years ago, John Barrett got the Central American Republic together for monthly meetings in the beautiful Pan-American Building at Washington, where the representatives of these countries could meet and know each other, rub elbows, sit at a common table and discuss common interests and common problems in a frank and honest fashion. The result is that instead of a new revolution or war breaking out somewhere in Central America every morning before breakfast, they haven't had a war for two years and a half.

But we must organize if we are to get results. I have noticed that there are three types of institutions in towns that are supposed to represent the business man's, and incidentally the town's, interests:

1. The small business organization designed to give credit information and undertake collections.

2. The business men's organization for developing trade and commerce only and which usually includes the one already named.

3. The big, broad, institution which includes all the interests of the other two and which is big enough and broad enough to include every interest of the country; its commerce, trade, education, recreation, health and agriculture. This is the kind of a body that is building towns for not only to-day, but for the future.

The Men Behind the Cities

Call the roll of cities in the United

(Continued on page 72)

Four-Page Bulletin Has Grown to 28

Retail Merchants of Kingsville, Ont., by Close Co-operation, Have Stimulated Business—An Auction Sale Plan That Has Produced Results—Merchants Provide Auctioneer for Farmers and Then Make Cash Sales to Them.

CO-OPERATION is the keynote that has spelt success for the Kingsville Retail Merchants' Association, resulted in a great business boom for the town, and stimulated retail trade in the community to an unprecedented degree.

It was in May, 1918, that business men of the town first gathered together to discuss the concrete proposal of organization of a retailers' association. The idea originated with C. W. Hendershot, of the firm of C. W. Hendershot & Co., Ltd., who, with other merchants, realized that while Kingsville, located on the shore of Lake Erie in Essex County, was a live business centre in the warmer months, owing largely to the influx of holiday residents from Detroit and large points throughout Western Ontario, it was practically "dead" by comparison, in the colder months of the year.

Extend Sales

Originally the organization was formed merely for the purpose of co-operative advertising with the definite object of reducing expenses, and getting home to the consumer in the surrounding country the retailers' sales message. No membership fees were charged, nor has this system yet been introduced, although within the near future this course is possible, as the association increases the scope of its work.

A four-page bulletin was issued advertising special values for the first Saturday in each month, and with a circulation of 1,800 was delivered to every resident of the town by carrier boy, and to every farmer through the rural mail delivery system, within a radius of nine miles. The nearby towns of Leamington, Harrow and Essex were also thoroughly covered.

Co-operation Counts

Robert Healey, of Healey & Crawford, furniture dealers, was elected president, and W. M. Webb, of Webb's gentlemen's furnishings, was selected as secretary, and by their indefatigable efforts, supported by the enthusiastic endeavors of the other merchants, have been largely responsible for the substantial success achieved in the first twelve months of operation.

Immediate Results

Results from this spirited co-operative sales program and business stimulator were immediately noticeable. Farmers and townspeople who had seldom before visited the town began to call on the special sales days, to take advantage of the real bargains offered. Prior to each issue of the bulletin, a general meeting of the merchants was held, the campaign discussed, suggestions received and reviewed, and a canvass was made for advertisements.

ROBERT HEALEY

Kingsville, Ont., president of the Kingsville Retail Merchants' Association.

An Original Feature

Within a short time, a further original feature was introduced whereby visitors to the town were invited to bring with them goods of any description they wished to dispose of. An auctioneer was provided by the association, and a general sale conducted on the federal square in the heart of the business district, where the produce or manufactured articles, of whatever nature they might be, were sold to the highest bidder without cost to owner. No commission was charged, and everything from live stock and horses to farm produce, furniture, household furnishings and commodities of every description were bought and sold. It was literally a free exchange.

Get the Cash

Nor do these public sales militate against the regular business of the furniture dealers and other merchants. Rather the opposite was the case. With ready cash in their possession, gained from the disposal of goods which, to them, was without great value, the visitors turned their attention to actual wants that could be purchased first hand in the stores.

The regular monthly sales day and auction is now a regular feature, and the biggest business builder Kingsville has known in its history, according to the officials and members of the organization.

As is the case with every movement in its infancy, the Kingsville Co-operative Business Men's Association met with doubters and pessimists, but even the most gloomy and conservative have come to a realization of the outstanding and obvious benefits that have accrued to the business interests, and at the present time, approaching the anniversary of its birth, the organization comprises practically every live wire merchant in the town; and it is a significant fact that among its most prominent members and readiest and most enthusiastic supporters are included Messrs. C. W. Hendershot, C. A. Quick, and T. J. Salmon, managers of the three largest stores in town, all dealing in general merchandise.

The bulletin, with a circulation of 1,800, consists of twenty-eight advertising spaces, four and a half by six inches each, which sell for three dollars an issue. No profits are turned back into the association, as the merchants participating in the campaign from month to month, buy their space at cost. They realize too, that to be successful they must offer real bargains and price reductions if the movement is to be continued and they are to gain lasting results from their association and co-operative sale program.

Heres a Plan That Has Produced Results

Which is the best way to produce results when advertising gramophone records? Many hardware dealers all over the Dominion are handling gramophones and records, and many of them advertise in the local papers. The J. H. Ashdown Hardware Co., Ltd., of Winnipeg, after doing considerable experimenting has found that it pays them to run a small separate advertisement on phonograph records and to advertise the name of only one record. One of their recent ads was worded as follows:

Hear This New —— Record
"DEAR OLD PAL"
and
"THE MAGIC OF YOUR EYES"
(By Oscar Seagle)
10-inch Size A 2684. $1.00
ASHDOWNS
"The Big Busy Hardware."

The firm has found that its results from this type of advertising have proven most satisfactory. They state that to advertise fifteen different records results only in confusion, whereas to pick on a very desirable title invariably brings a large number of people to the store, and very, very few of them leave with only one record. In other words they draw people to the store to buy a single record and sell them a large number.

Housecleaning Goods Trim That Sold Well

THE *above illustration represents a splendid housecleaning window shown a few weeks ago by Bryson-Graham, Ltd., of Ottawa. The window displays in this store are looked after by Fred Ashfield, who, as display manager, has full charge of all windows.*

In speaking to HARDWARE AND METAL, *Mr. Ashfield stated this display had no sooner been put in when demand was created for many of the lines shown. The display, of course, was made at a psychological time in so far as housecleaning operations are concerned.*

Windows in the Bryson-Graham store are changed twice every week. Each department having a window display is charged from $1.50 to $3.00 per day during the time the display is in. This means that each department in the store bears its share of the expenses in connection with putting in the various windows. This indicates what one large firm thinks of the importance of window displays as a direct method of selling goods..

What Hardware Men Are Doing

Seasonable Offerings From Coast to Coast—Many Firms Making Big Drive on Paints, Brushes and Auto Accessories—Other Lines Include Oil Stoves, Sporting Goods, Garden Seeds, Electric Washers, Auto and Carriage Finishes

Brighten the Home

J. B. KERNAGHAN, PRINCE ALBERT, SASK., in a display 12½ in. deep and 8½ in. wide, advertises as follows: "Kernaghan's Hardware, April, Brighten the Home Month" in large display type. In four boxes, one at each corner of the ad., are featured under separate headings, paint for outside work, for inside work, floor varnish and enamel. One of the boxes reads: "For Inside—Ladies you like woodwork white enamel in the bedrooms, bathrooms and kitchen. Get—- enamel, self levelling, shows no brush marks, it's a hammer testing enamel like —— floor varnish." The body of the ad. is filled with such comments as the following: "Let's Paint Up. Buy paints, varnish and enamel with international acknowledged quality. They cost no more, but results and wear are many times superior to ordinary lines. We stock only quality goods. We are sure you will demand them. If It's Good Hardware, We Have It."

Keeping the Domestic

THE ADAMSON HARDWARE CO., ORANGEVILLE, ONT., in advertising a demonstration of electric washers heads its ad. "Keeping the Domestic" and says: "Every woman knows how hard it is to get and keep a really good domestic. One chief reason why many domestics leave otherwise pleasant positions is because of the strain of wash day. The tub, washboard and hand wringer are too much for them. You can overcome all this and keep a good domestic, if you have one, or get one, if you haven't, by placing in your home a —— Electric Washer, the wonderful time, money and labor saving washer that is absolutely guaranteed in every respect. Don't let another wash day go by without seeing it for yourself. We will give a special demonstration in your own home. We will show how easy and economical it is to do all your household washing with a ——."

Automobile Accessories

CHAS. E. HOULDING, SASKATOON, SASK.—Two Hardware Stores, says: "Owing to the increasing demand from our customers, we have just installed a full line of automobile accessories and we will in future be able to fill your auto wants at the same time we are supplying your hardware. ——tires and tubes, guaranteed for 7,000 miles, chains and jacks, tire and tube repair outfits, in fact everything you can think of or need. Sporting goods, baseballs, baseball bats, protectors, masks, gloves, catcher's mitts, bases, anything you want in the way of baseball supplies now in stock. Schools, churches, amateur and professional clubs—special prices for club orders. This will be a year of real sport, buy early and get your pick."

Automatic Oil Stoves

SHANNON'S HARDWARE, MARMORA, ONT., advertises: "For Safety, Simplicity, Economy and Efficiency use —— Automatic Oil Stoves and Ovens, no wicks, no valves, just a blue flame. The summer kitchen kept cool, clean and comfortable. No wood to carry in, no ashes to dump. The new model is beautiful as well as efficient. Such an oil cooking equipment lends character and individuality to the kitchen. Besides the fine appearance there is a service as perfect and satisfactory as could be rendered by either coal or wood burning equipment, especially in the hot summer months. Watch for our ad. at the movies on Saturday evenings. See the stoves displayed in the window, then come into the store and see them work."

Clean Up—Paint Up

E. D. MALLOY, NANTON, ALBERTA, has an ad., of four sections, the larger space at the top being devoted to —— paints, brushes, mops and polishes, floor finishes and brooms. The second section immediately below lists garden tools, rakes, hoes, shovels and sprinkling cans. This is followed by an announcement stating that vacuum cleaners are rented out at 50 cents per night and the ad. closes with an announcement regarding formaldehyde.

Auto and Carriage Finishes

M. WEICHEL & SON, LIMITED, WATERLOO AND ELMIRA, ONT., feature —— and —— automobile and carriage finishes in an ad. 7 x 6½ inches. It reads: "A great deal of pleasure is lost driving in an automobile or carriage that looks dilapidated and old. The appearance of a machine should be the pride of every car owner and if only motorists will recognize the fact that machines can be kept in good condition and looking well at little expense by using our —— and —— auto and carriage finishes. Let us give you directions for turning your old car into a new one with our auto finishes. One thing you must not do. Don't worry. The work is not difficult or tedious. Don't hurry. Follow the directions carefully. Two quarts auto enamel are enough to cover any car one coat, a half pint will finish the wheels. Let us show you how to do it."

Auto Accessories

THE DAY HARDWARE CO., RED DEER, ALBERTA, says: "It's not what you pay for your tires that counts, it's what your tires pay you. Up hill and down hill goes the —— equipped car. When you need another tire try a ——."

Incubators and Brooders

BAILEY & REYNOLDS, TRENTON, ONT., in their ad. show illustrations of both a standard coal-burning brooder and an incubator with the following comment: "—— Incubators are unquestionably the most successful hatching devices that have ever been placed on the market. Each and every machine is sold under an absolute guarantee to hatch more chicks than any other incubator manufactured. The —— brooder grows three chicks where one grew before and saves one-half the expense and nine-tenths of the trouble."

Refinish Your Home

CARTER BROS., PICTON, ONT., below an illustration of a housewife with a can of varnish fixing up the woodwork in her home say: "It's fun to refinish your home—when you use the right varnish. Do you know that a good floor varnish is not necessarily a good furniture varnish? That is one of the things we have learned in our long experience in selling varnishes. Our knowledge is at your disposal, so be sure to tell us what you are going to refinish and we will give you the right varnish at the right price."

This Is Roofing Time

MASON & DALE'S HARDWARE, BOWMANVILLE, ONT., advertise as follows: This is roofing time. Does your roof leak? Are you going to do roofing this spring? If so, come in and get our prices for these good roofings." (Three makes of roofing are here mentioned in display type). The ad. closes with an announcement regarding —— ranges and heaters.

Garden Seeds

A. D. CROSS, PORT COLBORNE, ONT., says: "We have a complete stock of garden seeds in both bulk and packages, garbage pails, galvanized tubs, wringers, washing machines, clothes boilers and ironing boards."

Current Events in Photograph

One of the chief ambitions in life of the Bolsheviki seems to be to wreck and murder. This junk pile shows how costly locomotives were deliberately wrecked. The men on guard are British bluejackets and the scene is at Soroka, on the Murmansk-Archangel Railway. This wreckage is a very mild sample of what usually happens when the Bolsheviki are in charge of things.

Stove Prices Not to Be Less Now

Increased Wage Schedules Have More Than Offset Reductions in Pig Iron and Steel, Says Montreal Manufacturer—Demands of Labor for Shorter Hours a Factor in the Production Situation

"MANUFACTURERS did expect that they would be able to reduce prices on stoves, if there was a reduction on pig iron and steel," said Edward Goodwill, manager of the Thos. Davidson Co., Ltd., Montreal, to HARDWARE AND METAL. "But this will not be possible; the cost of wages has been growing higher all the while and molders' demands have been greater. This condition has offset the decrease in costs that was made recently, and in fact it would take a big decline in pig iron to justify any lower prices."

There may be an advance in prices but Mr. Goodwill did not say that this would come. He is of the firm conviction that there will be no declines in stoves, and that there is nothing whatever to be gained in deferring the purchase of one's needs in stoves and ranges. As costs go the manufacturer is making very little to-day over his own cost to produce.

Cost Figures Will be Higher

"I have just been going over this matter," said Mr. Goodwill, "and I know that the cost figures will be higher than they have been in the past. It will not be possible to reduce stove prices, for all operating costs are very high."

Labor Hard to Please

One of the greatest difficulties these days confronting the stove maker is that of the demands made by labor. The molders have been giving some trouble and want high wages. Even then, as with other classes of labor they are not satisfied with the hours they have to work.

"We were informed recently that the men were about to make a demand for an eight-hour day with no reduction of pay," said Mr. Goodwill. "We thereupon posted a notice in our foundry that the eight-hour day would be adopted at once. The men did not seem to understand the notice and asked about wages, when we informed them that the wages would be paid at the same rate they had been receiving. Had we agreed to the proposed demand it would have meant a 25 per cent. wage increase."

With the stove season approaching it would appear that there is no prospect of lower prices. Costs are high in the United States market, and, in many cases these seem higher, relatively, than the prices obtaining in Canada. It seems certain that pre-war prices will not return.

KEEP ELECTRIC LAMPS CLEAN

Dirty electric lamps are inefficient and wasteful. A recent investigation in a large establishment disclosed interesting figures in the extent of this waste. A group of lamps with a week's accumulation of dirt showed an average absorption of light of 16 per cent., some of them running as high as nearly 20 per cent. Another group which had been used for three weeks had an average absorption of .2 per cent. with a maximum of over 26 per cent. Figuring on this basis, 16 per cent. more lamps at the end of one week, or 22 per cent. at the end of three weeks, would be required to obtain the same illumination that would have been obtained if the lamps were kept clean. This, of course, meant a corresponding increase in the electric light bill.

EDITORIAL COMMENT

MAKE OCCASIONAL SURVEY

MANY merchants find that it pays to take a careful look around the store frequently to see that seasonable lines are displayed most effectively, if the fixtures are placed in the best manner for displaying the stock, and if the stock arrangement itself is calculated to make the best impression on customers. Sometimes too much is shown giving prospective buyers an impression of confusion and disorder. Sometimes not enough is on display or on looking it over it is easy to see how it might be more attractively arranged. Little things like this frequently make or mar sales and are worth the time and attention it takes to adjust them.

TO KEEP STOCK MOVING

IT'S not always what you put on your shelves that makes a success of business. It's what you keep moving off them. The only kind of goods you can make money on are those that keep moving. Stocking up with lines that are shelf clingers shows poor judgment in buying. Studying the needs of his trade and buying to meet these is one of the many important things the successful merchant has to do. There is such a thing, however, as educating the buying public to wanting higher quality goods and many hardware dealers have been doing this with marked success. By proving to customers that by paying a little more they can get something that will give lasting satisfaction and service they have in the last four years practically eliminated many of the alleged cheaper lines from their store. People realize now as never before that many things they formerly regarded as cheap were not cheap at all when service and satisfaction are considered. Many hardwaremen have stated to HARDWARE AND METAL that they have found it impossible to get rid of certain lines when they marked them at low prices. Prospective customers passed the goods by because they believed that the cheap price indicated cheap quality. The hardware men, however, in most cases were equal to the occasion. A short time later they offered the same goods at much higher prices and disposed of them and learned the lesson that it is a big mistake sometimes to offer to the public what looks like too big a bargain. Quality goods, carefully displayed with a view to the needs of your trade, well displayed and attractively advertised, will keep turning over and adding to your profits.

BETTERING CONDITIONS

THERE have been more reports in the past few months of firms shortening hours without reducing the pay of their employees, establishing profit-sharing plans, granting half-holidays, in some cases whole holidays, and taking similar steps, than appeared before in years. One of the changes brought about through the war is a difference in the attitude between many employers and their help. It would appear that many more changes of this kind are yet to come. England seems to be setting the pace and the rest of the world is falling into line. This process of bringing employer and employee closer together is not being accomplished without a good deal of industrial disturbance, but there seems little doubt that eventually it will work out so that there will be closer relations and harmony, that will make for better business. The question of bringing capital and labor together has been a big one for some time, but more progress is being made in solving it now than for a long time. One of the most encouraging factors in all that is being accomplished is the distinct tendency to make for better living conditions, better home life and more education. All these have been badly needed, especially in many of the big industrial centres. One of the best things the workers in England are doing is the gradual elimination of slum districts and the establishment of workers' villages where living conditions are in many instances almost ideal.

THE STEEL SITUATION

BECAUSE of the effects it will have on other business the steel situation in the United States is being watched with keen interest by thousands of merchants and manufacturers. The attitude that appears to have been adopted recently, that of not being particularly anxious to do business, is causing a good deal of comment. The steel firms have been very hard at work for some time, driven to capacity very often. They have made a great deal of money and some producers are reported to hold the view that if buyers are not anxious to do business at the lower prices recently quoted, the steel men can very well afford to wait until the public is ready to buy

again and spend the time in putting their plants in shape. This idea, if carried out will, in the view of many, increase the problems of reconstruction rather than help solve it by the effects it will have on other business and especially upon investors. The investor does not need to rush into new ventures especially with so many offerings of Government bonds and securities. Just what might happen between the time the steel men reduced production to a minimum and got their plants going on a regular schedule again is very difficult to predict, but if other businesses were compelled to more or less adopt the same policy the general situation would not be improved any.

CONDITIONS THAT FAVOR BUSINESS

THERE was a tendency following the signing of the armistice to hold back—to wait for prices to drop; merchants all over were conservative. Some to-day are sitting away back in their offices telling people things are quiet and prices must come down and missing the chance of their lives to move their stocks.

There is business within reach of the aggressive merchant—the farmer was never so prosperous—there are some retailers creating sales records this spring. Read what W. J. Carter, of Carter Bros., Picton, Ont., writes in the course of a letter recently received:

"Business is fine, and has every appearance of keeping up. The farmers are getting enormous prices for their calves and hogs. When the latter went to 18c last year, it was thought the utmost price had been reached, but they were paid 21½ cents here last Saturday. In the old days they would realize $4 or $5 for a month old calf, now they get $23.00. One farmer got $476.00 for four head of cattle last week. Verily, the farmers' lines are falling in pleasant places these days."

Isn't there some reason here to believe conditions should be good with the merchant? Are you out in the sunshine or glooming away back in the office where every day is dull? "Business is fine"—are you getting your share?

THE livest, biggest retail merchants are constantly on the watch for new ideas. Salesmanship is one of the greatest things in the world.

THINK of business in broader terms than your own store, your own street and your own house. All merchants have common problems and by getting together and deciding on a common basis of action they can usually solve them. Co-operation not only counts in business but it makes broader-gauged men.

SHORTER working hours and higher wages seems to be a popular demand all over the world just now.

WHAT OTHER EDITORS SAY

GASOLINE in Owen Sound, is sold for thirty-seven cents a gallon. In Chatsworth this week's price is thirty-five cents. Since the juice can be delivered to the tanks in the county town for less money than to the tanks in Chatsworth, the local vendors would seem to be satisfied with a lesser profit. The idea that money can be saved by purchasing supplies at larger centres is again proven incorrect. High costs of doing business are not conducive to low prices, and the cost of doing business in the larger towns is much higher than in the smaller.—*The News*, Chatsworth, Ont.

* * *

IT seems not to be certain that the plan for stabilizing prices is absolutely abandoned, so far as iron and steel products are involved in the restoration of industrial and trade activities. It is a matter of special interest on account of the exceptional condition of industry and trade on many lines at a time of such extensive readjustment as has been made necessary for getting back to peace conditions. In ordinary time of production and trade, conditions of demand and supply will of themselves work out the process of stabilizing, whether on a lower or a higher level.

The trouble now is that on many lines industry and trade were so put out of joint by the utterly exceptional war conditions that they cannot get back in the normal manner without a good deal of delay and of uncertainty in the movement on many lines.—*Journal of Commerce*, New York.

* * *

THE reason steel prices stay up is that the leaders in the trade are not hopeful that a large demand would result from a sharp lowering of prices. The term commonly used for such an attitude is "pessimistic" but the word is not appropriate, since it refers to temperament rather than judgment. The leaders feel that there is more money to be made by maintaining prices and squeezing out the last ton possible from existing contracts, at the same time receiving such orders as must be placed irrespective of prices, than by opening the market, negotiating with prospective buyers and finding the level at which they will take hold. Obviously it is of no particular consequence what level prices would reach in a decline, if the demand were strong enough to bring about an advancing market afterwards, for the steel trade must depend on averages, and when a dip in prices causes an upturn the tonnage sold at the lowest level is almost negligible.

Many men whose normal duty it is to sell steel do not hold to this view. They would prefer to see an open market, and chafe under the present restraint. They feel that if there were an open market the results in the long run would be satisfactory.—*The American Metal Market.*

* * *

LONDON hardware merchants have decided to close their store doors at 6 o'clock on Saturday nights instead of keeping open according to the age-old custom. They are not the pioneers in this early closing movement locally, neither are they likely to be the only business men of like mind in the immediate future.

The practice of continuing business far into Saturday night grew out of early conditions. The pioneer knew only long hours. He worked until dark or after, and expected to do his shopping subsequent to his own "quitting time." There are still those who can have little time in which to shop except in these later hours, but the number is growing steadily less.

For the great number of patrons of the retail stores Saturday night shopping is not necessary, and it is an imposition upon the merchant and his clerks. Working people who themselves desire shorter working hours should bear in mind their duty to refrain from imposing needless hours upon others. Saturday night shopping should be done under stress only. It is up to the public to effect the remedy. No merchant wishes the expense of doing business at night that might better be done in the daytime.—The *Free Press*, London, Ont.

EVENTS IN THE TRADE

Business Changes

A. Dean, Carp, Ont., harness dealer, is discontinuing business.

Briercrest, Sask.—P. H. Carter & Co. succeed A. Turnbull, hardware.

The Robsart Hardware Co., of Robsart, Sask., is discontinuing business.

Fowler Hardware Ltd., Sudbury, have bought a one-ton truck for the store local deliveries.

The Wakyte Manufacturing Co., Ltd., have moved into larger quarters at 185 Pacific Ave., Winnipeg.

Brockville, Ont.—D. A. McNab, of Orillia, Ont., has purchased the hardware business of the late B. D. Stacey.

Jas. Saunderson & Co., plumbers, etc., has been registered at Montreal by James Saunderson and Michael E. Wheeley.

Purvis Bros., Ltd., who have been in the hardware business at Sudbury, Ont., for nearly thirty years announce that they are retiring.

Work has been commenced at Sarnia, Ont., on a big new plant for the Holmes Foundry Co. Three new buildings will be devoted to the making of auto parts.

A. E. Hinds & Co., Winnipeg, have been appointed agents in Western Canada for Edward E. Johnson, Inc., St. Paul, manufacturers of Demon pump couplings and well casing.

New Firms

Fortin & Gauthier, hardware, has been registered at La Tuque, Que., by Oscar Fortin and Joseph Gauthier.

Fire Losses

Fire of unknown origin caused a loss of $50,000 in the factory of the Canada Wire and Cable Company at Toronto. Some damage was caused to the premises of the Consolidated Steel Company immediately adjoining.

Obituary

The death occurred at Grand Forks, B.C., after a brief illness with pneumonia, of W. K. C. Manley, aged 50. He had been in the hardware business at Grand Forks for twenty-five years.

Robert H. House, aged 71, for some time manager of the glass department in Ingram and Davey's hardware at St. Thomas, Ont., died after a long illness with heart trouble. He was a native of Beamsville, Ont., but had resided in St. Thomas for thirty-five years. Prior to going with Ingram and Davey he was with Risdon Bros.' hardware.

Nathaniel O. Ramsden, aged 50, died very suddenly in his hardware store at Mount Dennis, Ont., from heart weakness, aggravated, it is thought, by excitement over the return recently of his son from overseas. Mr. Ramsden took an active interest in civic matters and was a former president of the Mount Dennis Ratepayers' Association.

Named Manager For Canada

F. W. Deer, who has been assistant manager of Imperial Oil, Ltd., Western Ontario division, with headquarters at Toronto, leaves in May to assume the management for Canada of the Cataract Refining & Manufacturing Co., Buffalo, N.Y. The Cataract Refining & Manufacturing Co. are refined grease specialists, and deal also in cutting oils and compounds. The Canadian offices will be in the Royal Bank building.

F. W. DEER

Who has been appointed Canadian manager for the Cataract Refining and Manufacturing Co., with headquarters in Toronto.

Mr. Deer has been associated with the Imperial Oil Ltd., in Toronto for the past 13 years, and prior to that time was interested in the oil game as related to the mining fields in South Africa. Mr. Deer will look after the interests of the company for the whole of Canada.

Personals

W. F. Dobell, superintendent of the Brandram-Henderson Ltd., Toronto factory is spending the week at Montreal.

Harry T. White has been appointed sales manager of Stewart & Wood, Ltd., Toronto. This appointment was made at a meeting of the directors on Saturday, April 26. Mr. White has been associated with the company 28 years.

Montreal Personals

Heller Bros. Co.'s representative, F. Heller, was in Montreal during the week

J. A. Barker, with the Willis H. Simpson Co., Inc., New York, was in Montreal this week.

G. W. Carter, of the Eagle Lock Co., Terryville, Conn., called on the Montreal jobbers this week.

P. G. Perkins, Smith and Hemenway representative, New York, called on the Montreal trade this week.

D. Rose, with the Carborundum Co., Niagara Falls, Ont., was in Montreal on Wednesday of this week.

W. H. Newton, sales manager of the Canada Paint Co., Ltd., is calling on Quebec City trade this week.

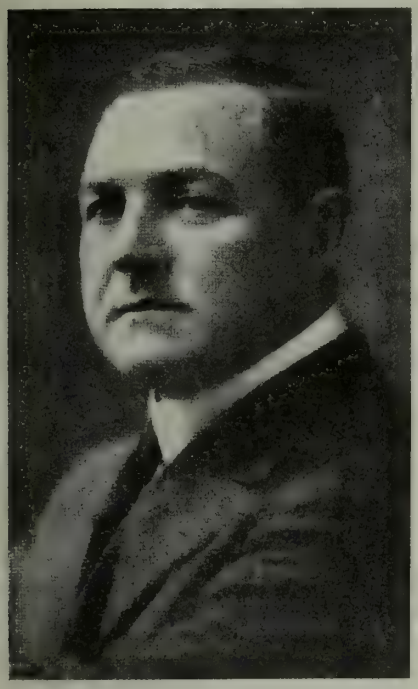
M. J. Fultz, travelling representative of the American Pad and Textile Co. was a Montreal visitor this week.

George Henderson, president and general manager of Brandram-Henderson, Ltd., spent a day or two in Toronto this week.

Taylor Instrument Companies, Rochester, N.Y., were represented in Montreal during the week by H. G. Macpherson.

The Boss Manufacturing Co., glove makers, Kewanee, Ills., were represented in Montreal territory this week by H. E. Morris.

W. F. Duffield, in the interests of his firm, the Reading Hardware Co., Reading, Pa., called on the Montreal trade this week.



F. B. Leslie, of A. C. Leslie and Co., Ltd., was in Philadelphia, New York, and other centres for some time, and has returned to Montreal.

The friends of Henry J. Noultie, stockkeeper for Starke-Seybold, Ltd., wholesale hardware, Montreal, will regret to learn of the death this week of Mrs. Noultie, after an illness of several weeks.

The Canadian File and Tool Works, Montreal, has been dissolved and is succeeded by Canadian File and Tool Works, Ltd.

William Hyslop, Jr. Victim of Influenza

Following an illness of only a week with influenza, the death occurred at his home in Toronto of William Hyslop, Jr., president and manager of Hyslop Bros., Ltd., bicycle and automobile dealers, To-

The Late William Hyslop, Jr.

ronto. Mr. Hyslop, who was 48 years of age, was born in Hamilton, Ont. After graduating from Upper Canada College in Toronto he went into the bicycle business with his father in 1888, later going into business with his brother. The present business at 12 Shuter Street was established in 1900.

Not only was Mr. Hyslop known as a successful business man, but in his day he was one of the greatest amateur athletes in the country, holding in 1893 all championships for bicycle riding for all distances between one quarter and five miles. In the same year he held the Canadian swimming championship for 100 yards. After he retired from active participation in athletics, Mr. Hyslop retained his connection with sport both here and in the United States, belonging to many famous sporting organizations and clubs.

During his later years Mr. Hyslop became an ardent golf enthusiast. He belonged to the Lambton Golf Club, National Club, Ontario Jockey Club, Scarboro' Club, Detroit Athletic Club, Buffalo Automobile Club, Detroit Automobile Club, Question Club of New York, the Lake Shore Club, and to the A. F. and A. M.

J. H. Ashdown, president of J. H. Ashdown Hardware Co., Winnipeg, is chairman of the Y.M.C.A. campaign committee which starts a three day campaign May 5, to raise $100,000 in Winnipeg.

WINNIPEG NEWS

Douglas Moulden, of H. F. Moulden & Sons, hardware brokers, left to-night for Montreal on a short business trip.

The J. H. Ashdown Hardware Co. are closing their warehouse at 5 p.m. This is putting the eight-hour day into force.

Stanley Davies, representing the Toronto Lock Mfg. Co., Toronto, spent a few days in the city, calling on the hardware trade.

A. L. Fitzgerald, of Merrick-Anderson Co., Winnipeg, wholesale hardware dealers, is in Chicago, New York and other Eastern points on a buying trip.

H. C. Conley, manager of the wholesale sporting goods department for the J. H. Ashdown Hardware Co., Winnipeg, is leaving them, and is succeeded by J. Maitland.

Clifford Delaney, of the J. H. Ashdown Hardware Co., formerly a city traveller, has returned from the front and has been taken back on the staff.

E. Victor Vallance, hardware broker, has just returned from his spring trip throughout the three Western provinces, and reports prospects are very promising for the coming season.

Charlie Lacroix, of Lacroix Bros., Prince Albert, Sask., spent most of the week in the city on business, leaving last night for home. Mr. Lacroix reports that business prospects are very bright in his district, and is looking forward to a big year.

Mr. Smith, of Smith & Hemenway, Irvington, N.J., spent a few days in the city, calling on the trade. Mr. Smith stated that their plant, which has been working on Government contracts, is gradually working back to a pre-war basis of production, and that they will soon be able to take care of shipments promptly.

Russell Sutherland, hardware broker of this city, left this week for a trip through the West in the interests of the Springer Lock Co., Pullman Sash Balance Co., Stratford Brass Co.,, as well as several other manufacturers whom he represents.

J. H. Ashdown, president of J. H. Ashdown Hardware Co., Winnipeg, has returned from California. It is understood he is making elaborate preparations to celebrate the golden jubilee of his business.

George Endress, of Moncrieff & Endress, manufacturers' agents, has just returned from overseas, after three years service, and is renewing old acquaintances, prior to taking over the business which has been carried on in his absence by A. E. Hinds.

R. A. Gilbert has joined the selling staff of the J. H. Ashdown Hardware Co., Ltd., Winnipeg. He is on the wholesale auto accessory staff, being reported an expert on automobiles tires. He was formerly with the K and S Tire Co.

On account of the railways using the fast time, and because the freight sheds close on Saturday morning at 11 o'clock fast time, few shipments can be made by the wholesalers in Winnipeg. Another thing which causes inconvenience is that no shipments will be received after 10 o'clock city time, which is 11 o'clock railway time.

C. H. S. Bamford, sales manager of the J. H. Ashdown Hardware Company, Winnipeg, was the speaker on Monday evening last at the University in the last of a series of business lectures. "Salesmanship and Administration" was Mr. Bamford's subject. G. N. Jackson was the chairman.

DECIMAL POINT OMITTED

In the editorial page of HARDWARE AND METAL last week, an editorial appeared under the heading: "Taking the Discount." In giving the table the decimal point was omitted on a couple of lines, with the result that the actual money value appeared greater than it actually is. Where the terms are "2%, ten days, net sixty days," the correct amount saved is 14%—that shown was 144%; where the terms are "3%, ten days, net sixty days," the correct amount saved is 21%—that shown was 216%. Otherwise the table was correct.

Appointed to Canadian Post

E. T. Driver, B.A.Sc., has just sailed for Canada to take up a position as technical expert with the Canadian head office of the British Aluminium Co., Ltd., 265 Adelaide Street W. Mr. Driver is an honor graduate of London University, and it is stated has made a special study of the manufacture and applications of aluminium, having been engaged in the offices of the British company for some years, and also having acquired practical experience of the production of the metal by working in the mills. For the last two years Mr. Driver has held a commission as Lieutenant in the Royal Air Force on the Western Front and, it is said, was able to initiate some improvements in the wireless equipment of aeroplanes which were of considerable value.

E. T. DRIVER, B.A.Sc.

St. John News

Charles O. Morris, who was elected to office as the first president of the St. John Hardware Clerks' Association when that organization was formed in St. John, N.B., recently, is a member of the staff of W. H. Thorne & Co., Ltd. He has been with this company since he left the High School fifteen years ago, and now is in charge of the customs and transportation work of the concern.

Mr. Morris has been an active member of the committee, representing the different hardware firms through which matters connected with their various activities had been dealt with, and when the idea of an association developed, he was the logical choice for the chair.

The general object of the association is stated in the constitution to be "to promote friendship among the employees of the different hardware establishments and to encourage co-operation between employers and employes." One of the first efforts of the new organization will be a campaign for the universal observance of the Saturday half-holiday by all commercial establishments all the year round. The clerks want this for themselves, but they are not selfish about it and they want to see their fellows in other lines of business enjoy the same privileges. As a first step every clerk is to be taught the lesson of co-operation by securing from each a pledge to do no shopping on their own account during the hours when their own place of business is closed. They will be asked to spread the gospel of early-closing as tactfully as possible among their friends and customers and thus, by the process of education bring about a situation which will make it more profitable for the merchants to close their stores for the half-holiday than keep open when there is not sufficient business to warrant it.

In order to exchange news of mutual interest, to afford a vehicle for inspiring messages from successful men in their own line of business, and to promulgate their ideas, the association is planning to publish a monthly bulletin which they hope will grow into a tidy sized magazine, devoted to the interests of the hardware clerks in the locality.

It is an interesting fact that among the most enterprising of the clerks who are taking the lead in the formation of the association are many who are regular readers and students of HARDWARE AND METAL.

British Firms Free To Make Own Terms

The following cablegram has been received by the British Government Trade Commissioners in Canada, G. T. Milne and F. W. Field, from the Department of Overseas Trade (Development and Intelligence): "All subsidies and control over prices and material with regard to orders for pig iron, manufactured iron and steel and tin plates will be withdrawn April 30 subject to provisions of existing contracts and any export regulations. This means that manufacturers and merchants in the United Kingdom are free to make their own terms with regard to price and delivery from May 1."

Four-Day Convention Planned; Hamilton Selected as Headquarters

At a meeting of the executive of the Ontario Retail Hardware Association, held in the King Edward Hotel, Toronto on Thursday of this week, discussion relative to next year's convention was paramount.

It was finally decided upon to hold a four-days' convention the third week in February, commencing on Tuesday and continuing until Friday.

Hamilton is again the choice of the executive as the convention city, and headquarters will be at the Royal Connaught Hotel.

Efforts are being directed towards securing suitable quarters for manufacturers' exhibits and a building located near the hotel is being sought.

New price lists on pipe fittings are just being completed by the secretary and these will be forwarded to members within the next few days. Circulars outlining "Ten Reasons Why Retailers Should Belong to the Ontario Retail Hardware Association" are being sent out to non-members, and this, it is indicated is just the forerunner of a big campaign to secure additional membership.

Those in attendance at the executive meeting were: A. J. Wright, president, Hamilton; John Caslor, treasurer, Toronto; W. F. Macpherson, secretary, Prescott; Nelson Mills, Hamilton; George E. May, Toronto; F. B. Smith, Belleville.

HOLD ANNUAL MEETING

Election of New Officers Main Business At Steel Co. of Canada Meeting

At the annual meeting of the Steel Company of Canada Ltd., held in Hamilton on Wednesday of this week, the main business of the company was confined to making some changes in directorate of the company. Hon. Charles Alexander, Providence, R.I., retired from the board, and G. H. Duggan Montreal, president of the Dominion Bridge Company, was elected in his place. Cyrus A. Birge retired from the office of vice-president, but remains on the executive. Robert Hobson was re-elected president, and F. H. Whitton and Ross D. McMaster, Montreal, vice-president, and H. H. Champ, secretary. All the other officers and directors were re-elected.

Mr. Hobson gave the president's report, and Mr. Whitton the report of general manager. The office of general manager and assistant were abolished, the former occupants of these offices being elected vice-presidents.

FRANCIS H. WHITTON

Who was elected a vice-president of the Steel Co. of Canada, Hamilton, at the annual meeting, Wednesday of this week. The post of General Manager which Mr. Whitton held has been abolished.

Harry Barrowman, who for fifteen years has been with A. M. Bell & Co., Ltd., of Halifax, and is leaving to go into business for himself, was presented by the staff with a handsome oak clock and an office desk and chair by the firm.

Vernon Burroughs, of the staff of W. H. Cuddy, hardware, Strathroy, Ont., has accepted a position in Detroit.

Incorporations

Taylor Wilkie, Ltd., capital $250,000, head office Sandwich, Ont.; plans to manufacture and deal in autos, trucks, bicycles, motorcycles, boats and accessories.

Dixon Motors, Ottawa, Ltd., capital $100,000, head office Ottawa; plans to manufacture and deal in autos, trucks and tractors.

Automotive Service & Construction, Ltd., head office Montreal, capital $50,000; plans to manufacture motor vehicles, tractors and agricultural implements.

Simplicity Sales Co., Ltd., head office Toronto, capital $100,000; plans to manufacture and deal in accessories for autos and motor trucks.

G. A. Lewis Co., Ltd., head office Montreal, capital $50,000; plans to manufacture and do a wholesale and retail business in paints, oils, chemicals, glassware and fancy articles.

Many Chances to Sell Accessories

Montreal Wholesaler Sees Big Opportunities for Hardware Dealer—Should All Get Good Business if Gone After—Smallest Town Should Have Hardware-Accessory Stock

IN the opinion of James G. Lewis, vice-president of Lewis Bros., Ltd., Montreal, the hardware retailer is, and should be, the logical distributor of automobile accessories.

"There is no reason why the retail hardware man should not sell this line," said Mr. Lewis to HARDWARE AND METAL. "He is the best fitted man in the community to sell these lines, in fact the only dealer in a position to sell this line to the consumer. This applies in particular to the small town dealer too. In fact, this is one of the places where the hardware dealer has been rather slow in taking advantage of his opportunity, letting much of the trade go to the large city dealer."

Big Opportunities

Mr. Lewis referred to the United States dealers as a sample of initiative. "In every small town there, the hardware dealer carries a good stock of accessories, and this is one of his big lines. There is no reason why the small dealer in our own towns should not put in a stock of these goods, for if the business is left to the larger city dealers, the little fellow is simply losing good business that he might have, and which he ought to secure."

Mr. Lewis pointed out that there was an evident desire to stock these lines more than ever before. He estimated that the very large proportion of their accessory sales were made to the hardware dealers, and this year there has been a great amount of business, showing a decided interest still in this growing line.

Big Farmers' Trade

"The time is coming when every farmer will have his 'flivver,'" said Mr. Lewis. "This means that he will need accessories of various kinds, and he ought to be able to get his repairs, etc., in his home town."

This is a very significant fact. The farmer will have, if he has not already, a car of his own. The dealer, with the great opportunity at his command, and in following a plan of being a force in the community, will be in a first position to claim the farmer's trade for the new accessories that he will want from time to time. Not only so, but he will be able to cultivate his successful farmer friend into buying lines of real merit. He can play up his accessory business through his local newspaper advertising, and here is his field, very often a big territory lying adjacent to the smallest towns.

There are seasons of the year when other hardware lines are not selling and when accessories, if pushed, will sell freely. Why not get in line for the immediate season ahead? He who carries a good stock will get the business. Frequent displays now will bring the results promptly.

Uses Court Scene to Sell Electric Cleansers

A window display of vacuum cleaners that attracted a lot of attention, and a number of prospects, and that can easily be arranged by any hardware dealer was arranged this week by a Toronto firm. The whole idea is based on a trial scene in a court room. In the window in question, Dust Broom, A Sweeper and A Beater are supposed to be on trial on a charge laid by Mrs. Housewife, who claims that they have made her life unbearable owing to drudgery. This fact is announced on a large show card. The judges stand at the back of the window and right in the centre was made out of blue plush, over which a Union Jack had been draped. Two lighted electric lamps, one on each side of the judge—a large doll—complete the effect. A white ribbon leading from the judge to a show card bearing the question: "What is your verdict?" indicates that the judge is asking the jury this question.

In another stand at the side, also made of plush, sit the jurors, thirteen large-sized dolls. A ribbon running from one of them, supposed to represent the forewoman, to a large show card, indicates the reply, "We find the prisoners guilty." In a space at the opposite side of the window made by railing off a small portion, and covering the railing with green baize, the prisoners, an old broom, a carpet sweeper, and a beater, were placed as in a prisoners' box. All around the window were various sizes and styles of vacuum cleaners and a lot of printed matter furnished by the manufacturers. The entire display was well arranged and the effect in general was to suggest plenty of action and the benefits to be derived from owning a good vacuum cleaner.

CHARCOAL HEATER

J. MacIntyre, Whitby, Ont.—Can you supply us with the name of any manufacturer who makes a charcoal stove that is used for heating a body of water. As we understand it the stove is placed in the vessel with the water and the water heated in this manner.

Have suggested Thos. Davidson Mfg. Co., Montreal; Canada Foundries & Forgings, Ltd.; Jas. Smart Plant, Brockville; Jas. Stewart Mfg. Co., Woodstock; Anthes Foundry Co., Winnipeg. Would any of our readers give any others?—Ed.

CANADIAN FAIRBANKS-MORSE CO., LTD.

The Canadian Fairbanks-Morse Co., Ltd., Montreal, have issued a new catalogue of automotive equipment. This catalogue is said to be the most complete yet issued by the firm, and in its make-up is similar to the 1918 edition but with a large number of additions made. All classes of equipment are fully illustrated, and descriptive reading matter is given.

A large space is given to illustrating and describing car equipment. In this section, motor and generator brushes, lighting bulbs, piston rings, fan belts, clutch facings, etc., are dealt with, and definite data are given regarding the sizes required of the above equipment. It is the intention of the company to supplement from time to time, the new catalogue with information concerning new lines that are added.

Dealers are requested, if not already in receipt of a catalogue, to send forward their name and address, when a copy will be forwarded.

JOHN MILLEN & SON

John Millen and Son, 321-323 St. James Street, Montreal, have issued a new automotive equipment catalogue, No. 62. This contains 312 pages, illustrating a complete line of automotive equipment, and with list prices given, from which regular discounts apply on single, dozen and larger quantity lots.

The business is fifty years old in May, 1919, and the cover of the new catalogue describes the transition from the scenes of 1869, with the old-time carriage, rail fences, ox-team and stump-dotted fields, in contrast with the neat wire fences, farm tractors and automobiles used today. The pictures are realistic and very attractive, and in the centre of the catalogue is a Corinthian column with the words: "Automotive Equipment—Progress—50 Years of Service," appearing. On either side are two trade marks of the firm: "Millen-nium—Quality—Service." Copy of catalogue will be sent interested dealers.

Elected President Carborundum Co.

Frank J. Tone has been made president of the Carborundum Co., of Niagara Falls, succeeding the late Frank W. Haskell. George R. Rayner has been made vice-president, succeeding R. B. Mellon, of Pittsburgh. F. H. Manley retains the office of treasurer.

THE CLERKS DEPARTMENT

Sharing the Business With the Clerks

By A. M. Peikoff, Grandview, Man.

"THE question of getting the best results from every agency of the store is one that is of vital interest to every merchant. To have the store clean and attractive at all times, to have goods so arranged that they may be ready for instant sale, to have deliveries out promptly at the time promised, and more than all, to have the employees of the store constantly on the alert, constantly on the lookout for business, working with the real interest of the store at heart, is certainly the pathway to an assured success.

"I started in business in Grandview, Man., last September, with a general stock of about $18,000. Beside myself I employ two clerks.

New Business Presents Difficulties

"Starting business in a new place presents a good many difficulties. With a new store, more than ordinary care is required if business is to be built up to a satisfactory basis; the store must be bright, attractive and well ordered. A hundred little details have to be looked after, details perhaps small in themselves but that added together make the conditions that bring customers to deal at the store. While I understood the importance of these things and did my best to see that everything was kept in the best possible condition, I found that under the system I was using it was impossible to achieve this result. It was either a matter of doing the things myself or of getting a habit of changing clerks every week or so, for they soon developed careless habits. But changing clerks frequently is bad business for the store. To have strangers constantly behind the counter is not the way to success, for it takes time before the customer will learn to trust the clerk and to put confidence in his judgment. I spent a lot of thought in trying to devise some plan that would overcome these difficulties, and finally I adopted an entirely new system that seemed to show some change of success.

A Bonus System Devised

"Under the new plan I employed the same two clerks, paying them a good salary and providing board and lodging. The head clerk gets $15 a month more than the junior. Each clerk is expected to sell $1,500 worth of goods a month. On business they do over and above that amount they each get a bonus of 2 per cent. Then to provide the element of competition, in addition to the incentive of the bonus, and to keep the junior clerk always on his tip-toes for business, I give him an additional bonus of 5 per cent. if his sales exceed those of the head clerk. In order that this bonus may not be too easily earned it is one of the conditions of the new plan that if the head clerk is beaten in sales he loses his 2 per cent. bonus. He has then two chances to redeem himself, but if in the two following months the junior's sales again exceed those of the head clerk then their positions are reversed, the head clerk becomes the junior and the junior the head clerk with the additional $15 a month that goes with that position.

"I have found that this scheme works splendidly. There is now no necessity for the bonus, and I am glad to pay them all the bonus they can earn, for while it pays them it also works greatly to my advantage.

Penalties for Failure to Meet Conditions

"Then there is the matter of looking after the store. They each have their own department to look after. For instance, the junior has the groceries,

hardware, crockery and paints. It is his duty to keep everything spick and span in this department. He must always have enough 10, 25 and 50 cent. packages of rice, sugar, dried fruits, etc., and 5 cent. packages of candy.

"As a penalty in not having fulfilled these duties, and having sufficient stocks of these goods ready, he loses his counter check book. Even if it is in the midst of the busiest day I simply take the book away from him and put it in the register and he loses his chance of selling, and must then and there get to work parcelling up the number of packages required. When he has done so he has his book returned and can resume his selling.

"The head clerk looks after the dry goods, gents' furnishings and boots and shoes, and somewhat similar conditions apply to his work.

Keeping the Store Bright and Clean

"Now in the matter of keeping the store swept and the counters and shelving dustless and bright, they are each given this duty for a week at a time, and are required to keep the store as clean and bright as the day on which it was opened. If this standard is not absolutely maintained then the penalty is that they lose their sales book until the condition is set right. This keeps them constantly alive as they are both looking forward to the end of the month in their endeavor to increase their bonus and to endeavor to beat each other's sales.

How Carelessness is Discouraged

"In regard to goods that are damaged through carelessness, I have also thought out a way of making the clerk feel his responsibility. I do not attempt to sell these goods to the customer. I simply make out a bill for these goods to the clerk as though they had been sold across the counter, and this bill is of course deducted from his bonus. By this system the clerk gets a certain part of the profits of the business, and it is only right that he should be made to share the loss in the case of avoidable waste.

"Then in regard to the important matter of deliveries. Where deliveries are promised for a certain hour they must be delivered at that time. If a customer refuses goods on account of them being delivered late then the same policy is adopted, the goods are confiscated and the clerk responsible is given a bill for

them and this amount is again deducted from his share of the profits.

Preventing a Rowdy Atmosphere in the Store

"Then we have adopted a system to prevent the use of profane language in the store. We have a charity box in the store, and if anyone swears they have to put five cents in the charity box and the proceeds are given to the Red Cross. This of course is a matter of mutual understanding, and is scrupulously observed.

"That is the general framework of the system I have adopted to keep the store running smoothly and at the highest possible level of efficiency, and it has worked wonders with us. All the difficulties that caused so much trouble and dissension under the old system, where the clerks were merely clerks with no interest in the success of the business, have vanished, and you would hardly recognize it for the same store. We are giving better service, and the clerks are more contented and more interested than they ever were, even at the best of times under the old method.

"This system has certainly proved itself of value in the case of our store."

Retail Salesman is An Important Factor

THE retail salesman is the most important factor in the modern commercial institution. The man who designs goods is important. The man who makes goods is important. The man who stocks goods is important. But the man who sells goods and distributes them to the ultimate consumer is really the most important of all.

An artist can paint a most beautiful picture, but it is really without value unless somebody can be found who wants it. A composer can conceive a most interesting overture, which is likewise valueless until somebody can be made to appreciate it and want it. And quite the same thing is true of the author—his work is valueless and without intrinsic merit until somebody wants it.

The salesman is the man who makes the world want what the other man has conceived or produced. Hence, the salesman occupies a most important position, which very often is valueless to his own way of thinking.

All of us are, as a matter of fact, salesmen. The minister who preaches in church is selling his ability, and the better he sells it the bigger is his congregation. He may not look for his reward in this world's goods, but his success depends on his ability to put across his proposition. The politician sells his services. The writer, the lecturer, the manufacturer, the day laborer—all are salesmen, and according to their selling ability are they paid.

The salesman is too apt to think of himself as a non-essential. But the contrary is nearer the truth. The salesman is fundamentally necessary to every commercial organization. Very often, in fact, the salesman's ability brings in a greater reward of remuneration than does that of the manufacturer or the artist.

Some of the highest paid people in the country are salesmen.

Therefore, the salesman should be on the alert for every advantage as it comes along. Yet in most cases he is not.

Some salesmen—alas, too many—are content to take things as they come—and if they don't come, to complain about them. It never enters their minds that they might make progress through their own initiative. They do not realize that attention to details and perseverance are just as essential to success in salesmanship as they are in any other line of endeavor.

Many wall-paper salesmen know but little of the goods they are called upon to sell. They may recognize variations in the styles, but they do not know the subject in detail—as they should know it if they are to be successful salesmen.

Charles M. Schwab, one of the greatest salesmen in America, says: "The supersalesman will not only study the immediate needs of his customers, but he will provide against those needs, even before the customers realize that they exist." How can a salesman anticipate the needs of his customers if he does not know what these needs are likely to be? His knowledge of things in his field must be greater than that of his customer. He must know all about a certain wall paper, and he must know more than that—he must know where the wall paper is going, how it will look in a certain scheme, why it is right here and when it is wrong there, and why this, that and the other thing commends it so that it is suitable for a certain definite purpose.

"Too hard work," says a salesman. "I haven't got the time to do all this studying. I am only paid so much a week, and I certainly give work to a value that is greater than my salary."

BUILDING A NEW BUSINESS LEADER

Continued from page 40

of garages and salesrooms. Two or three of the largest garages in Winnipeg are located within a stone's throw of the store.

The Garage—A Source of Revenue to This Merchant

"Are they a menace to the store—wouldn't your business be bigger away from them?" Mr. Templeton was asked. "Indeed no! I would be glad to have two or three more near here," was the reply. "I not only get business from the customers of the garage, but from the garage men themselves. The mechanics buy their tools here and they send their customers over for many lines or buy from me themselves for their customers. I find them directly and indirectly a source of benefit to my business and certainly couldn't wish for a better location in that respect."

Business Improving

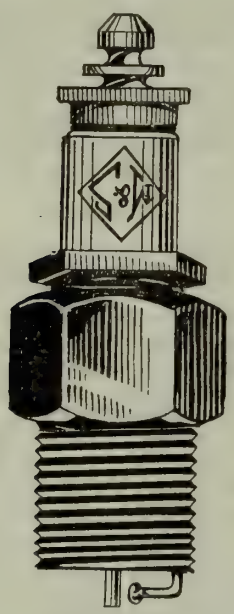
Coming back to the other hardware lines, Mr. Templeton indicated business was improving. There are more carpenters' tools and kindred lines moving but the builders' hardware is still pretty slow. Asked as to whether he would ever go into the builders' hardware business so strongly again, Mr. Templeton stated emphatically that he would not. "It is nice business when it is coming along well, but I have seen what it has done when it is not so good, and I am certainly not going to be caught again. The motor accessory field is opening up bigger all the time and I see in it a future which, on the basis I now have reached in the game, promises well."

The hardware man can make a success of the motor accessory business as well as selling tools or kitchen ware; the field is large and constantly growing. The development shown by some merchants may be a stimulus to others. It requires study but the reward is certain. There is no better time to start than now.

SHEFFIELD STEEL MILLS HAVE PLENTY OF ORDERS

Reports from Sheffield, England, regarding the steel outlook state that: "The signs of an approaching revival of activity in the heavy steel branches are beginning to materialize, as some substantial overseas orders for billets, blooms, and slabs, as well as finished steel, have been placed this week, and there is an increase of work at the furnaces. Evidently buyers are becoming satisfied that the trend of prices is certain to be upward. Notwithstanding the inflated prices a considerable amount of new work has also been booked in the railway-steel branches, local plants being now fully employed on rails, tires, axles, and springs for the home and South American companies. Some authorities on trade contend that the fears of American underselling are unlikely to be realized, for in support of this view some American quotations for plates for France work out at from $10 to $15 higher than offers from British makers. As regards the reports of American steel going to the British colonies, it appears that most of it is replacing the German material formerly bought by these markets. Numerous and substantial orders for steel for agricultural machinery are arriving from continental sources. Mills are busy and forges moderately employed, and owing to the activity of the automobile trade there is a scarcity of small steel castings. Finished iron and steel cannot be rolled fast enough to meet requirements."

NEW HARDWARE GOODS



OFFERED TO CANADIAN HARDWAREMEN

ILLUMINAL

"Illuminal," being marketed in Canada by J. G. Roberts, 1 Kinkora avenue, Montreal, lights gas, it is claimed, without matches or friction. It is stated that no flint, no carbon, is required and that "Illuminal" is invaluable to users of gas stoves, gas heaters, gas jets, incandescent mantles, etc. "Just turn on the gas and it lights immediately," is the claim of the maker.

SPARK PLUG

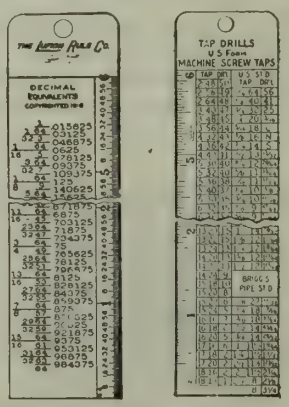
The M. & S. spark plug, which is manufactured by the Machine & Stamping Co., Ltd., 1209 King Street West, Toronto, Ont., it is claimed, is one of the strongest and best wearing plugs on the market. Special features claimed by the manufacturers are the three in one terminal, which, it is stated, will take three different connections, and the ball point electrode. This spark plug, it is stated, will not readily crack or leak, and will result in a saving of gas, oi and trouble, and an increase of power.

Spark Plug

PLIER

Smith & Hemenway Co., Inc., 114 Cort St., Irvington, N.J., are manufacturing an improved "Red Devil" plier.

This tool, it is stated, will grasp and hold any regular or irregular shape of nut, pipe or rod. The cutters in all slip-joint pliers when thrown open push forward. In designing this tool both cutters are made parallel, at an angle when open and will, it is stated, do the work of a side cutting plier. The new design in the handles and head which has been adopted, makes it most attractive, the manufacturers claim.



"Red Devil" Plier

The sizes are 6½, 8 and 10 inch. The method of packing is one in a box, six in a carton, the box bearing the number and size on both ends so that a merchant can put the individual carton on his shelf with the number and size visible. The finishes of this plier, it is stated, are gun metal and nickel-plated.

STEEL REFERENCE TABLE AND SCALE

A combination of exceptional usefulness and convenience is found, it is stated, in the new No. 97½ reference table and scale offered by the Lufkin Rule Co., of Canada, Ltd., Windsor, Ont., manufacturers of mechanics' scales, measuring tapes and folding wood rules.

This new article carries on one side, it is stated, tables of tap and drill sizes, U.S. standard, including fractional as well as numbered sizes; also S.A.E. and Briggs pipe standard, and a 6 inch scale in 32nds. The other side bears a 6 inch scale in 64ths, with the improved feature of readable graduations, and a table of common fractions and their decimal equivalents.

New Lufkin Product

The article is in the form of a semi-flexible 6 inch steel rule, 1¼ inches wide. It has good legible figures throughout, it is stated, is convenient to carry in the pocket, and has also hole at one end for hanging up. The manufacturers claim it is the most practical combined reference table and scale on the market.

NEW AUTO TIRE

The Patent Record gives a description of a puncture and blow-out proof auto tire patent granted to G. E. Phillips, of Sarnia, Ont. The features about this device are that only 65 per cent. of the regular air pressure is required to fully inflate the tire, thus relieving, it is stated, the casing of the constant strain from high pressure, and increasing the life of the fabric carcase of the casing 100 per cent.

The patents cover a complete tire, that is casing, tube and protector. The latter two are the principal items, as they can be used, it is stated, in any standard pneumatic casing. The only difference in the new casing and those now in use is that the tread directly in the centre will, it is stated, have one-half inch more rubber without increasing the diameter or shape of the tire on the outside.

ALUMINUM SILVER CLEANERS

The British Aluminium Company, Limited, 60 W. Front street, Toronto, is marketing aluminum in sheet form for cleaning silver. The manufacturers state that with the use of these aluminum sheets silver may be easily cleaned and the process is outlined briefly as consisting of boiling the silver articles in contact with a piece of aluminum and in a solution which contains a little soda. The idea is to use a boiler or other vessel at the bottom of which is placed a sheet of aluminum. The boiler is filled with water containing one teaspoonful of soda and one teaspoonful of common salt to the quart. In a few minutes, it is claimed, the articles are cleaned and should be removed, rinsed and dried with a soft cloth. Further details will be supplied upon request.

CANADA'S METAL INDUSTRY

According to the annual report of the Canadian Bureau of Statistics, the values of metals imported by the Dominion last year were as follows: Brass, $5,319,192; copper, $6,131,541; lead, $1,062,424; tin, $15,609,170; zinc, $1,333,744.

Canada's exports in 1918 included aluminum $7,233,570; old and scrap brass, $1,454,451; copper, $20,772,109; nickel, $11,263,246.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

ONE important change this week is that which affects list prices on washing machines. Advances have occurred of from 50c to $3.00 each in the list price of a great many styles. Difficulty in securing and the high prices of suitable lumber is given as the main reason, offsetting any easier tendency so far apparent in iron or steel. The discount remains at an unchanged figure, only the lists being revised.

The flax seed market received a setback on Tuesday and Wednesday of this week, but seemed to be steadier again, and there does not seem any prospect of very much lower prices in the immediate future. Some oil markets showed advances during the week and the range of quotations generally has narrowed toward the higher levels.

That manufacturing conditions in general are showing some improvement in Great Britain and the United States as well as in Canada is apparent from the receipt of sharp edge tools, some lines of cutlery and metal polish from England and a well-known line of rifles from the markets to the South. Prices on all these lines are higher than former figures.

Galvanized wire shows an advance in some quarters this week, this being a reaction from recent sharp decline. Bamboo poles are arriving from Japan and prices show a sharp advance.

Turpentine showed a slight recession at primary points on Tuesday but came right back again the next day and tendency seems firm. The situation locally is unchanged, though scarcity is reported in many centres, due largely to unknown cause of transportation hold-ups.

Brass and bronze wood screws have undergone a further decline this week, the drop being a pretty substantial one and following closely on the heels of a recent change downward. Further reports of lower prices on some lines of building papers and tarred felt are now in, practically all centres having adopted the changes noted last week.

Business is reported very good and seems to be improving steadily. All spring lines and mixed paint, etc., are moving forward well.

MONTREAL MARKETS

MONTREAL, May 1—For the most part, prices are quite steady on many commodities, but there have been a number of reductions. Among these are new and additional reductions on building papers and roofings, these being given below in detail. There may be a readjustment on wrapping papers, raw costs being lower, but labor holding high still. Pipe wrenches, plumbers' oakum and garden shears are down in price. Lead, aluminum and spelter are lower. Washing machines are marked up, the list on a number of these being changed.

There is a better movement of gardening tools, the retailers sending in repeat enquiries, and this indicating that the consumer has been buying. A healthy and better condition is looked for in the immediate future.

Washing Machines Are Now Higher

Montreal

WASHING MACHINES.—Advances have been made effective on the list for various washing machines. There is no change in the discount which remains at 30 per cent. and 10 per cent. List prices on the affected lines are as follows:, Jubilee, $10.25; Dowswell & Canadian, $11; Peerless, $11.50; Hamilton & Snowball, $17; Momentum, $18.50; Patriot, $21; Seafoam Electric "A," $110, and "B" style, $50.

Pipe Wrenches; Oakum, Garden Shears Down

Montreal

WRENCHES, OAKUM, SHEARS.—Declines have been effected in pipe wrenches of Vulcan make. The new prices are: No. 31, $3.50; No. 32, $5; No. 33, $7; No. 36, $11.25 each. Plumbers' oakum has been reduced in one quarter one cent per pound, the present quotation being $9 per 100 pounds. Garden shears have been reduced in price. The new quotations on the No. 100 series in 9-inch length are as follows: No. 100 x 9-inch, $19.20 per dozen; No. 104, $30; No. 105, $33; No. 106, $30; No. 107, $18; No. 101, $21.

Heavy Sheathing, Tarred Paper Down

Montreal

BUILDING PAPER, ROOFING.—Heavy tarred straw sheathing is reduced in price 30c per roll. This applies to Scythe Brand, and the new price per cwt. is $3.20, and not 78c as reported last week. The price of 78c per roll applies to Anchor tar sheathing No. 2, Good Luck Roofing 1 ply, is quoted down at $1.70; 2-ply, $2; 3-ply, $2.35. Two-ply ready-roofing is reduced to $1.35 per roll, and 2-ply to $1.65. Cyclone dry sheathing is quoted down at $1.20 per roll and to $1.30 for Cyclone tarred. Joliet dry sheathing, 60c, and tarred 78c per soll. Rosin-sized sheathing, blue, is quoted at 70c. Heavy dry straw sheathing $3.05 per 100 pounds, and tarred $3.20. Carpet felt is $3.75. Black Diamond tar felt $3.80 per cwt. Monarch white sheathing is quoted at $5.75, and gray at $4.75.

Small But Frequent Are Rope Orders

Montreal

ROPE AND CORDAGE.—Markets are steadily held without change. There is

a steady business, and this might be stated as seasonable, viewing it in the light of the past few years' trade. Orders are frequent, but the jobbers are governing their stocks by the orders received from the retailers, and who are buying in limited quantities for the most part. Prices are: Pure manila, 34c; British manila, 30c, and sisal, 27½c per pound.

Stoves Will Move; Steady Ware Market

Montreal

STOVES AND WARES.—Markets are ruling very steady on stoves and ranges, and the manufacturers believe that there is no justification for lower prices. Labor costs to them have been very high they say, and this means that cost of production has been kept very high. The movement of enamelled wares and other seasonable lines has been good. "We are very busy on these goods, and there is much activity," said a large manufacturer.

Orders Accumulated on Gasoline; Coal Oil

Montreal

GASOLINE, COAL OIL.—Larger sales of gasoline are gradually developing and there are large stocks to meet this need Prices have been steadily held without change at 34c per gallon. On coal oil there has been no change, and the market is a fair one, seasonable turnovers being made. Prices on various grades run from 20c to 23c per Imperial gallon.

Many Wire Nails Have Been Sold

Montreal

NAILS AND WIRE.—It cannot be said that anyone is buying heavily of nails, but there is a good movement, orders being frequent. In the aggregate there is a considerable tonnage moving all the time, and this is likely to increase as the season progresses. Base price on standard wire holds at $4.75 per keg, and that on cut nails is the same. No change has been effected on wire, the base price still being $5 per 100 pounds on smooth steel No. 9.

Iron Unchanged; Steel the Same

Montreal

IRON AND STEEL.—Movement of iron and steel to the country is reasonably good. There is a fair prospect of larger business coming through, and there will be more business from the country merchants, it is expected. No price changes have been recorded.

Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75
Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22

No Sheet Changes; Trade Coming

Montreal.

SHEETS AND PLATES.—Jobbers feel that trading is being done here on quite a favorable basis, and there is a fair volume of business passing. There is a reasonable amount of stock here to meet present needs, and import of sheets is now possible. On this basis lower prices could be obtained.

	Per 100 lbs.	
BLACK SHEETS—		
10 gauge	$5 40	$6 25
12 gauge	5 45	6 30
14 gauge	5 50	6 35
16 gauge	5 60	6 50
18-20 gauge	6 15	6 35
22-24 gauge	6 20	6 40
26 gauge	6 25	6 50
28 gauge	6 60	7 00
GALVANIZED SHEETS—		
10¾ oz.		$9 25
28 gauge		8 75
26 gauge		8 50
22 and 24 gauge		8 35
20 gauge		8 35
18 gauge		8 35
16 gauge		8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 30c per 100 lbs. is made for broken lots.

Plumbers Purchase Lead Products

Montreal.

LEAD PRODUCTS.—The market here is steady and fairly active for the various lines used by the plumber. Some work is now looking up, and it is very likely that more will develop. Prices are ruling quite steady, the market being unchanged. Pig lead is somewhat easier and the tendencies on manufactured lines are anything but of a firming nature. Labor outlays by the manufacturers will tend to offset small declines.

Lead pipe	0 11½
Lead waste	0 12½
Lead traps and bends	Net list
Lead traps and bends	15%
Lead wool, lb.	0 14
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	0 10½

50-50	0 39¼
Zinc sheets, casks	0 17
Do., broken lots	0 18

Yet Small Interest In Old Material

Montreal

OLD MATERIAL.—Prices are ruling with practically no change on old material. There is not a great deal doing in any line, and the dealers are, notwithstanding, looking forward to improved conditions. The large buyers of metal scrap are inclined to wait price adjustments, and once these are made, or the present basis settled upon definitely, there will undoubtedly be quite a marked improvement in demand.

Dealers' Buying Prices—		
Pipe scrap, ton	9 00	10 00
Stove plate, ton		15 00
No. 2 busheling		5 00
Old rubbers, boots and shoes	0 06½	0 07

Red brass	0 12	0 12½
Light brass	0 06	0 07
Scrap zinc		0 04¾
Heavy copper	0 13	0 13½

FLASHES FROM THE WEEK'S MARKETS

Washing machines show many revisions this week, list prices advancing from 50c to $3.00 each.

* * * *

Some lines of building paper and tarred felt have been revised downward slightly.

* * * *

London prices on pipe fittings have shown a decline.

* * * *

Brass and bronze wood screws show a substantial drop. This follows closely on the heels of a recent change.

* * * *

Galvanized wire, after a sharp decline at Winnipeg recently, has reacted to higher levels.

* * * *

Bamboo poles arriving from Japan are carrying somewhat higher prices.

* * * *

Linseed oil advanced 8c per gallon at Winnipeg.

* * * *

English razors are now on the market, black handled being quoted at $23.00 and white handled at $25.00 for some of the better makes.

* * * *

Remington rifles are again being quoted in some models. A more complete range is expected soon.

* * * *

Brasso metal polish is again available. Prices are higher.

* * * *

Turpentine is reported scarce in London. Prices remain firm and unchanged.

* * * *

Socket wrench sets, Mossberg make, are again revised upward.

* * * *

Uncertainty over extent of labor troubles which may break on May Day is noticeable this week.

* * * *

More interest is being shown in builders' hardware. Sales are improving.

Wrought iron, No. 1, per gr. ton	11 00
No. 1 machinery cast	18 00
Heavy melting steel	10 00

Lead; Aluminum And Spelter Down

Montreal

INGOT METALS.—Lower prices are obtaining on three of the ingots in this market; lead, spelter and aluminum being quoted down. There is a quiet trading condition all around.

COPPER.—Improvement of demand was noted in the States this week but there is no local interest and price remains at 18c per pound.

TIN.—Fluctuations continue, but these are of a more limited nature, and the basis is considered near normal, price being 56c.

LEAD.—Offerings have been made for less money in the United States markets, and there is a weaker condition here as a result. The basis is held at 6½c.

ANTIMONY.—Nothing new characterizes antimony and there is not much movement of the metal. Price stays at 8½c.

SPELTER.—Slightly lower prices are effective for this, and the limited amount of business being done is based at 8c to 8½c per pound.

ALUMINUM.—With a lower price of 38c per pound this market is dull and uninteresting. Larger quantities could be bought lower.

PIG IRON.—A decidedly unchanged position obtains. Quoted price here remains at $45 per ton.

TORONTO MARKETS

TORONTO, May 1—An important change has been made in washing machines this week, advances in the list of a great number of styles being reported. The discount holds at unchanged levels. A further decline in brass and bronze screws has been effected following on drop recently reported. Brass escutcheon pins are lower. Changes generally are not so numerous this week, the markets showing a steadier tendency than for some time past. Business is considered better.

Higher Prices on Washing Machines

Toronto.

WASHING MACHINES.—There has been a change this week in the list prices on a great number of washing machines, the new prices providing for advances in the majority of cases. The change which has been made affects the list price only, the discount remaining at 30 and 10 per cent., which is an unchanged figure. The complete list of machines which have been changed along with the new list prices which apply, follow herewith:

Washing Machines.—Connor's Improved, $10.75; Magic, $11; Ottawa, $11.50; Winner, $17; Canada First (cut gear), $21; Gem, $18.50; Beaver, $23; Perfection Electric, $119.50; Perfection Steel stand, 1 tub, $1.50; Perfection steel stand, 2 tubs, $121.50; Perfection steel stand,, 3 tubs, $127.50; Perfection Electric, 1 tub, $122.50; Perfection Electric, 2 tubs, $125; Perfection Electric, 3 tubs, $127.50; Perfection (engine drive), $59.50; Perfection (engine drive), 1 tub, $62.50; Perfection (engine drive), 2 tubs, $65; Perfection (engine drive), 3 tubs, $67.50; Jubilee, $10.25; Dowswell, $11.25; Hamilton, $12.50; Canadian. $11; Peerless, $11.50; Snowball, $17; Momentum, $18.50; Patriot (cut gear), $21; High Grade (cut gear and "BB"), $23; Seafoam "B" Engine Drive, $50; Seafoam "A" Electric Drive, $110; New Idea, Electric, $118.50; Sunshine, $10.25; Popular, No. 2, $11; Popular, No. 1, $11.50; Premier (double speed), 1$8.50; Imperial (large dolly), $18.50; Economic, $13.50; Puritan, $17; Champion High Speed, $18.50; Home (cut gear), $21; Imperial (electric), $110; Hydro, 1 tub, engine drive, $51,50; Hydro, 2 tubs, engine drive. $61.50; Hydro, 3 tubs, engine drive, $67.50; Hydro, 1 tub, electric, $111.50; Hydro, 2 tubs, electric, $121.50; Hydro, 3 tubs, electric, $127.50.

Brass Escutcheon Pins Go Lower

Toronto.

BRASS ESCUTCHEON PINS.—Revision has been effective this week on brass escutcheon pins. These are now being quoted to the trade at net list. No change is reported in the price of the steel escutcheon pins.

Brass, Bronze Screws Decline

Toronto.

WOOD SCREWS.—A further change has been made effective on the price of brass and bronze wood screws. This provides for quite a substantial decline from the former figures and follows closely on the heels of a change made not long ago. The present discount along with the former discount for comparative purposes are shown herewith. There has been no change whatever in the bright steel wood screws.

	Present Discount	Previous Discount
Flat head brass 47½%		40%
Oval head brass	45%	35%
Round head brass	45%	35%
Flat head bronze 42½%		30%
Oval head bronze	40%	27½%
Round head bronze	40%	27½%

Stove Situation Outlook Clearer; Wares Hold

Toronto.

STOVES, WARES.—The atmosphere surrounding the stove outlook seems to have cleared somewhat, following the announcement made recently that there was no prospect of any immediate revision in prices. The trade seems to be better satisfied to go ahead and buy. Whereas the requirements just now are not so heavy as usual, there is some nice business finding its way to the manufacturers. Summer lines are quite active and manufacturers report that coal-oil stoves particularly are moving forward quite freely. There has been no change in price in many of these lines and the immediate prospect is that the market will remain steady for some little time.

There is nothing new reported in the situation of enamel or tinware or kindred lines. Spring orders have been completed pretty well and the business has been hardly started as yet. The outlook seems to be quite satisfactory and everyone seems to be looking forward to good business.

Better Movement Oils, Gasoline

Toronto.

OILS, GASOLINE.—Coal oil is coming into active demand now for use in stoves, with the result that orders are being placed with the refineries and assuming much larger proportions. Prices for the week remain unchanged, being 19½c. to 22½c. per gal., according to grade. It might also be said that with the increased use of motor cars the sale of gasoline has also improved. The price of this product has remained unchanged also, the price to the dealers being 33c. per gal.

Better Trade in Iron and Steel

Toronto.

IRON AND STEEL.—From all accounts there is quite a considerable enquiry for iron and steel in all its branches. It has extended even to buyers, and while the actual business done is yet rather limited, there seems to be somewhat better undercurrent of feeling. Prices during the week on bars have remained unchanged, the following list showing the quotations effective to-day:

Common bar steel	4 25	4 50
Common bar iron	$4 25	$4 50
Refined iron	4 65	4 90
Angle base	4 50	4 75
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel, No. 10	4 50	4 75
Do., No. 12	4 75	5 00
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 30

Activity Marks Attitude of Sheets

Toronto.

SHEETS, PLATES.—Activity seems to be generally the keynote sounded by jobbers in relation to business coming to hand on sheets. There seems to be a tendency among buyers to keep their orders down to immediate requirements, but the orders are coming along frequently, which in the aggregate work out in a nice volume of business. Prices show no change during the week from the following levels:

BLACK SHEETS.	Per 100 lbs.	
10 gauge	$5 00	$5 45
12 gauge	5 05	5 50
14 gauge	....	5 10
16 gauge	....	5 20
18-20 gauge	5 80	....
22-24 gauge	5 85	....
26 gauge	5 90	....
28 gauge	6 00	....
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 50	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS.

10¾ oz.	$7 80	$8 10
U.S. 28	7 40	7 70
U.S. 26	7 10	7 40
22 and 24	6 95	7 25
18 and 20	6 80	7 10
16	6 65	6 95
12 and 14	6 50	6 80

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Corrugated Sheets Holding Firm

Toronto.

CORRUGATED SHEETS.—The market is holding quite firm and without any change from levels recently established. Manufacturers report a better volume of business than has been noticeable for some time past, and the outlook seems much better. Inquiries at hand indicate a trend towards an active season. Quotations range as follows:

Corrugated Sheets—	Per 100 sq. ft. Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Wrought Pipe Firm; Boiler Tubes Steady

Toronto.

WROUGHT PIPE, BOILER TUBES.—The situation in respect to wrought pipe remains unchanged during the week. There seems to be a fair amount of business coming to hand at the present time, and manufacturers are optimistic over the outlook. Prices shown in the current market quotations are still holding.

Boiler tubes show a steadier tendency and the market on these seems quite settled after the many changes recently effected. Jobbers are able to get supplies through quickly and report a fair sale. Quotations follow herewith:

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00

2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	.....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

Business Brisk in Lead and Zinc Products

Toronto.

LEAD AND ZINC PRODUCTS.—Manfacturers report sales of lead and zinc products better. Solder is in more active demand and the same is true of manufactured lead lines, though this business should improve still further in the next two or three months. Prices during the week have held steady and without change.

Lead pipe, lb.	....	$0 11½
Lead waste pipe, lb.	....	0 12½
Lead traps and bends	....	15%
Lead wool, lb.	....	0 14
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½

Solder, wire, lb.	0 34	0 40
Zinc sheets, per lb.	....	0 17

Dull Market in Old Materials

Toronto.

OLD MATERIALS.—"Things are no worse or no better than they have been for some weeks past." That is the way the largest dealers in the district size up the situation. Dealers are taking on such material as comes in at the prices shown below but they are not keen to buy. They have to take on quantities at times just to let the trade see that they are in the market for material, and sometimes in order to protect their name and credit. As a general thing they do not want to buy, even at the comparatively low figures now quoted. Some of the smaller dealers still have in mind the high figures they were receiving for their material during the years of the war, while the ultimate user has in mind the much smaller figure at which he may have to sell the articles for which he would buy scrap material. Between these two points there is a big gap, and it has not been bridged.

The steel mills and the foundries are not buying anything to speak of. In many cases, they are pretty well filled up, and added to that the rate at which they are consuming material just now is much smaller than it was during the period of the war.

Prices have not been changed at all during the last two weeks.

Dealers' Buying Prices—		
Tea lead	....	0 03

Automobile tires	0 03½	0 04

Nails Hold Steady; Wire Unchanged

Toronto.

NAILS, WIRE.—Wholesalers report a fair amount of business coming to hand for wire nails. This is not very extensive as yet, but there is some nice sorting business taking place which somewhat tends to better the situation. There has been no change in prices this week, the wire nails being quoted at $4.70 per 100 lbs. base, and cut nails at $4.75.

There is nothing new to relate in the situation in smooth steel wire or wire products. There is some business being done in annealed wire and fence wire, but outside of these two there is very little action. The smooth steel wire base is $5.00 per 100 lbs.

Cordage Situation Featureless; Twine

Toronto.

CORDAGE, TWINE.—Spring orders for cordage have been pretty well completed and just at present there is the usual lull which follows this condition and precedes the time when sorting orders begin to arrive. Manufacturers, however, as well as jobbers report that business is as good as they expect at the present time, and seems to be quite satisfied that things are working out satisfactorily. The prices remain quite steady, the pure manila being quoted at 34c. per lb., base; British manila, at 30c; New Zealand hemp, 30c.; sisal, 27½c. and sisal lath yarn, 27½c.

The business which has been placed with Canadian manufacturers on binder twine for shipment to Roumania has helped out the situation in this respect to some extent. Whether any more business will be forthcoming or not is still something which has to be determined. There have been no changes in the price locally, and none are anticipated in the immediate future.

Ingot Metals Holding Steady

Toronto.

INGOT METALS.—The situation during the week reveals no features of outstanding importance, the market generally seeming to be on a fairly steady basis. Sales are not heavy, buyers only specifying for their requirements.

COPPER.—A somewhat better tone to the market is noticeable at primary points. No quotable change is shown in price here, 18c. per lb. being the figure generally heard. Business is fairly good.

TIN.—The situation in this metal is without feature. Supplies are ample for requirements of the trade, but then the demand is not heavy. Quotations are being made at 57c. per lb.

SPELTER.—Business is by no means heavy nor is it really fair, buyers being satisfied to work along pretty close to actual requirements. Stocks are not large. Price remains at 8¼c. to 8½c. per lb.

LEAD.—Primary points report conditions rather dull and whereas some trading is noticeable here, it is by no means large. The price has held at last week's decline, being 6½c. per lb.

ALUMINUM.—Conditions in this market continue quiet. Quotations nominally range around 40c. per lb., with little interest shown.

ANTIMONY.—There seems to be more activity to the market at primary points and bookings for future delivery are quite plentiful. Locally there is a better feeling as a reflection of primary conditions. Price holds pretty steady at 8c. per lb.

LONDON MARKETS

LONDON, Ont., May 1—Lower prices have been established on some lines of building paper and tarred felt. Washing machine lists have been revised, many showing advances ranging from 50c to $3.00 each. Pipe fittings have declined and a substantial drop in brass and bronze screws is noted. Advances have occurred in socket wrench sets, rubber grainers, wire stretchers, pine tar, hose couplings, cleaning rods and bamboo fishing rods.

Activity is noted in sales of horse-clipping and sheep shearing machines, washing machines, clothes wringers and churns along with other spring goods. More interest is being shown in builders' hardware.

Lower Prices on Pipe Fittings

London, Ont.

PIPE FITTINGS.—Quotations on pipe fittings have been revised to lower levels this week, quotations now in effect being as follows: Malleable fittings—Class B, black, 22c per pound; C, black, 14½c; B galvanized, 31c; C, galvanized, 22c. Bushings, 32½ per cent. off list. Plugs, 30 per cent. off list. Unions, 45 per cent. off list.

Metal Polish on Market; Razors, Too

London, Ont.

METAL POLISH, RAZORS.—English "Brasso" metal polish, which has been scarce for some time, is now coming in larger shipments. New prices have been determined upon which show somewhat higher levels as follows: No. 3, $1.35 per dozen; No. 6, $2.25; No. 12, $4.50. Shipments of English razors are now being received by jobbers. The prices vary some, but average about $23 for black handle and $25 for white handle in any of the good makes.

Shipment Rifles Here; Rods Higher

London, Ont.

RIFLES, RODS.—Remington rifles are now back on the market again after a lengthy absence. Models now available are Nos. 12A x 22 cal.; 14A x 30 cal., and 14A x 32 cal., prices on which are $21; $35.50 and $35.50 each respectively. Higher prices have been named on cleaning rods, the No. 505 x 22 cal., twisted wire with brush, being quoted at 55c per dozen and the No. 510 x 22 cal., slotted end, being quoted at 65c per dozen.

Brisk Demand For Cooking Ware

London, Ont.

COOKING WARE.—A brisk demand for Pyrex cooking ware is reported, and jobbers intimate supplies are coming through more freely. Prices on some of the better selling numbers are noted as follows: Casseroles—No. 102, $21 per dozen; No. 103, $16.85; No. 167, $16.85; No. 168, $21; No. 193, $16.85. Pudding dishes, No. 122, $12; No. 123, $10. Pie plates, No. 202, $9.25. Cake dishes, No. 221, $9.25. Utility pans, No. 231, $12.75. Custard dishes, No. 423, $2.10.

Hose Couplings Show Advance

London, Ont.

HOSE COUPLINGS.—Brass hose couplings have registered an advance, the new prices now being quoted ranging as follows: ½-inch, $1.85 per dozen; ⅝-inch, $1.90; ¾-inch, $1.90; 1-inch, $3.60. Gem hose nozzles are unchanged at $6.30 per dozen. A fair amount of hose goods are now being called for.

Discounts on Brass, Bronze Screws Change

London, Ont.

BRASS AND BRONZE SCREWS.—Discounts on brass and bronze screws have undergone a further change, providing for a substantial decline in net prices to the trade, the present basis being quoted as follows: Brass, flat head, 47½ per cent discount from list; round head, 45 per cent.; oval head, 45 per cent.; bronze, flat head, 42½ per cent. from discount list; round head, 40 per cent.; oval head, 40 per cent.

Bamboo Poles Higher; Brooms

London, Ont.

BAMBOO POLES, BROOMS.—Shipments of bamboo poles from Japan have been received and new prices established which show an advance over former figures. The present scale of quotations is: 12 ft., $1.25 per dozen; 14 ft., $1.50; 16 ft., $2; 18 ft., $3; 20 ft., $3.75. Corn house brooms have declined, one of the cheaper grades being now quoted at $6 per dozen.

Washing Machine Lists Revised

London, Ont.

WASHING MACHINES.—List prices on many washing machines have been revised to higher levels, the discount showing no change at 30 and 10 per cent. from list. Sales are being made in excellent style and business in both the machines and clothes wringers has been very active. New list prices established are:

Washing Machines.—List prices each: Jubilee, $10.25; Dowswell, $11.25; Hamilton, $12.50; Canadian, $11; Peerless, $11.50; Snowball, $17; Momentum, $18.50; Patriot, $21; High Grade, $23; Seafoam B (engine drive), $50; Seafoam A (electric) $110; New Idea (electric), $118.50; Connors' Improved, $10.75; Magic, $11; Ottawa, $11.50; Winner, $17; Canada First, $21; Gem, $18.50; Beaver, $23; Perfection (electric), $119.50; Sunshine, $10.25; Popular No. 2, $11; Popular No. 1, $11.50; Premier, $18.50; Imperial, $18.50; Economic, $13.50; Puritan, $17; Champion High Speed, $18.50; Home, $21; Imperial (electric), $110.

Discount 30 and 10%.

Building Papers Show Decline

London, Ont.

BUILDING PAPERS.—There have been revisions in the prices of some lines of building papers, the new quotations showing a decline from former levels. The lines affected with the new prices are: Tarred felt, $3.75 per 100 pounds; tarred fibre No. 2, 78c per roll; dry fibre No. 2, 60c.; Surprise sheathing, 60c.

Socket Wrench Sets Up; Wire Stretchers

London, Ont.

SOCKET WRENCH SETS, WIRE STRETCHERS.—Higher prices have been established on Mossberg socket wrench sets this week. This is a result of higher manufacturing costs it is indicated. Prices on three lines carried in stock here are: No. 30, $4.50 per set; No. 13, $4.50; No. 14, $14.25. Townsend wire stretchers show a sharp advance in price, to-day's figures being $17.50 per dozen.

Rubber Grainers Up; Pine Tar, Too

London, Ont.

GRAINERS, PINE TAR.—Rubber grainers show an advance in price this week, the Magis Handled being quoted at $5.25, and Davis (sets of three) being quoted at $14.50 per doz.

Pine tar has advanced 10c. per doz., ½ pints being now quoted at $1.30 per doz. cans, and 1 pints at $1.85 per doz. cans.

Nails Moving Freely; Rope Quiet

London, Ont.

NAILS, ROPE—A better movement of nails is reported, orders coming to hand representing a very nice volume of business. Prices are unchanged, wire quoted at a base of $4.70 per 100 pounds and cut at $4.75.

Booked orders for rope are practically all shipped out and sorting business has not yet started to any extent, making trade in this line somewhat quiet. Quotations remain steady, pure manila selling at a base of 34c per pound; British manila at 30c; New Zealand hemp at 30c. and sisal at 27⅛c.

Linseed Oil Holds; Turpentine Scarce

London, Ont.

LINSEED OIL, TURPENTINE — A sharp break from continued advancing markets occurred on Tuesday and this has served to throw an element of uncertainty into the situation again. Just what may develop is hard to determine. Prices for the week are unchanged at levels shown below.

Turpentine is reported scarce locally. The market seems to be very well maintained and there is no immediate indi-

cation of much if any lower prices. Quotations follow:

Linseed Oil.	Raw	Boiled
1 to 2 bbls	$1 95	$1 98
3 to 5 bbls.	1 94	1 97
6 to 9 bbls.	1 92	1 95

Less barrels, add 10c gal.

Turpentine.	Imp. gal.
1 bbl. lots	$1 15
2 to 4 bbl. lots	1 14
5 gal. lots	1 25

WINNIPEG MARKETS

WINNIPEG, May 1—Price changes during the week again show a weaker tendency in the majority of lines, among which appear: well points, sash cord, wrapping twine, lamp wick, stove wick, cotton clothes lines, locomotive jacks, wrenches, screw drivers and punches. Lines showing an advance are: whiffletree hooks, Neverslip products, linseed oil and galvanized wire.

Business is reported very brisk in all lines, particularly sporting goods and auto accessories, while general hardware lines are also reported in good demand.

Galvanized Wire Moves Higher

Winnipeg.

GALVANIZED WIRE.—Prices have been revised to higher levels on galvanized wire, following the recent decline. However, new prices are still considerably lower than former high levels, being quoted to-day as follows: 6 ga., $6.65; 7 ga., $6.65; 8 ga., $6.65; 10 ga., $6.75; 11 ga., $6.90; 13 ga., $5.75; 14 ga., $7.25; 15 ga., $7.85; 16 ga., $8 per 100 lbs.

5 *to* 10 *Per Cent. Drop in Well Points*

Winnipeg.

WELL POINTS.—With new discounts just issued on well points, a reduction in price of from 5 to 10 per cent. has taken place. To-day's selling prices are given herewith: No. 90, $24.30; No. 94, $31.05; No. 98, $37.80; No. 140, $40.50; No. 144, $48.60; No. 164, $60.75; No. 168, $70.85; No. 184, $121.50 per doz.

Ten Per Cent. Drop in Lamp Wick

Winnipeg.

LAMP WICK.—Based on new discounts issued recently lower prices are now effective on lamp and stove wick, which decline approximately 10%, making to-day's selling prices as follows:

Lamp Wick—No. 0, 75c; No. A, 94c; No. B, $1.38; No. D, $2.20 per gross.

Rochester Lamp Wick—No. 1, 40c; No. 2, 56c; No. 3, $1.95 per dozen.

Rayo Lamp Wick—$1.10 per dozen.

Rayo, Jr., Lamp Wick—75c per dozen.

Flat Stove Wick—3 inch, 49c; 3½ inch, 56c; 4 inch, 67c; 4½ inch, 75c; 5 inch, 87c per dozen.

Sash Cord, Wrapping Twine Down 5%

Winnipeg.

SASH CORD, WRAP TWINE.—The recent reduction in all cotton lines is reflected in new prices now effective on sash cord and cotton wrapping twine, which decline about 5%. These lines are now selling at the following figures. Hercules sash cord, No. 6, 72c.; No. 2, 71c.; No. 5, 8, 9 and 10, 70c per lb.

Cotton wrapping twine, 3 ply in balls, 69c.; 3 ply in cones, 66c.; 4 ply in balls, 73c.; 4 ply in cones, 70c per lb.

Whiffletree Hooks Move Higher

Winnipeg.

WHIFFLETREE HOOKS.—Prices on Premium whiffletree hooks show a revision to higher levels during the week, based on latest quotations, and are now selling as follows: No. 2, $4.50; No. 3, $5.15; No. 4, $5.85 per doz.

Lower Prices on Clothes Lines

Winnipeg.

CLOTHES LINES.—Cotton clothes lines have also registered a decline during the week, and are now selling on the following basis:

40 ft., $2.90; 48 ft., $3.45; 60 ft., $4.30 per dozen.

Weather Strip Being Booked

Winnipeg.

WEATHER STRIP.—Bookings are now being taken by the Winnipeg jobbers for Swan and Anti-frost weather strip, for Fall delivery at firm prices, which are given herewith:

Swan weather strip, 75c set; Anti-frost weather strip, 45c carton.

Screw Jacks Down 10 *Per Cent.*

Winnipeg.

SCREW JACKS.—Prices on locomotive jacks, which have been steadily increasing for some time past, show a reduction of approximately 10% during the week. They are now quoted as follows:

Jacks, 1¾x8 in., $3.75; 2x10 in., $5.05; 3x12 in., $5.60; 2x14 in., $6.20; 2x16 in., $6.95 each.

Higher Prices on Shoes, Calks, Etc.

Winnipeg.

HORSE SHOES, CALKS, ETC.—New prices just to hand covering Neverslip horse shoes, calks, etc., all of which show advances of from 5 to 10% over former quotations. Bookings are now being solicited by the Winnipeg jobbers for Fall shipments at the following figures:

Neverslip Shoes, Calked—No. 1, $1.13; No. 2, $1.22; No. 3, $1.31; No. 4, $1.49; No. 5, $1.80, No 6, $1.94; No. 7, $2.12 per set

Drilled Iron Shoes, Fore and Hind—No 1, $13; Nos. 2 to 6, $12.50 per keg.

Neverslip Calks—⅜ inch, $2.47; 7-16 inch, $2.64; ½ inch, $2.64; 9-16 inch, $2.80; ⅝ inch, $2.80 per 100.

Taps—⅝ inch, 34c; 7-16 inch, 38c; ½ inch, 42½c; 9-16 inch, 47c; ⅝ inch, 55c each.

Screw Drivers Lower; Other Lines

Winnipeg.

SCREW DRIVERS.—Prices have been revised during the week, on Perfect Handle screw drivers and Sharpen Eze chisels and punches, all lines showing a slight reduction from former quotations. To-day's selling prices on the Perfect Handle screw drivers are given herewith:

2 in., $4.35; 4 in., $5.15; 5 in., $5.15; 6 in., $6.15; 8 in., $8.20; 10 in., $10.25; No. 9½, $12.30; No. 612, $6.15 per doz.

Some Wrenches Revised Downward

Winnipeg.

WRENCHES. — Some lines of wrenches also show a slight revision during the week and are now quoted at the following figures:

Agricultural wrenches: 6 in., $6.70; 8 in., $8.00; 10 in., $9.40; 12 in., $12.00 per doz.

Perfect Handle: No. 615, 6 in., $12.00; 8 in., $14.40; 10 in., $16.80; 12 in., $21.60; 15 in., $28.80; 18 in., $38.40 per doz

Linseed Oil Up 8c; *Turpentine Holds*

Winnipeg.

TURPENTINE, LINSEED OIL.—Following the sharp advance in flax seed prices, an advance is recorded during the week, of 8c per gal., on linseed oil, making to-day's market price as follows: raw linseed oil, $1.93 per gal.; boiled linseed oil, $1.96 per gal., in single bbl. lots.

Turpentine prices still hold firm at former quotations, which are given herewith: Bbl. lots, $1.25 gal.; ½ bbl. lots, $1.28 gal.; 5 gal. lots, $1.30 gal.; 1 gal. lots, $1.30 gal., plus the usual extras for containers.

Owing to a typographical error the Winnipeg price on Lyman 4-point barb wire appeared in last week's issue as $4.65 per spool. It should have been $4.85.

TRADE INQUIRIES

34. Barbed and other fencing wire.—A South African manufacturers' agent specializing in iron and steel goods, is prepared to take up an agency for Canadian-made fencing wire. Samples and prices with cable code arrangement is requested in first communication.

40. A Jamaican commission agent located at Kingston wishes to represent Canadian manufacturers of all lines of manufactured goods.

41. Agencies.—A leading firm in St. John's dealing in lead, tin, zinc, and manufactures thereof; galvanized iron, sheet iron, trunks, axe and pick handles, etc., spices, jellies, coffee and other standard grocery lines, tweeds, hessian, etc., desires communication with Canadian exporting firms of these commodities.

PITTSBURGH MARKETS

PITTSBURGH, Pa., May 1.—The stagnation in the pig iron, unfinished steel and finished steel markets has become more pronounced and at the same time it has become more remarkable, because with the opening of spring and the progress towards the peace settlement one would certainly expect greater activity.

Yet the fact is that merchant furnaces continue to blow out, one after another, and steel mill operations continually decrease, having now dropped to about 60 per cent. of capacity, and with at least half the production depending upon old orders, current bookings representing 30 per cent. or less of capacity.

There is disposition in many quarters have been expected to obtain immediately after the cessation of hostilities, when war work must have been suspended very largely, and when time had not been afforded for consumers of iron and steel to get busy on peace work. Yet the showing has been that even three months after the signing of the armistice, in January, the average rate of steel production was 87 per cent. of capacity, production being now about 60 per cent. with prospects that if conditions do not change a rate of less than 50 per cent. will be reached in another 30 days.

The Price Muddle

These are conditions that might easily to blame the lethargy in the market on the muddle made in Washington of the attempt to set prices. The program as originally announced seemed to call for price deflation in all lines, so that buyers could go ahead, but the Industrial Board shifted its ground and referred to the operation as being one of "price stabilization." Certain reductions, not as large as had been expected in many quarters, were arranged, and then the new prices are announced as being minimum for the remainder of the year.

It is quite unsafe to accept at par explanations American business men give for dullness in business, as has been proved, by subsequent events, upon many occasions. For instance, in say ten years before the war, there were several protracted cases before the Interstate Commerce Commission, the railroads desiring freight rate advances, and if business chanced to be always dull at the time, everybody said the trouble was the Interstate Commerce Commission; if they would only grant that rate advance business would boom. Men even set dates, and said that unless the decision should be reached by such a time it would do no good anyhow. When decisions were made, however, these same men scarcely took time to read the details of them, and business went on just as before. At other times it was the tariff that was holding business back. It is well therefore not to put too much stock in the talk these days that the muddle at Washington is responsible for dull business. The observation will be seen to be the more pertinent when it is noted that all the talk and criticism is levelled against the Railroad Administration, particularly Walker D. Hines, Director-General of Railroads, because he refused to endorse the Industrial Board steel prices and place orders at them. He refused to "co-operate." Practically nothing is said about the Navy Department, which did precisely the same thing, and worse, indeed, for the Navy Department formally threw out the bids for 20,000 tons of steel, stating that they were unacceptable because not competitive. The Director-General had not even asked for bids. Then Chairman Hurley, of the Shipping Board, announced that additional contracts for 2,000,000 tons deadweight of vessels are about to be cancelled because the war is over and the board can't go ahead at "war time prices." If all this talk were fair and sensible there would be equal criticism of all three departments, but the Railroad Administration gets it all. The explanation is not a matter of business at all, but of psychology. The Railroad Administration, the Navy Department and the Shipping Board all helped to win the war, and all are entitled to equal credit because they all tried to do their best. There was a big difference, however, in the psychological effect. The United States Navy, for various reasons, one of which is extremely obvious, stayed out of the United States, The Shipping Board sent its ships out of the United States. The railroads, however, operated all over the ground and everybody came in contact with them, experiencing much dissatisfaction in that contact. So Director-General Hines gets all the blame, and nothing is said about Secretary Daniels or Chairman Hurley.

"Open Market" Discussion

The trade talk is largely of "open market. There has been an "open market," so-called, in pig iron for several weeks, for for merchant furnaces lost little time in renouncing allegiance to the Industrial Board price schedule, being much dissatisfied with it because it reduced steel so much less, proportionately, than pig iron, and also because they held that for real activity business would have to get back to usual principles, which means an open market in pig iron, as always before the war, each district making its own prices under competitive conditions.

LETTERS TO THE EDITOR

These columns are open to contributions upon any topic of interest to the trade, it being understood that the views expressed are those of the contributors, and do not necessarily imply editorial indorsement. Names of contributors will be withheld, if desired, but name of writer must accompany correspondence as an evidence of good faith.

Editor, Hardware and Metal,
Toronto, Ont.
Dear Sir:—

The letter which you enclosed asking if I was aware of any improvements that could be made in the magazine, appeals to me very much.

I make use of HARDWARE AND METAL every day in the week with the exception of Sunday. I find the advertising matter very beneficial, for this reason: I am a long way from a city and there being no other hardware store in the town I have no other source of supply for ideas, as to advertising, showing goods, etc.

In answer to question number two, I believe the time is not far off when your readers will ask for a directory of manufacturers in the United States; in fact some of us will have to have one if we want to stay in business, for this reason:

A great many of the goods made in Canada are being sold to the mail order houses and grain growers' organizations at a price which enables those people to cut the feet from under the local merchant.

If the manufacturers insist on selling to these people then the retailer must look to the States, for although the goods may cost him more, they will be different, and that appears to be his only chance to stay in business.

Take as an instance the Tapatco Sweat Pad. This pad, of which I have just purchased some, cost me $8.80; the United Grain Growers are selling this identical pad here for 67c laid down here. As this is a small place (population 20) you can imagine how embarrassing this is for me.

Then again there is a well-known horse clipper sold by the mail order houses for $9.25 which costs me $8.85 in Calgary (by the way a fortune awaits the Canadian manufacturer who will make a horse clipper that is different to the one I refer to and who will confine his business to the retail trade), how am I going to overcome either of these obstacles? There is only one way that I can see and that is to find out who makes a sweat pad or horse clipper that is different.

I enclose a letter from the American Pad & Textile Co., which is a reply to a letter I sent them drawing their attention to the fact that the T. Eaton Co., of Saskatoon, were selling their sweat pad for just what it cost me.

They (the American Pad & Textile Co.), claim they have sold no pads to this concern for over one year and not many then, yet undoubtedly the mail order house in question must be selling thousands, for the simple reason that the retailer cannot come near their price. What I would like to know is, who do the mail order house get them from?

This all leads up to the same inevitable conclusion, namely—the retailer must stop buying from manufacturers who sell to mail order houses and grain growers' associations, otherwise the manufacturer will put the retailer out of business, although he does not realize that fact yet.

I am at a loss to understand why the retailer is not awake to what is going on. He seems to be sleeping at his post.

When I started in this place the farmers were so anxious to get a hardware store here that they gave their help in the construction of my store, yet to-day the United Grain Growers are soliciting orders for anything and everything, even to snaps and hame straps, yet they must realize that a hardware store in a village with a population of 20 cannot be a very paying business, and surely they must know that my hardware store is an asset to the place and a benefit to them, because every business that is started adds to the value of their elevator.

I would like to get the opinion of other retailers on this important matter.

Yours truly,
Batten Bailey, Hardware, Lanfine, Alta.

Women and the Paint Department

Housewives Purchase Largest Percentage of Indoor Paint and Varnish Specialties—Usually Have Final Say About Color Scheme for Outside of the Home—Women Appreciate Service in the Paint Department

WHO purchases the largest percentage of indoor paint and varnish specialties? The women folk! Who is the prime mover behind the domestic clean-up and paint-up campaigns about the home? The women folk!

Who usually has the last say about the color scheme for the outside of the house? The women folk!

Who likes better to buy paints and varnishes in a well-ordered paint department, which extends real service rather than one that is neglected? The women folk!

If it weren't for the women folk, there would be a lot of sorry-looking, small-profit paint departments. There are still a great many of them that could swing a larger balance of profit by encouraging and developing the women folk's trade much more than they have.

Better and larger service is one keynote that will serve this purpose admirably.

Appreciate Service

Women appreciate those little niceties of service that are susceptible of development in a paint department and which can be made to tie them to your store as permanent trade.

Women cannot be blamed for not patronizing some paint departments. They are situated in the back-end of the store, accessible only after one has zig-zagged a tortuous course around and between rolls of roofing, bales of fence wire, and sundry other building materials, in which she has neither direct nor indirect interest. Too often she is obliged to choose her shades in the dim, religious light of a back alley window and is disappointed with them when she gets them home.

Never again for hers in that store. A well-lighted, easily accessible, service-rendering paint department gets her next purchase.

Like to Compare Colors

Women folk want to see what their purchase looks like. They want to visualize how their paint will appear after it is applied. They want to compare one color with another. They like to match one color against another. Perhaps they want to select a color scheme over your counter. Poor lighting doesn't foster the service that should be rendered to meet these demands. Good lighting where paints and varnishes are displayed and selected, is an asset that should be sought in placing a paint department where it will attract the trade of the women folk.

Make it accessible and attractive also.

When a woman has to hobble over and around a lot of uninteresting hardware and builders' supplies to get to the paint department, it dampens a lot of enthusiasm for making any second or third trips.

Solves the Problem

The paint department right up in the front of the store avoids any handicaps of this sort. But Jim Connor solved the problem of attracting the women folks to the paint department by going another step farther. He learned his lesson from one of the largest grocery stores in his town.

This progressive grocery store had, like many others, done away with most of the counters and provided tables at which customers could be seated while placing their orders. An interview with the grocery man elicited the fact that his women customers like this more sociable way of doing business. When seated, they were more at ease, and were not jostled by other customers, and the method induced larger individual orders.

Connor felt that his paint department was big enough to make this venture, and followed suit. From his own observations and what the grocery man told him, he was convinced that he could induce and develop more paint business with the women folks by arranging his paint department in a similar manner.

Up to the Front

Preceding this idea, he had already determined to have the paint department right up in front, under good light, and where women did not have to pass a lot of goods they were not even remotely interested in.

There was enough room to the left of his entrance, to rail off a little compartment in which were placed three mahogany tables, and enough light cane-bottom chairs to accommodate his trade. He obtained three plate glass tops for the tables such as are used on office furniture. Underneath the glass he arranged color cards of all the lines in stock. This meant that there were always color cards at hand and that his whole line would be displayed at each table. On top of each table there were always present a small display of polishing oils, metal polishes or waxes, which the customer could pick up at will and become interested in. It was remarkable the extent to which he increased his sales in such sundry lines in this way.

Moore's Paints

Ready Mixed

Produce Customer Satisfaction

The customer finds them just the paints for the job at hand; covering a great amount of surface, easy to apply and presenting a good appearance long after other paints have faded away.

They're the Paints that bring the customer back for more

Moore's Mixed Paints are manufactured primarily to please the customer, and are sold to you at a price to allow for a generous margin of profit.

An ideal paint for the customer to use and the dealer to sell, that's Moore's.

Our splendid agency proposition will interest you. Write us for information.

BENJAMIN MOORE & CO., Ltd.
WEST TORONTO - ONTARIO

The larger displays of flat wall paints, varnish samples, etc., were arranged around the walls of the compartment, so that they could easily be referred to. A sufficient stock of all his lines was arranged on shelves against the wall, so that a clerk could reach for a can whenever necessary. The bulk of his paint stock was kept in the warehouse, but where it was not necessary to take customers. From this stock, the stock in the compartment was constantly replenished.

Showed Floor Finish

One of the details of his arrangement was to have the floor of the compartment laid in hardwood and finished with his brand of floor varnish. In the centre where the tables were placed he covered the floor with an attractive rug.

The whole arrangement created an atmosphere that was attractive and inviting—especially to the women. It didn't take them long to get on to it either. After a few of his feminine paint inquiries had been led into this compartment by the clerks, they didn't hesitate to gossip about it amongst their friends and relatives. Curiosity led many women into Connor's store for the first time. Comfort in making paint purchases tied them to this store for permanent trade.

Other Lines Also

In off seasons, such as Christmas, Connor realized that his departure would be of little service to him as far as paint sales were concerned. It was very little trouble to remove the small paint stock necessary for the compartment, and replace it with silver, brass and other Christmas goods. However, he never lost sight of the fact that it was started essentially as a feature of his paint department. The color cards always remained under the plate glass tops, and for whatever purpose the compartment was being used, his paints, varnishes, and other specialties were always near the eye of his trade.

Nor did the men overlook its advantages. The compartment and its chairs were used for the comfort of men who had more or less lengthy business consultations with Connor. With all of his paint displays concentrated before them, they could not help but receive an impression of Connor's line which led to business sooner or later. Oftentimes "sooner."

This method of selling paints and varnishes not only served the purpose of making Connor's store an attractive store to buy goods in, but enabled him to extend the services of his paint department in other directions. It helped him solve a problem which every serious-minded paint dealer constantly faces.

He realized that too frequently a paint purchaser little appreciates the services that either paints or varnishes can render. With the customers comfortably seated, and the whole line displayed before them, the clerk was better able to lead from one line to another and increase his sales. A table does not denote so markedly a defined line between buyer and seller. The clerk was able, in a more sociable way, to learn the intended use of the purchase and to suggest other lines to go with it. It placed him in a better position to advise his customers in the best methods of using it, which naturally led to more confidence on the part of the purchaser. In this way, many abuses, and much lack of information about the proper uses of paints and varnishes was overcome. More consultation over proper methods of application, suitable color schemes, and the protective value of paints and varnishes was promoted. It enabled the clerk to more easily assume an advisory capacity to his customer.

Connor himself says that that little compartment and its arrangement has done more for the development of his paint department and the service it can render than a whole lot of ephemeral advertising. He counted on it as both an advertisement and a service that brought actual business and an increased profit.

Make it Accessible

Many smaller paint departments than Connor's cannot, perhaps, afford the luxury of a compartment arranged in this manner; but making it easily accessible does not cost anything beyond a little trouble in arrangement. Good light doesn't cost any more in a small store than a big one. The small store can make an "up-front" display of paints, varnishes and brushes just as readily as a big one. It is such little considerations as these that oftentimes make the difference between a profit and a loss or just break even. Woman, with her feminine instinct and other sensitive response, does not take long to respond to favorable attractive conditions—and she is just as readily repulsed by unfavorable, unattractive arrangements, if not more so.

Perhaps the greater bulk of women's purchases have been prompted by the desire for decoration. To some extent she buys the smaller sizes for the purposes of renewing furniture and other domestic articles. Comparatively little of her purchases of paints and varnishes have been purchased from purely the preservative and protective standpoint.

Assuredly here lies a tremendous field of development for the "Save the Surface" campaign, now being launched by the Canadian paint and varnish trade. Show most women how they can save a cent here and a dollar there, and they hop to the idea in a hurry. If the women folk can be impressed with the true protective and preservative value of paints and varnishes, it will open a new avenue for increased demand. As has been stated in these columns before, women will only stand for neglect of paint or varnish for about so long, and then something has to be done to remedy it. But this has been largely prompted from the decorative instinct. When they are made to realize that such neglect costs money in useless deterioration, it will form a new incentive to buying on their part—or getting the man of the house to buy. Sales brought about by this incentive will not be in pints and half-pints for the odds and ends about the house, but in half-gallons and gallons for exterior and interior house painting.

If any paint dealer is unconvinced that it pays to appeal to the woman, let him take up any purely woman's magazine of to-day, and compare it with any purely man's magazine. Look over the advertising pages. Note how much more advertising is addressed exclusively to women than to men, in a thousand and one lines. Also note in many men's magazines, how adroitly some advertising is directed to women on articles that only a man can use.

With paints and varnishes, both men and women can use and appreciate it—in not a few instances, the woman more than the man.

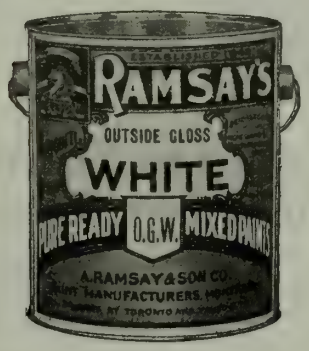
The purchasing power of the women folk with paints and varnishes is not to be winked at. The paint dealer with a weather eye to the development of his sales will find a splendid field of opportunities amongst them. Convenience, service, and the other little attentions that attract women will have a powerful influence in enlarging his paint and varnish trade amongst them. At the same time don't overlook the fact that a fair share of advertising sent directly to them, will have an influence that will bring quick and sure results.

Says Selling Gasoline Helps Other Business

"Selling gasoline is a material help in building up business in other lines," says G. L. Chesney, whose hardware store is on 16th Avenue, Calgary, Alta.

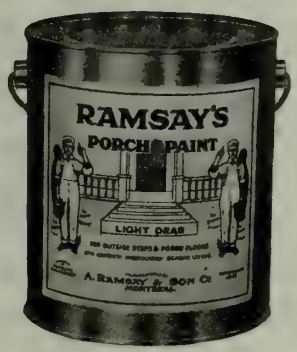
"My trade has grown since I put in the gasoline service station, and not only that, but I sell more gasoline than some of the dealers down town," said Mr. Chesney. "I sell on a close margin, and when a customer buys gasoline there is often an enquiry for oil, grease, spark plugs, tires, and so that side of the trade has grown, and with it has grown the hardware business. Then I find the tin shop is always a help to business here, for a job in the tin shop often brings along an order for hardware with it."

"Do you do much advertising, Mr. Chesney?" asked HARDWARE AND METAL.



"Yes, I am a consistent advertiser, but I chiefly use the street cars for that. People always read the ads. in the street cars, and I find it to be a direct boost for sales. The ads. are changed every week. I use a good weekly advertisement in the newspapers and get some returns from that, but I regard that more as a medium to keep the firm's name before the public and let them know we are in business all the time. In any case our business here is not confined to the North hill, and my motor delivery visits all parts of the city.

"It is astonishing if a certain line of goods is advertised how you will find responses from all parts of the city. I have experienced that time after time."



RAMSAY'S

"The Right Paint To Paint Right"

"Save the surface and you save all" *Paint & Varnish*

Make Ramsay's the foundation of your Paint Department, you will then be equipped to meet every need. The good will of your customers and better business will be the logical result. Do you know our Dealer proposition? You should. It's a good one.

Save the Surface and Save all Paint and Varnish

Not Looking For Any Downward Trend in Window Glass Prices

THE JOHNSTON BROKERAGE CO., Pittsburgh, has sent the following letter to the trade: Since the first group of hand plants began operations in February the demand has been light, and we should estimate that from 25 to 30 per cent. of the manufactured goods has been shipped. The accumulation of stock, however, is not so burdensome as to be a menace, as this first group of factories will cease to operate after making their allotment arranged through Washington of 1,200 50-ft. boxes per pot. In operating the four-shift system, the production has been kept at a high point and many factories report that they will have completed their quota before the first week in May; some of them telephoned last week that they would have their glass produced in twelve weeks instead of fourteen or fifteen weeks' operating period. A few that have not been so well supplied with men have to run a week longer, but we don't think there will be many that will find it necessary to make glass up to the time fixed for closing down, which is May 24.

Will Carry Stock

The factories are satisfied with the situation; they have made arrangements to carry their stock and await the demand that we are sure to have later on. There has been a noticeable improvement in the market as far as demand is concerned, during the last two weeks. This comes from all sections, particularly from the Eastern district where the disturbance has been greatest. Reports from jobbing centres indicate that in the hands of the large distributors stocks are far below normal; some of them 50 per cent. below the quantity usually carried, and reports from the small dealers show that they are not carrying anything like the customary stocks. Various reports have come to us, which we consider reliable, and show that stocks in hands of the country merchants are from 75 per cent. to 90 per cent. of what is usual for them to have on hand. The last half of the year promises to be very active as the building interests are reviving, but our orders will come from the large jobbers to build up their stocks as they are going to have a most tremendous trade to replace stocks in the hands of small dealers scattered over the country.

Quantity Diminished

With the closing of the hand plants in May, and also quite a number of the machine factories, the quantity of glass made for the balance of 1919 will be greatly diminished. The hand plants in the second group will not start until August 15, and they will have no glass on the market until the first of September, therefore we are urging our friends to sort up their stock while the factories are well equipped to take care of business; they can get better service now than they will be able to obtain later on, although by this we do not mean that there is going to be any immediate scarcity, but when the demand starts in our home market we expect to be very busy. We are giving no thought at all to any downward trend of prices.

We have also had a little business from Canada recently and there is increased activity in the foreign demand, so from these three sources we are confident that our stocks are going to be cleaned up before the end of the year, more completely than they have been for several years.

The daily papers are filled with comments on the scarcity of dwelling houses in every part of the United States; hundreds of thousands of dwellings are required to take care of the needs of the people. This is a class of business that is quickly completed, and our products are almost entirely required for glazing these buildings.

When the demand starts in it is going to be for very quick service, and the jobber that has his stock assorted to take care of this business will get the preference. If he must wait until he receives shipments from the factories he will be severely penalized by cancellation of orders.

It is our opinion that the 50 per cent. allotment will be carried out as arranged, and the demand should absorb all of this glass and any stocks that the manufacturers had on hand at the time of resumption.

New Association Aims to Further Interests of British Trade in Canada

THE Canadian Association of British Manufacturers and their Representatives has been established with branches at Toronto and Montreal. Similar associations have existed in Australia and New Zealand for several years. The objects of the association as set forth in the constitution are as follows: "To further the interests of British trade throughout the Dominion of Canada and to affiliate with and work in concert with kindred associations in other centres of the Dominion having similar objects."

Provisional committees were appointed to draft the constitution of the Association. The Toronto committee comprised: G. A. Marshall, chairman (steel); Capt. Harris, (shoe polish); A. C. King, (dry goods); C. W. Beal, (pottery); E. V. Pannell, (aluminum); H. Wilson, (dry goods) with F. W. Field, the British Government trade commissioner in Ontario, acting as secretary pro tem of the committee.

The Montreal committee includes: J. H. Peattie, (dry goods); G. H. Bishop, (dry goods); F. H. Scott,(silver and electro plate); A. K. Drury, (heavy metals); F. I. Spielman, (paints, etc).

Those interested in the formation of the association naturally wish to increase Great Britain's share of the import trade of Canada. As Canada is buying a considerable volume of merchandise abroad each year, it is desired that the United Kingdom shall obtain a substantial share of that business. It is felt that the progress which Canadian manufacturers have made, especially during the past few years, will be exceeded by the manufacturing developments in Canada in the future. This is recognized as a welcome and gratifying feature, because as each unit of the British Empire becomes stronger industrially, and agriculturally, each developing its resources, so will the great British Empire grow in stability, prosperity and influence.

The executive council of the Toronto branch of the new association comprises: J. Wilson, president, (dry goods); G. A. Marshall, (steel), vice-president; H. V. Andrews, (wools); C. W. Beale, (pottery); Capt. Harris, (shoe polish); J. Haywood, (groceries, coffee, etc.); E. V. Pannell, (aluminum and electrical lines).

The executive council of the Montreal branch will probably be elected in the near future.

The association will consist of British subjects only:

(a) British manufacturers and wholesale exporters from the United Kingdom.

(b) Representatives and agents of British manufacturers and wholesale exporters from the United Kingdom.

No representative or agent of British manufacturers who enters into any agency, agreement with, or in any way represents any manufacturers or wholesale exporters whose principal works or place of business are situated in any country deemed by the supreme council to be or to have been hostile or unfriendly, will be entitled to membership in the association.

There are several hundred manufacturers of the United Kingdom represented in Canada by branch houses or agents, and it is anticipated that a large number, both of British manufacturers and their representatives will enrol as members of the new association.

The Eaton Toy Co., Ltd., capital $50,000, head office Ottawa; plans to manufacture and deal in machinery, internal combustion engines, vehicles and railway equipment.

Varnish Investments

Varnish buying is not only an investment for the dealer, but is equally so for the consumer.

In the long run the only profitable varnish investments are those that produce a handsome finish that lasts indefinitely. Such products are profitable for the painter, because every operation on which he uses them is a permanent testimonial and business-builder for him. They are profitable for the owner, because a lasting finish means economy. They are profitable for the dealer, because they are easy to sell, and the demand for them is continuous and cumulative.

Berry Brothers' label has for sixty-one years been the buyers' guarantee of profitable investments in varnishes, enamels and stains.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, May 1.—One commodity furnishes the real interest of the week in point of change, linseed oil having again soared. It is nearing the $2 mark, and with deliveries of needed seed from the Argentine not promising at this writing it is not probable that markets will improve just now. Flax seed has reached and passed the $4 mark, which would justify $2 oil, say the crushers.

There is still a scarcity of turpentine, and the undertone of the market is steadily firm. One jobber is asking $1.24 per gallon in 5-gallon tins. Some are not making any quotations whatever.

Putty and mixed paints are going out steadily and there is a good outlook, orders from the travellers and by mail coming in to the manufacturers splendidly A big season is in prospect.

Further Advances; May be $2.00 Oil

Montreal

LINSEED OIL.—Difficulties of moving Argentine flax to this market have not lessened, and the steady advance of prices continues, seed prices having passed the $4 mark during the week. The range of price this week on raw oil is $1.83 to $1.92 per gallon, and even this basis does not represent the price that ought to prevail on spot seed quotations. No one cares to make predictions, but there seems to be no relief in sight in the matter of supplies. This being the case, $2 oil may not be far off.

	Imp. Gal.	
Raw—		
1 to 4 barrels	$1 83	$1 92
5 to 9 barrels	1 82	1 91
10 to 25 barrels	1 81	1 90
Boiled—		
1 to 4 barrels	$1 85½	$1 94½
5 to 9 barrels	1 84½	1 93½
10 to 25 barrels	1 83½	1 92½

Much Putty Sold; Basis is Same

Montreal

PUTTY.—In spite of the fact that oil prices have advanced much there has been no change in putty basis. The undertone is naturally firm, and higher oil will make consideration of the continuance of these prices more than probable. There is a very splendid movement to the trade.

Standard Putty	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

No Improvement On Turpentine

Montreal

TURPENTINE.—Some jobbers are still off the market as far as making quotations is concerned, though they are doubtless taking care of their own customers. There is an undoubted shortness in supplies and prices are firm. The only change is one made by a jobber on 5-gallon lots, the price being advanced to $1.24. Demand is increasing.

Turpentine—	Imp. Gal.	
1 to 4 barrels	....	$1 12
Small lots	$1 17	1 24

(Packages extra.)

No Change On White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—Prices have been steadily maintained on lead. There has been some weakness from time to time on pig lead, but there are many things to offset this favorable change, linseed oil being a factor, and labor a bigger one. There is a splendid movement to the trade on the basis of $15.50 per cwt. for 5-ton lots; $16 for ton lots, and $16.35 for the small quantities.

Big Increase in Paint Business

Montreal.

PAINTS AND SPECIALTIES.—The paint men are wearing contented smiles these days. These are prompted by an excellent increase of actual orders and by the prospect of much larger business coming to hand. "We have had one of the best months in our history, if not the best, in April," said a large manufacturer, "and we expect a record business in May." This is quite a reflection of the general feeling in paint circles. With a full co-operation all around and a general boost by all toward putting over a successful "Save the Surface' campaign this spring and summer, there ought to be real improvement in the situation. Orders are excellent for both mixed paints, varnishes and specialties. There is naturally a firm tone to the market on most items.

TORONTO

TORONTO, May 1.—A steadier tone has followed the sharp break in flax seed, and markets show little change on linseed oil. Turpentine remains firm and unchanged. Business is very good, mixed paint, white lead in oil and kindred lines moving forward in very good volume.

Range on Linseed Oil Narrows

Toronto.

LINSEED OIL.—The market on flax seed showed a sharp break on Tuesday and a further recession on Wednesday, though situation seems to have steadied somewhat. This has not yet affected prices to the retail trade as yet—in fact the range of quotations for the week has narrowed towards the higher figure. Business is considered very good and supplies are ample for immediate requirements to the trade. Quotations prevailing this week are noted as follows:

Linseed Oil—	Raw	
1 to 2 barrels, gal.	$1 86	$1 95
3 to 5 barrels, gal.	1 85	1 94
10 bbls. and over	1 83	1 92
	Boiled	
1 to 2 barrels, gal.	$1 88½	$1 98
3 to 5 barrels, gal.	1 87½	1 97
10 barrels and over	1 85½	1 95

Prices shown are those ruling on Thursday of current week and subject to daily fluctuations of the market.

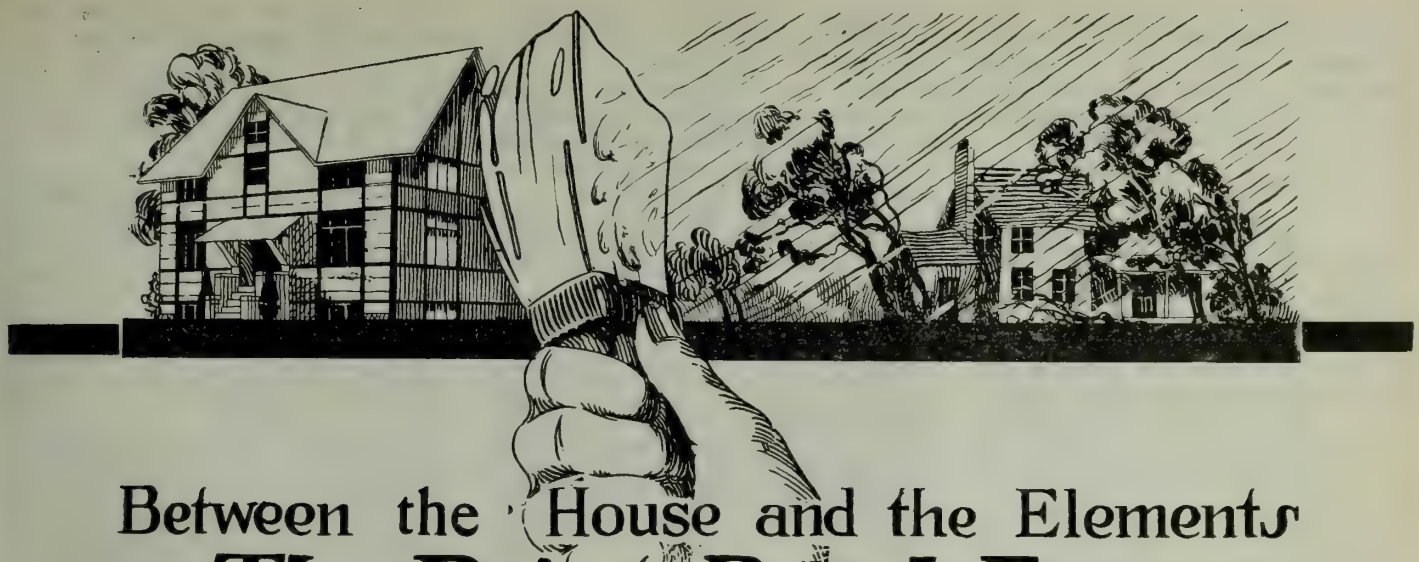
Turpentine Holds At Firm Levels

Toronto.

TURPENTINE.—The market is firm and the situation locally is without special feature. Importers are experiencing some difficulty in getting supplies through promptly owing to trouble with railway, but this condition should soon right itself. A little recession at primary points occurred on Tuesday but the market came right back again and is firm this morning. Quotations for the week are unchanged as follows:

Turpentine—	Imp. Gal.
1 barrel (barrel included)	$1.12-$1.15
2 to 4 barrels (barrel included)	1.11- 1.14
5 gallon lots	1.22- 1.25

Mixed Paints Maintain Activity



Toronto.

MIXED PAINTS.—Business is very satisfactory from reports manufacturers give out, and real warm spring weather would undoubtedly stir up a great many more orders. Prices are well maintained and outlook is considered promising.

White Lead in Oil Holding Firm

Toronto.

WHITE LEAD IN OIL.—Steadiness marks the market in white lead in oil this week. There seems to be a very fair

Between the House and the Elements

The Paint Brush Forms The Only Real Protection

IT is this thought—"Protection"—that furnishes the key-note of the co-operative campaign now under way, to increase the consumption of paints and varnishes throughout Canada.

Every firm or individual making or selling paint products, is expected to do his part to make this campaign a success.

You will share in the **profit** the campaign is bound to bring to the paint and varnish trade—you will naturally want to share in the **effort** to impress the public with the importance of "painting to protect."

In your windows and in your newspaper ads make constant use of the phrase that has been adopted in connection with this big co-operative campaign—

"Save the surface and you save all" *Paint & Varnish*

In order to get **maximum** benefit from this great movement you should make sure that you have the right **brand** of paints and varnishes to offer those people who are inspired by the educational advertising of the Paint and Varnish Association to do some painting. There are several reliable brands of paint, but only one B-H English Paint. Considering its advantages in quality and its equality in price, B-H "English" Paint is the logical line for you to handle. And, when you add the outstanding publicity done for B-H "English" Paint, the reasons become overwhelming.

If there is no B-H Agent in your town, here's your opportunity. Do not let it escape you! Write at once to our nearest Branch, and let us lay our attractive proposition before you.

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG

MEDICINE HAT CALGARY EDMONTON VANCOUVER

movement and improved weather conditions would undoubtedly influence a better demand. Prices during the week are unchanged at the following levels: 5-ton lots $15.80 per 100 pounds; 1-ton lots $16.30, and less quantities $16.65.

Glass Quiet; Putty Unchanged

Toronto.

GLASS, PUTTY.—There seems to be a slightly better movement of window glass in progress, but even at that the volume of business is still small. Stocks are ample and discounts shown in current market quotations without change. Putty is without any outstanding feature of interest. The market is very well maintained and prices shown herewith are steadily held.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

A Survey of Paint Trade Prospects

THE Chamber of Commerce of the United States has sent a press bulletin to all the newspapers, trade papers and magazines, surveying "The Business Situation" and summarizing a report which will be printed in full in the May issue of the *Nation's Business*, the official publication of the Chamber.

This report was prepared by Mr. A. W. Douglas, chairman of the Chamber's committee on statistics and standards, and vice-president of the Simmons Hardware Company, and his comment on "Paint Trade Prospects," as shown in the *American Paint Journal*, is as follows:

"The outlook for paint sales is for an increase of anywhere from fifteen to twenty-five per cent. during the next four or five months over the same period of last year. The increase in the use of paint probably will be greater proportionately than the increase in actual building OWING TO THE CLEAN-UP AND PAINT-UP CAMPAIGNS. The actually advanced cost of paint itself does not cut proportionately as much figure as might be imagined, for the great expense is that of labor. Some ingredients of paint like lead and zinc, have declined in price, but linseed oil still is high. There is no general expectation of a reduction in the price of paint."

Going into statistics a bit, it will be obvious to *Journal* readers that if there is an increase of say twenty per cent. during the next four or five months—the period in which the bulk of the $200,000,000 annual volume of paint and varnish products is distributed among the consumers—it is fairly certain that such increase will be maintained, if not further increased by such impetus, for the whole year.

That would mean $40,000,000 worth of new paint and varnish business. On the basis of 30 per cent. for material and 70 per cent. for labor, the cost or value of the application of this added $40,000,000 worth of materials will be $93,333,333—making a total of $133,333,333 increase in the value of this year's volume of paint and varnish and their application.

Whatever proportion of that impressive volume is "owing to the clean up and paint up campaign," we dare not estimate But looking for the moment in another direction, though in this same connection, we are brought face to face with some further statistics that may prompt still further reflection.

The total annual cost of the National Clean Up and Paint Up Campaign, that has been paid by its contributors, since the trade undertook the financing of the National Bureau, has been $9,661 in 1915; $18,371 in 1916; $13,962 in 1917; $14,893 in 1918, and about $17,000 will be spent in 1919. In 1916 the National Bureau supplied free plate matter through the Western Newspaper Union, while this year the increased costs of postage, printing, etc., limit the Bureau's facilities to the basis of its pioneer years, though at a cost at least 50 per cent. more.

Isn't something besides the increased paint and varnish sales volume, and kind words—and other kinds of words—fairly "owing to the clean up and paint up campaign?"

HUMAN ELEMENT IN TOWN BUILDING

Continued from page 43

States and Canada that are doing things and you will invariably learn that back of them are bodies of educated men that are giving their time unselfishly and generously to building up their cities. Such men have in mind that boys and girls have value in a community as well as wheat and oats, lumber and other commodities. A town which is a better place to rear a family in, a town which is a better place to raise boys and girls in, to develop manhood and womanhood, to build character in, without which business would be as unstable as a rope of sand, is a better place to do business in. And these same men are willing to give some of their time, some of their energy and some of their money to get these results.

Most towns have an idea that a factory is the only thing that can build a town. They forget that towns develop from within out. They want trade and so they buy a factory to come to town to furnish employment for labor and more business. In nine cases out of ten, the factory that wants a location will come to your town if you have the physical requirements for it to run without buying it. And if you buy it, later on the chances are you will find it "a fly by night" and you must pay the fiddler.

A live business men's organization furnishes the facilities for looking into these matters carefully. Let us pass rapidly among our large cities and see what problems they have had to meet and how they met them:

Chicago got her boulevard and park system through the efforts of one of her citizens who appeared before the City Council persistently for ten years. It has been built up commercially largely through an active business men's organization.

Cleveland has become a great city of play grounds through organization. More homes are owned in this city for its population than any other in the United States. A great Union Depot was the result of seven years' effort.

Memphis, through its agricultural committee, is changing the State from cotton to diversified farming. They found that milk was being shipped from Wisconsin to Memphis because they did not have dairy cattle in the State to meet their requirements.

Little Rock—The agricultural committee found that two years ago in Arkansas they were receiving sixty million a year for cotton but were spending seventy-two millions a year for feed that she should have been raising. Since then, 2,900 meetings were held in one year to bring about a change.

In Waukesha, a city of 10,000 people, the business men and bankers loaned farmers money six years ago to buy pedigreed dairy stock and erected a stock pavilion. In 1918 the farmers of this district sold 180 carloads of pure bred and grade dairy cattle amounting to $320,000.

In Ashland the business men and bankers financed farmers after the district had gone to pieces because the lumber was gone. The result was that cheese factories and creameries sprang up all over that district.

At Fondulac, a body of bustling business men invited 1,242 farmers attending a country institution to sit down to dinner with them.

In Wisconsin, seventeen towns from 500 to 2,000 put in rest rooms last year.

"Yes," you are saying, "that is alright, they can do it in towns where they have plenty of money and a paid secretary, but how about small places where little or no money can be raised? How about little towns without any vision?" Mr. Melville then told his audience about a little town of thirty-five people—they did things regardless of population.

Lakefield, Minnesota, accomplished all that it has done through the co-operation of the business men and the farmers. It has a real, live commercial club. It is co-operation and energy that does these things. Never run down your own town, especially to strangers. Boost it, make it the best town in your county—your county the best in your province—your province the best in the country. All we need is more vision, pep and initiative.

VISION

Then vision forth what here you most desire.
Dream of industries and busy marts of trade.
Dream of traffic, dream of wealth, dream of parks and playgrounds—of happiness, content.
Dream of contented labor at its task;
Dream of smiling women and better men;
Dream of homes where laughing children play;
Dream of a city beautiful and fair.
Think and plan as others have for their accomplishments,
Then work, work for contented labor at its task;
Work for smiling women and better men;
Work for homes were laughing children play;
Work for a city beautiful and great, and
Make your city a place where dreams come true.

EXPORT MAY DEVELOP FOR PAINTS

Chas. H. Gratton, who went to France as special representative for Brandram-Henderson, Ltd., and who was in charge of the exhibit made by this firm at the Lyons Fair, has returned to Montreal.

Mr. Gratton reports that, without a doubt France and Belgium will need great quantities of goods. Tariffs have been made high to debar foreign-made goods, but Mr. Gratton states that concessions have been made in some cases as goods are badly needed, and at the present time they must have large quantities of various products. Mr. Gratton is confident that business will result of a satisfactory nature.

Think what an opportunity to get after the Motor Car trade of your town through DA-COTE.

Here's one selling point alone that will make hundreds of customers for DA-COTE and you.

A professional painter requires from one to six weeks' time and will charge anywhere from $50.00 to $500.00 for painting a car.

DA-COTE dries within twenty-four hours and costs only a couple of dollars. The time saved alone is worth ten times the cost of DA-COTE.

DA-COTE is the same motor car enamel that we've been selling to Garage owners and master painters for years. Now it is put up in popular sizes for the car owner.

Order Dougall DA-COTE to-day. You will find a ready demand. Plenty of color cards and DA-COTE literature free for the asking.

"Save the surface and you save all" *Paint & Varnish*

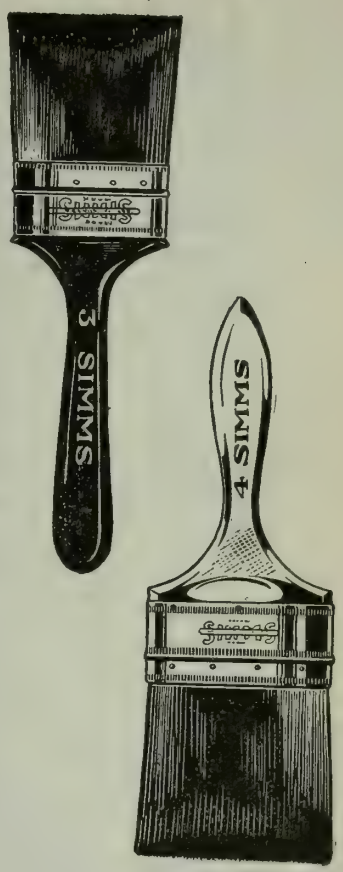
TRADE SIMMS SET IN RUBBER MARK

Simms Paint Brushes

Sold All Over the World



The demand for Simms' Set-in-Rubber Paint and Varnish Brushes extends all over the world. There are none like them anywhere.

Your customers know this. See to it that you have a full stock on hand.

The worst treatment cannot hurt Simms' Set-in-Rubber Brushes. The bristles are set in vulcanized rubber, and are guaranteed to hold firmly **forever.**

People don't cover their houses with loose bristles when they use Simm's Brushes. Push the sale of this line and your reputation won't suffer.

Send for price list. Look over your stocks without delay. Insure big profits and satisfied customers by having all Simms' Better Brushes on your shelves. Order to-day.

T. S. SIMMS & CO., LIMITED

ST. JOHN, N. B.

Branches: Montreal, Toronto, London

Why It Pays!

ADVERTISING in HARDWARE AND METAL is economical because it reaches, and the advertiser only pays for, a circulation of tremendous buying power, which is always on the lookout for new lines and information regarding goods which are already in stock.

Manufacturers and wholesalers cannot afford to side-step the dealers. In nine cases out of ten, the customer accepts the retailer's recommendation.

Mr. Merchant:

When you are finished with this paper pass it on to your clerks. It will help them to help you, which means increased business.

Moulding, Flooring, Slating, Box, Fence, Barrel Nails, 25c per 100 lbs. over common nail prices. Finishing Nails, 50c per 100 lbs. advance over common nail price. Clinch Nails and Sash Pins, 75c per 100 lbs. over common nail price.

Miscellaneous wire nails, 60% off miscellaneous list, f.o.b. Toronto, Montreal, Hamilton, London.

Cut Nails—Montreal, $4.75 base; Toronto, $4.75 base; London, $4.75; Hamilton, $4.75; no equalization of freights.

Roofing Nails—American, large head, keg, $8.50; 25-lb. boxes, per 100 lbs., $9.00.

F.o.b. Montreal, Toronto, Hamilton.

"Save the Surface and you save all" Paint & Varnish

Your Service-- Mr. Paint Dealer

On what basis are you selling paint to your customers? Are you driving home the necessity of using only good paint?—for preservation and protection.

You can best do that by selling—

Maple Leaf Paints and Varnishes

Their preserving, protecting and beautifying qualities are so readily apparent that they establish a permanent preference with the consumer.

Maple Leaf sales are permanent and productive of more "worth while good business."

Would you be willing to have us outline our proposition in detail? Your request is solicited.

Hardware and Metal

Classified Advertising Section

143-153 University Ave., Toronto

Hardware and Metal Subscribers

Buy for business as well as for p r i v a t e consumption. That is why one inquiry frequently pays for an entire year's advertising. Advertisers in HARDWARE AND METAL r e a c h only the cream of the trade—the best and biggest buyers in Canada.

Announcement

The Martin-Senour Co., Limited, take pleasure in announcing their hearty support of and ready co-operation in the "Save the Surface Campaign."

This campaign, which is strictly educational in character, is being conducted by a representative committee, acting on behalf of practically all the Canadian Paint and Varnish Manufacturers and other closely related industries.

The campaign has for its object the educating of the public in the preservative and protective values of paint, varnish and allied products for the conservation of property.

This object has the approval of The Canadian Commission of Conservation and The Canadian Trade Commission.

The campaign is closely identified with a similar one being at present conducted in the United States, so that cumulatively the two should be continent-wide reaching in scope and influence.

The consumer advertising of The Martin-Senour Co., Ltd., has been "tuned and timed" to support and augment this national "Save the Surface Campaign." On the opposite page may be observed the first of a series of consumer advertisements which will be appearing throughout the "Clean Up, Paint Up" period in a very large list of publicity mediums, which include the largely-circulated daily and weekly press, national magazines, farm and religious journals.

These ads., large enough to dominate the pages on which they appear, are as well educational in character and will undoubtedly be the means of influencing a large volume of trade to the stores where Martin-Senour products are available.

To the several thousand Martin-Senour dealer-agents throughout Canada who are generally recognized as the most aggressive and successful distributors of paints and varnishes, we bespeak your interest and co-operation in this splendid campaign.

Follow our lead and hook up your local advertising and displays with the campaign which has for its slogan

"Save the surface and you save all" *Paint & Varnish*

Electros, suggestions and methods of co-operation cheerfully supplied

The Message of Home Preservation and Building Protection

Every surface within and without your home needs the protection which Paint and Varnish alone can give.

"100% Pure" Paint
The Paint for wear and weather.

Senour's Floor Paint
The old reliable—it wears, and wears, and wears.

"Neu-Tone"
The sanitary washable Flat Oil Paint for Interior Decorations.

"Wood-Lac" Stains
Improves the new—renews the old.

"Marble-ite"
The one perfect floor finish—will not mar or scratch white, under hardest wear.

"Varnoleum"
Beautifies and preserves Oil Cloth and Linoleum.

Wear, decay, rust, start from the surface. Protect the surface and you protect all.

MARTIN-SENOUR PAINTS AND VARNISHES

are the most effective material protectors you can use for every surface—wood, iron, steel, stucco, cement.

When you choose a Martin-Senour product, you are sure of getting the paint or varnish best suited to your purpose. Because of its high quality and superior durability, it will prove the most economical for you to use.

MARTIN-SENOUR 100% PURE PAINT & VARNISHES

Stephens House Paint Especially Adapted for Service In Canada's Extreme Climate

How much do jobs, on which poor paint is used, really cost? How many customers do you lose through selling certain brands of paints and varnishes on which profits are greater, but on which you have your doubts as to quality, wear, etc.?

Think it over.

If you are not satisfied with your paint for this season, if you feel that your increase will not be as great as you deserve, get in touch with us at once.

We have a special proposition to make you.

This Argument Has Converted Many Into Consistent Users of Good Paint

IF a man has the foresight to insure his home against destruction by fire, he will be willing to insure it against destruction by decay.

The only insurance against decay is GOOD PAINT.

Fire and decay mean the very same thing. In chemistry the same word describes them both—oxidation.

Paint not only insures against decay, but PREVENTS decay.

It costs a man much less to protect his house against decay than to insure it against fire—and insurance does not PREVENT fire.

If a farmer objects to painting his barn, ask him if he has it insured. If he has, you should have no difficulty in selling him barn paint.

The deterioration of an unpainted house or barn in one year will amount to ten times the cost of painting.

Lowe Brothers Paints

The best insurance against destruction by decay—and the cheapest.

They not only protect but beautify.

Every gallon of Lowe Brothers' Paints used on a building means ten times the price of the paint added to the value of the building.

Lowe Brothers' Paints, because of the high quality of their ingredients and the fineness of grinding are noted for their brilliancy and permanence of color, great spreading capacity, hiding power and durability.

Write for special dealer proposition.

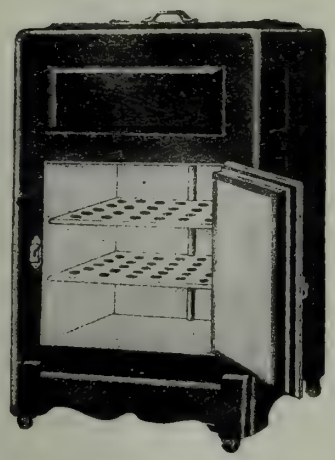
The Trade Mark behind the "Hardware House of Quality"

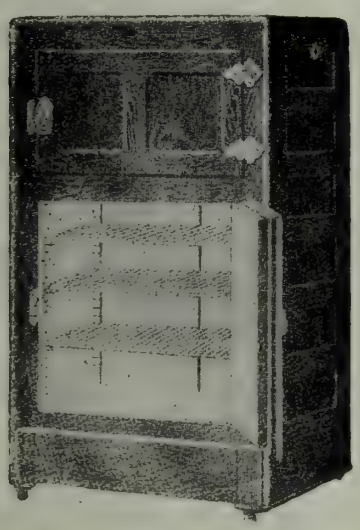


DIAMOND A BRAND — A — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Profitable Lines For Summer Sales

The dealer well-stocked with seasonable lines captures the bulk of the trade. Not only should his lines be seasonable but they must possess a favorable quality-reputation to merit the confidence of his customers.

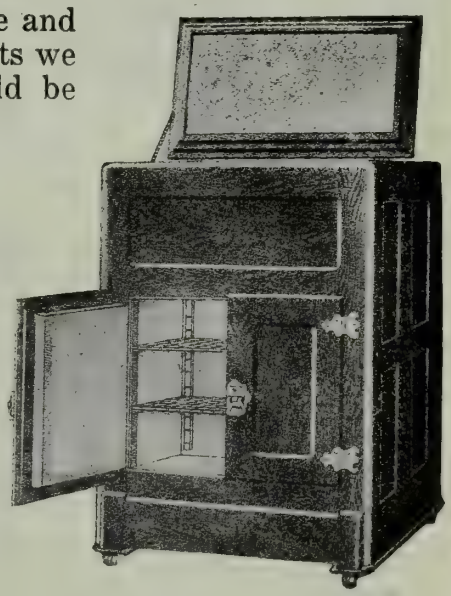


Our various warehouses and convenient distributing points enables the Western dealer to keep his stock seasonable and the quality of the products we handle are all that could be desired.

"Prairie City" No. 102
White Enamel Lining

	Width	Dep.	Hght.
Outside case, in...	25½	18¼	42½
Prov. chamber, in.	21	13½	16
Ice chamber, in...	21	13	13

Weight, 120 pounds



"Winnipeg" No. 316
Porcelain Lining

	Width	Dep.	Hght.
Outside case, in...	29½	21¾	56
Prov. chamber, in.	24	16	23½
Ice chamber, in. ..	24	16	18

Weight, 255 pounds

Here are illustrated three lines of "Diamond A" Refrigerators: the "Prairie City," the "Winnipeg" and the "Garry." These refrigerators are all well made of seasoned Kiln Dried Ash or Hardwood, attractively finished, have the best of nickel-plated trimmings, adjustable shelves, white enamel or porcelain linings, metal ice racks, automatic, self-cleaning syphon traps, Removable Drip Pipes, Self-Retaining Casters, etc.

Sold at popular prices and in a variety of sizes. Write to-day for descriptive literature and prices.

"Garry" No. 207

The Farmers Want Commonwealth Barn Red

They'll be asking for a lot of it.

There is no better paint made for the exteriors of barns, silos, factories, etc., or for fences and woodwork that is exposed to the weather.

It covers well—has a fine, very durable finish—is economical—and easy to apply. It is a S-W Product, with all the goodness which stands behind the S-W name.

If your order has not already been sent in, mail or wire it at once, so that you will be able to supply your customers.

25,000 Dealers Sell S-W Products

If you are not one of them, ask for porticulars of our Dealer proposition. It will interest you.

Safe Gauge Glasses

Strong's Ironclad

When ordering Gauge Glasses stop and consider what poorly made, unsafe Gauge Glasses may **cost** the concern.

An eye put out—a man badly cut—a workman laid up for weeks—the company put to great expense under the New Liability Laws.

The ten thousand concerns who use Strong's Ironclad have carefully considered these facts and stick to Strong's Ironclad because **safe** and **reliable** when under High Pressures.

All sizes in le..gths of 1 in. to 72 in. in any fraction of an inch, with fused ends. Sell **safe** glasses and **hold** customers. Write for prices.

—The Perfect Stove
The "CHAPLEAU"

The "CHAPLEAU" The stove which is easy to Sell and which gives satisfaction

The Chapleau steel stove is worthy of a prominent place in every progressive merchant's store. There is no better stove on the market, and it offers, moreover, an unparalleled value both to the merchant and to the customer.

The Chapleau steel stove is a marvel of excellence in every respect—it is equipped with superbly nickeled fittings, with accessories of polished cast iron, and with a large, evenly heated oven—it is a stove which can be relied upon—the bottom is of tile, plain or ornamental; the upper part allows more room for cooking as the pipe is not in the way; the plate warmer is provided with double doors and with a mirror; the deep fire box burns either wood or coal, etc. We could fill pages with the commendations we receive on the Chapleau.

We have a very interesting proposition to make to all progressive merchants who aim to sell the best stove at the lowest price. Write AT ONCE for our catalogue.

New Idea Warm Air Furnace

MORE HEATING SURFACE on every NEW IDEA FURNACE than any other furnace. Ash pit large and roomy, less chance of ashes banking up and burning out grates.

FIRE POT one piece, with deep flanges adding one-third more heating surface. Very heavy. Guaranteed for FIVE YEARS.

RADIATOR large, giving more surface than found in other furnaces.

NEW IDEA DUPLEX GRATES (Patented) take care of any size clinker from either Hard or Soft Coal. They operate so easily a child can operate them. They work so well that there are never any ashes worth sifting, saving the dirtiest work necessary in attending old-style furnaces.

New Idea Furnace made in seven sizes. And every one Guaranteed.

Get the NEW IDEA FURNACE AGENCY for 1919 and see your furnace business grow. They sell themselves and others. Write now for Agency.

Overcoming Loss of Time Mistakes, and High Costs of Needless Delays

This is a fairly high claim. Claims without convincing proof are shallow, but Gipe-Hazard claims have stood the test of experience. Ask any user of our devices of his honest opinion of their values.

Our circular—full of information—tells a great deal more about the matter, and a post card costs but two cents to enable you to get it.

Write for that circular.

The Sign The World Knows.

Throughout the world the red Gargoyle commands respect.

The people of every civilized country know that it is the mark of genuine expertness, of highest quality, in lubrication.

The red Gargoyle means accuracy and dependability in lubrication. Because, Gargoyle Mobiloils when used as specified by the Charts which represent the professional advice of the manufacturers of Gargoyle Mobiloils, give the user maximum lubrication efficiency.

Dealers who display this red Gargoyle, and sell Gargoyle Mobiloils according to the Chart of Recommendations, have the confidence of every motorist—and this confidence is extended to every department of the dealer's business.

Is the red Gargoyle in front of your shop?

We will gladly send one of these easily-seen, respect-building, permanent metal signs to every dealer who sells *lubrication service*, rather than just oil.

BRANCHES IN ALL CITIES

RECOMMENDED BY THEIR QUALITY.....

Imperial Parowax, Imperial Ioco Liquid Gloss, Imperial Household Lubricant—just try these three excellent products in your own home, and you will ever after unhesitatingly recommend them to your customers.

Imperial Ioco Liquid Gloss for renewing the lustre on all finished surfaces—furniture, automobile and carriage bodies. Useful also in cleaning and polishing plate and cut glass.

Imperial Household Lubricant prevents rust and kills the squeaks. As its name indicates, it is just the thing for a phonograph, sewing-machine and typewriter, as well as for other household purposes.

Imperial Parowax seals out the air in preserving. A little parowax makes the wash-day lighter—brightens the clothes, and adds the laundry gloss in ironing, too.

A better value for customers and a more liberal margin for dealers in these than any similar products.

IMPERIAL OIL LIMITED

A QUALITY PERENNIAL

¶ If you motor all the year round you have an excellent opportunity of knowing the meaning of "day-by-day service from Dunlop Tires."

¶ If you motor between Spring and Fall only, you have an excellent opportunity of knowing right now why so many other motorists use Dunlop Tires all the time.

¶ The "Two Hands" Line consists of:
Dunlop Cord—"Traction" and "Ribbed."
Dunlop Fabric—"Traction," "Special," "Ribbed," "Clipper," "Plain."

CARBORUNDUM NIAGARA GRINDERS

JUST TO REMIND YOU THAT YOU CAN SELL THEM

To the Carpenter

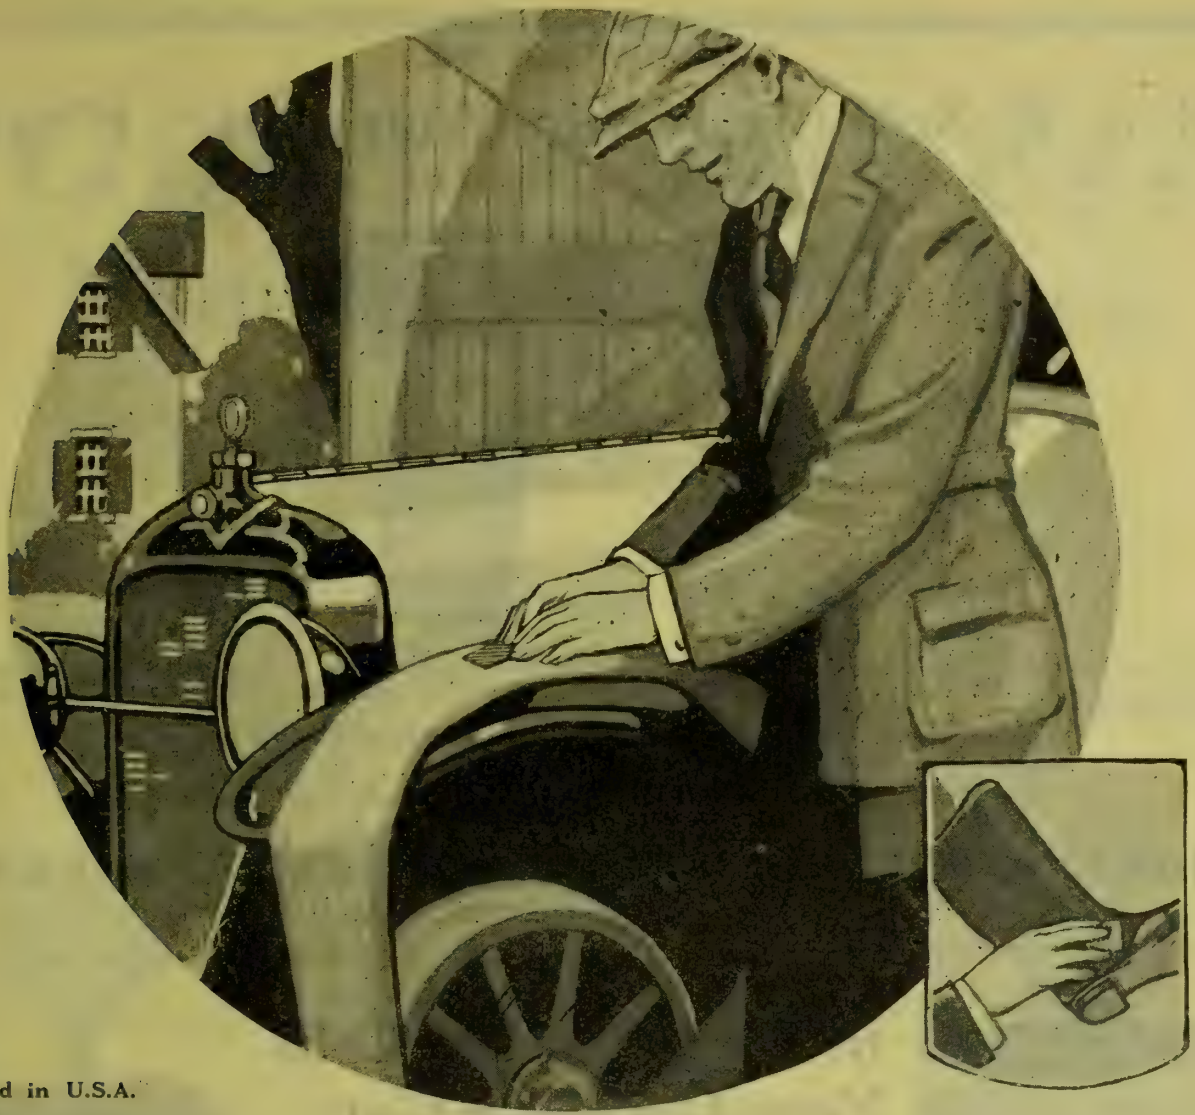
For grinding his chisels, plane, bits, gouges, etc. The No. 3 Niagara just suits him. It's big enough for bench work, small enough to pack in his tool kit.

To the Garage Man

For grinding parts, tools and fittings—for a dozen and one jobs about the shop. He will want the big No. 4, or, if he has power, the No. 28 Grinder Head.

To the Farmer

For grinding his scythes, grass hooks, mower sections, feed chopping knives—for edging spades and general farm tools, for grinding household knives, etc., the Niagara No. 14 is the machine for him.



To the Householder

For grinding household knives and tools —a little No. 1 machine.

The business is waiting for you—go after it with Carborundum Niagara Grinders. Carborundum displays and advertising will help you.

THE CARBORUNDUM COMPANY
NIAGARA FALLS, N. Y.

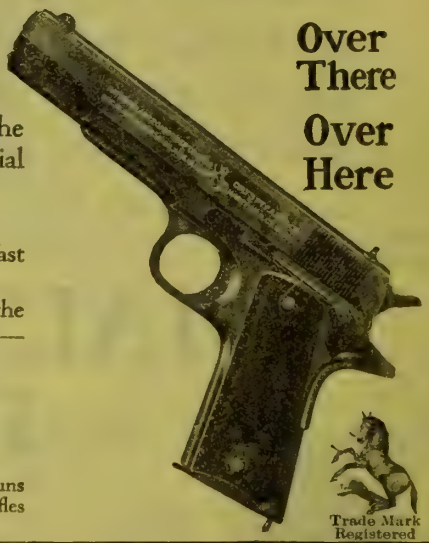
COLT

"The World's Right Arm"

When the Huns came face to face with our boys over there they looked into the muzzles of these Colt "Forty-fives"!



This is the official side arm of our fighting forces on land and sea.

Home demands were impossible to meet during the war, but now the great Colt factories are rushing full speed ahead to provide essential Colt protection for the homes.

Dealers need no longer supply their trade with a "second best."

Colt Automatic Pistols and Colt Revolvers are being supplied the trade as fast as possible. Get your orders in for the popular models now.

Remember that the name Colt on an Automatic Pistol or Revolver assures the owner that he has the utmost attainable in accuracy, safety and dependability — "The Proven Best by Government Test."

AUTOMOBILE ACCESSORY CATALOGUE

Our 1919 Automobile Accessory Catalogue has just been received from our printer

It has been our aim in compiling this book to make it a valuable buying guide for the Accessory dealer. Every article listed has been carefully selected, and we believe represents the best value which can be obtained in its particular line.

Such well-known lines as "Maltese Cross Tires," "Eveready" Automobile Lamps and Flashlights, "Champion" Spark Plugs, "Mossberg" and "Lane" Socket Wrench Sets, "Sterling" Auto Jacks, "Niagara" Bumpers, "Pyrene" Fire Extinguishers, "Weed" Tire Chains, "Richards-Wilcox" Garage Door Hardware and "Toronto" Metallic Garages are among the leaders in this catalogue. Every other article listed is of the same high quality, and makes this one of the best accessory catalogues offered to the Canadian trade.

If you have not received a copy of this catalogue, we will gladly send one on request. You can't afford to be without it.

Automobile Oil and Transmission Greases.

PRAIRIE CITY OIL COMPANY, LIMITED, WINNIPEG

The Fastest Selling All-Year Accessory a Dealer Can Handle

Small investment Good profit Takes up little room Every motorist needs them And has no excuse for being without them at this price.

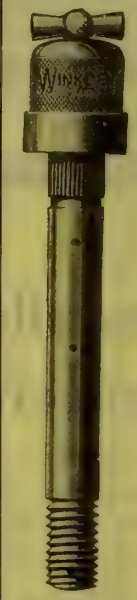
MERCHANT'S ANTI-SKID CHAIN TIGHTENER

$1.00 A PAIR

If dealer does not handle, sold direct prepaid on receipt of price.

Simple and easy to attach. You can slip it on a customer's car in about one minute, and it means a sale every time.

The Tightener catches the chain at five points, giving an easy tension all around. It holds the chain in place, prevents dragging or rattling, and yet permits the chain to creep on the tire, and carry out to the full its non-skid action. Keeps chain from pounding the fender, and prevents it from unhooking.



JOBBERS AND DEALERS:—Write at once for full particulars and generous terms, for now is the time to sell these things.

CODE FOOT BOARD TRUSS BAR

for Ford Cars

Increases the life of the car. Can be attached by any one in a few minutes. Costs a trifle. Meets a popular demand. A quick seller with good profits.

At your Jobber's

The J. H. Hanson Co., Limited
MONTREAL, QUE.
The Western Specialty Co.,
WINNIPEG, MAN.

Takes Little Shelf Space
Brings Big Returns

How It Works

First place the tube around the container—as shown in the picture. Clean and roughen the surface around the hole with emery, apply cement. Then press on the patch firmly — and the tube is ready to go into casing.
No waiting for the patch to set. The hotter the road, the tighter it holds.

What It Contains

The Locktite Patcher container serves as a cylinder around which the tube is placed and repaired. A clamp holds the tube tightly in position —no buckling.
The emery top of the container—strong, canvas-back patching sheet — gasoline swab — tube buffer and cement furnish the complete Patcher—ready for all tire troubles.

You'll get big returns for the small space devoted to Locktite Patchers.

Motorists are buying the Locktite Auto-New-Matic Patcher because it solves their blow-out and puncture troubles.

Locktite seals tube cuts and rips quickly and permanently—locks them tight. The Locktite Patcher is a complete workshop on the road—for the emergency or for the repair of spare tubes in the garage.

It's a time-saver for the motorist—a money-maker for the dealer.

Are you getting your share of the Locktite Patcher business?

There is also a special garage size of Locktite Canvas-Back Patcher.

This offers a splendid profit-maker for dealers. Write for proposition.

Springs and Axles

We manufacture the celebrated "Anchor Brand" Carriage and Wagon Springs and Axles.

Automobile, Trolley, Railway and Heavy Coil Springs.

The Guelph Spring & Axle Company, Limited

GUELPH, ONTARIO

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are arctively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeping, please remit with copy, preferably by money order.

TENTS — CANOES — PADDLES — PACKSACKS — CUSHIONS

These lines find ready sale through the hardware trade. Your stock need not be large—just a few standard size tents—as we carry a large, well assorted stock for prompt shipment. Canoes and paddles of all kinds can be supplied but should be ordered as far ahead as possible to ensure delivery when required. Various kinds of canoe cushions as well as launch cushions made to order. Can be supplied on short notice. Pack Sacks of every kind and style. Send for catalogue.

Are you with us in selling braces?

Our national advertising is putting bit braces on the map with amateurs as well as mechanics, emphasizing its use along with the hammer, the screw driver and the saw.

This campaign in the Saturday Evening Post and other mediums is making Millers Falls Bit Braces more than ever the standard tool, and the advertising is creating a strong demand for our No. 732 Brace which we are specially featuring because its patent chuck makes it an all-purpose tool which can do all kinds of boring with twist drills as well as with augers and other tools.

Are you with us in this campaign? If you use the same arguments and push our bit braces you can benefit by our advertising and get new business. Amateurs often have no bit brace and are willing to be shown the economy of a 732 Brace that will help them do odd jobs around the house.

Get this rack for counter and window display use. It shows up the talking points on a 732 Brace and helps do your selling for you. Sent free with small order for No. 732 Braces.

Sleeve Bar and Holder

Plain Bar

Williams' "Agrippa" Boring-Tool Holders for Multiple Bars

Raise no bar against the selection of Bars. The choice is yours.

The "twin-screw" fastening with V groove at top and bottom accommodates any shape or size of bar within its range. No shims or bushings of any kind are required.

We furnish two types of Standard Bars, Sleeve and Plain, as illustrated—they are interchangeable in the Holder.

In the *Sleeve-Bar* the Cap admits a straight or angular Cutter; either can be quickly inserted at the business end of the Bar without removing the Cap, or disturbing the setting of either the Bar, or the Holder.

The *Plain-Bar* provides for the use of both styles of Cutters in the simplest manner possible.

Machinists' Tools Booklets with your Imprint, if desired.

National Garage Door Set

The extra serviceable working qualities of our No. 806 Garage Door Set make it such a good seller. Its attractive appearance is also a vital factor in making sales.

Note the absence of any structural iron work, and how one door opens without disturbing the other. An easy-working garage door set,—hanger operates on a swivel, and turns on the track without sticking or binding, and doors are absolutely weather-tight.

Set No. 806 includes: No. 27 Latch; 1 only Swivel Hanger; 6-foot Braced Rail; 4½ pair, 4 x 4 inch Jap. No. 505 T.P. Butts; 1 only, No. 820 Chain Bolt; 1 only, No. 830 Foot Bolt; 1 only, No. 5 Pull; 1 only, 4½ inch No. 30 Safety Hasp. All necessary bolts and screws. Comes packed in the "Unusual National Way." Japan finished. Write for prices, etc.

NATIONAL MANUFACTURING COMPANY, STERLING, ILL.

ALL GARAGE DOORS SHOULD BE HUNG ON ROLLERS

No equipment ever produced offers the many attractive features or gives such universal satisfaction to the user as does the

HATCH GARAGE DOOR OUTFIT

Outfit includes:

- **3 Special Swivel Door Rollers**
- **22 Feet of Track**
- **3 Pairs Special Garage Door Hinges**
- **3 Stay Rollers**
- **2 Extra Heavy Door Handles**
- **1 Safety Hasp**
- **1 Hook and Eye**

Makes doors weather-tight, sag-proof; prevents slamming, and does not get out of order.

The hinged door allows entrance without opening the other two.

Complete directions packed with every set.

The roller bearing swivel hangers hold the doors in place, take the bind off the hinges and roll the doors around the corner, on the inside of building to the side wall.

Plymouth Rope

is an honest rope, both in construction and workmanship. Under proper working conditions it will give superior service in any field of endeavor, insuring safety, satisfaction and economy to the user.

Rope—like everything else—wears out. Its length of service depends on two things—the **quality** of the rope, and the **treatment and care** it receives. The quality of Plymouth Rope goes without saying. Dealers can help their customers obtain **extra** service in the use of Plymouth Rope by handing them a copy of our booklet, "How to Take Care of Rope." A supply of these booklets will be sent to Plymouth dealers on request.

Time to Order
FREEZERS

All of the three, LIGHTNING, GEM or BLIZZARD, have served the housewives of America for thirty years, and, like the cream they create, are in demand in all seasons.

They are built of the very best material and workmanship possible—their ingenious construction makes them easy to operate, quick freezing, and economical to both dealer and user.

The Blizzard, being simpler in construction and cheaper in price, makes it a good running-mate with either the Lightning or Gem. They sel themselves and stay sold! No come-backs or complaints.

This means easy net profits for you.

Every merchant needs accurate store records for two purposes

1. Every day he needs a complete, accurate record of his store transactions to successfully control his business.
2. He needs these same figures every time his banker or wholesaler calls on him for a financial statement.

He also needs them to know how much money he is making, and what it costs him to do business.

Every merchant can get a record of his store transactions in two ways—slowly by hand, or quickly and accurately by machinery.

A modern National Cash Register will give him accurate, unchangeable records. It will classify, add, and certify. It will save him work and reduce his expenses.

No merchant should keep records by hand that can be kept so easily by machinery.

A post card will bring full information about how an up-to-date National will take the drudgery out of keeping store records.

These Advertisements Are Your Salesmen

Advertising of Canadian-made Reliable Flashlights and Reliable Batteries will send its selling message to the outermost parts of Canada.

The great merits of Reliable products will be driven home to the multitude of Canadians who use flashlights and batteries—farmers, automobile and truck owners, fishermen, sportsmen, housewives, boys and girls.

Publications carrying our advertising reach 1,600,000 Canadian homes every issue, and schedules are planned to cover the year.

Reliable Tubular Flashlights are of metal, handsomely enamelled in colors. Their looks help sell them, their quality brings customers back. Reliable Batteries repeat because they *are* "Lively and Lasting."

More than 3,900,000 batteries and 250,000 flashlights are sold yearly in Canada. Get your share of this tremendous retail business. Stock Reliable products *at once.*

Profits on Reliable products are bigger than on competing lines. Ask your jobber to supply you from his fresh stock.

Reliable selling helps are worth using—inquire about them.

BARCALO

"S" Wrench

Simplicity

During our past twenty years' experience in the making and marketing of metal products we have made **Simplicity** a necessary quality—for an ideal "S" wrench. The absence of complicated parts in the Barcalo "S" wrench has made it a general favorite. Note the few parts, but four—a drop-forged movable jaw—screw—pin and solid bar. All combined to make a handy, durable and useful tool for the Mechanic, Machinist and Garageman.

The Wrench

There are many things the Barcalo "S" wrench will do, that many other wrenches will not—there are splendid profits to be made by you in selling it and the customer's satisfaction created will mean an added **quality reputation** to your store.

Made in 6, 8, 10, 12 and 14 inch sizes.

Its Parts

Our guarantee is **your protection.** We supply without question a new wrench for every one proving unsatisfactory in any way. Write to-day for information and prices.

Why Not Stock Them?

WE are Washing Machine specialists. For twenty years we have been manufacturing home laundry equipment exclusively. Our "1900" Cataract and "1900" Agitator Electric Machines are the best designed Washers on the market. They are mechanically perfect and give wonderful satisfaction.

A liberal profit is allowed on all "1900" Washers and Wringers. Our complete line includes washers that operate by Hand, Water Power, Engine Power and Electric Motor. We also have a full assortment of sizes and grades of superior, beautifully finished hand and power wringers. The profit made by carrying the "1900" line is limited only by the "prospects" within your reach.

"1900" Agitator Electric.

"1900" Cataract Electric.

Extensively Advertised— And the Dealer Gets the Benefit

Every dealer who proves his worth is handed all the inquiries from his territory resulting from our twice-a-year advertising campaigns.
If, at the present time, you do not carry a line of washing machines, or are looking for "something better," you will profit by writing our "Wholesale Department."

THE "1900" WASHER COMPANY
537 Yonge St. - Toronto

Be the Master of Your Own Business!

LACO Lamp contracts are not iron-clad complicated agreements limiting your sales initiative. They do not require you to build up our business at your expense. Our aim is to co-operate with you in gaining profit and prestige to our mutual benefit.

WE make no attempt to finance your business. You are trading independently on your own capital. You buy your LACO stock—we presume you will handle it with the same business judgment that has prompted you to want LACO in your store. We hold no whip-hand over you, once you have bought the goods—we ask no more than we give.

YOUR order for LACO lamps is a definite business transaction—you order what you require, not only as judged from your own past experience, but what you need, as you need it, and when you need it.

Your order is filled according to *your* wishes alone.

A Square Deal to YOU—to your CUSTOMER—to our JOBBERS—and to OURSELVES

Back of it all is the unsurpassed LACO Guarantee, that protects you and benefits us all.

The business you build in LACO LAMPS is yours to hold. Make no mistake—

Another BISHOPRIC STUCCO BOARD Home

More and more are home-owners building with stucco, because of its economy, strength and durability.

This photograph shows the residence being built by Superintendent J. H. W. Bower, of the Military Hospitals Commission, at Sunnyside and Fentiman Avenues, Ottawa.

Bishopric Stucco Board was used on all interior outside walls as a background for plaster; Bishopric Sheathing was used in place of lumber on outside walls on studs—then furred with 1 x 2 furring strips and stucco board and cement stucco applied, giving a double air space, increasing the warmth and durability of the building, yet not increasing to any great extent the cost.

Every Hardware Dealer—who does any business at all with Architects, Builders and Contractors—can handle Bishopric Products to advantage.

Write us for samples and prices.

Bishopric Wall Board Co., Limited, OTTAWA

Sanitary -- Odor-Proof -- Sturdy

That's the story of Eddy's Indurated Fibreware in a nutshell.

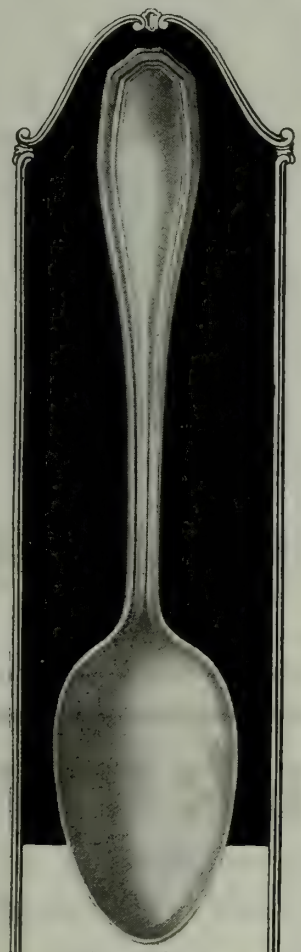
In the Home On the Farm Anywhere Everywhere

Eddy's Indurated Fibreware finds a place and makes friends. There's no great selling argument required when you handle this line. It sells itself. Its very appearance suggests cleanliness. Moulded, pressed and baked, its glass-like surface at first sight impresses your customers with the fact that dust or dirt simply cannot lodge in it, for the very good reason that there's no crevices or cracks in it for dust or dirt to lodge in.

EDDY'S
INDURATED FIBREWARE

is an all year 'round proposition. The better your stock of it, the more you'll sell.

Get ready for big summer business.



Have it when it's asked for.

WHAT'S IN A GUARANTEE?

The fact that T. F. Lawn Mowers have been on the market for forty years and are still the general favorites is ample proof of superiority over other makes.

They measure up to all we claim for them. There's "selling value" in the T.F. Guarantee.

The Taylor-Forbes Lawn Mowers are guaranteed for one year from date of purchase, against defective material and if for any reason the purchaser is dissatisfied with the machine we will be pleased to replace it free of charge, if delivered at our works accompanied by the tag attached to each mower.

Here's the Hecla PIPELESS Furnace

to increase your sales—widen your market

Once again, Clare Bros. are the first to produce an innovation—this time in furnaces.

The "Hecla" Pipeless Furnace is a furnace with all the "Hecla" qualities—modified to suit the needs of a pipeless heating plant. The patented features—circular waterpan—steel ribbed firepot—dust and gas proof fused joints—which made the "Hecla" the best selling furnace in Canada, are all incorporated in the pipeless furnace.

And it **will** heat buildings. The principle upon which all pipeless heating is based is so scientifically applied in the Hecla Pipeless that the whole building is made comfortable and uniformly warm. And the temperature throughout is even. The volume of cold and warm air is so carefully proportioned that it is impossible to have one room hot.

A Great Field

You will find a warm welcome for the "Hecla" pipeless furnace in your usual furnace trade. And it is so easy to instal. No pipes to make except the smoke pipe—no elbows to cut—only one register—it is complete in itself—you do not need a large number of workmen to instal a "Hecla" Pipeless Furnace. And it means a much larger market for you. Houses without furnace piping will instal a pipeless. It is ideal for churches, one-roomed schools, halls, etc. It will establish the ventilation so necessary to health, not given by steam or hot water heating. It acts also as an auxiliary in the spring and fall when only a temporary heat is needed. Houses with cellars with no room for pipes will welcome the pipeless idea.

A Hecla Pipeless Furnace will give you a market much larger than you now enjoy.

Learn more about this perfected furnace. Write to-day for our catalogue. We still have a few territories open for agents. Inquire about getting the appointment in your district.

We now have a most complete booklet on the Hecla Pipeless Furnace ready. Write for a supply—distribute them among your prospects.

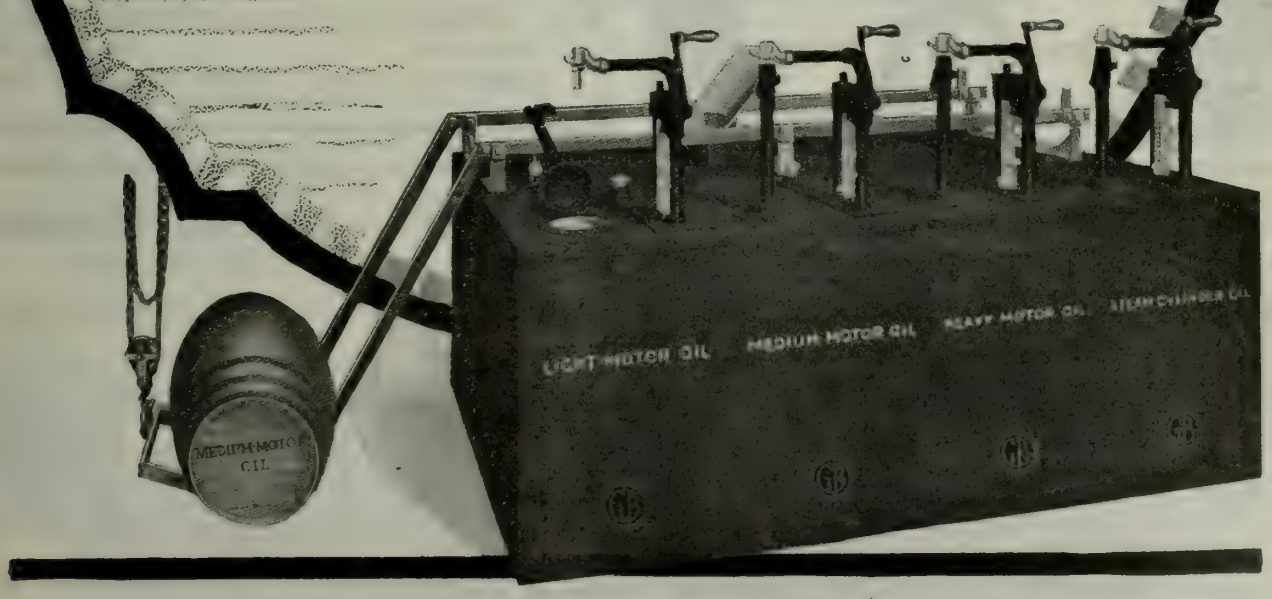
Cleaner Oil, Economically Handled
No Waste, More Profits.

This sums up the advantages of the dust and dirt-proof, leak and waste-proof battery of

GILBERT & BARKER
T-230-L Lubricating Oil Outfit



It replaces the fire risk, mess and waste of barrel storage, with safety, convenience and economy. The oil is kept absolutely clean and cannot evaporate. The modern hardware dealer is making additional profits catering to the automobile trade.

This outfit can be put in the rear of the store, quickly available to serve the auto trade with oil. A barrel track and chain hoist enables any man to drain a barrel with ease and despatch. It's such a good investment, making for such positive economy and additional profits from the handling of oils, that it soon pays for itself. At least this has been the experience of thousands of users.

PEERLESS POULTRY FENCE

The kind that endures—in place to stay and please — because it lasts. It looks well and is always in place — "it stays put." It's the dealer's friend. You can put up the strongest kind of a guarantee—we back you up.

We build this fence of open hearth steel wire with all the impurities burned out and all its strength and lasting qualities retained. Peerless poultry fencing is extra strong, heavily galvanized, can't sag, won't rust, never gets out of shape, keeps in and keeps out—both great and small.

Poultry Will Pay the War Debt

The Peerless Lock holds the intersecting wires in a firm grip that is non-slippable. Compare it with any other poultry fence. The Peerless fence is built to stand any test. It is durable.

Note the extra close spacing at bottom, no base boards required. Turns the small chicks, keeps small animals in or out.

WRITE FOR DEALER'S PROPOSITION

We show you where the big trade is for parks, lawns, cemeteries, fences plain and ornamental for farms, ranches, all purposes. **Write for Catalog.**

Canada ranks high in the poultry business. A well fenced poultry farm means larger profits when Peerless fencing is used.

4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT

Satisfied Customers the Best Advertisement

This old axiom will work for you most effectively in increasing your trade with motorists if you sell Imperial Polarine Lubricating oils and greases. Imperial Polarine is scientifically right. The motorist who uses the correct grade of Imperial Polarine in his car cannot but be satisfied.

Imperial Polarine does satisfy customers. The fact that more Imperial Polarine is used in Canada than all other makes put together demonstrates the fact.

Polarine
FRICTION REDUCING MOTOR OIL
"Makes a good car better"

Be headquarters for Imperial Polarine in your locality. Carry a full supply of each size package in every grade—the complete Imperial Polarine line. Then you can give your customer the size package he wants in the grade best suited to his requirements.

There is a minimum profit of 33-1/3% in every sale of Imperial Polarine you make. If you develop the business so that you can order in large quantities and turn your stock quickly your profit increases in pleasing proportion.

Tractor owners as well as car owners use Imperial Polarine—a lot of it. Get after this business too.

There are three grades for cylinder lubrication—Imperial Polarine, Imperial Polarine Heavy and Imperial Polarine A. Also Imperial Polarine oils and greases for transmission and differential lubrication.

Send to-day for the Polarine booklet on lubrication. If you have not received your copy—address us at 56 Church Street, Toronto.

Marketers of *Gargoyle Mobiloils* in Canada
BRANCHES IN ALL CITIES

Keep Your Merchandise Bright

SOILED commodities never appeal to your customers—they want their goods bright and clean. Dusty merchandise looks shop-worn. Keep down dust and your stock will remain as clean as the day you unpacked it.

STANDARD Floor Dressing

prevents dust from rising off the floors and shelving. Dust cannot rise from floors treated with Imperial Standard Floor Dressing.

In addition, it is a wood-*preserving*, non-evaporating dressing for all wood, linoleum and oil-cloth surfaces, thoroughly cleansing in its action.

One gallon will treat 500 to 700 square feet of floor space—once dressed no further treatment is required for three or four months, save regular cleaning. Use it on your floors to clean them and save the spoiling of valuable merchandise.

Advise those responsible for the cleaning of apartment houses, churches, public buildings, etc., as well as neighboring merchants, of its qualities, and demonstrate its worth by your own store's cleanliness.

Sold in one and four-gallon cans, also half-barrels and barrels.

Ask the Imperial Oil man.

IMPERIAL OIL LIMITED

Extending the Hardwaremens' Field

Trunks and Bags Form Another Addition That Spells Profit—Aggressive Methods Getting Results

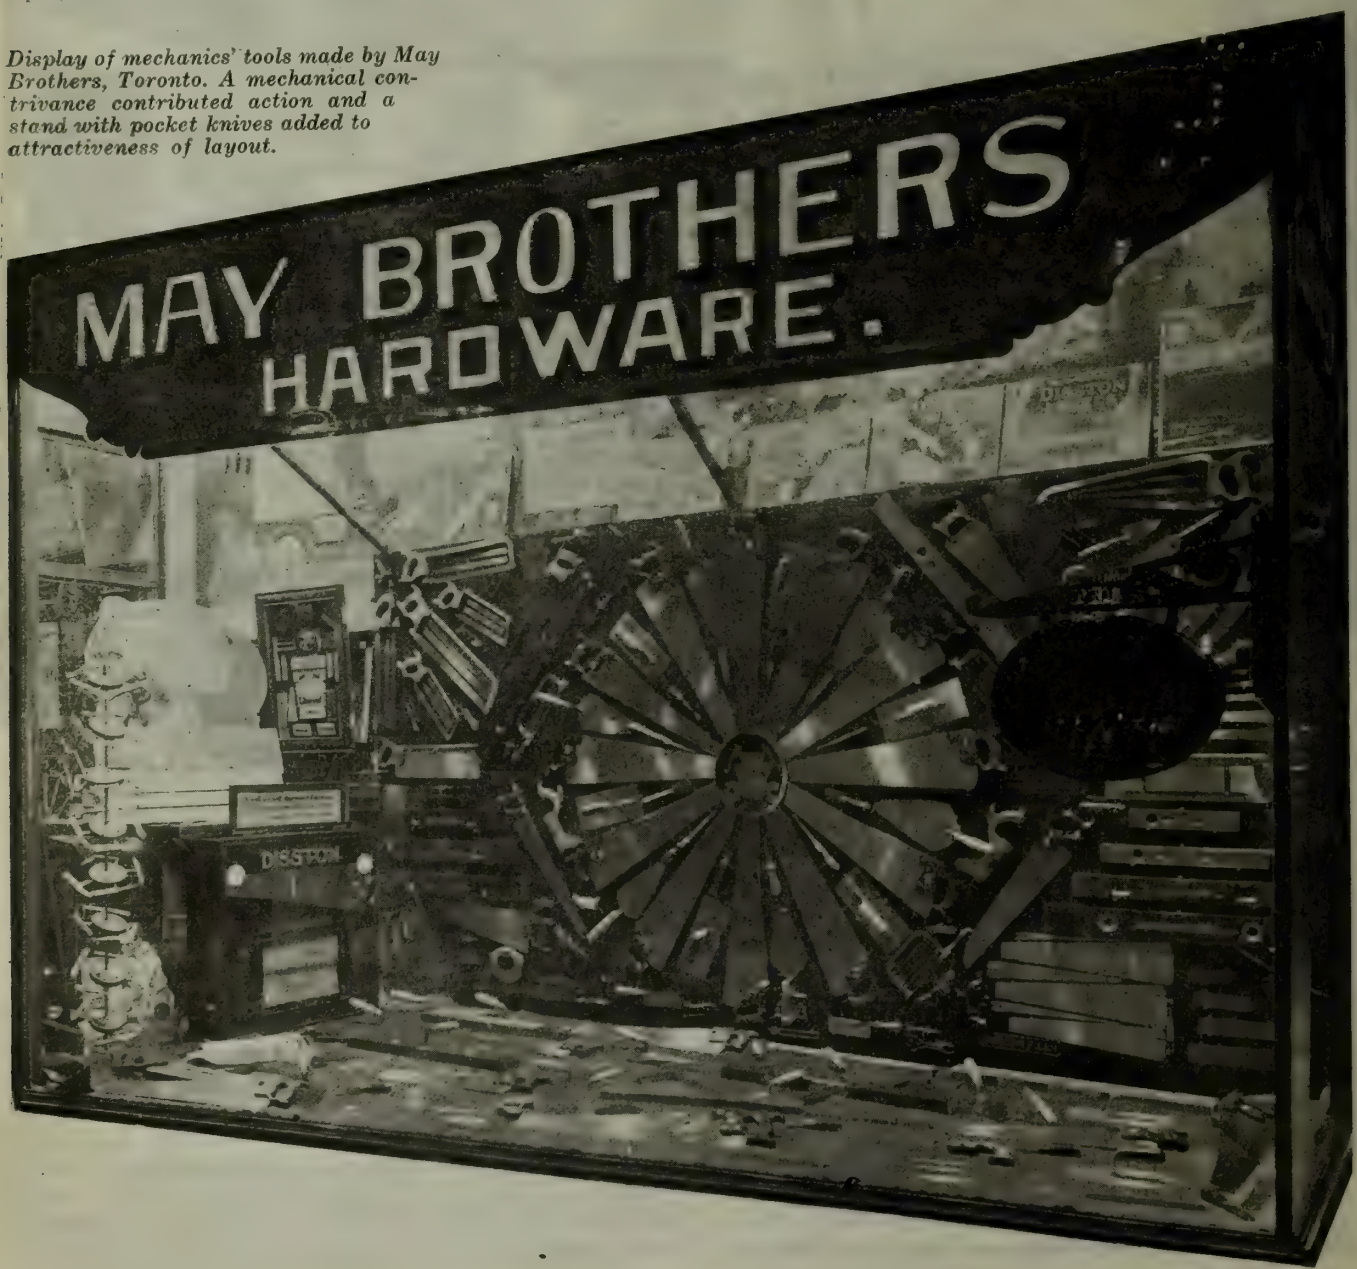
This is an attractive display of trunks and bags recently made in J. H. Ashdown Hardware Co., store in Calgary.

MORE and more is the hardware man's field extending. It is not so many years ago that the average hardware man sold builders' hardware, tools, house furnishings, such as enamelware, tinware, stoves, and perhaps some lines of sporting goods. To-day the hardware man carries in additions to all these, lines such as automobile accessories, phonographs, and also trunks and bags.

It is this latter line which hardware men are taking up quite extensively and those who have given it a trial extending over a couple of years are quite satisfied that the line is a good one from the hardware man's viewpoint. In commenting on the possibilities for sales in trunks and bags, H. A. Bowen, of the J. H. Ashdown Hardware Company, Ltd., Calgary, stated: "It is something that a hardware store does not usually carry. However, we have had the department here for a good two years now and progress has marked every month's sales since we have installed same.

"Once a month a window is devoted to the display of bags and leather goods and the results which the firm has secured are very gratifying. We find that the window display makes a direct influence on the volume of sales. There is of course always a steady demand, but it is to draw the attention of the public to the fact that we carry the line that we consistently use the display in our windows. Combined with this are the advertisements in the newspapers and we find that our sales are showing steady improvement.

"We find that it is possible to put on a few lines



at a special price and these form what we might term 'leaders.' These serve to draw a certain class of trade to the store and when we have the customer in the store, we feel that it is up to the salesman to see that a customer secures exactly what he wants. It may be that something which the customer has seen in the window is not exactly suitable for his requirements; in such a case we endeavor to take care of his needs from the stock that we may have on hand.

"There are others again to whom the bargain appeal will not reach. We emphasize the fact that we carry quality goods and we are prepared to satisfy any customer's requirements no matter what they may be. The price of leather remains very high, but that seems to make very little difference to the customer contemplating a purchase. When a man needs a suitcase or a club bag or a trunk he is usually prepared to pay whatever is necessary to satisfy his ideas of value."

This company keep their supply of trunks and bags on the top floor of the store, but every method to encourage customers to visit this department is promoted. The window which is shown herewith is one means which they have found very successful, and there is no question of doubt that other merchants are finding it equally so.

It is only necessary to look at the other window display that is shown with this article arranged with mechanic tools. It is true that this line of goods is not a new department with the hardware merchant. However, there are some merchants that seem to feel they have always been headquarters for mechanic tools, or at least, they have always handled same, and for that reason it is not necessary to make any special drive to bring this fact to the attention of the customers. This is a mistaken idea, as the public is more or less fickle and they very soon forget unless you are constantly hammering at them and pointing the way towards your store for these and other lines.

The window display of May Brothers' store in which tools were shown was not only valuable from the fact that the goods were arranged in an attractive manner, but there was action supplied in a mechanical way. This showed a handsaw moving up and down and there was a needle arranged in such a way that the progress of the saw would show how true

Display of mechanics' tools made by May Brothers, Toronto. A mechanical contrivance contributed action and a stand with pocket knives added to attractiveness of layout.

Current Events in Photographs

Will Try to Fly Across Atlantic

This is the first photograph of the Handley-Page oversea plane and shows the testing of the engines. The machine is one of the most powerful yet built and will be one of the largest machines participating in the Trans-Atlantic flight.

the teeth were set. This feature makes a very desirable change, for when something of a mechanical nature can be incorporated into a window display, it will be found that it often attracts where no other will.

There was another little wrinkle used in connection with the window display. Practically every mechanic is responsible for the sale of a jack knife. It may be that he just wants a heavy knife for work at which he daily labors or maybe he wants a real neat pocket knife. Incorporated with this window display, though not very clearly illustrated in the photograph, there was a little pedestal stand upon which knives of all descriptions were shown. These knives served to attract the attention and the display stand was arranged in such a manner that each style of knife was in full view of the purchaser so that there was no trouble in making a selection.

There was another idea which this firm carried out in regard to illustrating paints and their uses. There is another window which this firm has for display in which a display of paints and paint brushes was made. At the back of the window there was a set of porch steps, newly made and newly painted. The steps looked very nice and clean and attractive and there was a card which indicated that this firm had the same style of paint which had been used on those steps, inside the store for sale. In front of the steps the various kinds of finishes were shown and brushes were arranged in a neat display, the whole was backed up with display cards which had been furnished by the manufacturer.

The value of the window display cannot be overestimated very well. More and more and more, the better class of merchants realize that greater attention must be given to the class of goods that they display and the number of times that they change the display. In any schemes of retail advertising, the window display is one that must not be overlooked.

One might sermonize intensively and still not get the point clearly across to the retailer. It is by showing actual displays such as those herewith, along with the description of the arrangement and the actual success which those firms are meeting with, that helps more than any amount of theorizing that might be attempted. The idea of getting pointers from other members of the trade is a good one and the exchange of ideas is one which has been found to work out to good advantage.

Retail merchants as a whole are paying particular attention now to their window displays and it is with a view to encouraging this that this article has been written. It is not a very difficult task to arrange goods in a nice way and attractive manner and it does not take such a lot of time. The benefits which will be derived are many and cannot be overlooked. Every merchant should see that his window displays are made with a view to bringing a customer into the store and when the display of goods has done this it is up to the merchant and his sales staff to take care of the customer's requirements whatever they may be.

SERVICE is the dynamo not only of business but of life. He who serves most succeeds best.

WISE spenders find that they not only get a full measure of the things they want but also have a surplus left for investment.

TURNOVER, not leftover, is what makes a business grow and yield steadily increasing profits.

Excitement Stirring in Binder Twine

Buying by Farmers' Clubs Results in Dealers' Cancellations—The Farmers' Proposition Has Flaws—Retailer Here to Stay.

BINDER twine is perhaps causing as much excitement as any other one item related to the hardware trade, and the reason is not hard to find. The United Farmers of Ontario have purchased in the neighborhood of 1,000 tons for distribution to their local branches, and this quantity represents quite a percentage of the volume of binder twine sold in the province of Ontario. The result of this move has been that a greater number of retailers have sent in cancellations of their bookings with the manufacturers and are stepping out of the sales arena altogether.

Whether this attitude is the one which should be adopted without a thorough investigation into the methods under which the farmer buys his twine is just a question. It is a case of giving up the ghost when the outlook may not be quite so black as would appear from first impressions.

Canadian Manufacturers' Stand

It might be well to point out where the Canadian manufacturers stood when approached by the representatives of the farmers with orders. The Canadian manufacturers were a unit in refusing to sell the organization, one firm stating to HARDWARE AND METAL that they had turned down an order for 600 tons. Their reason and that of the other manufacturers was simply that the dealer had handled the business satisfactorily; he was operating on a small margin and they felt that the dealer should be protected. The Farmers' Association representative then went to Chicago, where an initial order for 600 tons, it is understood, was placed with the International Harvester Co., and this was later increased to 1,000 tons. The price at which they bought is supposed to be pretty close to that paid by the retail merchant for his supplies from the Canadian manufacturer.

Dealers Can Compete

In talking with a representative of one of the large Canadian companies, HARDWARE AND METAL was told that the dealers, by buying early, could, when selling on exactly the same basis as that governing sales by the United Farmers to their members, be in a position to compete. The transaction would not show much profit, it is true, but the business would be going through the legitimate channels.

The Farmer's Proposition

Consider what the farmer does when he buys through the organization. He pays 10 per cent. cash down when he places his order; the minimum amount he can buy is 50 pounds, there are no broken packages; at the tail end of the season he cannot secure one or two balls of twine to complete his harvesting, he has to arrange to come into town on the day the car arrives to take delivery.

Not a Favorable Arrangement

Now this is not the most favorable arrangement for any buyer to be placed in with any line of goods. In the first place, should the price decline he has to pay the high price—the dealer would probably protect the farmer against a decline. The farmer buys 50 or 100 pounds of twine, whatever he considers he may need—if it is a bad season and he has 25 pounds left over he is again facing a possible decline in the price. On an advancing market this might be all right, but it seem as though the peak must have been reached and lower prices may be expected.

Then again it may be a good season—the farmer may want 10 or 20 pounds more of twine to complete operations. Where is he going to get it if the dealer is eliminated—will he want to buy 50 pounds from the association, and isn't it more than likely that he may find the association supplies exhausted? Is this a good proposition?

There is also the question of delivery. The farmer may be compelled to lose two or three hours or even half a day coming into town to get his twine, which will cost him more than the total value of the twine, let alone any ¼c or ½c he might pay the merchant for carrying the stock. He also has to complete payment—there is no putting off the evil day to see how the crop turns out, and if it is a bad one, making that an excuse to withhold payment of the account as he would the merchant.

Merchant Sell on Same Basis

The merchant may say the line isn't worth handling and that he doesn't make any money on it, but it is quite apparent when the business threatens to get away from him he is not pleased. The way to handle the business is on the same basis exactly that the association handles it. The farmer must feel that is fair and cannot object to the merchant operating along the same line. Probably a small premium could be charged for broken lots and most certainly the man wanting credit should be charged for it.

Retailer Not to be Eliminated

In the smaller towns, depending as they do to a great extent on the farmers for their trade, the merchant may not want to antagonize them. There should be no objection to handling the business, however, in a businesslike way, and in spite of the activities of the farmers' clubs, the retailer is not going to be eliminated. Whether the merchant wants it or not there is a field for him in handling twine—where a line such as this is sold in competition with the world he cannot expect a big margin of profit. Quick turnover on a cash basis is the answer; the manufacturers have endeavored to protect the merchant—is the merchant going to carry on or let the business slide?

Prior to the war there was a considerable amount of binder twine imported from the Old Country and it has been hinted that an effort to secure supplies in that market will be made next year.

The farmers' organizations out West have been handling twine for quite a number of years, but this is the first time that the Ontario farmer has been a factor in handling any large quantity through the organization to which he now lends his support. What the future will bring forth is still problematical.

Sees Active Roofing Season Ahead

D. P. Hatch, sales manager of the Barrett Company, Montreal, anticipates an improvement in the roofing trade. "We look for a busy trade in May," said Mr. Hatch to HARDWARE AND METAL. "There has not been as great activity as there should have been in April, but we believe that a big improvement will be shown next month."

Mr. Hatch expressed his conviction that prices would hold quite firmly on roofing and building papers. True, some declines had been just recorded, but these were likely to constitute the very limit of decreases which could be made effective. If there had been any relief to the manufacturer, in the matter of slight reductions on raw materials, labor costs were so high as to offset these, and in some cases, to more than offset them. "Basing our opinion on present manufacturing costs we do not anticipate any declines for several months, if indeed this year," said Mr. Hatch.

"Saturday Savings" a Sales Booster

Hardwaremen in Various Parts of the Dominion Tell of Good Results Obtained by Putting on Week-End Specials—Some Ads That Contain Suggestions for Dealers in Arranging Their Copy

SPECIAL week-end sales advertised under the caption of "Saturday Savings," "Saturday Specials," "Week-end Specials," and similar titles have been increasing in popularity with hardware dealers in all parts of the Dominion, and from statements made to HARDWARE AND METAL some excellent results, from a sales standpoint, have been obtained. Dealers state that they have frequently found that people who come to the store attracted by the "specials" advertised, purchase a lot of other goods. Good newspaper advertising, backed by attractive window displays, they say, are essentials in making a "special" a success. The specials are held at the week-end in order to draw the custom of the farmers, who are in town in large numbers, and also because in many of the towns and cities where they have been put on Friday is pay day at factories or other places of business.

Hold Them Regularly

Saturday specials have proven so successful that many dealers state that they find it good business to hold them regularly as their customers have come to look for them, and if no announcement appears in the papers, many enquiries are made as to why no specials are being offered.

"During the quiet seasons I advertise a special almost every week," said H. B. May, of Indian Head, Sask., to HARDWARE AND METAL. " My advertisements have proven good trade getters. One advertisement run under the title "A few specials," resulted in the sale of 8 dozen brooms, 4 dozen pails, 4 dozen pairs of gloves and mitts, besides other articles. This I consider good, during a quiet part of the year. My general results from advertising have been most satisfactory. My business in December increased 33 1-3% over that of the same month in the previous year, and I attribute this chiefly to advertising. The campaign was the most extensive I have gone in for, as I ran practically a page for three weeks. I back up all this advertising matter with window displays, and we certainly got results. Both the window displays and the ads were changed every week."

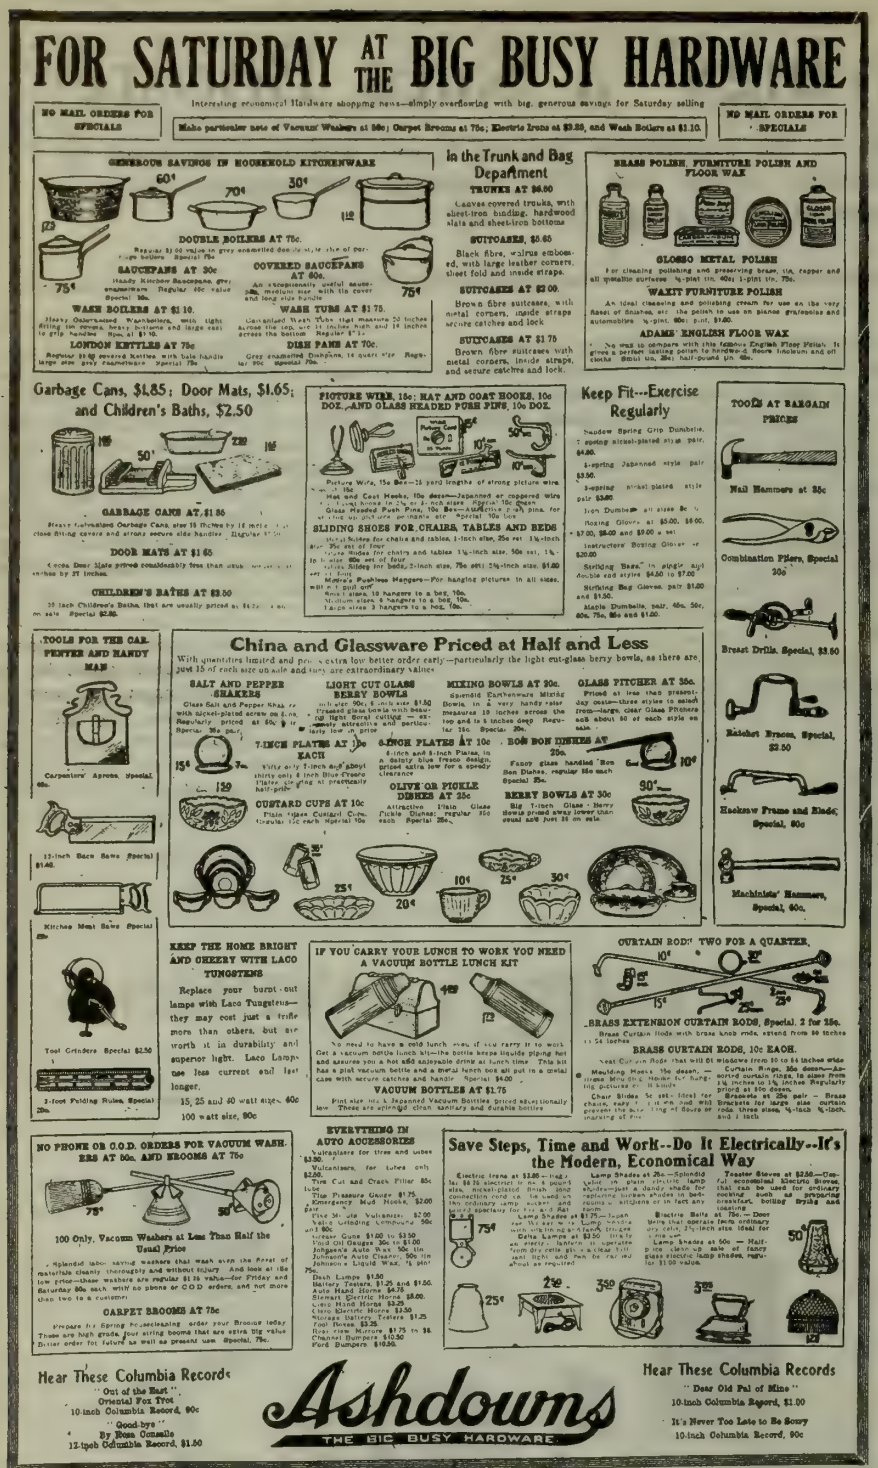
Gratifying Results

"We have had very gratifying results from our "Saturday specials," said J. B. Curran, managing director of the Brandon Hardware Co., Ltd., Brandon, Man., to HARDWARE AND METAL. "We have had a series of these sales and when the values are reasonably good and the weather conditions fine the sales have proven most satisfactory. We make no special effort at window dressing, as the specials are sold direct from the window, and an elaborate display would defeat its object, that is to sell broken lines that have been hanging fire too long.

In announcing its specials the firm uses a space two columns wide and five inches deep. "Saturday Specials," in display type, is the caption. Below are listed 15 to 20 specials in a single column list. The adjoining space is occupied by "75c" in as large type as can be got into the space. Below this list is a note stating: "There are also some bargain tables of goods at 10c, 15c and 25c, which will surprise you."

Ingram & Davey, of St. Thomas, Ont., frequently put on "Saturday Savings" sales. Their ads usually occupy a space nine by eleven inches, and a generous use is made of illustrations.

"From years of experience we find that advertising, if conducted in a systematic and business-like manner, always pays well, said Geo. W. Davey to HARDWARE AND METAL. We give prices of each and every article without crowding, and always advertise goods in keeping with the season. Ads of this kind draw people to the store, and we find that even when they come for bargains they often buy many lines not mentioned in the advertisement."



Mr. Davey stated that he makes a point of featuring something special each week. The features must be real bargains and include lines that are seasonable. These specials not only draw the farmer and his wife, but bring many new customers from the city, who otherwise might not visit the store," he stated.

Sold 300 Brooms

Mr. Davey explained that arrangements are always made a week in ad-

The space used for "Saturday Savings" ads is never less than nine by eleven inches, frequently larger. The ads are always well illustrated. Ingram and Davey state that they have had splendid results from "specials of this kind.

Neat arrangement and a free use of illustrations is a feature of Ashdown advertising. Note how prices are given not only in the reading matter but also with the illustration. Ads of this kind are often more widely read than the general news in a paper because they contain so much of direct interest to the buying public.

vance to give the public something new the week following. Using cuts freely in the space provided, he says, is also a very good idea. As an instance of this he mentions an advertisement which appeared in the newspaper of recent date, right in the centre of which he displayed a cut of a corn broom. He offered this at 59c, and at the closing hour Saturday night the salesman had disposed of no less than 300 brooms. "We are quite satisfied," he continued, "that the people read the ads Through a systematic campaign they look for the advertisement, and wait to see it before making their purchases."

Value of Windows

Whenever they can do it the J. H. Ashdown Hardware Co., Ltd., of Winnipeg, put in a window display that will back up their advertising matter. This, of course, is not always possible, as the firm tries to confine each window to some particular line. In a great many cases, however, a window can be put in. For instance, if they advertise something special in the line of graniteware, they always show a window of the goods and special attention is paid to pricing each line. Only when there are enough goods of a particular line to make a display is the window connected up with the advertising copy. They are able to do this often and effectively with their china and glassware. On one occasion they advertised a tea set and ran a splendid window display in connection with it. The window and the newspaper copy "pulled" to such an extent that every tea set the firm had in stock at the particular price was sold. This is such a successful line that the firm advertises it almost every week in their Saturday advertisement, and invariably put in a window display.

Produces Results

The Ashdown Co. finds it to their advantage occasionally to utilize a corner in their advertisement for a line which, under ordinary circumstances, would not be advertised. For instance a number of cuts of small electrical fittings may be shown with the regular prices quoted. The firm does not advertise bargains in lines of this kind. They state that it is surprising the number of inquiries they get for electrical fittings, or whatever other line they may have mentioned, following the advertisement.

It will be noticed that "No mail orders for specials" is featured in a box at each side of the ad at the top. This is a policy that is adhered to by the firm in its advertising of specials, and is based on the idea that it is better to get the people into the store, where there is a chance of selling them many other goods than those they came with the idea of buying. The firm has frequently found that people will ask for goods that were advertised two or three weeks after the ad was run. As a result of this it is hard to estimate the results obtained from the ad. However, it has been frequently found that a large ad will produce direct and immediate results in sales totalling ten times its cost. As a general rule large space pays best, they say, and this year are using more newspaper space than ever.

Hold Many "Specials"

Arthan & Hughes, of Tompkins, Sask., have been running a number of "specials" and with excellent results they state.

"We have put on a number of specials," said E. C. Arthan to HARDWARE AND METAL. "One of the best was a sale of pails. We had a heavy stock of pails and took this method of reducing it. As far as special sales are concerned we believe in them. If we sell a customer an article at a big discount we believe we get the profit back in many other ways. The farmers are the biggest gossips there are in the country, and they are doing one of two things, either knocking the merchant or boosting for him. These special sales make boosters for us. When we put on a special sale we advertise it, and we have large plate glass windows and we fill the windows with the articles advertised to

show them we have the goods to sell and also to catch the man who does not read the local paper. We do not do a strictly cash business, as we believe in giving a man a chance; of course we are careful to whom we give credit. Our business is about 75 per cent. cash and 25 per cent. credit. The amount of business we do on credit does not hurt us to carry it, and we are willing to help a man along by giving him credit. If we make a mistake in judging a man's character we take the loss, but we must say our losses are very light."

New Bankruptcy Act is Now Before the House

Many Questions Being Asked by Members—Hon. Hugh Guthrie Explains the Working of the Measure, Emphasizing Its Quickness and Accuracy

THE new Bankruptcy Act, now being given its second reading before the House, is occasioning a great deal of discussion. Much of this centres around efforts to make its action quick and accurate. The new bill was introduced by Hon. Hugh Guthrie and one of the first comments he had to deal with was that it was imperative that there should be nothing haphazard about the appointment of trustees and that they should be good, honest, capable men. Mr. Guthrie in reply stated that the committee had dealt at some length with this matter and that there was some difference of opinion regarding it among representative bodies of Canada. It was decided that the trustees should be appointed by the Governor in Council upon application of the Secretary of State. A sufficient number of trustees are to be appointed throughout Canada who will have a limited territorial jurisdiction and they will be required to give adequate security for the performance of their duties and for the prompt payment over of funds which come into their hands.

May Demand Order

An order for increased security may be made upon application of the creditors, he stated. The standing security is $10,000.

Mr. Guthrie was asked if the act is passed what will be the effect on the local acts now in force, and stated that all provincial legislation dealing with the subject of bankruptcy would in his opinion become null and void. The basis of the new bill, he said, is the English Bankruptcy Act, although it was not possible to apply all sections of the British Act here. The bill as it stands he said was a modification of and addition to the laws of a good many provinces also.

As the act is a new departure, Mr. Guthrie explained that it is not yet known how many trustees will be necessary throughout Canada. They were not, he said, salaried officers, but their fees will be voted by the creditors.

Should Get Interest

He was asked if any provision is made in the bill for the payment of interest upon the sum which the assignee is obliged to deposit with the Secretary of State. Mr. Jacobs who asked this said it seemed to him that when such a cash deposit was put up there should be some provision whereby the party would receive at least as much interest as the owners of Victory Bonds.

"I think if the trustees puts up cash security," said Mr. Guthrie, "he certainly ought to be entitled to a return by way of interest, but I believe in practice, it will work out in the form of guaranteed bonds."

He stated that the Canadian Manufacturers' Association and the Wholesale Grocers' Association, and other bodies, had deemed that the question of the selection of trustees was most vital. In England, Mr. Guthrie stated, the trustees are appointed by the courts, and he was asked why the same system was not adopted here.

He pointed out that one difficulty the Committee had striven to overcome, was the delay and expense in connection with application to the courts.

Too Expensive

"One complaint that has come to us from all over Canada," he said, "is that the expense of cases that go before the court, notably the cases of companies under the Winding-Up Act, is so great and the procedure so tedious that creditors become disgusted. An outstanding case in British Columbia to-day is that of the Dominion Trust Co. I believe that 80 per cent. of their assets have been expended in courts, liquidators and the like. If one thing was impressed upon the Committee more than another, it was that we should avoid as far as possible court procedure and court appointments."

H. H. McLean said that he could not understand the principle of taking the control of the estate or of the assets away from the creditors who own them, and asked why the trustees as proposed should be limited to a particular class.

How It Works

Mr. Guthrie stated, that it is not contemplated under the Bill that the trustee will be asked to carry on the business. It was not the common experience, after an assignment takes place, that the business is carried on, it is wound up. One of the chief objects of the Bill is to see that it is wound up properly. It might have to be carried on, but it was not planned that the trustee should do this. The creditors may appoint a manager. The insolvent himself may be appointed by the creditors. There is a special provision, he stated, that the insolvent, who is the man most familiar with the business, shall be appointed if the creditors agree. The largest creditors in the Dominion, the Canadian Wholesalers, the Canadian Manufacturers' Association, and the retailers, he stated, all passed favorably upon the clause as it stands, and did not approve of appointing anyone as a trustee or of anything that might open the door to the appointment of friends of any man or set of men as trustees or of anything not in the interests of the creditors.

The discussion on the Bill is still in progress.

What of Comparative Prices in Retail Advertising?

Has the use of "comparative prices" in retail advertising been abused to such a degree that an advertisement is weakened when the claim is made that the article is worth so-and-so, but is being sold for so-and-so (a low price)?

Some of the leading retail stores have concluded that such statements have so often been untrue that they are losing their power to produce trade because of this feeling and the knowledge that the "comparative price" is a constant temptation to department managers and others to exaggerate, they have eliminated such statements entirely.

They believe—and their sales records bear out the assertion, says a bulletin from the Associated Advertising Clubs—that a well-written description of the goods, followed by the announcement that prices are uncommonly attractive, is a stronger appeal than the other style of store advertising. Prices are, of course, usually stated, though not on all occasions.

The Associated Advertising Clubs are seeking further information on the subject, and to this end, William P. Green, organization secretary of the National Vigilance Committee of the Advertising Clubs, recently issued a letter to a number of representative stores in many of the more important communities of the country, which reads in part as follows:

"We are interested in having your viewpoint on such questions as use of the term "value," the conditions, if any, under which goods in lots may be advertised "values up to," and such other phrases as your experience has shown you to enter into a determination of right policies.

"We would like to have you tell us whether some stores, by reason of size, class of goods handled, or business conditions, are justified in using comparative prices, and if so, to what extent.

"Also please let us have your reaction on this—if a store announces that it does not use comparative prices in its advertising, but subsequently advertises goods (one half off," without stating either the original or sale price, is this, in your opinion, really comparative price advertising? Kindly explain your answer."

EDITORIAL COMMENT

MUST GO AFTER TRADE

EXPORT business has been secured by many Canadian firms in a most satisfactory volume. It is rather significant that the firms who have been getting the business are the firms who went after it. Some firms as soon as they deemed the time opportune sent their own personal representatives to round up orders. Others depended on other methods. It is not altogether reasonable to expect trade commissions or other bodies to get business and hand it to people. Canadian firms would not depend on this means of getting business at home. They would go out after it. Firms who have been waiting for business to be handed to them are likely to be disappointed. The general manager of a Western Ontario firm sums up the situation fairly well in a recent letter in which he says in part:

"Let me impress on you that the talk of the mother country and other sections of the Empire being unwilling to trade with us is merely the result of profound ignorance. They do want to trade with us—they do want our goods—but they will not come after us. We must go after them."

Canadian firms have a lot of good goods and good materials that the people in England and other countries want. The business is there, but it must be gone after. There is nothing new in this principle. The firms have built up a business at home by going after it. The same methods that meant success at home means success abroad and while it may be true that there will be rivals and some competition, no country stands higher in the eyes of the Allies to-day than Canada. However, this is nothing particular to lean upon in a business transaction. If Canadians show that they have the goods and go after the business, they will get it.

KEEP AT IT

ARE you keeping your name and the name of your store before the buying public all the year round. Advertising knows no seasons. It is good business for you to keep seasonable lines to the fore, but unless you keep your store before the people all the time you are not going to get the profits you would otherwise. Attractive advertising keeps everlastingly at it. It works twenty-four hours a day and seven days a week. It never stops. People will see your name on your window or your sign above your door and forget, but if they see your advertisement continually, your name and your store becomes fastened in their minds. If you back your advertising with goods and good service the results will be apparent in steadily growing business and more and more profits.

MEANS MORE BUSINESS

THE preferential tariff of Great Britain which allows 6½ per cent. to Canadian manufacturers developing export trade is resulting in an enormous expansion of automobile making in the Dominion by American firms. It is stated that Detroit manufacturers alone will invest no less than $12,000,000 in new plants in Canada. Some of this work is already under way and in at least one instance an American firm is leasing a large plant in Ontario that was making engines and boilers and will use it to try and keep up with its orders until a new factory can be built. This expansion in the export auto trade will undoubtedly have an effect in stimulating business at home, and every auto that is sold at home means the sale of accessories. In this the hardware dealer is especially interested and also in the supplies. The steady growth of the auto accessory business has been a source of keen satisfaction to many hardware dealers in the past five years, and they are looking forward to even greater developments in the next decade.

PROFITS ARE NECESSARY

JUST where the demands which labor is making to-day for higher wages and shorter hours will lead to is a question that has got many business men puzzled. In the midst of a whole lot of other problems that require the most careful consideration this question of higher wages and shorter hours stands pre-eminent with many firms because it affects their whole future not only from a production standpoint but from the very foundation. It strikes directly at profits, and profits are what all firms are vitally interested in. One hears a lot of talk these days about "killing the goose that laid the golden egg." It remains, however, to be seen just how far the demands of labor can be carried without killing the goose. In some recent instances labor's demands include, beside the shorter hours and higher wages, a share in the profits. Some have gone even further and wanted a share in the business. Labor cannat have more than it can earn even with the rewards

of capital altogether eliminated and the payment of management brought down to the basis of the laborer. There has been quite a lot of talk about distributing profits to workers. Much of what has been suggested seems decidedly impractical. Profits are to business what fertilizer is to the soil. Business starved of profits will soon eat up its own capital. It is stated that even a plan which would return six per cent. on the invested capital and distribute the balance to the workers would mean business starvation. One of the biggest businesses in the world of its kind, the Armour Co., was built up by putting back into the firm more than eighty-seven per cent. of the total profits. Many of the most substantial business structures all over the world to-day have been built up by the same process. It would appear that one of the mistakes many firms have been making is to veil too much of their affairs, especially regarding profits, from the public. Mysterious and very often erroneous reports have been circulated regarding the huge sums certain firms were making. Reports of this kind have been magnified and have bred discontent, which, fostered by other conditions, are crystallizing into demands which are now supplying many captains of industry with much food for earnest thought. Some firms are meeting demands for shorter hours and higher wages. Others are adopting profit-sharing plans. Many others are wondering just what to do for the best. Many business men are beginning to realize that they have been making a mistake in ignoring public opinion and allowing stories of huge profits to go unchallenged. Intelligent publicity will do a lot to counteract the evil effects of this, but in the meantime a movement is under way which promises to sweep right through the industrial and commercial world and there is no telling yet just what the results are going to be.

THE HOUSING PROPOSITION

ACCORDING to the Ontario Director of the Bureau of Municipal Affairs one-half of the cities of the province have already passed by-laws by which they will come under the provisions of the Housing Act. He estimates that no less than $8,000,000 worth of new buildings will be under construction in this manner shortly. Some of the hardware dealers have been taking the view that little or nothing was likely to come of the activities of the Housing Commission. Others took the view that the Commission had not only lost a lot of valuable time but had not accomplished anything itself and prevented others who would have built from going ahead. It has taken time to get the machinery for the Housing Act in motion, but once it is started it is expected that rapid progress will be made and that a lot of work will be under construction this summer.

WHAT OTHER EDITORS SAY

ONE who watches carefully the pages of general advertising mediums is struck by two things; the persistency with which those advertisers who are recognized as successful maintain their advertising week after week, month after month, and year after year. They never seem to abate their effort; apparently the volume of their business increases steadily. The other thing noticeable is the large number of advertisers who thrust their announcements above the surface for a little while and then sink into oblivion. They either had not merit as a basis for their claims or they did not possess the skill to steer their enterprise successfully, or else they lacked the nerve to put forth proper effort.—*Advertising Experience.*

THE atmosphere through which the steel situation must be discerned has been befogged in a variety of ways. There has been the usual befogging by the playing of their usual tactics by both buyers and sellers, buyers pretending they have no intention or occasion to buy while sellers make their familiar pleas as to production costs. Additional befogging has occurred because the idea, proper in war time, that producers have to be taken care of, is not entirely dispelled, while a rather dense mixture has been spread over the prospect by operations at Washington, where things are done differently, or left undone differently, than in regular business circles. To put the thing in a nutshell, the steel producers have been playing for time and also exerting pressure upon Washington to withdraw its opposition to wage reductions. The steel producers have been doubtful whether there would be a really large volume of steel demand this year. Accordingly, as in all the past, they have sought to postpone price reduction until the last moment, until the time when it would be certain that reductions would at once fill the mills and start the market on the road of advances.—*The American Metal Market.*

WHATEVER the difficulties between the metal-workers and their employers, strikes are generally the result of a wrong attitude of mind, on the part of either employers or workers, or of both. If the employers have the opinion that the aim of labor is to make business impossible by demanding more and still more of the margin of operation they will not be conciliatory. If the workers believe that the employers are merely "capitalistic exploiters of labor," that will have a continuing sense of injury. Under such conditions trouble is inevitable. We believe that the practice of the electrical contractors and the electricians might be more generally adopted for the mutual advantage of both employers and employed and for the benefit of the country as a whole It is to be expected that the Government Commission on Industrial Relations now touring the West will advise the setting up of trade councils on the model of the Whitley plan. Workers are entitled to a growing share in the control of industry. Given that the majority of them will give loyal service.—*The Times*, Toronto.

THE most frequent complaint that we hear in regard to clerks is their lack of initiative. Merchant after merchant laments the fact that their clerks need too much directing—it is necessary to keep continually telling them what to do. When a clerk has finished one thing he has been told to do, he stands around until told to do something else, instead of himself seeing the things that ought to be done and going about his work without being urged.

It is unfortunate that more clerks do not realize that they could make themselves much more valuable to their employers by going about their work without direction so that the proprietor will not be taking up time, in telling them what to do, that should be given to other important store work.—*Profit Pointers.*

Broad-Minded Merchandising Pays

Introduce Outside Lines in Your Displays to Enhance Your Own Goods and to Produce the Desired Moral Effect on Their Customers—Co-operate With Other Merchants to Encourage the Better Furnishing of the Homes of Your District

ARE you introducing novelty in your merchandising? Are you getting away from the beaten path of conservative hardware ideas in the selling of your goods? Think these two questions over as you read this article and see where you can improve your methods.

How often hardwaremen, not in rural districts alone, but right in our largest cities, have said: "Isn't it great the way those big department stores advertise? Don't they put over some great stunts?" No matter how much bad you think about them you still admire their aggressiveness and often wonder how you can compete.

Now to size up your possibilities for a moment. Do you realize that there are some very fine homes in your district whose owners are in a financial position to afford much better furnishings than they have? And some day they are going to buy them from the big city store unless the local merchant gets after them first, and he can. Here is one suggestion which shows that you can do it.

The Artistic Side of Merchandising

You say, "Oh, I'm not artistically inclined! My salesmen know nothing about artistic ideas." This is where you underestimate both yourself and your selling force, for nearly every man has a streak of good taste in his make-up or he can develop it and if he can't scare it up himself he can borrow it from some of his acquaintances until at last he begins to think it is his own. All it requires is putting into practice what you already know or can learn. Suppose now as an example you have a window to trim in which you wish to display electric fixtures, appliances, etc. Sure you can arrange them very nicely and they will look quite neat, but wherein does the display differ from any other of the dozens you and your competitor have put in before? Why not something different?

You know the wall paper man down the street, if you do not carry the line yourself. Why not go down and get his idea? If he is a live wire he will cooperate with you and loan you a display rack of wall paper that will harmonize with the goods you are showing. He may even go to the trouble to fix up a pair of panels representing the corner of a dining room. This set up in your window will form the background. Now see the picture man and borrow a nice picture that will blend in with the paper and the other goods. Next hang your electric fixture, selecting one that is in keeping with the paper and display other lines suitable for such a room: a pretty table lamp, a set of cutlery, a piece or two of hollowware. If you are not sure about the harmony of the lines displayed, ask your friends, ask those who should know and get their ideas—don't be afraid of borrowing other people's ideas and using them to establish your store as the place to buy the better goods. The public will soon look to you for ideas in the fitting of their homes. This can be carried right through the home—cellar to garret, even to the office and factory, in fact everywhere.

Take Stock of the Homes

The possibilities that lie behind the front door of the average well-kept home are always under-estimated and the hardware dealer is too often inclined to leave the suggesting to the other merchants in the town, who incidentally are doing the same, with the result nobody gets the business until some day the expressman brings home a tell-tale parcel.

Why not take stock of the most likely homes in your district and set out to get the business that is waiting to be picked off, by running a series of windows and interior displays along the lines mentioned above and through your paper and personal contact get the bigger trade of your community.

Handsome Homes in the Country

You no doubt can call to mind the many handsome country homes in your vicinity. Do you know their needs? Not perhaps what they actually need but what the owners would like to have if they knew you could supply them.

You can help to make rural life more attractive by fitting the country homes with all the most modern conveniences and labor saving devices. For instance, the installation of an electric power plant for domestic use will make possible the use of electric lighting fixtures, electric washing machine, electric iron, electrically operated churn, electric vacuum cleaner and many such labor saving devices. The installation of a sanitary water system will lead to the outfitting of a bathroom, a kitchen, etc.,—one modern idea leads to scores of others which mean good business for you.

In a small town, in fact a village in Ontario, one hardware man devotes much of the quiet season in the summer time to selling and installing water systems, which net him a very good profit and pave the way for other more profitable business.

This idea is not new of course, but very often it is neglected. The profit on such a job is only the beginning, for a well equipped kitchen is not complete until the cooking utensils are taken stock of, vacancies filled and old inefficient pots, pans and kettles displaced by the newer and better type.

The Walls the First Step

In decorating the home the first step is the decorating of the walls. Build your plans around this fact and in getting the interest of Mrs. Housewife make this one of your first interest getters.

Follow the decoration of walls, whether they be produced from your paint or wall paper department (someone else's if need be) with the furnishing, study the best style of furniture to go with the wall decoration and then add the other touches which go to complete a nicely furnished home, even to the rug. Start the housewives thinking through your window decorations and your interior trims until you finally get into their homes.

The Farmer and His Stable

Don't stop with the home, but show the farmer that you are just as interested in his end of the institution as the housewife's, and that you can place his part on an equal basis with the house. That barn door opens as if it were glued to the track, perhaps the hanger is a poor one. Labor is scarce, why not a hay fork and stable carrier to say nothing of the water and lighting system; a motor to grind his feed, to fan his grain, to cut his wood, etc.?

The hardware dealer's merchandising can be made most comprehensive if a broad policy of co-operation is adopted, one which will not prevent him from displaying the other fellow's goods, thus encouraging mutual good-will and hearty co-operation.

Demonstrating Electrical Devices to Create Interest and Effect Sales

MANY points in display, store arrangement and salesmanship might be adopted by hardware dealers, from an electrical demonstration put on by a Toronto store. To start with, the display was complete. One thing that impressed everyone who saw it was that the store in question not only had everything in stock, but all the very latest improvements. No matter whether it was a spark plug for an auto or an electric iceless refrigerator, a vacuum cleaner or a high speed washer, it was on display and working. The iceless refrigerator was shown manufacturing little chunks of ice to be put in water glasses. The electric washers were running, filled with foamy lather. The vacuum cleaners were sucking up shovels full of dust, pieces of paper, sand and other things that impressed the lookers on with their efficiency. Half a dozen spark plugs connected with a motor were "sparking." There was no doubt whatever about it. All who saw the demonstration, and the continuous blue sparks, were satisfied in their own minds, that the plugs were built for service.

In connection with the display, a plan was featured that made for efficiency. The electric washers were in a section to themselves. There was a section for auto accessories, another for toasters, percolators and similar lines. In another section, a battery of vacuum cleaners were busy, and over in a corner the iceless refrigerators were humming as the motor driven equipment sent the fluid through the coils.

A man or woman no sooner stopped before a gorgeous display of electric lamps, the electric washers, vacuum cleaners or other lines than an alert and thoroughly posted salesman was on the job to answer any questions, give prices and all general information. Every one of the salesmen and saleswomen knew their business. The little ladies in charge of the electric refrigerators might have worked in a plant where electric motors were made, so thoroughly could they tell all about the machines and what they would do. So it was with the electric washers, the vacuum cleaners, the auto accessories and all the other lines. Without being in any way officious or obtrusive, the sales force in charge of the demonstration was on the job every minute.

Another feature of the demonstration was the decorations, the setting for the various electrical devices. There were all kinds of effects, all in keeping with whatever was shown. For instance, there were floral and woodland effects among the lighting fixtures, there was furniture that harmonized with the table and hall lamps, there was spotless linen and handsome furniture to go with the toasters, percolators and other articles used in the home. The effect was to suggest involuntarily to prospective buyers that the articles shown, would not only make their homes more complete, but to show them also how best to show them in the home.

TO LAUNCH CLEAN-UP WEEK BY PARADE

Montreal is out to do its annual springtime cleaning this year in a way that should prove decidedly effective. A monster parade is now being planned for May 17. This will present a great opportunity to the hardware dealer who is out to make this a banner year. With the inauguration of this campaign there will be a big demand made upon the hardware men's stock of rakes, hoes and shovels. Step-ladders, the scrubbing brush assortments, the mops and pails, cleansers, sponges, etc., should be brought to the fore and displayed in the windows, and sales of paints and varnishes should be greatly stimulated as a result. Reports indicate that the dealers are taking an active interest in the campaign, and the citizens are being asked to do their share in making the campaign a success.

EVENTS IN THE TRADE

Business Changes

Ottawa.—Israel Houle, succeeds Houle & Richard, hardware.

Harris, Sask.—Kaiser & Kerr succeed N. S. Blondin, hardware.

Colonsay, Sask.—Morgan and Baird have purchased the hardware and implement business of J. E. Morgan.

Lucan, Ont.—Joseph Hodgins & Son, of Strathroy, Ont., have purchased the hardware business of the late Richard Hodgins. Alex. Hodgins will be manager.

Fire Losses

An explosion in a furnace was responsible for a fire at Deseronto, Ont., which partially destroyed a portion of the plant of the Standard Iron Co.

Obituaries

Thomas A. White died at Bruce Mines, Ont., on April 21, 1919, in his 81st year. Mr. White was in business for many years, and was one of the oldest and best known hardware men in the north country.

Trade Notes

The Colonial Mfg. Co., Montreal, saddlery, has been dissolved.

The Mitchell Vacuum Cleaner Co., Ltd., has been registered at Montreal.

G. B. Laforest & Co., Montreal, steel, has been registered by Guy B. Laforest.

The Imperial Oil Co., Ltd., has purchased property and will erect a storage plant at Eston, Sask.

The Terrebonne Electric Power & Steel Co., of Terrebonne, Que., has secured a Dominion charter.

A winding up order has been granted in connection with the Hastings Wagon Co. Ltd., of Watford, Ont.

The Canada Cement Co., of Port Colborne, Ont., will shortly commence the erection of a potash plant, to cost $1,500,000.

W. Ashley has withdrawn from the tinsmithing firm of Tufts & Ashley, at Delisle, Sask., and the business will be continued by Mr. Tufts.

The hardware firm of Ingram & Davey, Ltd., of St. Thomas, Ont., has the distinction of being the first business concern of any kind in that city to install a private telephone exchange.

McLennan & McFeely, of Vancouver, B.C., are opening an auto accessory department which will be in charge of Arthur Britton, manager of the sporting goods section.

A dissolution of partnership has taken place in the Delton Hardware Co., Edmonton, Alta., between Bernard V. Dougherty, John H. Chesser and Henry E. Grant.

At the annual meeting of the Dalyte Electric Co., the merger of the Flexible Conduit Co., Dalyte Lamp Co. and Munder Tungsten Co., the following officers were elected: President, John Kennedy; vice-president, J. E. Carter; managing director, J. S. Wheeler.

Oneida Community, Ltd., make the announcement that they are about to move their head Canadian office from Oneida, N.Y., to their Canadian factory, which is located at Niagara Falls, Ont.

The Hoover Suction Sweeper Co., of North Canton, Ohio, will make its Canadian headquarters in Hamilton, Ont., and will erect a plant there. The Canadian sales manager will be Thomas F. Kelly. Temporary quarters of the company have been established at 20 Macnab St.

F. E. McFeely, warehouse manager and salesman of the wholesale hardware firm of McLennan, McFeely & Co., Ltd., Vancouver, has started in business for himself, as a manufacturers' agent, with offices at 508 Credit Foncier Building, Vancouver.

Personals

After three and a half years' service overseas, Harry Taylor has returned to his position with the Drake Hardware Co., Ltd.. of Victoria, B.C.

A. Pritzker, National Electric Heating Co., Toronto, who has been seriously ill with pleuro-pneumonia, is now on the way to recovery.

E. Roy Fenwick, manager of the New Brunswick branch of the Dunlop Tire & Rubber Co. at St. John, has been appointed manager of the Montreal branch.

J. E. Dufton, formerly with the Gas Appliance Co., London, Ont., has been appointed Canadian representative of Eclipse Gas Stove Co., Rockford, Ill.

Prior to his departure for Vancouver, where he is starting business, F. A. Healey, who has been manager of the hardware department of Revillon, Wholesale, Ltd., Edmonton, Alta., for twelve years, was presented with a massive cut glass rose bowl, on a mirror reflector, by the management and department heads, and with a fitted club bag by the staff. L. M. Muir succeeds Mr. Healey in charge of the hardware department.

Mr. C. Brownley, who has been manager for the past six years of the Great West Saddlery Co.'s Calgary branch, has resigned to become manager of the Calgary branch of the Delco Light Co. On behalf of the employees he was presented with a gold chain and Masonic emblem prior to leaving.

Gordon Cunningham, buyer of sporting goods in the hardware department of Revillon, Wholesale, Ltd., Edmonton, Alta., is leaving shortly for the coast to recover his health, after a long illness with influenza.

Montreal News

George C. Wiltshire, representative of F. H. Noble and Co., Chicago, was in Montreal early this week.

H. Lamarre, of Lamarre and Co., St. Remi, stove manufacturers, was visiting Montreal this week.

W. S. Fisher, of the Enterprise Foundry Co., Limited, Sackville, N.B., was a Montreal caller this week.

D. Blais, of Gagnon Freres, Chicoutimi, Quebec, was in Montreal this week in the interest of his firm.

J. H. Ross, formerly with the Remington U.M.C. Arms Co., and who is now selling various lines on his own account, was in Montreal this week.

Mr. Brooks, representing Oneida Community, Ltd., and selling their line of traps throughout the country, called on Montreal jobbers this week.

Walter B. Ramsay, president A. Ramsay and Son Co., Ltd., Montreal, returned from England this week. Mr. Ramsay has been absent for several weeks in connection with special business for the Canadian Paint, Oil and Varnish Association.

Z. E. Martin, of the Martin-Senour Co., Ltd., and who resides in Chicago, was in Montreal this week. Mr. Martin was called to Knowlton, Quebec, through the death of his mother. During his stay in Montreal he visited the Montreal factory for a day or two.

George Henderson, president Brandram-Henderson, Ltd., Montreal, left on Monday for Vancouver. Mr. Henderson expects to be absent for a month and will visit the company's agencies in B.C., Manitoba and Alberta.

John Irwin, managing director of McArthur-Irwin, Ltd., Montreal, has been confined to the Royal Victoria Hospital for the past ten days, and underwent an operation which was happily successful. Mr. Irwin is expected back at his office in a few days.

J. E. Penfound, representing McArthur-Irwin, Ltd., Montreal, left this week for a western trip. Mr. Penfound will be away about two months, and will cover territory through Western Canada, going as far as Victoria.

Winnipeg News

N. J. Dinnen & Co., manufacturers' agents, Winnipeg, have moved from the Canada Building to the Nokomis Building.

C. C. Craig, of the C. C. Craig Company, cutlery importer, leaves on an extensive trip to the Pacific Coast next week.

A. C. Leslie Co., Ltd., have moved their offices in Winnipeg from the Nanton Building to 610 Confederation Life Building.

Mr. Davidson, of Henry Disston & Sons, Ltd., Toronto, is in the city this week, soliciting the trade in the interests of his firm.

Mr. Yendall, of the Richards Wilcox Co., London, Ont., spent a few days in the city during the week, calling on the jobbing trade, leaving Friday night for the East.

Incorporations

Gravenite Products Limited, capital $240,000, head office Toronto, plans to manufacture and deal in electrical devices and appliances, and to carry on the business of brass founders and tool makers.

Piano Cases and Phonographs, Limited, head office, Brantford, Ont., capital $100,000, plans to manufacture and deal in office and store fixtures, and to carry on the business of wood and metal workers.

The Sellers Kitchen Cabinet Company, of Canada, Limited, capital $90,000, head office, Southampton, Ontario, plans to manufacture and deal in kitchen cabinets and wood manufactures.

The Sudbury Improved Car Stake and Manufacturing Company, Limited, capital, $500,000, head office, Sudbury, Ont., plans to manufacture and deal in car stakes, screws, chains, tackle and all articles used in connection with lumbering.

LaSalle Hardware, Limited, capital, $50,000, head office, Lachine, Quebec, plans to carry on a general business in hardware, plumbers' supplies and building materials.

The Office Furniture and Supplies Company, Limited, capital, $100,000, head office, Brockville, Ont., plans to manufacture and deal in furniture made of steel and wood.

CLOSES ON SATURDAY AFTERNOONS

The Stevens Hepner Co., of Port Elgin, Ont., has made the following announcement:

"We have decided to close on Saturday afternoons until October first. During the winter months we will discontinue the half holiday and will run nine hours per day. An increase of 10% on the rates per hour and on piece work rates will be made, so that employees will make approximately the same amount in a week of 55 hours as they formerly made in 60 hours."

New C.M.A. President to be Montreal Man

T. P. Howard, of the Phoenix Bridge and Iron Works, Montreal, is, it is indicated, slated for the presidency of the Canadian Manufacturers' Association. The annual meeting is to be held shortly, and, in accordance with the custom followed heretofore by this Association, the vice-president, which office Mr. Howard now fills, will be elected to the higher honor.

Mr. Howard is considered one of the industrial leaders of Montreal, and the appointment will, it is thought, have the approval of all manufacturers.

Among other important considerations taken up at the meeting of the executive, held in Montreal last week, the question of appointing a committee to represent the Association of Montreal on the proposed technical council, received favorable discussion. The object is to promote technical education, and a representative was appointed to represent the Association at a subsequent meeting called to consider compulsory education. Preparation was also discussed relative to the reception of the Royal Commission, which will, later in the month, go there to study industrial conditions.

An additional important consideration taken up, was that of steamship service between Montreal and Europe and between this port and Australia.

Marshall, Son & Bunney Opening in Toronto

Marshall, Son & Bunney, successors to Geo. A. Marshall & Co., have taken over the former premises of the Canada Hardware Co., at 39 Richmond St. E., Toronto, and will conduct a business as importers in steel, tool steel, alloy steel, files, drills, axles, springs, vises, saws, wickless and brazier lamps and auto accessories. It is the intention of the company to deal entirely in British goods, and a complete stock of the foregoing lines will be carried. Members of the company will call on manufacturers, wholesalers and retailers in all parts of Canada. In an interview with HARDWARE AND METAL, Mr. Geo. A. Marshall stated that the company will confine their lines to those of British manufacturers, and have made arrangements with the latter firms to adopt Canadian patterns. Geo. A. Marshall has been connected with the steel and cutlery trade for nearly 30 years, and has a wide connection both in England and throughout Canada. Mr. Marshall is also head of the Perfection Sanitary Brush Co., of Toronto. Reginald Marshall, son of Geo. A. Marshall, has just returned after serving for three years as a captain in the R.A.F. Mr. Marshall, Jr., was formerly associated with his father, Geo. A. Marshall, in Toronto. Walter E. Bunney has been connected with a Sheffield steel manufacturer, Jones, Colver, Ltd., Sheffield, Eng., for 21 years, latterly as general manager of W. D. Beesley & Co., a Sheffield subsidiary firm and a manufacturer of cold roll strip and wire of all kinds. Both Mr. Marshall and Mr. Bunney have spent considerable time, during the past few months, with the English houses which are to be represented by the new company in Canada. The following firms will be represented: Wm. Atkins & Co., Ltd., Sheffield; J. Brockhouse & Co., Ltd., West Bromwich, England; Howie & Burley, Ltd., Birmingham, England; C. & J. Hampton, Ltd., Sheffield, England; W. Gilbertson & Co., Ltd., Swansea; Joseph Evans & Sons, Ltd., Sheffield, England.

Tribute to Francis Glidden; "Northern Chesterfield"

In its April issue, the Palm Beach, Fla., "Post" pays a tribute to one of the best loved characters ever identified with this trade. It says:

"A very familiar face, always wearing that genial smile that makes everyone his friend, seen almost daily along Clematis avenue, in his wheel chair, or his motor car, is that of Francis H. Glidden, of Cleveland, the founder of the great varnish manufacturing business that has made the Glidden name so widely known. Mr. Glidden laid the foundation of that business early in 1875 when quite a young man, leaving his native state of Maine in January, 1870.

"Mr. Glidden's sons, who have always been associated with him in the business, also have their winter homes in Palm Beach, and although the crowds have gone 'the Glidden Colony' will not leave until about May 1, as we are having the most delightful weather of the season now.

"The Gliddens have many friends here. Mr. Glidden is a typical 'gentleman of the old school' and his dignified and courteous affability has won him many admirers. Mr. Glidden retired from active business two years ago at the age of 85 years, having earned the sobriquet of 'dean of the trade' and 'the grand old man of the varnish business.' He has our heartiest good wishes for many more years in which to enjoy the fruits of his labors."

C. F. HENLEY COMING BACK

C. F. Henley, who formerly travelled in Northern Manitoba and Saskatchewan for Plewes, Ltd., passed through Winnipeg last week. Mr. Henley was at the front, and was wounded very severely, in fact it was thought at one time that he would not recover. However, he made progress, and later made one trip for Plewes, Ltd., but was called back by the military to administer the Military Service Act in Alberta. He is still with the Government, but will shortly be back on the road again.

Export May Develop For Cordage

Asked as to the prospects for business abroad in binder twine, cordage, etc., W. A. C. Hamilton, of the Consumers' Cordage Co., Ltd., Montreal, said:

"We have had many enquiries from sources abroad in recent weeks. These have been mostly in the nature of enquiries for quotations, but we hope that there will be some business later as a result of the enquiry."

Mr. Hamilton said that it was not possible at the present time to make quotations except for immediate or near delivery. "Labor unrest makes this impossible," he said, "and new demands are being made practically all the time, so that the manufacturer could not extend his terms and prices indefinitely."

Replying to HARDWARE AND METAL'S question as to the probable permanancy of any trade that might be secured abroad, Mr. Hamilton said that there was reason to hope that a permanent business would be secured in some parts of Europe.

"We are as near the raw products as many of the European countries," continued Mr. Hamilton, "and should be in a position to ship the manufactured material there. Recently an order came from Roumania for binder twine, and this was distributed among various makers. There should be business for both binder twine and other cordage. Many of the countries there will not be in a position now to work along regular lines, and in the meantime some business should be forthcoming."

In the past, Mr. Hamilton pointed out that some export business had been done with Scandinavia. There was reason to hope that there would be a much larger expansion abroad for all lines, however.

Boston Berry Bros., Inc., Ordered to Desist

Under recent date a despatch from Washington indicates that the Federal Trade Commission has found that it recently erroneously served Berry Brothers, the well-known Detroit concern, in proceedings intended against a Boston concern, Berry Bros., Inc., distributors of varnishes and like products, and Evert W. Hinckley, its manager, who now have been ordered to cease and desist from giving money or gratuities such as liquor, entertainment, cigars, valuable presents and the like, to employees of the Detroit concern's customers or prospective customers of its competitors' customers or prospective customers, to influence the purchase of supplies.

At the same time, the Commission dismissed its proceedings against William H. Kennedy, former salesman of the concern, having found he did not use the practices complained of during 1918, as charged.

The commission found that the Boston concern and Hinckley during 1918 secretly paid money to Harry C. Ayers, foreman finisher employed by Estes & Sons, Hancock, Mass., and to George M. Crooker, foreman finisher of the Maine Mfg. Co., Nashua, N.H., as an inducement to them to influence their employers to purchase their products or to refrain from dealing with their competitors.

Adopt Life Insurance Plan for Employees

THE AutoStrop Safety Razor Co., Toronto, has just adopted a plan which has for its object the insuring of every one in the employ of the company.

Under this system, as explained by C. S. Stampleman, the general manager of the Canadian branch, the AutoStrop Company undertakes to insure the life of each member of its staff and to pay all premiums in connection with such insurance.

The policies are graded in amounts from $500 to $2,500, the value of each policy agreeing proportionately with the length of time spent by the recipient in the service of the company. Each employee is permitted to choose his or her beneficiary and thereafter all responsibility in relation to the various policies is assumed by the Company.

When an employee of the office or factory has been with the company three months, a policy for $500 is taken out and each succeeding year an additional $100 is added to the face value of the policy until the amount reaches $1,000.

A preferred plan covering departmental heads and travelling salesmen is issued, the initial policy being for $1,250, and each year an addition of $250 being made to the policy until the face value reaches $2,500.

Should an employee leave at the end of the year or at any time, he is given the option of carrying the policy in his own name if he wishes; otherwise policy is just cancelled. The company have adopted the 8-hour day.

W. W. Page Passes On

Wallace Welton Page, who for the past several years has been secretary and sales and advertising manager of the Geneva Cutlery Corporation, Geneva, N. Y., died at his home in Geneva on on Tuseday, April 29, after a brief illness at the age of 38.

Previous to his connection with the Geneva Cutlery Corporation, he was with the H. O. Company of Buffalo, N.Y., E. Kirstein & Sons' Optical House of Rochester and the Standard Optical Company of Geneva.

On February 1, 1916, he became affiliated with the Geneva Cutlery Corporation, as secretary and director, and immediately took up the duties of sales and Advertising Manager of that organization.

At the time of his death, in addition to his activities in connection with the Cutlery Corporation, Mr. Page was president of the National Wire Wheel Works, president of the Goodwin Press and a principal owner and officer of a large New York Export Corporation, and the director or principal owner of several other extensive corporations.

Mr. Page was widely known and made fast friends among hundreds of men during his business career. He leave a widow and five brothers and sisters.

Opening Sales Office About June 15

L. M. Cochrane, who has been associated with the Northern Electric Company, Limited, in Calgary and Winnipeg for the past eight years, has resigned his position of district sales manager of the Winnipeg district, to enter into business for himself.

Mr. Cochrane is opening a sales office in Winnipeg, which will be his headquarters, and will represent manufacturers of electrical and automobile accessory products. He will cover the Western territory from Port Arthur and Fort William to the Pacific Coast, and will work with jobbers and distributors exclusively.

Mr. Cochrane is visiting manufacturers in Eastern Canada and the United States completing arrangements in connection with his business, and expects to open his office about June 15.

Resigns as President Du Pont Company

An announcement has been made by the executive board of the E. I. du Pont de Nemours Company, that Pierre S. du Pont had resigned from the presidency of the company. Irenee S. du Pont, chairman of the executive committee, succeeds him as president, and Pierre S. du Pont becomes president of the board of directors.

These changes were to become effective May 1. It was said at the du Pont offices that these changes were made in order to meet the new business conditions consequent upon the ending of the world war.

Sons Return From Overseas

Chas. N. Haldenby, president of Sanderson Pearcy & Co., Ltd., is rejoicing over the safe return this week of his two eldest sons from the war.

Capt. E. W. Haldenby, M.C., has served continuously for three years as adjutant of the 15th Battalion and Lt. R. E. Haldenby, M.C., has also served two years with the same battalion.

Mr. Haldenby's youngest son, Norman, also served for two years in France with the 69th Battery, was wounded and returned home recently.

Friends are congratulating Mr. Haldenby on his fighting family of boys and their safe return

To Hold Back on Stove Export Trade

Canadian stove manufacturers will not, as an organization, continue their efforts to secure export business in Europe. A. M. Smith, of the McClary Mfg. Co., London, Ont., who went overseas some weeks ago to size up the situation and the prospects for business, has returned, and, at a meeting of the stove manufacturers, held in Toronto, gave a full report on conditions. It was stated to HARDWARE AND METAL that as a result of the information given them by Mr. Smith the manufacturers do not feel justified in any further expenditures to get business in France, England, or other European countries. Mr. Smith's report will be issued in full shortly, it is stated, and will be mailed to Canadian stove firms.

A. C. Jones Goes to Hamilton

On the occasion of his leaving for Hamilton, A. C. Jones, who for the past 6½ years has been in charge of the pricing and costing department with the Aikenhead Hardware Ltd., Toronto, was presented with a solid gold watch. T. E. Aikenhead, president of Aikenhead Hardware Ltd., on behalf of the directors and the staff made the presentation. Mr. Aikenhead wished Mr. Jones every success in his new venture and assured him that he was leaving a host of friends behind in the associates he had had for so many years.

Mr. Jones goes to Hamilton as sales manager of the Allith Manufacturing Co. of that city and will assume his new duties on Monday, May 12.

Tiling Department Active

The James Walker Hardware Co., Ltd., Montreal, is finding business very encouraging in a retail way. "Our tiling department is especially busy," said Max Hill, the manager to HARDWARE AND METAL. "We now have forty-three men engaged in this work and the outlook is very good."

In the matter of collections, Mr. Hill stated that these might be better. It meant hard work to keep these up to standard, and it was rather difficult to get accounts paid as they should be. Close, constant application was essential, and by being ever on the trail of delinquents it was possible to overtake outstandings far better than if one permitted any easing of effort.

Mr. Hill feels that there will be a fairly good business this summer, and in some departments this will be particularly good. The auto accessory department has been doing a splendid business," he concluded.

Paper Manufacturer Bereaved

The many friends of J. H. McComb, wholesale building papers, Montreal, will sympathize with him in the loss of his wife, who passed away in that city on May 1. Mrs. McComb had been suffering for many months and the end was not unexpected. The funeral was held on Saturday afternoon, May 3.

D. A. MacNab Located At Brockville, Ont.

D. A. MacNab, president of the Ontario Retail Hardware and Stove Dealers' Association, who was for many years engaged in the hardware business at Orillia with his brother, has purchased a hardware business at Brockville, Ont., and is now rearranging stock fixtures, etc.

Conditions Improving

E. B. Plewes, head of Plewes, Ltd., Winnipeg, returned last week from one of his trips in the country, and stated that he found business almost as good as it was on the same trip a year ago. He says there is lots of evidence that if conditions are good as regards the crop this year, there will be an enormous demand for hardware. He quoted one hardware dealer who stated that when he saw that the crop was going to be right, he would stock up heavy, but not until then. The dealers are still holding back, and yet it looks from the above as though conditions are improving.

English Garden Tools Arriving

Alexander Gibb, representing some of the English manufacturers, states that quantities of English tools are coming to hand now. Many of these are garden tools, large quantities of which were sold through the Canadian trade before the war. Orders being filled now, Mr. Gibb said, are those which have been in the hands of British firms for some time, some of them being taken in 1917.

NOW CONCRETE AUTOMOBILES

A recent despatch from London, Eng., announces that an English manufacturing company is preparing to put on the market an automobile that can be retailed for $250, certainly for not more than $300. Scarcely any wood will be used in the construction of the car, the principal material being a new substance which is described as "a kind of concrete, light, but strong and durable, produced from waste material, such as slag, clinkers and sawdust, and covered with a metal solution."

The process of manufacture is another innovation in England. All parts, including wheels and chassis, will be stamped out, each complete in one piece, and then fitted together.

Heaton's Industrial Agency announce that the Hauck Mfg. Company of Brooklyn, N.Y., have completed arrangements for taking over a plant at Port Hope, Ont., and they will commence on May 15 manufacturing oil-burning torches and appliances.

W. H. BANFIELD & SONS, LTD.

The catalogue of lighting fixtures previously mentioned in HARDWARE AND METAL has been printed in French. Readers of HARDWARE AND METAL who are interested may obtain copies upon request.

RETAIL MERCHANDISING

The University of Manitoba has published a book entitled "Retail Merchandising," which covers the short course in merchandising held at the University in Winnipeg, February 4 to 9, 1918. The book contains information as to organization, selling, cash, credits, collections, turnover, figuring profits and many other details incident to the successful operation of the retail store. Copies, for which a nominal charge is made, can be secured by writing the University of Manitoba, Winnipeg.

Payment of Freight Plans Finally Worked Out

THE plan of the Canadian railways to go on a cash basis will become effective on June 1. As stated in previous issues of HARDWARE AND METAL, the railways planned to do this on March 1, but the manufacturers and many of the large firms made such strenuous objections to the clause in reference to bonding, that it was postponed. As a result of conferences between members of the Canadian Railway War Board, the railways and the shippers, an understanding has been arrived at by which the objectionable bonding clause has been eliminated. This, it is stated to HARDWARE AND METAL, would have made the whole plan unworkable.

The clauses as they now stand are practically an adoption of the plan that has been in use by the Canadian Pacific Railway, and, it is stated, are entirely satisfactory to shippers throughout the country.

Payment within 48 hours, it is stated, will be considered as cash.

Charges on goods shipped from the 1st to the 7th of any month, inclusive, shall be paid on or before the 14th of the same month; charges on goods shipped between the 8th and 14th of any month, inclusive, shall be paid before the last day of that month, and charges on goods shipped between the 22nd and the last day of any month shall be duly paid before the 7th day of the month following.

THE CLERKS DEPARTMENT

Diverts Golden Stream to Confreres

Romance of Science is Story of Dr. Frederick G. Cottrell, Chief Metallurgist, U.S. Bureau of Mines, in His Development of Helium and Supply of Potash—Money Pouring in to Benefit Struggling Scientists

By ALBERT WHITING FOX, in the New York *Sun*

THERE is a man working for a modest Government compensation who to-morrow could command a salary which would make the earnings of a popular movie star look like pin money. He could announce his readiness to give his services exclusively to one concern and have the directors of American steel companies, copper companies, zinc companies, etc., hurrying here ready to outbid each other in big round, substantial figures.

Dr. Frederick G. Cottrell, chief metallurgist of the Bureau of Mines, is the man in question. The story of his career, the results he has achieved and is achieving and the rapidly accumulating benefits which the nation is getting from his work form a striking romance of science.

A little more than ten years ago Dr. Cottrell was a poorly paid, struggling assistant professor of chemistry in the University of California. Now he has saved big plants in the country literally millons of dollars, has found a means of giving the United States a potash supply independent of Germany, has been responsible largely for the development of the non-inflammable gas helium of inestimable military and commercial value, and stands out as such an undisputed leader in his line that he was awarded the Perkin medal for 1919 by the Society of Chemical Industry "in recognition of his most original and valuable work in applied chemistry."

Diverts Golden Stream

Only in the matter of financial recompense has Dr. Cottrell remained backward. He has consistently refused all offers to make a fortune out of his work, and when money began to pour in upon him in spite of himself he promptly got his friends together, formed what is known as the "research corporation," turned the financial stream into the corporation with the provision that the funds were to be used to assist struggling scientists whose hardships he already knew. An ironclad agreement has been made that all profits from his work go to the corporation and not to Mr. Cottrell himself.

No one would imagine from his manner or appearance that Dr. Cottrell had already risen to the top rank among the scientists of the world. There is nothing about him to suggest the popular conception of the great scientist. He looks like the typical wide awake American business man of 40, who has no fads and believes in the free and easy unconventional way of meeting men with whom he comes in contact.

After luncheon with him at the club one might say that his particular interest was in how to care properly for an automobile or in billiards. At present Dr. Cottrell is making a flying trip to Europe in connection with helium developments.

The first big contribution of Dr. Cottrell to science was the electric precipitation of particles of liquids and solids, or, in popular terms, the elimination of smoke and rescue of smoke constituents by a process of electricity. Undertaken first to eliminate smoke as a nuisance, the process showed that the so-called smoke dust precipitated at big plants was worth in some cases more than the product being manufactured.

It was in 1906 while he was working as assistant professor of chemistry at the University of California that the idea first came to Dr. Cottrell. California at that time was much annoyed over fumes from smelters. There were examples of it close to the university. The fumes were admittedly necessary to the running of the smelters, but were a nuisance to every one within their radius. There was continued talk about it, but no one suggested a possible remedy, excepting to remove the smelters.

Springs His Surprise

Dr. Cottrell said little, but it was noticed that he began spending all his spare time in the laboratory. He worked whenever he got a chance during the day and far into the night. Finally he surprised his friends at the university by telling them that he had discovered an "electrical precipitation process" which would do away with the smoke.

In a general way his idea was to remove the suspended particles from the gases by the aid of electrical discharges. His process was to operate by passing the gases, carrying the suspended, finely divided particles, between two systems of electrodes, one of which was made to carry a negative electrical charge while the other carried a positive charge.

The electrodes were to be charged by being connected with a source of high voltage electricity, consisting of a high voltage transformer for increasing the electric potential up to a working voltage of from 20,000 to 100,000 volts. A rectifier for changing alternating current into direct current and a switchboard were to provide the necessary control equipment. Dr. Cottrell figured that the suspended particles while passing between the electrodes would become electrically charged and would be driven into pipes by the forces of the electric field.

The professors at the university believed in Cottrell and were interested in his announcement, although they all agreed that nothing could be done with it without money.

Cottrell had no money. He was distinctly "hard up" in those days, but he was certain he could eliminate the smoke nuisance if given a chance. He obtained the personal and financial assistance finally of Prof Edmond O'Neill, of the chemistry department and Dr. Harry East Miller and E. S. Heller, both alumni of the university. This put him in a position where he could attempt to get some of the smelting companies interested, but his efforts along this line were either not taken seriously or were ridiculed.

"There's a smoke bug up in the university," was the only comment heard which even indicated to Dr. Cottrell that his presence was known by the men running smelters. Strangely enough this "smoke bug" was to play an all important part in the developments of the future.

It happened that the Riverdale Portland Cement Company, near Riverdale, Cal., was having all manner of trouble with the orange growers in the vicinity. Dust blown out of the stacks from the rotary kilns was settling in the buds and killing the crops. The orange growers had taken the matter into the courts and were spending hundreds of thousands of dollars in pressing and winning their cases.

The company bought up the land at $1,000 an acre and then found it could not stand the pace. More than $1,000,000 had already been spent by the company in litigation and still there were no relief in sight. The directors were desperate. In the course of one meeting somebody repeated the story about the "smoke bug" at the university and the directors said, "Bring him to us."

Dr. Cottrell went to the company's plant and installed his process. It worked like a charm. His process did away with the smoke and collected approximately 100 tons of dust per day. His presence at the plant gave him an opportunity to get acquainted with the men running the business. They found him interesting and full of suggestions designed to help them.

The mill had a capacity of 5,000 barrels of cement a day and business was good, but Dr. Cottrell told them they might find it profitable to examine the smoke dust, which was coming in at the rate of 100 tons a day. He figured that there might be profitable potash values contained in this dust. The company took his advice and investigated. Now the Portland Cement Company is manufacturing chiefly potash, obtained from the smoke dust by the Cottrell process, and is only making cement as a by-product. A new and profitable means of getting potash had been discovered.

A recent statement issued by the Bureau of Mines here bears on this

phase of Dr. Cottrell's work. It is as follows:

"In the attempts of the United States to find some methods of increasing the potash production for fertilizers and other purposes to offset the stoppage of shipments from Germany there has come to the attention of the Bureau of Mines, Department of the Interior, a highly successful effort at the plant of the Riverdale Cement Company, Riverdale, Cal.

"This company, after a number of years of costly litigation with the orange growers in the territory adjacent to the plant, because the mill discharged large quantities of dust that fell on the groves, installed a Cottrell electric precipitator with the sole hope of abating the nuisance.

"Word now reaches the Bureau of Mines that the factory of this cement company on March 1 went into full blast operation for the purpose of making potash, with cement as a by-product. The investigator who reported many details of this operation of the plant to the bureau says:

"'This is certainly a romantic development of modern industry, where an apparatus installed for the purpose of saving the life of the factory turns out to be the centre of operations, around which the entire plant is adjusted, the incidental profits being sufficient, at least during the continuance of the war, to make the former operation of the factory of secondary importance.'"

But if one plant can make potash in this way, why not other plants? the Bureau of Mines asked. How about blast furnaces, the smelting plants, where the dust contains potash as it does in most cases?

Promises Plenty of Potash

The United States Government now feels assured that by means of Dr. Cottrell's discovery America will have more than enough potash for its own needs without depending on Germany or any other outside source. In a statement issued on October 3 last, Secretary of the Interior Lane said definitely:

"The United States does not need German potash. America can in two years become entirely independent of Germany in this regard by the development of her own deposits and the use of processes devised by Dr. Cottrell of this department."

Among the plants already using the Cottrell processes are the American Smelting and Refining Companies at Garfield, Utah; Maurer, N.J.; Omaha, Neb.; the American Steel and Wire Company at Worcester, Mass.; the Anaconda Copper Mining Company at Anaconda, Mont.; the Balbach Smelting and Refining Company at Newark, N. J.; the Minnesota Steel Company at Duluth, Minn.; the Raritan Copper Works at Perth Amboy, N. J.; the Rome Brass and Copper Company at Rome, N. Y.; the Winchester Repeating Arms Company at New Haven, Conn., and others too numerous to mention.

The assets of the research corporation, of which men like Charles D. Walcott, secretary of the Smithsonian Institution, and Otto H. Kahn are directors, jumped to $217,862.72 from royalties on Dr. Cottrell's invention as soon as it got fairly started. More money is coming in than the corporation knows what to do with, but Dr. Cottrell is convinced that new scientific discoveries can be helped along by financial assistance from discoveries already made. That is his slogan.

Development of Helium

Other important work has been done by Dr. Cottrell, but the value of the right man in the right place has been particularly emphasized by the development of the new non-inflammable gas helium.

The idea of using helium in balloons, dirigibles, etc., is that it has practically the same lifting power as hydrogen, but unlike hydrogen cannot be set afire. It makes the balloon and dirigible safe against explosive bullets. It is the airship's defence against the incendiary bullet just as armor was the defence of the old wooden ships against cannon.

CHARLES O. MORRIS

President St. John, N.B. Clark's Association

The military authorities dread to think what would have happened if the Germans had had helium instead of hydrogen in their Zeppelins during the London and Paris raids.

It was during one of the Zeppelin raids over London that the first move toward developing helium started. An old British scientist fell to thinking what would happen if the Zeppelin could not be set afire. He remembered having put away an old report made some ten years ago by a Prof. Cady of the Universtiy of Kansas, which claimed that helium could be found in the ground in Oklahoma and Texas. He got the report out and sent it to the Admiralty.

The British experts decided that if there was one chance in a thousand to get anything of that sort it was worth taking, so they communicated with the Government of the United States and sent experts over. The experts were referred to the Bureau of Bines, and Director Manning of the bureau in turn referred them to Dr. Cottrell. Then things began to happen.

Dr. Cottrell Gets Busy

Dr. Cottrell brushed aside all sceptical suggestions as to why the plan would not work. "We are not here to find out why it won't work, but to make it work," he said, and forthwith he started setting the wheels in motion.

It is not easy to cut red tape and get action out of the executive departments in Washington. In this case the War Department and the Navy Department, as well as the Bureau of Mines, were concerned. It was necessary to keep these three branches working and it was necessary to get money from Congress without telling Congress what the funds were needed for, as it was a deep war secret.

The theory advanced for the quantity production of helium seemed to Dr. Cottrell sound. In a general way it consisted of a process similar to liquefaction of air, everything except helium was to be liquefied out, which was possible because it required 268 degrees centigrade below zero to liquefy helium, and other gases went out before that was reached. To Dr. Cottrell there seemed no difficulty in the practical application which could not be surmounter, excepting the danger of not getting red tape cut and delay and inactivity done away with.

He set out to force action and haunted the offices in question until he became the "helium bug," which reminded him of his former "smoke bug" title. But he kept after results and managed to cut enough red tape to get things started.

As for getting money from Congress the Bureau of Mines began to plead for an appropriation for important experiments in "argon," this being the camouflage name for helium. Congress did not know what was going to be done with argon, but Dr. Cottrell saw some of the Congressmen and the money was forthcoming. Now helium is being produced in quantity at two big texas plants in Texas.

Stockdale Subjects at Western Conventions

Regina, Sask., May 8 (Special).—Frank Stockdale's lectures will be one of the outstanding features of the annual conventions of the Saskatchewan and Alberta branches of the Retail Merchants' Association to be held in Regina for Saskatchewan, May 13, 14 and 15, and at Medicine Hat for Alberta, June 3, 4 and 5. The greatest interest attaching to his special series of instructive lectures may be gauged from the following partial list of points covered in his programme under the various subjects:

"Meeting To-day's Competition": What to-day's competition is; The methods your competitors use; The things you must do to meet them.

"Some After-the-War Problems": Buying the goods—the plan; Selling the goods—the method; Pricing the goods—the profit; Holding down expenses.

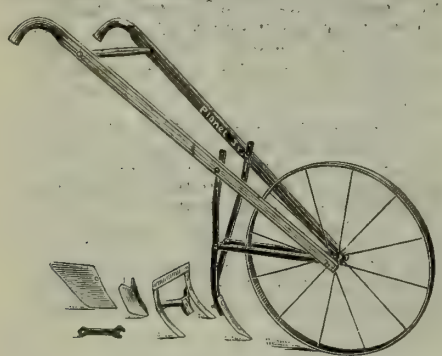
"Opportunities in Retail Advertising"; What advertising is; How it protects your trade territory; The advertising of your competitors.

"Protecting the Home Town Front"; Your town and you—and your store; When the trade leaves town; When brains, energy, and youth leave town; Things that make towns grow and prosper.

"Salespeople of To-day and To-morrow": Changing "lookers" to "buyers"; Salespeople and store-waiters; Suggestive selling; Selling service and satisfaction.

Frank Stockdale has spent the last five years in the field investigating retail merchants and retail stores of every kind and size. Before that he was engaged in the retail business himself. His talks are boiled-down reports of his experiences and his investigations.

He is a "clearing house" for better business ideas for he is in touch with what retailers are thinking and doing.



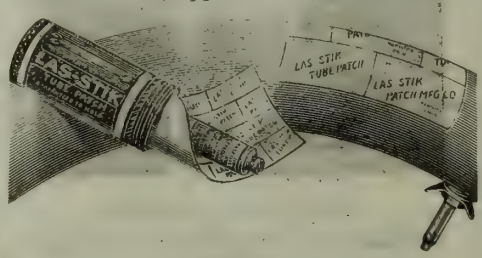
Every merchant in Saskatchewan and Alberta who can possibly do so should unhesitatingly attend these conventions.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

PLOW AND CULTIVATOR

S. L. Allen & Co., Inc., Fifth Street and Glenwood Ave., Philadelphia, have added to their "Planet Jr." family a garden plow and cultivator. The wheel, it is stated, is 24 inches in diameter with a rim 1½ inches wide, insuring, it is claimed, easy running in the lightest soil. The equipment, it is stated, is so complete that it will meet all the needs of the ordinary garden, where the adjustments and refinements of the higher priced wheel hoes are not required. The wide cultivator tooth, it is stated, may be used for opening furrows, for cultivating and hilling between rows of plants, while the plow may be used for preparing the ground in the spring, going twice in each furrow. Later, it is stated, it will open furrows for fertilizer or for planting, cover them, or plow to and from the crop during the season.



Garden Plow and Cultivator

The three prong cultivator teeth, it is stated, are made of steel and specially hardened, will break up the soil deep or shallow and give excellent and thorough cultivation. The centre tooth of the three prong, it is stated, may be uesed alone or separately for extra deep work. The scuffle blade, it is claimed, is just the thing for weed cutting and shallow cultivation, as it leaves a fine mulch which prevents rapid loss of moisture by evaporation. The tool, it is claimed, while light, is very strong and the handles are adjustable for height to suit either adult or child.

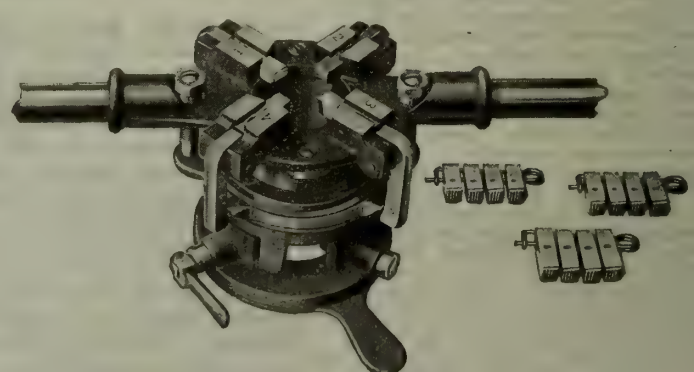
TUBE PATCH

Las-Stik tube patch, manufactured by the Las-Stik Patch Mfg. Co., of Hamilton, Ont., makes a permanent patch, it is stated, on a small puncture or a large blowout on tubes without vulcanizing, which will stretch with the tube upon inflation. It is an all white, self-vulcanizing sheet rubber patch, it is stated, and the claim is made that it will save seventy-five per cent. on tube repairing, that it can be applied in about five minutes' time by anyone, and at any place. Las-Stik, it is stated, is a cold patch, no heat or tools being required, and can be used immediately as the pressure and heat from the casing in action does the work. It is claimed that with Las-Stik it costs only one cent to repair a nail hole. It is manufactured under an entirely new process, which gives it the required strength to resist the highest air pressure, hottest roads and hardest service.

Las-Stik Tube Patch

PIPE THREADER

In working out the design of the new receding pipe threader, which has recently been added to the line of tools manufactured by the Greenfield Tap & Die Corporation, Greenfield, Mass., two special advantages are claimed for it—one, the quick release o fthe chasers at the end of the cut, the other, the quick resetting to cutting size.



In operation the tool is wound onto the pipe until a thread of the desired length has been cut, after which the threader may be pulled straight off. It is stated that this tool "leads" on easily and that the action of the tool becomes freer as it is advanced onto the work.

No unwinding is necessary to return the threader to its original cutting position. To accomplish this result it is merely necessary to release the lead screw, lift the head, reset the trigger and begin another cut. It will be apparent that none but the actual cutting teeth of this threader follow around the threads.

The chasers are narrow and they travel along the pipe parallel to the thread they are cutting and not parallel to the axis of the pipe, the claim being made that this condition of operation reduces considerable friction. The chasers are interchangeable and made in such a way tht it is possible to replace a single chaser in case of breakage. Under such conditions, the replaced chaser will follow or "track" uniformly with the balance of the set, making it unnecessary to buy an entire new set of chasers when one becomes unfit for further use.

At the beginning of the operation, the chasers, it is stated, cut a full depth thread, and as the work progresses the levers which support the chasers gradually change their position, permitting the chasers to recede until they have finally backed completely away from the pipe. Then the threader can be pulled straight off the pipe, avoiding loss of time in unwinding. A single turn of either of three conveniently placed lugs disengages the lead screw, it is stated, so that the head may be pulled back to its original position and reset at that point.

The threader is regularly furnished with one set of narrow chasers for each pipe size, Briggs standard right-hand threads being furnished unless otherwise specified. Chasers for cutting British (Whitworth) standard threads may be furnished to order.

Receding Pipe Threader

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

REVISIONS have occurred in many fall lines such as stove pipe, stove pipe elbows, stove boards, coal hods, stove pipe thimbles and kindred lines. The present basis of quoting these lines provides for substantial declines and orders are now being solicited for fall delivery on the reduced basis. One coat enamelware RK has declined 10 per cent. this week according to new discounts just issued.

Linseed oil is again to the fore this week in an advance of 5c per gallon. The situation in regard to Argentine seed shows no improvement and supplies are not coming through yet. Whether they will is now becoming doubtful according to some factors and the failure of Argentine seed to reach this continent will tend to stabilize prices here around their present level at least for some time to come. Crushers report activity manifest in sales.

Turpentine has registered a 2c per gallon advance this week. The markets in the South are surprising in the strength shown, the reasons given being the marked reduction in tankage and slowness in determining what new supplies may be expected from present crop out-turn. There has been a scarcity of supplies here though no one is suffering on this account as far as can be learned. Shipments rolling will overcome this temporary shortage, however.

Flashlights and renewal batteries have come in for revision downward this week, the new list prices showing a general decline approximating 15 per cent. There has been no change made in the discounts. Dash churns have registered an advance, whereas machine screws are again on the downward trend according to discounts just issued.

A revision upward has occurred in combination anvils and vises, some lines of pliers and japanned lawn rakes. Dry mortar stain is also higher, whereas declines are noted in lamp burners, malleable fittings and soldering coppers. Business is reported very good and jobbers are well pleased with volume of orders being shipped out.

MONTREAL MARKETS

MONTREAL, May 8—In the matter of price changes, lumbering tools and tool handles have advanced in price. This is the only actual advance. An increase in the price of stoves will not come as a surprise, for labor outlays to the moulders have been heavier and the makers claim that prices must go higher. Declines are effective on brass screws, both flat and round head, and rope clips are down about 5 per cent. Various wares, such as stove boards, fire shovels, stove pipe, elbows, coal hods, etc., are reduced through a change of discount. Galvanized and black sheets are on a lower price basis. Various grades of solder are lower in price to the extent of three cents per pound. The ingot markets are quiet, but unchanged.

Notwithstanding the fact that conditions of weather are somewhat unseasonable, resulting in a curtailed sale of gardening tools and some other early spring lines, there is much activity in hardware jobbing circles, and what is better, a confident feeling.

Brass Screws Less; Builders' Hardware

Montreal

SCREWS, BUILDERS' HARDWARE.—Lower prices are effective for round and flat head brass screws. The discount on round head is now 45 per cent., and that on flat head 47½ per cent. Builders' hardware of P. & F. Corbin make is being revised in price, and an average decline of about 10 per cent is expected to be arranged through these changes.

Lumber Tools Up; Rope Clips Down

Montreal

LUMBER TOOLS, ROPE CLIPS.—Advanced prices are effective for lumbering tools of Pink's make. The discount has been revised from 35% and 5% on tools to 30%, and that on handles is now 35% and 10%. Increase for labor are assigned the reason for this advance.

Rope clips, now in heavy demand by the boats, are down about 5 per cent. The new prices are as follows: Galvanized, ¼-inch, 72c per dozen; japanned, 60c; 5-16-inch galvanized, 80c; ⅜-inch galvanized, 95c; black, 75c; ½-inch, $1.40-$1.10; ⅝-inch, $1.95-$1.50; ¾-inch, $3-$2.25; ⅞-inch, $4-$3.10; 1-inch, $4.80-$3.60.

Stoves To Go Up; Wares Are Down

Montreal.

STOVES, WARES.—There is every indication that higher prices will become effective for stoves, said a large manufacturer to HARDWARE AND METAL this week. He clearly indicated that there would be no lower prices and that there would be higher quotations sooner than it was thought possible a while ago. Various wares are on a revised basis. This change applies to some lines of fall goods which were not changed recently when the various other wares were changed. The lines affected and the new basis follows: Stove boards, paper lined, 40 per cent. and 5 per cent. from list; wood lined, 30 per cent. and 5 per cent.; fire shovels, 10 per cent. on list; coal hods, japanned, 25 per cent. on list; galvanized, 40 per cent; stove pipe elbows, black, tin and galvanized, 12½ per cent. on list; patent and regular stove pipe, 33 1-3 per cent. on list stove pipe rings, Crown, 20 per cent. on list; chimney thimbles, 50 per cent. on list.

Prices Holding And Oil Trade Normal

Montreal

OILS AND GASOLINE.—There is little of a new nature in the oil market. There is a fair demand within the city for coal oil, although weather conditions are against an early use of oil cook stoves. Prices remain at 20c to 23c per gallon. Gasoline sales are fairly good, and the price basis for motor grade holds at 34c per gallon.

Nail Tonnage Sold; Fairly Large

Montreal

NAILS AND WIRE.—There is a good healthy demand for nails, indicating that building operations are not altogether dead. The price basis is steadily held at $4.75 per 100 pounds, with the same quotation holding for cut nails. There is a good sale for various kinds of wire, and fencing is in fair demand. Base price for No. 9 smooth wire remains at $5 per 100 pounds.

Selling Active On Iron And Steel Bars

Montreal

IRON AND STEEL.—Jobbers are well pleased with the business coming to hand for iron and steel. It would seem that the country needs are being cared for well and that farmers are getting their tools in shape for the spring work. Changes of any kind are absent this week.

Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75
Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22

Both Kinds Sheets On Lower Basis

Montreal.

SHEETS AND PLATES.—A lower price range is available here this week and the reductions apply to both black sheets and galvanized. There is only a fair movement, but the stocks maintained are not heavy, jobbers, as well as retailers governing their holdings by the probable demand. New prices are given below.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$5 25	$6 25
12 gauge	5 30	6 30
14 gauge	5 35	6 35
16 gauge	5 45	6 50
18-20 gauge	6 00	6 35
22-24 gauge	6 05	6 40
26 gauge	6 10	6 50
28 gauge	6 40	7 00
GALVANIZED SHEETS—		
10¾ oz.	$8 35	$9 25
28 gauge	8 30	8 75
26 gauge	....	8 50
22 and 24 gauge	7 70	8 35
20 gauge	7 50	8 35
18 gauge	7 50	8 35
16 gauge	7 30	8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Solder Down 3 Cents; Traps and Bends Hold

Montreal

LEAD PRODUCTS.—Prices are reduced three cents per pound on solder. This applies to half and half and to other grades, and there is a lower price basis for plumbers' wiping grade, 3c less being quoted. Trade has improved for various lines and there is a better undertone to business for these lines. No further price changes are made.

Lead pipe	0 11½
Lead waste	0 12½
Lead traps and bends	15%
Lead wool, lb.	0 14
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	0 10½
Lead sheets, 4 to 8 lbs, sq. ft.	0 09½
Cut sheets ¾c lb. extra, and cut sheets to size, 1c. lb. extra.	
Solder, guaranteed, lb.	0 33
Solder, strictly, lb.	0 29
Solder, commercial, lb.	0 27
Solder, wiping, lb.	0 25
Solder wire (8 gauge)—	
40-60	0 34
45-55	0 36¾
50-50	0 39¼
Zinc sheets, casks	0 17
Do., broken lots	0 18

When Argument Stops Material Will Move

Montreal

OLD MATERIALS.—It is confidently expected by the old material buyers that once the steel price controversy is settled in the States there will be considerable buying of steel scrap, particularly heavy scrap and melting steel. In the meantime there is really little to report, prices holding without change. Movement accelerated, there would be a better undertone on the various metals.

Dealers' Buying Prices—		
Pipe scrap, ton	9 00	10 00
Stove plate, ton	....	15 00
No. 2 busheling	....	5 00
Old rubbers, boots and shoes	0 06½	0 07
Overshoes, lumbermen's rubber boots	....	0 03½
Bicycle tires	....	0 03
Automobile tires	....	0 03
Yellow brass	....	0 08½
Red brass	0 12	0 12½
Light brass	0 06	0 07
Scrap zinc	....	0 04¾
Heavy copper	0 13	0 13½
Wrought iron, No. 1, per gr. ton	....	11 00
No. 1 machinery cast	....	18 00
Heavy melting steel	....	10 00

Very Quiet Still Are All Ingots

Montreal

INGOTS, METALS.—Local conditions are about as quiet as they have been on the various ingots. Trading is done in small lots, and there are no actual changes of price this week.

COPPER.—No feature has been developed either in the local market or outside and with little demand, price remains at 18c per pound.

TIN.—Interest is being evinced in the tin situation in that speculation is greater as to what the future will bring about. The restrictions may be revised or at least lifted in the States a little later on, and whether this will mean the advance of prices or a decline with heavier buying, is not clear. Local basis still 56c per pound.

LEAD.—This is being quoted lower at New York and there is little movement reported. Prices here are without change of any kind, 6½c per pound being the basis here.

ANTIMONY.—Locally there is an ample stock of this to meet the small demand and which is supplied at 8½c per pound.

SPELTER.—While there is no local change the tendency is weaker in the United States to a limited extent. Price here holds at 8½c per pound.

ALUMINUM.—Small sales are reported and price is still given as 38c per pound.

PIG IRON.—With no change in the general situation price basis is still $45 per ton.

BRIEFS FROM THE WEEK'S MARKETS

Dash churns advanced about 33 1/3 per cent. this week. A "dash" big advance, one might say.

* * * *

Winnipeg quotations on turpentine show an advance of 10c per gallon.

* * * *

Quotations on Winchester and Remington rifles have been revised along with American ammunition.

* * * *

Soldering coppers are being quoted at a base of 42c per pound, a decline. The extras are unchanged.

* * * *

Machine screws show a substantial drop in new discounts issued this week.

* * * *

One-coat enamelware, R. K., is down 10 per cent., being quoted at 50 and 10 per cent. discount from list.

* * * *

Pipe fittings, steam cocks, valves and kindred lines have been revised downward.

* * * *

Flashlight batteries have undergone a revision downward of about 5c each in the list price.

* * * *

Stove pipes and stove pipe elbows are down substantially in new prices issued for fall.

* * * *

Linseed oil advanced 5c per gallon on the Toronto market.

* * * *

Turpentine is also higher, 2c per gallon advance being shown. Supplies are scarce.

TORONTO MARKETS

TORONTO, May 8—Lower prices have been named on stove pipes and stove pipe elbows for fall delivery. Declines have also been registered in machine screws, soldering coppers and one coat enamelware. A drop has also been recorded in flashlights and renewal batters with a slight readjustment of broom prices to lower levels noted. American rifles and ammunition show a slight move upward and dash churns have also followed the upward trend. Business is reported very good and jobbers noted a marked improvement in volume of sales.

Revision in Rifles, Ammunition Necessary

Toronto.

RIFLES AND AMMUNITION.—Prices on Winchester Rifles, owing to the Federal tax in the United States, have had to be revised locally, and these are now invoiced at 7½% advance on the list. American ammunition is being quoted at an advance of 15% on the list. Remington rifles are quoted at an advance on the list of 47½%. The reason given for these changes is as follows: The Federal tax in the United States on rifles for home consumption is 10%. However, the exporters do not have to pay the tax on the goods that go out of the country. However, the Dominion Government has so ruled that the Canadian buyer has to pay the regular duty of 30% on this tax, which amounts to about 3%, and this has to be added to the laid down cost of the merchandise in Canada. Why this action should be taken in view of the fact that the United States Government permits the shipment of these goods free of special taxation has not been determined. By the time the wholesaler and the retailer handle the goods on this increased cost basis, it means that the consumer has to pay probably 5% on what are already high prices for this class of merchandise.

Decline in Stove Pipe and Elbows

Toronto.

STOVE PIPES, ELBOWS.—New prices have just been issued on stove pipes and stove pipe elbows this week. Standard stove pipe is now quoted at list plus 3 1-3%, whereas former price was list plus 75%. The new net prices on the 6 in. standard pipe are $17 per 100 lengths, and 7 in., $18.20. Stove pipe elbows, 6 in., are now being quoted at $2.47 per doz. net, and 7 in. at $2.76; this net price is arrived at from a list plus 12½% basis; the basis of quoting formerly was list plus 25%. New net prices on stove pipe elbows, light, are for the 5 and 6 in., $2 per doz., and 7 in., $2.15; the former comparative prices were $2.30 and $2.50.

Sharp Advance in Dash Churns

Toronto.

DASH CHURNS.—There has been an advance made in dash churns this week, the new prices named showing an upward trend amounting to almost 33 1-3%. At the present basis the five gallon dash churn is quoted at $2.25 each, the seven gallon at $2.45 each, and the ten gallon at $2.70 each.

Soldering Coppers Register Declines

Toronto.

SOLDERING COPPERS.—There has been a further decline this week made in the base price of soldering coppers. The base which has now been established is 42 cents per pound. The usual extras apply without any changes made in same.

Lower Prices on Machine Screws

Toronto.

MACHINE SCREWS—Discounts have again been revised this week on machine screws. The new prices quoted provide for a further decline which follows quite closely at the heels of one made a month or six weeks ago. The present scale of discounts named on cut machine screws are as follows: Flat head and round head steel, 37½ and 10%; oval head and fillister head steel, 30% discount; flat head and round head brass, 30%; oval head and fillister head brass, 15% discount; washer head steel and brass machine screw prices will be quoted on application.

Flashlight Batteries Revised Downward

Toronto.

FLASHLIGHT BATTERIES.—Prices on the Reliable flashlight batteries have been revised downward, and new quotations follow below. It will be noted that with the exception of No. 443, the list has been reduced 5c each. The present lists are: No. 423, 45c; No. 324, 45c; No. 422, 40c; No. 452, 40c; No. 442, 40c; No. 322, 40c; No. 222, 35c; No. 443, 60c each.

Stoves Holding: Some Wares Down

Toronto.

STOVES, WARES.—No new developments are reported during the week in the situation of stoves. Summer lines are moving forward quite freely, and business as it effects the regular stoves and ranges is what might be termed normal for this season of the year. There has been no indication of price changes and there does not seem to be any immediate prospect of a revision taking place.

A decline of 10% has been made in the price of one coat enamelware R K, which is now being quoted to the trade at a discount of 50 and 10%.

Some Fall lines have been revised, notably stove pipes and stove pipe elbows, a notation of which appears elsewhere with these markets. Manufacturers report a fair volume of business coming in, and look forward to more activity in business as the season advances. Altogether the outlook is quite satisfactory.

Broom Prices Show Readjustment

Toronto.

BROOMS.—Some manufacturers report a slight revision in prices of brooms, not a general decline but a readjustment. The new prices established show a slight drop of about 5% in some of the better grades.

Roofing Shows Slight Change

Toronto.

ROOFING.—A slight change in ready roofing has occurred in some quarters, new prices on the Panamoid just named for the 1 ply, $1.60 per square; 2 ply, $1.85; 3 ply, $2.20. Other lines of roofing and building papers are unchanged at declines recently recorded. Business is quiet just at the present time.

Oils, Gasoline Active; Firmly Held

Toronto.

OILS, GASOLINE.—More activity continues to be manifested in sales of lubricating oils and gasoline. Automobile users are now greater consumers, and volume of sales has responded. There has been no price change in oils, whereas gasoline is firm at 33c per gal. Coal oil is moving freely at firmly maintained prices, ranging from 19½c to 22½c per gal., according to grade.

Flashlights, Batteries Revised Downward

Toronto.

FLASHLIGHTS, BATTERIES.—Manufacturers have put into effect a further general change this week on list prices on Eveready flashlights and batteries. It is indicated this is quite a favorable reduction, amounting to about 15 per cent. Discounts will remain as before, the following applying: Less than $50 list, one delivery, 33 1-3 per cent.; $50 list or over, one delivery, 40 per cent. All prices f.o.b. Toronto, and subject to change. List prices on a few lines follow:

Stock Number Article	Stock No. Battery	List Price of Battery	List Price Complete
2602	791	$0 40	$1 70
2606	705	0 60	1 95
2614	711	0 65	2 65
2616	790	0 40	2 40

Iron and Steel Showing Activity

Toronto.

IRON AND STEEL.—A better feeling is apparent among the jobbers as a result of increased business being handled for iron and steel bars. Retailers are buying carefully, but they seem to be buying quite regularly now, which should be a very good sign.

Common bar steel	4 25	4 50
Common bar iron	$4 25	$4 50
Refined iron	4 65	4 90
Angle base	4 50	4 75
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel, No. 10	4 50	4 75
Do., No. 12	4 75	5 00
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 30

Sheets Holding Firm; Selling Well

Toronto.

SHEETS, PLATES.—A firm market seems to be generally in effect on galvanized sheet and black sheets, the basis now established being right in line with to-day's costs. Business is reported brisk also, and the substantial reductions made in prices are considered a factor along with improved conditions generally. The outlook is considered very promising, the placing of many large orders contributing to this feeling of confidence.

BLACK SHEETS.	Per 100 lbs.	
10 gauge	$5 00	$5 45
12 gauge	5 05	5 50
14 gauge	....	5 10
16 gauge	....	5 20
18-20 gauge	5 80	....
22-24 gauge	5 85	....
26 gauge	5 90	....
28 gauge	6 00	....
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 50	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS.		
10¾ oz.	$7 80	$8 10
U.S. 28	7 40	7 70
U.S. 26	7 10	7 40
22 and 24	6 95	7 25
18 and 20	6 80	7 10
16	6 65	6 95
12 and 14	6 50	6 80

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Better Feeling in Corrugated Sheets

Toronto.

CORRUGATED SHEETS. — Manufacturers report a better feeling in the trade noticeable with a resulting improvement in number and size of orders coming to hand. Business is still open to improvement, but this is apparent, and activity is the keynote expected during the next few months. Prices are firm and unchanged as follows:

Corrugated Sheets—	Per 100 sq. ft. Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Wrought Pipe, Boiler Tubes Remain Steady

Toronto.

WROUGHT PIPE, BOILER TUBES.—Steadiness marks the situation in respect to wrought pipe. Sales are showing some improvements and market holds at unchanged prices as shown in current market quotations. Boiler tube supplies are coming along freely and trade is considered very satisfactory. Prices are steady and unchanged as follows:

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	.....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

FALL LINES DOWN

A change has occurred this week in the price of stove pipes, stove pipe elbows, fire shovels, coal hods, stove pipe thimbles and stove boards for fall. New discounts issued provide for a substantial decline from former figures. When the recent change was made in enamelware and tinware about April 1, HARDWARE AND METAL at that time indicated that a change to lower levels on fall lines would very likely follow at an early date when market could be more easily determined.

Nails Moving Fairly Well; Wire

Toronto.

NAILS, WIRE.—There seems to be a fair amount of activity in business on nails. Prices are unchanged, the wire selling at a base of $4.70 per 100 lbs., and cut at a base of $4.75 per 100 lbs. Wire is selling fairly well at base prices recently established. The smooth steel wire base is now $5 per 100 pounds.

Solder Holds; Other Lines Too

Toronto.

LEAD AND ZINC PRODUCTS.—Solder is holding without change and nothing new in the way of price changes is shown in manufactured lead products. Business has eased away somewhat this week, but is considered fair. Range of prices follows:

Lead pipe, lb.		$0 11½
Lead waste pipe, lb.		0 12½
Lead traps and bends		15%
Lead wool, lb.		0 14
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½

Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.

Solder, guaranteed, lb.	0 33	0 38
Solder, strictly, lb.	0 31	0 33
Solder, commercial, lb.	0 28	0 32
Solder, wiping, lb.	0 27½	0 29½
Solder, wire, lb.	0 34	0 40
Zinc sheets, per lb.	....	0 17

"Still Waiting" For Better Times

Toronto.

OLD MATERIALS.—The attitude remains one of waiting, and no new developments are apparent. Until peace is signed and the European situation clarified no improvement from present stagnation of business in the various lines of old materials is looked for. Nominally, prices run as follows:

Dealers' Buying Prices—		
Tea lead	....	0 03
Heavy lead pipe	....	0 04
Pipe scrap	....	8 00
Stove plate, per ton	....	10 00
No. 2 busheling	....	8 00
Yellow brass	....	0 06
Red brass	....	0 08½
Light brass	....	0 05
Scrap zinc	....	0 05
Heavy copper	....	0 15
Wrought iron, No. 1, per gr. ton	....	15 00
No. 1 machinery cast	....	14 00
Heavy melting steel	....	9 00
Old rubbers, boots and shoes	0 06	0 06¼
Overshoes, lumbermen's rubber boots	....	0 04½
Bicycle tires	....	0 04½
Automobile tires	0 03½	0 04

Cordage Quiet; Twine is Lower

Toronto.

CORDAGE, TWINE.—There is little activity in rope noted just now. The market seems to be quite steady and sales within narrow channels. The prices remain quite steady, the pure manila being quoted at 34c. per lb., base; British manila, at 30c; New Zealand hemp, 30c.; sisal, 27½c, and sisal lath yarn, 27½c. Declines have been registered in some quarters in jute twines ranging from 4c. to 8c. per lb., according to grade. A better supply is reported available.

Ingot Metals Hold Their Own

Toronto.

INGOT METALS.—Generally there is little new to report and all metals are holding their own quite well. Lead and spelter are weak at primary markets, but this has not affected the situation here yet.

COPPER. — The market remains steady at 18c. per lb. locally, a reflection of primary conditions. There is only a small movement.

TIN.—The price of tin is reported as 56c. per lb. this week. Little new is reported on this metal with sales only fair.

SPELTER.—The primary markets display weakness, but there is no indication of a change locally as yet. Quotations here are being made at 8¼c. per lb.

LEAD.—Weakness has characterized the past week's activities in lead. There is little business offering and prices at primary points have sagged. No change has been made here, 6½c. per lb. being quoted.

ALUMINUM.—Little or no interest attaches to this metal, with quotations ranging around 40c per lb.

ANTIMONY.—Sales locally are just fair and price steady at 8c per pound. Stocks are ample for requirements.

LONDON MARKETS

LONDON, May 8—Prices on a number of lines have been readjusted during the week and in the majority of instances show a tendency to continue firm. Business is reported as exceptionally good, not only in the city, but throughout the district. District merchants report that they are well satisfied with the volume of trade offering and that they are looking for good business throughout the year. Quite a lot of building is getting under way and many inquiries are being made by other prospective builders. Turpentine prices are firm and supplies very limited. Lines which show advances this week are dry mortar stain, farmers' combination anvils and vises, lawn rakes, side cutting pliers, plough bolts. Reductions are noted in lamp burners, malleable fittings, cast plugs,

Dry Mortar Stain Slightly Higher

London, Ont.

DRY MORTAR STAIN.—An advance has been made in dry mortar stain, and the new quotations are Clinton Red, $1.55 per hundred pounds; Clinton Black, $2.50.

Anvils and Vises Higher; Pliers Too

London, Ont.

Farmers' combination anvil and vise prices have been increased, and the new quotation is $2.25 each.

New and higher prices are now in effect for Bernard side-cutting pliers. The new quotations are, per doz.: No. 102x4½ in., $19.75; 5½ in., $25; 6 in., $27.50; 7 in, $34.50.

Japanned Lawn Rakes Go Higher

London, Ont.

JAPANNED LAWN RAKES.—J. D. lawn rakes, japanned, are higher this season, and the latest quotaations are as follows: 15 in., $8.00 per doz.; 20 in., $9.00 per doz.

Reduction is Made in Lamp Burners

London, Ont.

LAMP BURNERS.—Prices of lamp burners have been revised, and the lower quotations now in effect are, per doz.: Banner, No. 0, $1; No. A, $1; No. B, $1.25; No. D, $2.75.

Malleable Fittings Revised Slightly

London, Ont.

MALLEABLE FITTINGS.—A readjustment downward has been made in the prices of malleable fittings, and the new quotations are: Class B, black, 22c. per lb.; class C, black, 14c. per lb.; class B, galvanized, 30c. per lb.; class C, galvanized, 21c. per lb. New and lower quotations for cast plugs are now in effect. The new price is 35 per cent. off list; this is a readjustment also.

Ammunition Price Shows Readjustment

London, Ont.

WINCHESTER AMMUNITION.—Winchester ammunition prices have been adjusted to conform with ruling in respect to duty applied as Federal tax in the U.S. The new quotation is list plus 15%.

Lower Prices Are Named For Batteries

London, Ont.

EVER READY DAYLO BATTERIES.—This line has been reduced 10 to 15%, and the new list prices on some of the best selling numbers are given herewith. The discount remains at 33% in small quantities. Lists follow: No. 700, 40c; No. 750, 40c; No. 751, 45c; No. 703, 45c; No. 791, 40c; No. 790, 40c; No 705, 60c each.

New Price Named on Plow Bolts

London, Ont.

PLOW BOLTS.—An advance of 10% above the price of right hand thread plow bolts has been made for the left hand thread bolts. The prices were formerly the same for both kinds.

Poultry Netting, Harvest Tools Hold

London, Ont.

POULTRY NETTING.—Good sales of poultry netting are being made. The price for Canadian is 15% off list. A good business is being done in harvest tools. Prices show no change, the quotations being 17½% off list.

Oil Stoves and Ovens in Demand

London, Ont.

OIL STOVES, OVENS.—A good business in these lines is being done. Quotations are as follows: Perfection: 2 burner, $14.06; 3 burner, $18.19; 4 burner, $23.06. Perfection ovens, No. 21G, $4.31; No. 41G, $4.31; No. 22G, $5.44; No. 42G, $5.44 each.

Lawn Mower Sales Are Reported Brisk

London, Ont.

A brisk demand for lawn mowers is noted. The following quotations are in effect: Daisy, Star, Woodyatt, Empress, 35%. Net prices figured at 35% discount follow:

Daisy—12 inch, $5.36 each; 14 inch, $5.85; 16 inch, $6.30.

Star—14 inch, $6.96 each; 16 inch, $7.41.

Woodyatt—14 inch, $7.67, each; 16 inch, $8.13; 18 inch, $8.58; 20 inch, $9.04.

Empress, Ball Bearing—14 inch, $9.92; 16 inch, $10.40; 18 inch, $10.82; 20 inch, $11.28.

Screen Doors, Windows Active; Hinges Too

London, Ont.

SCREEN DOORS AND WINDOW HINGES.—With the opening of the building season, screen doors and windows are selling well. Quotations are as follows:

Screen Doors—No. 1, grained, $17.40 doz.; No. 2, grained (with brackets), $21.50; No. 21, Mission Style, grained, filled and varnished, $26; No. 8, Panel Bottom, grained, filled and varnished, $30.65; No. 9, Panel Bottom with Oval, grained, filled and varnished, $36.90.

Screen Door Spring Hinges: No. 20, $19.50 gross pair; No. 7/11, loose pin, $20.

Rope and Nails Show No Change

London, Ont.

NAILS, ROPE.—Good sales of nails are being made and enquiries coming in steadily indicate that business in this line will remain good for some time. Quotations show no change, wire holding at $4.70, base and cut at $4.75 base per 100 lbs. Rope business remains somewhat quiet. Prices are steady, as follows: Pure manila, 34c base per lb.; British manila, 30c; New Zealand hemp, 30c; sisal, 27½c.

Glass, Putty, White Lead in Oil Steady

London, Ont.

GLASS, PUTTY, WHITE LEAD IN OIL.—A fair business is being done in these lines. Quotations show no change and are as follows: Glass: single diamond, 25% off list; double diamond, 25% off list; cut lights, 10% off list. Putty: standard 100 lb. drums, per cwt., $6.75; standard 25 lb. drums, $7; pure 100 lbs., $8.75; pure, 25 lbs., $9.

White lead in oil, pure, tons, $16.30 per cwt.; less than tons, $16.65.

Linseed Oil and Turpentine Firm

London, Ont.

LINSEED OIL, TURPENTINE.—Good sales are reported in these lines at firm prices. Supplies of turpentine are very limited. Quotations are as follows: Linseed oil; 1 to 2 bbls., per gal., raw, $2.00, boiled, $2.03; 3 to 5 bbls., raw $1.99; boiled, $2.02; 6 to 9 bbls., raw, $1.97; boiled, $2.00; less bbls., add 10c gal. Turpentine; 1 bbl. lots, $1.17 Imp. gal.; 2 to 4 bbl. lots, $1.16 Imp. gal.; 5 gal., $1.27 Imp. gal.

WINNIPEG MARKETS

WINNIPEG, May 8—Price changes during the past week are comparatively few, with reductions predominating. Stillson wrench parts, galvanized sheets, pipe fittings, valves, steam cocks, stove pipes and stove pipe elbows have declined, while the following lines show an upward trend: linseed oil, turpentine, galvanized pails and tubs.

Business is reported very brisk in all lines of shelf hardware, orders, however, being smaller than in former years, showing nothing whatever of a speculative attitude on the part of the dealers in general.

Wrench Parts Down 10 Per Cent.

Winnipeg.

WRENCH PARTS.—Following the recent revision in Stillson wrenches, new prices have also been named on parts which show a reduction of approximately 10% from former quotations. To-day's net prices are given herewith:

Stillson Wrench Parts.—Jaws, 6 inch, 41c each; 8 inch, 44c; 10 inch, 47c; 14 inch, 63c; 18 inch, 96c; 24 inch, $1.25; 36 inch, $2.40. Nuts, 6 inch, 6c each; 8 inch, 8c; 10 inch, 11c; 14 inch, 17c; 18 inch, 19c; 24 inch, 30c; 36 inch, 40c. Frames, 6 inch, 21c each; 8 inch, 23c; 10 inch, 28c; 14 inch, 33c; 18 inch, 41c; 24 inch, 52c; 36 inch, 94c.

Galvanized Pails, Tubs Move Upward

Winnipeg.

GALVANIZED PAILS, TUBS.—Prices on galvanized pails and tubs, light weight and heavy weight, have again been revised to slightly higher levels, following a sharp reduction some few weeks ago. To-day's selling prices are given as follows: light galvanized pails and tubs, list price, 30%; heavy galvanized pails and tubs, 20%.

Galvanized Sheets Down 35 Cents

Winnipeg.

GALVANIZED SHEETS.—With the opening of navigation, which makes lower freight rates available, a further reduction is recorded during the week on galvanized sheets, of approximately 35c. per 100 lbs. This now makes the base $9 per 100 lbs. Net prices on the different gauges, f.o.b. Winnipeg, are given as follows: Apollo or Premier 10¾ oz., $9.40 per 100 lbs.; 28 gauge, $9; 26 gauge, $8.70; 24 gauge, $8.55; 22 gauge, $8.55; 20 gauge, $8.40; 18 gauge, $8.40; 16 gauge, $8.25. To the above prices add. for 36 in. widths in either 28 or 10¾ oz., 20c. per 100 lbs.

Pipe Fittings, Valves Down 5 to 10%

Winnipeg.

PIPE FITTINGS, VALVES, ETC.—A general revision downward is just announced on pipe fittings, valves, etc., which shows a reduction throughout of from 5 to 10%, based on latest manufacturers' quotations. To-day's ruling prices are given as follows:

Wrought couplings up to 4 inch, 40% discount.
Wrought couplings 4 inch and over, 20% discount.
Malleable pipe fittings, class A, 60-10% off new 1918 piece price list.
Malleable pipe fittings, Class B and C, 60-20% off new 1918 piece price list.
Rail fittings, 40% discount.
Cast iron fittings, 5% discount.
Drainage fittings, 35% fittings.
Companion flanges, 10% discount.
Floor and ceiling plates, 40% discount.
Floor plates, cast iron, 60% discount.
Hangers, Canadian bar, 60% discount.
Hangers, grabler bar and ring "American," 40% discount.
Honeywell generators, 30% discount.
Wrought nipples, up to 4 inch, 55% discount.
Wrought nipples, 4½ inch and over, 45% discount.
Pipe covering, 3 ply air cell, 45% discount.
Plugs and bushings, cast iron, 20% discount.
Radiator valves, 55% discount.
Reducers, eccentric, 5% discount.
Steam cocks, square head, 35% discount.
Branch tees, 10% discount.
Unions, malleable, 40% discount.
Unions, flange, 5% discount.
Valves, standard angle and globe, 20% discount.
Valves, standard gate, 25% discount.

Stove Pipe and Elbows Decline

Winnipeg.

STOVE PIPE ELBOWS.—New prices have just been announced by the manufacturers, covering stove pipe and elbows for Fall and orders are now being booked for shipment up to August 31 at new prices. These show a considerable reduction on last year's figures. New prices now effective, f.o.b. Winnipeg, are as follows: Ready to rivet pipe, 6 in., $16.50, 7 in., $18.50 per 100 lengths; patent standard pipe, 6 in., $17.50, 7 in., $19.50 per 100 lengths; stove pipe elbows, heavy, 6 in., $2.52, 7 in., $2.82 per doz.; stove pipe elbows, light, 6 in., $2.20, 7 in, $2.35 per doz.

Sandpaper Shows Activity

Winnipeg.

SAND PAPER.—Prices on sandpaper show no change over former prices, while the demand at this season is very good. To-day's market prices are confirmed as follows:

SAND PAPER

	Quire	Ream
Star—		
Nos. 00 and 0	.33	$6.05
No. ½	.36	6.50

No. 2½	.70	12.50

Good Demand For Poultry Netting

Winnipeg.

POULTRY NETTING. — Prices on poultry netting still continue firm with stocks fairly well assorted, and shipments are reported to be going forward freely. Prices are confirmed as follows: 1 in. mesh, 24 in., $6.30; 30 in., $7.65; 36 in., $9 per roll; 2 in mesh, 24 in., $3.05; 30 in., $3.60; 36 in., $4.20; 48 in., $5.60; 60 in., $6.95; 72 in., $8.30 per roll.

10c Advance Made in Turpentine

Winnipeg.

TURPENTINE.— Turpentine prices have been revised during the week, moving up 10c. per gal. over former quotations. A very good movement from southern points is noted and new supplies are not coming in very freely. Locally shipments are reported quite heavy as a big paint business is anticipated for this year, very little having been done during the war. Prices ruling to-day on turpentine are as follows: barrel lots, $1.35 gal.; half barrels, $1.38 per gal.; 5 gal. lots, $1.40 per gal.; 1 gal. lots, $1.40 per gal., plus the usual extras for containers.

Linseed Oil Holds at Advance

London, Ont.

LINSEED OIL.—The continued firm market in flax seed, which has been selling around $4 per bus., together with a heavy demand for linseed oil, has served to hold prices at advanced prices noted last week, of 8c. per gal. No immediate reduction is looked for. To-day's market prices are as follows: raw linseed oil, barrel lots, $1.93 per gal.; boiled linseed oil, barrel lots, $1.96 per gal.

PITTSBURGH MARKETS

PITTSBURGH, Pa., May 8.—The whole of the iron and steel market may be described as being in a waiting attitude, as the market is much duller than would be expected, on an average, even in ordinarily dull times, but the question is what the trade is waiting for. As noted in last report, the trade does not always assign real reason for its waiting attitude, and the reference in some quarters to buyers waiting for a settlement of the so-called "price-muddle" at Washington is not entitled to much confidence. It is probable the buyers have forgotten all about the matter, except that some may feel that if the Railroad Administration would begin an active buying campaign it would stimulate them to take hold also. Inasmuch as the Railroad Administration would not buy much steel, no matter how satisfactory the prices quoted might be, this feature may be dismissed.

That the steel people, on the other hand, are waiting for further action at Washington, or a declaration by the Industrial Board that it is done with its effort, is very greatly to be doubted,

In the past few weeks there has been much talk of an "open market" in steel products, as being at hand or near at hand. It might be thought, therefore, that the steel producers have simply been waiting for the Industrial Board to publish its obituary, in order to throw the steel market open to competition. Observation of the past ten days indicates that the attitude is quite the contrary. The steel producers evince no disposition to have an open market either now or at any other time in the future, unless there is a great change in fundamental conditions.

Railroad Buying

After receipt of cablegrams from the President, the Industrial Board made a very graceful switch, and while at first it insisted to the Railroad Administration that the latter had to buy steel at the prices the Industrial Board set, the board has since issued a statement in which it blandly disclaims any desire to dictate prices, explaining that it is constituted merely to be an "intermediary," as, for instance, between the steel producers and the Railroad Administration. That is what everybody understood from the original announcement, and one of the criticisms of the Board, in these reports and elsewhere, was that it departed from that platform when it insisted on the Railroad Administration buying at the prices named. The Industrial Board now goes still further, indeed, and while calling itself an intermediary, arranged a meeting between the steel committee and the Railroad Administration, at which the Industrial Board would not be present at all.

In these negotiations it seems reasonably certain the steel producers will refuse the Railroad Administration any further price concessions. It has very little to gain by offering concessions, and much to gain by refusing. Owing to the failure of the Department of Justice to approve the Industrial Board price fixing, which was really the most important respect in which the carrying out of the original program disappointed the steel producers, the producers are not well organized for price maintenance, except through their general and more or less tacit understanding. To make a decided stand against concessions to the Railroad Administration would tend to stiffen the backbone of all producers, whereas to make concessions might be suggestive that producers could make concessions to other consumers at later times.

As to railroad buying, the curious thing is that so few people realize that at best the Railroad Administration would buy very little. Rails have been mentioned as the chief item, but the statistics of rail production in 1918, recently made public, indicate that in that year the steam roads received about 1,400,000 gross tons of rails for replacement purposes, and all analysis shows that such a tonnage was a trifle above, rather than below a year's normal requirements Then it is now well known at this yeat was entered with about 1,200,000 tons on rail mill books, due the railroads at the much advertised average price of $36 a ton, the Industrial Board prices being $45 for Bessemer and $47 for open-hearth. Deliveries have been going forward right along and will be completed about next July. The supply should approximately take care of the most necessary replacement work of this year. Of course if the railroads had plenty of money they might replace rails on a more liberal scale, but that is not their position. In the four months after the signing of the armistice the railroads earned $114,000,000 while the Government guarantee for the period is $259,000,000. The deficit must be made up out of the public funds, and how much money will the roads have when they are returned to their owners and the guarantee ceases? As to the cars, there is probably a surplus to-day of 350,000 cars or more, and there are also surplus locomotives. No doubt in the long run the roads will be in need of making great improvements, but now is not the time when the Railroad Administration would be disposed to embark on such a program. Congress failed to pass the $750,000,000 appropriation for the "revolving fund" out of which deficits, below the Government earning guarantee, are made, and at the first of each month the Railroad Administration has to issue to the roads, to meet their most pressing obligations, "certificates of indebtedness" which the railroads use as collateral for loans.

Thus the outcome of the present negotiations between the steel committee and the Railroad Administration is likely to be just as follows: (1) The steel producers will refuse to make further price concessions: (2) The Railroad Administration will point out that it has no orders to place anyhow.

Pig Iron

Pig iron presents a refreshing contrast to steel, marketwise, even though it is very dull. There is more than the ordinary pre-war "open market" in pig iron. The normal open market means that there is at any date a recognized price, with an advancing or declining tendency. One producer advances his price and, usually within a few days, others follow, or there is a cut in prices, with corresponding following. Now the market is even more open than that, as there is actual bargaining whenever there is any tonnage of importance to be placed. One interest, buying Alabama iron, has been bargaining, making bids that are refused while the sellers make offers which are refused. In the local market no inquiry large enough to warrant bargaining has appeared.

Mill Operations

Steel mill operations are now averaging not more than 60 per cent. of capacity and the rate continues to decline. In some branches of the finished steel trade a slight increase has been observed in current bookings, but old orders are becoming exhausted more rapidly than new buying appears.

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

42. **Agricultural machinery.**—A farmers' co-operative society operating in the Transvaal, are prepared to purchase from Canadian manufacturers, gang plows, harrows, drags, cultivators, planters, mowers (cutting only, not binding), shellers and graders.

44. **Asbestos.**—A French commission house would like to get in touch with Canadian exporters of asbestos.

46. **Metals.**—A Paris commission agent wishes to get into touch with Canadian exporters of metals.

703. **Agricultural machinery, marine motors.**—A party at Bologna, Italy, asks to be put in communication with manufacturers of agricultural machinery and marine motors (for launches).

711. **Agency.** — A party at Parma, Italy, would handle on commission foodstuffs, canned, dried, preserved meat, and fish, liqueurs, chemicals, sulphate of copper, caustic soda, soda ash, oils and fats for soapmaking and lubricating, paints and varnishes, etc.

714. **Cement.**—Palermo, Sicily, manufacturers require machinery for making Portland cement.

723. **Woodenware and hardware.**—The representative of a London company now in New York is desirous of hearing from Canadian manufacturers of kitchen and domestic woodenware and hardware, able to fill export orders.

724. **Minerals.**—An English firm possessing an established connection among buyers would be glad to hear from Canadian producers wishing to secure an export outlet for Cobalt metal, Cobalt oxide, nickel matte, molybdenum concentrates, ferro-molybdenum, ferro-silicon, ferro-vanadium, vanadic oxide and concentrates, silico-manganese, silico-mangano aluminium, ferro-chrome, and chromite concentrates, including lead ores and concentrates, pig-lead, copper, other metalliferous ores, ferro and nonferous alloys, also graphite. Full particulars at the Commercial Intelligence Branch, Department of Trade and Commerce, Ottawa.

725. **Iron and steel.**—A firm in the north of England which has been importing steel blooms, billets, slabs, sheet bars, wire rods, etc., would be glad to consider propositions from actual Canadian manufacturers.

726. **Electric motors and dynamos.** — A London electrical company wishes to hear from Canadian manufacturers of electric motors and dynamos, both direct and alternating current.

727. A firm of British importers wishes to get in touch with Canadian manufacturers of domestic and other woodenware, with a view to arranging for the purchase of regular supplies. A member of the firm contemplates visiting Canada and the United States before long.

HOUSE PASSES SPONGE BILL

By only three votes over the constitutional majority, House Bill No. 152, prohibiting the sale of sponges which are loaded with sand, salt or other substances, passed the Springfield, Ill., House last week, following an interesting discussion. The final vote was 81 to 21. This bill was prepared by and introduced at the instance of James H. Rhodes & Co., jobbers of sponges, etc.

Make It a Bang-up Floor Paint Week

Housecleaning Time, Floor Paint Time—Plan Your Campaign—Getting Action in the Window Display—Treating Oak Floors — Service Will Spell Success

THE time to strike the iron is when it is hot. The time to strike the floor painting is when floors are undergoing the close scrutiny of house cleaning operations.

At this time, up come carpets, out comes furniture from the wall; every nook and corner is being ransacked to disperse the winter's accumulations of dust, dirt and lint.

What am I going to do with those floors is a question that looms big in every housewife's mind. She is in a keen, receptive mood for suggestions.

Here's the opportune time for the paint department to jump in and help her out.

And there are a thousand and one suggestions that may be drawn from the well-stocked paint department that will help her on her way, and bring increased business to the store.

Fillers, waxes, varnishes, polishing brushes, etc., for the hardwood floors. Crevice fillers, ground color, graining compounds and graining tools to assist in renewing the old floors that are badly in need of renewal. Floor paints, varnishes, stains and floor enamels to brighten up and renew kitchen, bath and bedroom floors. Porch and Verandah paints for the outside floors and steps.

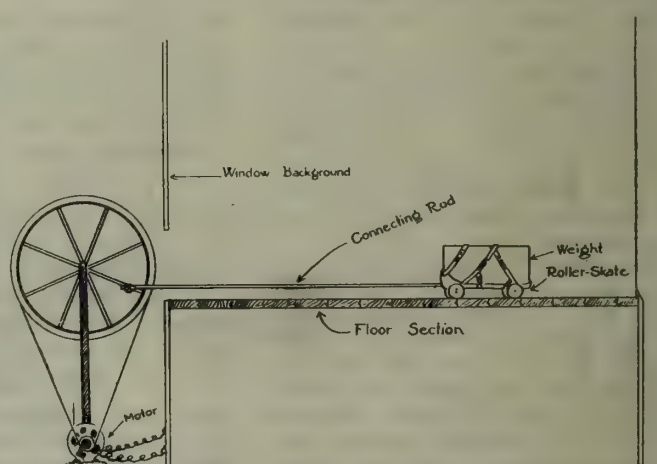
Assuredly plenty of opportunities and plenty of materials to back up a full planned floor paint week.

Plan the Campaign

Now for the planning. Choose the week that you think is best adapted to anticipate the house-cleaning season in your community. Arrange newspaper advertising, devoting special attention to your floor paint line, to commence not later than the Friday night before the week arranged and to run during the week. Stores where a mailing list is used, can arrange to circularize these either during the special week or just previous to it. Arrange with the advertising departments of the various lines carried, to obtain their special floor finish literature, and use these as enclosures. These may be also used as enclosures in parcels, statements to your customers, etc. Arrange all your paint advertising effort so that it will bear on the special effort you will make during that week.

If it is possible to obtain a demonstrator from one of your supply houses, arrange space for a demonstration, and have it featured in co-operation with the advertising your paint or varnish house will arrange for such an occasion.

Last, and by no means least, arrange a window display, devoted entirely to floor paints. It is impossible, in the brief space alloted to this suggestion to even hint at all the numerous possibilities for display along this line. As in every other effort, perhaps concentration upon some one outstanding feature of your floor finishes, should be the keynote of the display.



Take, for instance, the wearing qualities of your line. Let the advertising play up this factor more strongly than the others. Arrange the window display so that its importance can be caught quickly by the eye of the passerby. Use some comprehensive illustration that will show how well your floor finishes or paints will wear.

Just two brief suggestions for a window display along this line. Display graphically on a show card, how many thousands of times boot heels beat up a floor section of flooring, finished actually with your floor varnish or paint, and on it place a number of worn-out boots, well down at the heel. On a card below this section, have a caption to the effect that your floor finishes will outwear the shoes that try to wear it out, or words to that effect.

Getting Action in the Window

A very good mechanical device can be arranged to

The Brush Department

Avoid Mixed Window Displays for Best Results

"Our Show Windows One of the Best Forms of Advertisements We Have—Always Bring Results," Says G. O. Cawker—Toronto Hardwareman Tells How He Has Increased Brush and Paint Sales Each Season

THERE are three ways to sell more brushes. One of the best is to put in good window displays. Another is to display them in the store, and the third is to always ask those who are purchasing paints if they have the right kind of brushes for the work they are starting.

These are the plans used by Cawker Bros. of Toronto, and have resulted in steadily increasing sales of brushes.

"In arranging our window displays," said Mr. G. O. Cawker to HARDWARE AND METAL, "we found that it always produces much better results if a drive is made in only one line. Take brushes for instance. When we arrange a window display of brushes, we do not mix lawn mowers or washing machines or some other line of merchandise up with brushes. We show brushes only, and we get immediate results. A good window display is one of the most effective plans we have for "pulling" business. We have never failed to get good results from our displays."

Show Good Brushes

"We always show a good brush, at a reasonable price first," said Mr. Cawker, "the great majority of the customers take them. We are always careful to find out about the work to be done, and suggest the right kind of brush for the job. Many of those who are starting a job, do not know, that by using this brush or that brush, they can not only save time, but get a much better job. We show them why certain brushes will do certain work better, and save time and trouble in the long run. We find that most people appreciate all the help we can give them in the way of suggestions, and that they do not mind paying a reasonable price for a brush that will do all that we say it will. Of course there are customers who want something cheaper sometimes. If they ask for an inexpensive brush, we have something to meet their demands."

Put the Prices on

"It is a good plan to let people know the prices of all brushes, and all that we show carry either a price mark or a ticket. When we arrange a window display of brushes, we find it is a good plan to show paints in our other show windows. We change our window displays regularly, and always try to keep them as seasonable and attractive as possible."

Mr. Cawker stated that his paint sales have been steadily growing. Each year shows an increase in the volume of business. He aims to handle only paints and brushes that he is satisfied he can stand behind, and that will give good service to those who buy. Service of this kind is what brings people back year after year to buy their paints and brushes, and other goods from him, and many of them tell their friends and recommend Cawker's store when inquiry is made as to where this or that can be obtained.

Sells for Cash

"In a business like ours," said Mr. Cawker, "cash is the only plan. Credit business from our standpoint is no good. It would be foolish for us to try to attempt it. The collection of a large number of small credit accounts, would not only eat up all the profits, but all the profits on our other business as well. We sell for cash and find that it is the best plan."

Store display is regarded by this firm as a most important part of merchandising. Seasonable lines are kept right up at the front of the store, and all the stock is kept clean and in good order. It is changed around frequently.

"You can't let the people see too much of your stock," said Mr. Cawker. "By keeping the goods out where people can see them, we sell a lot more than we could in any other way. The goods sell themselves. People come in perhaps only intending to buy a can of paint and brush, while going through the store, they see half a dozen other things they know they need, but which they would have forgotten had they not seen the goods right out before them."

Like Good Goods

Mr. Cawker finds that people in general, are showing a decided tendency to want only goods of quality. They have no objection to paying a little more, he says, provided they are satis-

Display of brushes recently made in Cawker Bros., Toronto, store.

There's a Boeckh Brush for Every Paint Job

Sixty years' experience in the manufacturing of high-grade brushes has placed us in a position to know which paint and varnish brushes are best suited for various kinds of work. The kind of brushes that the public demand are the dependable ones that do the work with efficiency. That is the only kind we make—brushes that assure satisfaction to the user.

Your customers want the best in paint and varnish brushes — sell them Boeckh's Rubber Set, and derive the benefit of bigger profits and repeat orders.

BOECKH'S RUBBER SET BRUSHES

The bristles in Boeckh's Rubber Set Brushes cannot work loose and fall out to streak and mar the paint surface—they are rubber set and there to stay. Once used, Boeckh's Brushes are always in demand.

THE BOECKH COMPANY, Ltd.

TORONTO, CANADA

ESTABLISHED SINCE 1856

AVOID MIXED WINDOW DISPLAYS

Continued from page 74

fied that they are getting something that is worth the money from a service standpoint. As far as paint sales he has made this season are concerned, Mr. Cawker says people are buying in larger quantities than usual. He attributes this to the fact that help is scarce, and many people are forced to do their own painting, and also to the fact that there has been a lot of work held up which has to be done for the simple reason, if it is left any longer, the building or whatever the job may be will suffer.

MAKE IT A BANG-UP FLOOR PAINT WEEK

Continued from page 72

show the wearing qualities of a floor finish in any store that has electricity and where the paint department wishes to bring special attention to itself. Finish up a fairly good-sized section of flooring with whatever varnish or paint it is desired to demonstrate. Lay this flat on the platform of the window. Behind the background of the window fix up a pulley and gear it to a small motor, so that is will not revolve too rapidly. On the section of flooring, place a roller skate, to which is fastened a weight of 50 pounds or over, so that when the motor is started, it will pull the skate, with the attached weight. On a placard, state the date and hour at which the motor was set in motion, and give the number of times per minute, per hour, and per day that the roller skate passes over the finish. Numerous methods can be devised to draw attention to wearing qualities, around this demonstration.

Value in Getting Attention

Comes the question; will a special effort of this kind be worth while? Every paint dealer can pretty well estimate this for himself. He knows the interest that every housewife takes in the good appearance of her floors. There is scarcely a house in his community but has either a front verandah or porch with steps or else a back verandah with steps or perhaps both. These seldom take less than a quart of floor paint. The number of possible sales of quarts is limited only by the number of buildings in his district.

Every house is usually equipped with a drawing room, dining room, bathroom, kitchen and one or more bedrooms. The popularity for hardwood floors for halls, drawing and dining rooms alone calls for constant attention and the use of fillers, waxes, floor varnishes, etc. Kitchens, bathrooms, bedrooms, attics, stairs, and other rooms, are always potential users of either paints or varnishes.

The number of houses and buildings in his locality are his only limit, and it is safe to say that there is not 25 per cent. of the houses in his community that have ever used up to the limit of their possibilities in floor paints and varnishes to keep the floors properly protected and in good appearance.

Each paint dealer knows his community well enough to sit down for a moment or two with pencil and paper and figure out as to whether such a special effort would be worth while or not.

Know the Line You Handle

However, carrying out any plans along the lines suggested above, by no means completes what should be done to make a floor paint week successful. Every salesman in the store should become thoroughly posted on the uses and the services that his various floor lines can render.

As has been constantly emphasized on this page, what the customer is mainly interested in, is the service to be rendered, and how the line is to be applied, to enable him to obtain the maximum of service.

If the sales staff is not thoroughly posted, your special effort is quite likely to develop some flat spots that will mar the complete rounding out of your effort.

Possibly the biggest bulk of paint or varnish enquiries come out of customers' interest in proper floor finishing.

Take, for instance, one of the most recent developments in finishing natural oak flooring. It has been proven, and is being advocated by the larger manufacturers, that shellac is no longer necessary in a natural oak finish. After the floor has been properly filled, it is only necessary to apply two or three coats of floor varnish. The use of shellac has been maintained from time honored conditions that no longer exist. A prejudice in favor of shellac will be found in many quarters, but tests in actual use have proven that a natural oak floor finish in varnish gives better results without the use of shellac than with. The reason can be easily explained that without the brittle coat of shellac between the wood and the varnish, the varnish has a better opportunity of obtaining a wearing grip on the wood, and gives better wearing service.

While it is known that floor painting and refinishing is being neglected, the sales staff can render service to the customer by bringing the results of such neglect to his attention.

Where it is felt that a customer does not fully understand the proper application of his purchase, the salesman should take pains to see that he fully understands the necessary preparations to make in order that his floor may be in good condition to receive the finish, and that he should also fully understand the proper methods of application.

"Save the Surface and you Save All," the slogan of the present co-operative advertising campaign now under way, applies just as strongly to floors as to any other surface.

In addition to the advertising and displays that the paint dealer may arrange in putting forth a "Floor Paint Week," do not, by any means, overlook the idea of service to the customer. It should be the kindling spirit behind the whole effort. With it will come the crowning of the success of the week. Without it will be found something lacking, both in its success and the profits that will come to your paint department.

Montreal Enthusiasts Form Gun Club

Not only is trap shooting alluring to many Montreal men who have been "breaking the pigeons" in the past, but the season ahead promises to take on more than passing interest. At the Windsor Hotel, a few days ago, an association of these men was effected, some forty or more attending, and the Montreal Gun Club Limited begins its lease of life shortly. It is stated that, if the enthusiasm of the initial meeting can be maintained, Montreal will have one of the best and most promising gun clubs in the country.

In due time, it is proposed to secure suitable grounds, and to erect thereon a club house, traps, etc. Upwards of twenty men agreed to become charter members at this first meeting, and a meeting for the election of officers will be held on May 9. D. D. Bogue was made temporary chairman.

The Average Varnish Buyer

With the exception of the painter, comparatively few people know enough in a practical way about varnish to qualify them to choose it intelligently. Such buyers depend upon the word of the dealer and the label of the manufacturer.

This is why Berry Brothers' Varnishes, Enamels and Stains are so safe to recommend and easy to sell. Even occasional buyers among the smallest consumers have learned the necessity for discrimination, and the "Berry" label is recognized as a positive guarantee of quality.

For sixty-one years Berry Brothers' label has protected the buyer against inferior finishing products.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, May 8.—There is little change in the paint markets this week and all lines are firm. Linseed oil has been ruling steadier, the price of flaxseed having fluctuated during the week, but there being practically no change from the position, at least there is no quotable change on oil prices. Turpentine still is scarce and firm, the demand increasing, and the prospect of low prices is remote.

There is a good healthy business for paints, varnishes, etc., and the outlook is encouraging.

Less Change But Firm Oil Markets

Montreal

LINSEED OIL.—With flaxseed fluctuating a little still, there is really not much change from the position of last week, though quotations are firmer, if anything, in some quarters. Based on the prices asked for spot seed, oil would be worth nearer two dollars to-day per gallon than any less. It is stated that there have been a few sales made at a trifle under the market, but that this is probably done to liquidate small holdings. The whole situation determines itself into one of probable high prices for the next while, at least. With seed prices so high, it is doubtful if crushers will store up heavy supplies, and then, if there is a good painting season, as is expected, a surplus to meet excessive or even large demand does not seem likely. Crushers look for high oil, and it may yet reach the $2 mark.

Raw—	Imp. Gal.	
1 to 4 barrels	$1 83	$1 92
5 to 9 barrels	1 82	1 91
10 to 25 barrels	1 81	1 90
Boiled—	**Imp. Gal.**	
1 to 4 barrels	$1 85½	$1 94½
5 to 9 barrels	1 84½	1 93½
10 to 25 barrels	1 83½	1 92½

Putty Should Move To Higher Basis

Montreal

PUTTY.—Two or three factors have served to steady and hold the putty price basis without change. Fair stocks of whiting are said to be held by some of the makers, and then again, there is not an excessive demand at present for the commodity. But with the cost of linseed oil so very high, it is claimed that a revision of the price basis should be made to higher levels. No change at this time is looked for, notwithstanding.

Standard Putty -	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

No Welcome For Turpentine Orders

Montreal

TURPENTINE.—Few, if any of the jobbers are pushing the sale of turpentine, and some will not quote a price. Supplies are anything but heavy, and there is, indeed, less stock here than the opening of the painting season would warrant being carried. As a result of the shortage of stock, prices hold firmly, but are without change.

Turpentine—	Imp. Gal.	
1 to 4 barrels	....	$1 12
Small lots	$1 17	1 27

(Packages extra.)

Expect Lead To Hold On Basis

Montreal.

WHITE LEAD IN OIL.—"We do not expect any change to be made in white lead in oil until the end of June, anyway," said a large jobber this week. "It may not be made then, but in the meantime we look for no change."

There is a steady demand for supplies from the trade and supplies are ample to meet requirements. The price basis on Government standard lead is as follows: Five ton lots, per 100 lbs., $15.50; ton lots, $16; and smaller lots, $16.35.

Steady and Active Is Paint Market

Montreal

MIXED PAINTS, SPECIALTIES. — Jobbers and paint manufacturers are finding the general condition of business satisfactory. There is a large outgo every week, and orders are well assorted, indicating that there is a general condition of wise buying to meet actual needs. The price basis is steadily firm, the high linseed oil market being a big factor in holding the undertone firm.

TORONTO

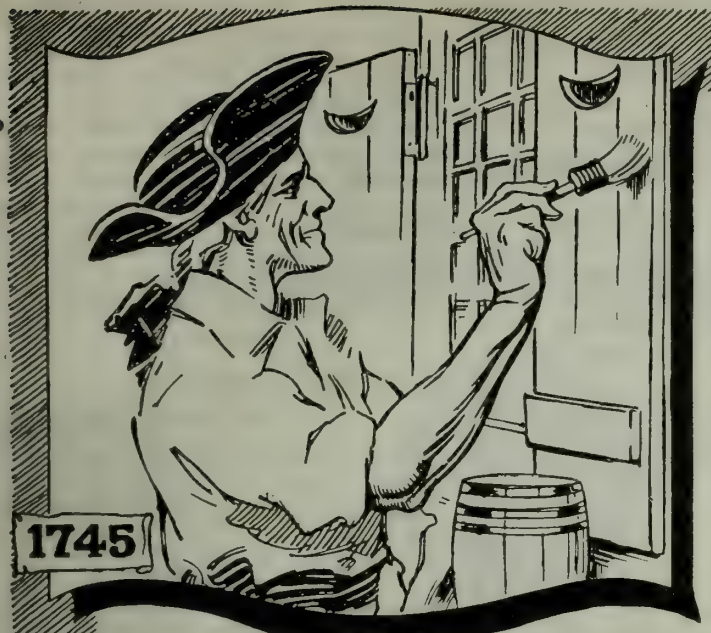
TORONTO, May 8.—Higher prices have been put into effect on both turpentine and linseed oil this week, and the market shows strength in both commodities. Turpentine seems to be a little scarce at the moment, but should soon be available in liberal quantities. Mixed paint orders are coming along freely and manufacturers report that they are working overtime to get shipments away promptly.

Linseed Oil Moves Up 5c

Toronto.

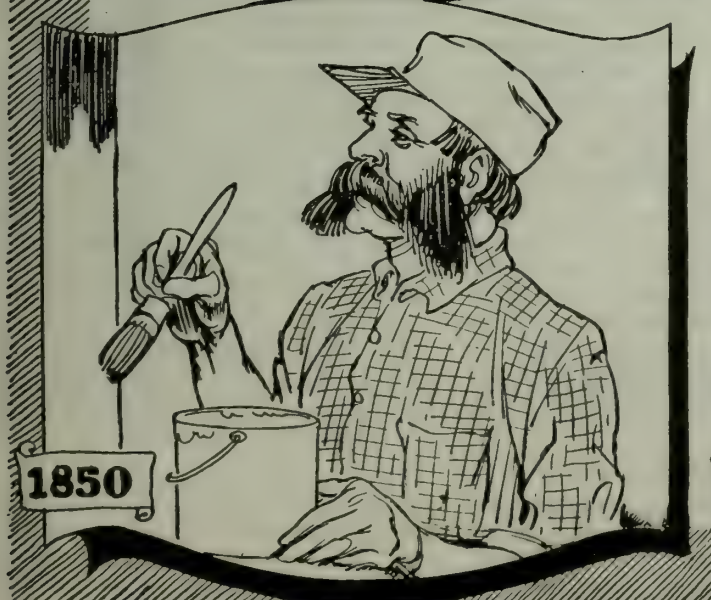
LINSEED OIL—The situation is without material change this week, as far as outside influences are concerned. Argentine seed is still conspicuous by its absence, and whereas some marked fluctuations are noted in Canadian seed prices, the level is holding pretty well up towards the $4.00 mark. Prices on oil are higher in some quarters this week, $2.00 per gallon being reached for raw linseed oil. Range of quotations follows:

Linseed Oil—	Raw		
1 to 2 barrels, gal.	$1 86	$1 98	$2 00
3 to 5 barrels, gal.	1 85	1 97	1 99
10 bbls. and over	1 83	1 95	1 97
	Boiled		
1 to 2 barrels, gal.	1 88½	$2 01	$2 03
3 to 5 barrels, gal.	1 87½	2 00	2 02
10 barrels and over	1 85½	1 98	2 00



Prices shown are those ruling on Thursday of current week and subject to daily fluctuations of the market.

Turpentine Moves Higher; Up 2c



Toronto.

TURPENTINE.—Continued strength is shown in the turpentine market and prices locally have advanced 2c per gallon this week. The market in the South, which is usually easy at this time of the year, is proving a surprise in its continued strength and indications seem to point to a scarcity. This is due to a marked reduction in tankage, it is intimated, and the fact that new supplies are slow in showing volume. There is some turpentine being unloaded this week, which will relieve temporary shortage here. Prices range as follows:

Turpentine—	Imp. Gal.	
1 barrel (barrel included)	$1 14	$1 17
2 to 4 barrels (barrel included)	1 13	1 16
5 gallon lots	1 24	1 27

Nearly Two Centuries Old

Brandram's Genuine B-B White Lead

Do they not mean something to you,—these pictures? Look at them. A long and honorable history is behind them.

Canada was largely a wilderness when Brandram's Genuine B-B White Lead was first made. Napoleon has come and gone. The United States has come into being—and now Germany has fallen. Steam power, electricity, telephone, telegraph, wireless, submarines, airplanes—these have all come into being since the Brandram process was discovered.

1919 is using out of the same pail as 1745. Exactly the same process was used in making the white lead (Brandram's Genuine B-B) of 1745, as is used in making that of 1919. In the world competition which has been waged all these years, the Brandram process is the only survivor of all the patented white lead processes which were in use at the time it came into being.

This is the white lead which is used in B-H "English" Paint, and in all other Brandram-Henderson paint products employing a white base.

Your guarantee lies in that two centuries of history. No one else can give a guarantee of the same character.

Write us for our attractive Agency proposition.

Improvement Shown in Mixed Paint Sales

Toronto.

MIXED PAINTS.—Manufacturers report that sales of mixed paints are very good and with a turn in the weather to more favorable conditions they are looking for a sharp increase in volume of orders. Repeat orders are coming in well already and there is just a hint that a big rush of business would tie up deliveries somewhat. However, manufacturers are pushing ahead production and indicate they will execute orders with greatest possible despatch. The market is firm and unchanged.

Steadiness Marks White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—Steadiness marks white lead in oil for its own. There is a somewhat better movement to the trade and the outlook is considered quite satisfactory. The market is without any change, pure white lead in oil being quoted in 5-ton lots at $15.80 per 100 pounds; 1-ton lots, $16.30; and less quantities, $16.65.

Glass Holds Firm; Putty Steady

Toronto.

GLASS, PUTTY.—Window glass remains in a firm position. The volume of sales is not large and stocks, though not considered heavy, are ample for immediate requirements. Discount shown in current market quotations are unchanged.

Putty is steady and whereas a fair amount is going forward, it does not represent a very big volume as yet. The market is without change at following levels:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

Winnipeg Clerks Demand Minimum Wage of $30 Per Week

They Also Ask Merchants to Give Them 44-Hour Week, and Other Considerations—R.M.A. Will Support Them if Given Support Themselves

WINNIPEG, May 8.—(Special).—The Retail and Wholesale Clerks, Shippers and Warehousemen's Association, of Winnipeg, have addressed a suggestion to the merchants of Winnipeg, which they want considered as a basis to work on for the future. Roughly speaking, it is as follows:

1. Forty-four hours shall constitute a week's work.
2. One hour for lunch at noon each day.
3. Employees shall receive full pay for holidays.
4. No overtime except at stocktaking, and then the pay shall be at the rate of time and half.
5. When reduction of staff becomes necessary, juniors shall be let out first.
6. When the staff is reduced, employees shall be given a week's notice.
7. Seniority shall govern cases of promotion.
8. Women and girls shall not be required to do heavy work.
9. No boys under sixteen shall be employed in any store governed by this agreement.
10. Employees shall be paid at the end of each week.
11. Apprentices must be over sixteen years of age when entering, and shall serve four years.
12. Only one apprentice shall be allowed to every five employees.

Rates of pay: Male, $30; female, $20 per week.

Rates for apprentices: First year, $15; second year, $17; third year, $20; fourth year, $25.

The above rate shall be known as the minimum rate of pay.

What the R. M. A. Say

In conversation with J. H. Curle, secretary of the Retail Merchants' Association of Manitoba, a representative of HARDWARE AND METAL was told it was too early to make a definite statement re the above suggestion. Mr. Curle stated that there would undoubtedly have to be many changes in the proposal as submitted, and that even before any agreement could be entered into, the retail grocery trade would have to be quite sure that the grocery business was going to be protected by the proper enforcement of the Early Closing By-law in Winnipeg. At present there is open house, due to the fact that an appeal is to be heard against the decision of Sir Hugh J. Macdonald's judgment in imposing a fine based on the Early Closing By-law. Retail clerks, Mr. Curle believed, would strongly support the by-law, and would join hands with the merchants in removing groceries from night stores.

What R. M. A. Wants

Asked for a definition of "night" store, Mr. Curle stated that prior to the passing of the Early Closing By-law, fruit and confectionery stores had been in the habit of stocking various quantities of groceries, and sales of groceries after hours were prevented by the spotter system. Now the spotter system is to be abandoned, and inspectors employed, who will be able to determine whether a store should be allowed to remain open at night.

According to Mr. Curle, if the Clerks' Association will support them in having groceries removed from stores which open at night, then they will co-operate with them in getting down to a basis of a shorter working day, and a higher rate of pay, of which the above is put forward as a suggestion by the clerks.

Heating Customs Are Changing

E. C. Townsend, Montreal, manager of Crane, Limited, indicated, on his return from England recently, that custom with regard to the use of heating and cooking arrangements in England, was changing.

Mr. Townsend referred to many changes that were being brought about, and the introduction of which would place modern conveniences in the homes of the people. One of the improvements looked for was that relative to cooking equipment. The old fire-place, Mr. Townsend thinks, is doomed, insofar as heating and cooking proposition is concerned. The people there, he says, are beginning to realize what a great waste of heat there is in the big open fire-place. As a result, there will be a general and favorable consideration, it is expected, of various modern stoves. It is more than likely that a big industry will gradually be built up by those seeking foreign markets for such products.

Says Demonstrations Keep the Goods Moving

Seventeen vacuum cleaners in two months is the sale made in the electrical goods department of George A. McMurtry and Co.'s store, St. Thomas, Ont. Mr. McMurtry states that business was never better than at the present time.

This week Mr. McMurtry held a special demonstration of gas stoves. He announced in his advertisement, that each day during the demonstration he would give away material cooked on the gas stoves demonstrated. Women demonstrators were on hand each day to explain the working of the stoves. Cups of tea were included in the free distribution of food. The store was filled to capacity from the opening of the demonstrations.

Mr. McMurtry has opened a new department and is offering for sale phonographs. He believes this new departure will prove a success, or to put it in his own words, "It will, I expect, be a hummer."

A special window display of gas stoves and electrical appliances was shown this week in connection with the demonstration. Next week this store will have a special window display of phonographs and equipment. Store demonstrations and good window displays, he says, are sure business getters.

SECOND OF THE SERIES OF CONSUMER ADS. APPEARING IN LARGE LIST OF PUBLICITY MEDIUMS TO HELP MARTIN-SENOUR DEALER-AGENTS SELL MORE PAINTS AND VARNISHES

MARTIN-SENOUR
100% PURE PAINT & VARNISHES

"Protection" For Your Home— No "Free Trade" With Decay

Everything with a surface needs surface protection. Not only the outside of your home, but every part of the inside—the floors, walls, furniture, woodwork and metal parts.

To paint, means protection and preservation and money saved on repairs, for wear and decay always start at the surface.

To leave a surface unprotected by paint or varnish, means "free trade" with decay and waste.

"100% Pure" Paint
The Paint for wear and weather.

Senour's Floor Paint
The old reliable — it wears, and wears, and wears.

"Neu-Tone"
The sanitary washable Flat Oil Paint for Interior Decorations.

"Wood-Lac" Stains
Improve the new — renew the old.

"Marble-ite"
The one perfect floor finish—will not mar or scratch white, under hardest wear.

"Varnoleum"
Beautifies and preserves Oil Cloth and Linoleum.

"Save the surface and you save all" Paint & Varnish

With

MARTIN-SENOUR PAINTS AND VARNISHES

They are the greatest material protectors you can use—and the cheapest—because they spread easier, cover more surface and last longer.

C. C. M. 3-Piece Crank Hanger

Standard Equipment on all

C·C·M· Bicycles

The most perfect satisfaction has been given to both riders and dealers for many years by the C.C.M. Crank Hanger.

It runs smoothly, with no "tight and loose spots." Does not easily get "out of true." Is very simple to adjust and repair. This is due to its special design which is mechanically correct, and to its sturdy strength and accurate workmanship.

This is but one of the special features which have made C.C.M. bicycles the fastest selling lines in Canada.

Write Head Office or nearest Branch for prices, agency terms, etc.

The "C.C.M. Family" includes these well-known name-plates:

War's Declared!

on the Huns of the Potato Fields

LIKE the Great War this one will be won by the side of right with the aid of plenty of the best ammunition. Your store should get into the fight as one of the "Ammunition Depots" fully equipped with the deadliest potato bug poison you can get—

Munro's Pure Paris Green

(Government Standard)

This will help to put the treacherous potato bug army in full retreat, and will prove a profitable venture for you.

Paris Green is known wherever potatoes are grown as the most effective poison for ridding potato plants of their destructive enemies. No sales argument is required to sell it. Just show a potato grower Munro's Pure Paris Green and the sale is made—and the bugs on his plants are as good as dead.

Get into the "Big Drive" with a full stock of Munro's.

If your jobber can't supply, order direct from the manufacturers

McARTHUR, IRWIN, LIMITED

MONTREAL

"I Have the Best Flashlight Business in Town because—"

"—Because my trade know that I handle only one grade of batteries—the best—the genuine Eveready TUNGSTEN.

"They know they can get Eveready Tungsten Batteries from me in any size at any time—and that I won't sell any battery that isn't fresh and full of pep.

"I keep my stock fresh by figuring out my weekly sales of each type, and ordering from my jobber every so often at regular intervals—not too fast nor slow enough to get out of stock.

"I watch my stock carefully and sell the oldest dated batteries first. I test every battery with an Eveready Battery Tester before I take the customer's money. I am doing a nice battery business with good profits and it's growing every week."

The above is an extract from a dealer's letter. 1919 will be the greatest "flashlight" year ever known. Eveready Tungsten Batteries are better than ever—we guarantee their quality and uniformity. Have you joined the Eveready Teamworkers? If not, fill out the coupon below, mail today and get in line for the big Eveready Daylo and Battery campaigns for the year.

Make the Autoist Your Friend

WITH

BOWSER ESTABLISHED 1865 **Gasoline and Oil Pumps**

Bowser Pumps in front of your store will bring the autoist to you for gasoline and lubricating oils.

This gives you your opportunity to cultivate the autoists desires for accessories, hardware, paint, oils and other lines you handle.

Our literature tells how other merchants have increased their business and profits by use of Bowser Storage Systems.

Ask us to send it to you. No obligations.

S. F. BOWSER & CO., Inc., 66-68 Frazer Avenue TORONTO, ONT.

Is Your Paint Business Going Forward —Or *Backward?*

Unless your paint business is built upon a rock, sooner or later your trade is going to be swept away by a competitor whose paint business **is** built upon a rock—the rock of good judgment in selecting the right line.

Year after year, Stephens' sales increase in volume —each succeeding year means a greater Paint turnover than ever before. **And we always knew it would.**

From the good-will begun the first day Stephens' Paints were manufactured we anticipated our present great volume of trade, because we have always given our customer—your customer—dollar for dollar value.

Stephens
REGISTERED TRADE MARK

Let us explain the Stephens proposition and tell you what it is doing for other dealers.

Around and Around and Around!!!

No human hand can keep up a fixed normal speed

If every owner of a fixed feed separator—especially those who **think** they are skimming clean—could see a chart of the great **variation** in speed during one week's separation, they would be amazed. The chart would show that practically all the time the separator was being **turned below** speed and wasting butterfat. Actual tests prove that 95% of all separators are turned below speed most of the time and all separators are turned below speed some of the time. No matter how careful you are, it is humanly **impossible** to turn at a fixed speed, day in and day out. Speedometers, bells and other contraptions only show how wasteful fixed feed separators are.

SHARPLES SUCTION-FEED CREAM SEPARATOR

SKIMS CLEAN AT ANY SPEED

We again emphasize the vigorous advertising campaign for Sharples—in which the dominant note is the exclusive Sharples feature of "Skims Clean at Any Speed." How convincing is this appeal can be readily grasped from the above reproduction of a Sharples advertisement. Is it any wonder that the Sharples dealer contract is a valuable one — and that the Sharples Separator Company carefully selects its dealers? Progressive dealers are invited to write us. We have a **real** opportunity to offer

The Sharples Separator Co.,

TORONTO, ONT.
REGINA, SASK.

The Lounsbury Co. Newcastle, N.B.

Distributors through all their branches.
"Over 2,425,000 Sharples Separators in daily use."

Barrett Everlastic Roofings

Roofings that you can safely recommend

Everlastic Roofings are made by The Barrett Company, Limited, the largest manufacturers of roofing materials in the world, with 60 years' experience in roofing America's greatest commercial and industrial buildings.

When you sell a Barrett Roofing you can know that you are selling the best, and that your customer is getting his full money's worth in service and satisfaction, and will thank you for recommending it.

Everlastic Slate-Surfaced Roofing

The most beautiful and durable roll roofing made. Surfaced with real crushed slate in soft shades of red or green. The slate not only makes a very handsome roof, but one that is fire- and weather-resisting and very durable.

Remind your customers that this roofing requires no painting and that the colors are fast. Comes in rolls 32 inches wide, weighing about 80 lbs. Nails and cement included in each roll.

Everlastic "Rubber" Roofing

This is one of our most popular roofings. Thousands upon thousands of buildings all over the world are protected from wind and weather by Everlastic "Rubber" Roofing. It is tough, pliable, elastic and very durable, and can be sold at a low price.

It is made of high-grade waterproofing materials, and is a roofing you can sell with perfect confidence that it will give satisfaction to your customers.

Made in 1-, 2- and 3-ply weights, each roll containing enough to cover 100 square feet of roofing surface. Complete with nails and cement for laps, will weigh about as follows: Light (1-ply), 35 lbs.; Medium (2-ply), 45 lbs.; Heavy (3-ply), 55 lbs. per roll.

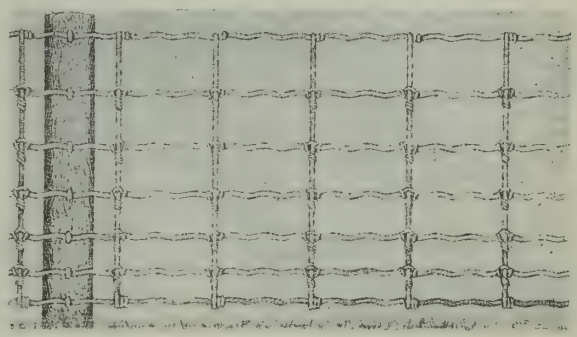
The Trade Mark behind the "Hardware House of Quality"

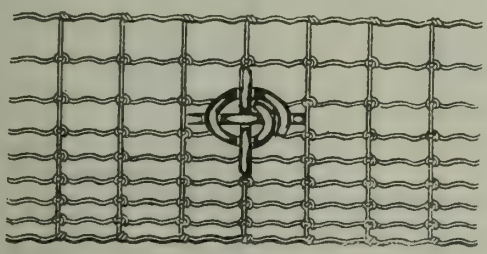
DIAMOND A BRAND — A — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada



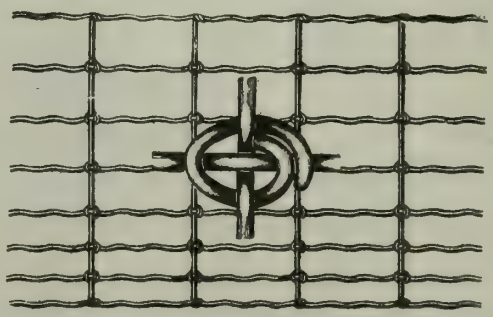
"Diamond A" Woven Wire Fence

List up the farmers in your district. They are all prospects for *"Diamond A" Woven Wire Fence.* The progressive farmer knows the value of a good fence. Show him why *"Diamond A"* gives better service than most other makes. He will experience no unnecessary delay if you are handling this line. We make prompt shipments and the Western dealer through our three large warehouses is sure of a complete stock at all times.



Illustrating Titelock Fastening

This is the method of fastening in our heavy grade fences. A sure and certain fastener that holds throughout the life of the fence.



Heavy Titelock

Horse, Cattle and Sheep Fence. All No. 9 Wire.
Made in two sizes only—H 5-40-9 and H 7-40-9.

Medium

General Stock Fence
Top and Bottom No. 10 Wires, 12 Gauge Filling.

Standard

General Stock Fence. All No. 10 Gauge Wire.

"Diamond A" Woven Wire Fence is made from best quality Bessemer Spring Steel galvanized wire. Every rod guaranteed full gauge wire. Write us for prices and particulars.

PAINTS-VARNISHES
BRAND OF
WINDSOR QUALITY
ENAMELS-DRY COLORS

WINDSOR Solvent Stain is a new and improved Flat Stain or Wood Dye. No other stain just like it on the market to-day.

May be put on over the hardest varnish without injuring the finish. Retains the natural grain on unfinished wood.

Windsor Solvent Stain dries hard in two hours and dust-proof in fifteen minutes.

Hardware Dealers everywhere are experiencing rapidly increasing sales in this profitable line. How about you?

Write us to-day for our interesting proposition.

Talk No. Two Hundred and Seven

We save money for the jobber by carrying a good bunch of his stock as the market declines, and he can sell for less to the dealer and sheet metal worker. Premier-Made-in-Canada keeps right on helping everybody—price, quality and service.

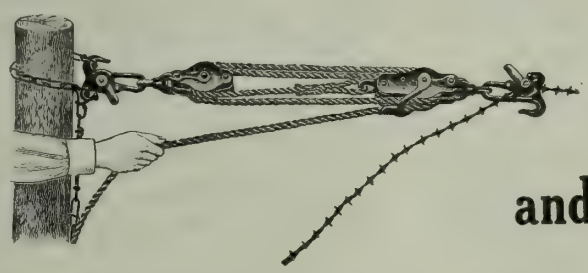
TINKER TOM.

Look for Talk No. 208 next week.

DOMINION SHEET METAL CORPORATION, Limited
HAMILTON, CANADA

TRADE MARK "MORRISCA"

When you see the above Trade Mark on anything pertaining to Fishing Tackle you need have no hesitation in recommending it to your customers.



There is no possibility (except in a few articles) of prices for Fishing Tackle being reduced before next season, so that during the period of transition you would be well advised to place orders well ahead of your every-day requirements.

Orders for future delivery are now being booked, but owing to the great pressure we have had with Government work it will be some time yet before we are able to attain our pre-war output.

Our new General Catalogue is now in preparation, and we are placing on a Register the names of Fishing Tackle Dealers who will obtain a copy on publication. Have you sent in your name? If not, do so now.

In the meantime we invite and welcome your enquiries and will be pleased to quote you for anything we can supply. We are Wholesale only, and all enquiries from consumers direct are referred to the nearest retailer. We don't cut into his business.

Morris Carswell & Co., Ltd.
118 Howard Street, Glasgow, Scotland

Wire Stretchers and Hoists

The Giant, a strong, heavy wire stretcher weighing 10 lbs., and equipped with 23 feet best ½-in. Manilla rope, is easily operated by one man. We also carry smaller Plain and Roller Bearing Stretchers, same quality as the Giant, and like it, held by loose pin and cotter pin so that new sheaves may be added without difficulty. These pins are of too high-grade steel to rivet.

MEHASCO

ANOTHER HEHASCO MESSAGE

32

We carry Hoists with capacities from one to three tons, in double or triple block of the same quality as the stretchers. Get our quotations on these lines.

Canada Factor as Export Nation

Interest in Canada's Growing Industries Shown in Business Being Secured—Canadian Manufacturers in Favorable Position to Handle Trade—War Growth to Extend to Peace Time Activities

PRACTICALLY every paper one picks up to-day shows where business for Canada is being placed by overseas countries, and altogether the outlook is one that promises well. Canadian manufacturers are in a very favorable position to handle export trade. They have well equipped plants and aggressive sales forces are seeking foreign fields so that they can speed up production which must ultimately mean better attention to the home market as well.

The Canadian Trade Commission has secured special concessions for Canadian manufacturers in Great Britain, and it is now possible to secure business on a more equitable basis with other factors in this market. Business from Roumania, Serbia and Greece is being placed and, whereas keen competition will be experienced in the markets of France, Belgium and Great Britain, there is trade there that will represent a very good volume to those going after it aggressively.

One advantage which Canada still maintains in competing for European orders with British manufacturers is that we are in a better position to make early deliveries. Not that the British manufacturer is not foresighted, but he has had to deal with a labor situation of serious character, which has seriously unsettled industrial conditions, and raised the dark spectre of Bolshevism. However, it would seem that British fair-mindedness has saved the situation. The agreements with the coal, transportation and railway workers were reached through the agency of conferences organized by the Government, and the awards were evidently such a determined effort to give fair play and were at the same time so satisfying to "public opinion," as represented by the great bulk of people not directly interested, that a settlement was reached.

Now industrial Britain faces the problem of manufacturing successfully on the basis of the new values of labor and raw materials which have been established. In this connection Lloyd George made it clear that both capital and labor had their problems to solve. Capital had to improve its organization and its methods. Labor had to face the necessity for harder and more intelligent work to justify shorter hours and higher pay. In other words, they would have to work together for the maintenance of production if prosperity for all were to be assured for the future. This is the problem which British industry is now working on. Its solution has an interest for the Canadian manufacturer in competitive export markets. Both capital and labor can find a lesson in the situation.

The question of tonnage is one that is on the minds of many who would do business overseas, for there is no surplus available at the present time, and some orders have been delayed, due to lack of space. For this reason the announcement was recently made that the Canada Steamship Lines have made a start in connection with the trans-Atlantic freight service that was mentioned some months ago, by an affiliation with La Compagnie Generale Trans-Atlantique for a service between Montreal and Havre and other French ports once a week. This company is generally known as the "French" Line, and has a large connection with European ports. It is proposed at the outset to form a subsidiary company, combining the service of the French Line and the Canada Steamship Lines and put on six vessels for a weekly service between Montreal and Havre, the boats running from 8,000 to 10,000 tons dead weight. It is thought that a start will be made about June and during the summer the ships will run direct from Montreal to the French port.

The idea of those behind this enterprise will be to develop the export of Canadian materials from raw to manufactured goods, and that a large number of goods from France will come back in return. It is felt that during the reconstruction period direct service between Canada and France will stimulate trade in various lines that will be required during this period, while gradually building up a permanent line of export.

It might be well just here to quote Lloyd Harris, chairman of the Canadian Trade Commission in London, who in speaking at Leeds recently, said that the aim of the Commission was to create a larger interflow between all parts of the Empire. Canada must no longer be thought of simply in terms of prairies, but in terms of factories. The economic effect of the war had been to change

(Continued on page 117)

Not an uncommon sight in any one of C anada's growing shipyards.

Handling Export Business in Paint

Will Not Come to Manufacturer Without Effort on His Part—Often Necessary to Establish Foreign Factory—Dyes One Line on Which Enemy Has Lost Out

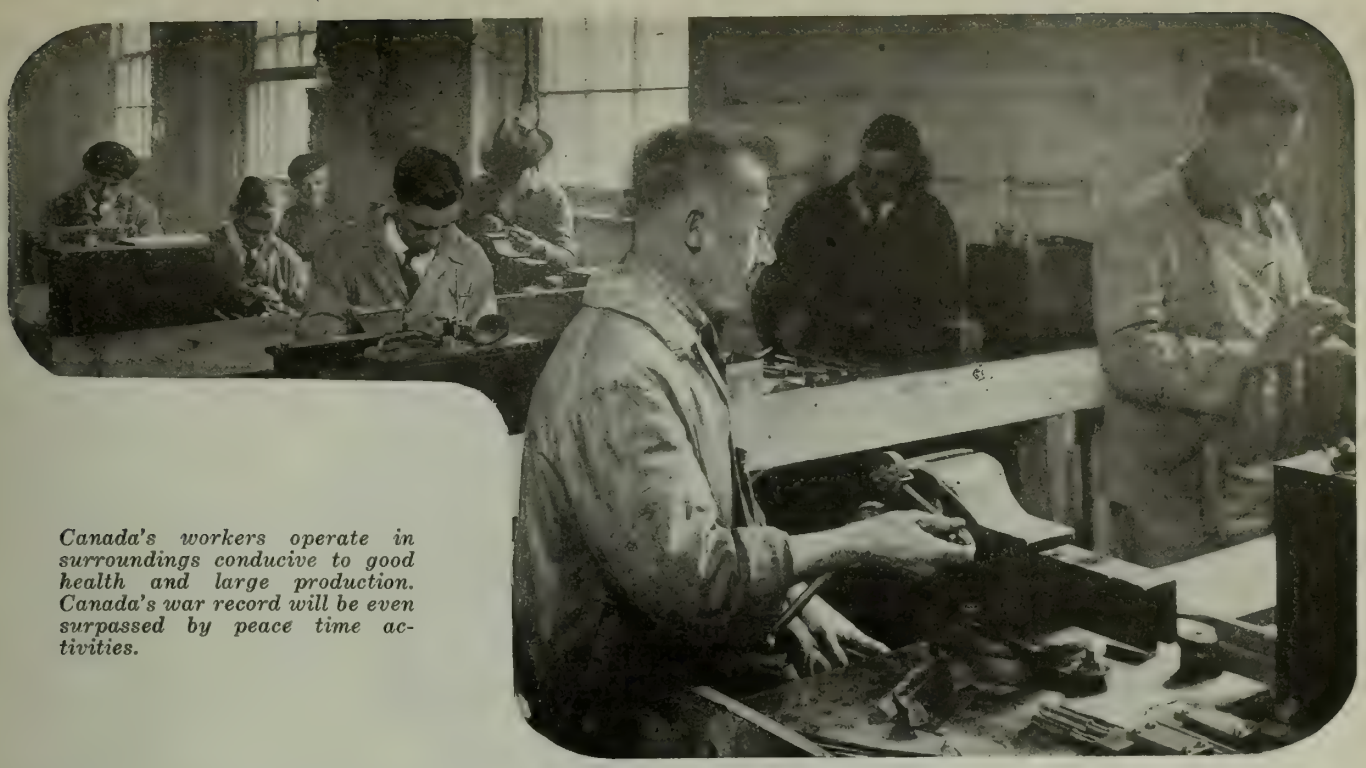
Based on an interview with W. S. FALLIS, Managing Director, Sherwin-Williams Co. of Canada, Ltd.

TIME was when the buyer went to market. He had to. To-day he does not follow this custom, not extensively, at any rate. Therefore the seller must go to the buyer, and he must do so with a will.

In referring to the expansion made by the company of which he is the Managing-Director for Canada, Mr. Fallis pointed out to the Montreal editor of HARDWARE AND METAL, that it had been deemed necessary to establish complete factories abroad. This was the case with their activities in Great Britain, as well as in Australia, and in making decisions of this nature, the whole problem of how to best serve the field it was desired to develop, had to be fully considered. For instance, the methods of the people whose business it was desired to secure, their wishes and their tendencies had to be considered. Not only so, but it might be that existing methods would need to be continued for the time being, even though these did not conform to the established policies or definite wishes of the firm in question. It was a case of good common sense to respect the peculiarities of the prospective buyer, even though it were decided to make a change of policy later. This was better to come about in a gradual manner, rather than in a precipitate fashion.

Using Old Connection

Mr. Fallis referred to the plan that had been followed in England. There, an established and going concern was purchased, and a business built upon the foundation that already existed. True, the plant and general lay-out was not ideal, as viewed from the standpoint of the company with regard to the Canadian and American plants. British policy and taste had to be considered. Many old traditions were in effect that had to be respected. Sales plans had to be considered. It was quite out of the question to make very drastic changes, much as these might be held before the management as ideal. In other words, it was essential to treat the future customer with a sufficient amount of deference. In the case of this company, at least, the plan has worked out well, and changes have been gradually made, so that now, prepared paint sells very extensively in England—to a far greater extent than it did some years ago. Time has worked wondrous change, indeed.



In addition to other plans adopted, the selling end had to be given very careful thought, and salesmen who knew, not the territory only, but the clients it was desired to reach, their tastes and tendencies, were employed to create goodwill and secure actual business.

Unsettled Conditions

Touching more closely upon the immediate prospect for the Canadian manufacturer abroad, Mr. Fallis referred to the unusual and abnormal conditions now existing. There had been, he said, quite a movement in linseed oil. "We have shipped quantities of this to

Canada is becoming a bigger factor in shipping. A merchant marine is on the way which will provide space for Canada's Exports.

Canada's workers operate in surroundings conducive to good health and large production. Canada's war record will be even surpassed by peace time activities.

United States centres," said Mr. Fallis, "and we have also shipped to England. England, again, has shipped to Canada, and we are just informed that 200,000 barrels of linseed oil are being released by the British authorities to relieve the scarcity in Germany."

This goes to show quite conclusively that conditions relative to export are in no way clearly defined. They are not definite. It is difficult to size up a given situation, and in the absence of a defined definite market abroad, the manufacturer who has not established connections abroad would be inclined to hesitate.

This much should not be forgotten by the manufacturer. There has always existed demand for goods of various manufacture, in other countries, and the only way in which the situation can be understood, if export is desired, is to secure first-hand information by making a survey of the foreign markets one would serve.

What Germany Lost

"There is one line of business that has been developed to a very extensive degree, and so much so that Germany will never get her trade in it back again, and this is in dyes. We have, ourselves, over $3,000,000 invested in this industry alone, in our plants on this continent, and there is a very large business. This trade has been secured and the dyes are very satisfactory. It is one of the big industries to-day." Other large firms are also turning out big quantities of dyes.

The dye business was developed as a result of the desperate needs of the trade for these goods, shut out after the nations had become engaged in deadly combat. It illustrates most clearly, how resourcefulness comes to the aid of those who face the most serious and impossible situations with a determination to master them and solve them. It is a case in point which bears effectively upon the contention borne out above, that the manufacturer must be aggressive.

Intensify Home Effort

Desirable as the development of an export trade may be, Mr. Fallis is an enthusiastic supporter of greater industrial expansion at home. He believes that industry can be made the stronger in Canada if there is a wide support, by the people, of their own industries. In speaking of this great development, he referred to the neighboring republic of the United States, which has so developed industry at home, that prosperity has grown apace to a marvellous extent. And, if the development at home is large, it will make the development abroad the more possible in a big way.

Particularly, should the rural population seek Canadian-made goods to a greater extent than formerly. A better understanding and greater co-operation from this element, in the purchase and use of Canadian products, would be a desirable thing indeed.

Just what the future status of Canada is, as an export nation, Mr. Fallis thinks will manifest itself in time. It is probable that those lines which she is particularly in a position to supply to best advantage, and those which are naturally hers, will meet with early and increasing favor. Development in lines that are really free to the world, will have to come through regular channels of competition. Labor, being high the world over, it is possible that Canadian manufacturers can at least make a strong bid for a large trade abroad.

CANADA FACTOR AS EXPORT NATION

Continued from page 115

Canada within four years from a primarily agricultural to a predominantly industrial country. In the year ending March, 1914, the value of exported manufactures was $57,000,000, against agricultural exports valued at $198,000,000. In the year ending March, 1918, the value of exported manufactures was $636,000,000, against the value of exported agricultural products of $567,000,000.

With one-thirteenth of the population of the United States, the value of the exports of Canada has been one-sixth as great as those from the United States during the last two years, in spite of the heavy drain upon the man power of the country. In the year ending March, 1918, export of the United States was per head of the population, $56.75, against the same item for Canada of $140.25.

This, it may be said, was largely due to munition business. Granted even that it was, the record is an excellent one. Canadian manufacturers who have been so aggressive and built up large plants to handle this business will show peace time foresight, and go after the export trade aggressively. Canada is in a very favorable position to handle export business; give her representatives a hearing.

Canada Must Show World Her Wares

Great Opportunities Before Manufacturers if Embraced Now—Buyers Will Not Come to Market—Representation and Samples Needed—Outlook Encouraging

THAT Canada has an opportunity of entering the markets of the world with her products, and of landing a large amount of business, is the opinion of W. E. Duncan, president of the Export Association of Canada, Limited, Montreal. "But she must speed up," declared Mr. Duncan to HARDWARE & METAL. The business will not come to Canada,—Canadian manufacturers must go after it, and they must do so without delay.

Asked as to whether Canadian steel products could be sold abroad on a competitive basis, and if she could hope to attain, and then retain any trade connections that were made, Mr. Duncan was equally definite as to the favorable outlook. "Unquestionably," he said, "she will be able to send her steel and iron products abroad, and to sell them in competition with other manufacturers."

Must Develop Action

Canadian manufacturers must be alive to the opportunity that awaits them, Mr. Duncan said. It is very certain that the buyers abroad will not come to Canada and ask for a given product. It is a matter of placing a cut-and-dried, definite business proposition before the prospective buyer. In other words, it is necessary to say,—"Here's my sample, it is worth so much, how many do you want?" With this, the necessity of being able to deliver is indispensable, and particularly at the present time.

Mr. Duncan pointed out that cables were received every day, asking for definite offers. Some wanted samples. There was a very marked interest abroad, and enquiries coming to hand were for many varied products, the prospective buyer wanting definite data as to price, quantity, etc. The need of the hour, if export business was to be secured in a large way, was that of being right on the spot with the order book, and in a position to deliver without delay.

Samples to be Sent

Those countries which developed a large foreign trade until the outbreak of the war, Mr. Duncan said, had been very attentive to the foreign trade. They had collated a great deal of information in catalog form. This was carefully compiled, and a large amount of information was to be found within the covers of this book. It was a most complete compendium of information, giving, as it did, a very comprehensive list and description of goods made in the country from which it came. Everything from "fish hooks" to "white elephant skins" was catalogued. But this was not all. Thousands of samples were available for the examination of the buyer, and he was enabled to select what he wanted, place his order forthwith, (for there was an agent to take it), and in this way the export of the country wishing to do business abroad, increased in large volume.

Some such plan as this must be followed by the Canadian manufacturer. "He must realize," said Mr. Duncan, "that the buyer in England, in Italy or in France, knows nothing about him. It would seem, sometimes, that the manufacturer here overlooks that fact. He must speed up and go right after this business."

Outlook Promising

Indications are not lacking that there is a big development ahead in the way of export trade for Canadian manufacturers, said Mr. Duncan. Already a great deal of business has been placed with various makers in this country, and it is unquestionable that more business will come.

"But what of the future?" HARDWARE AND METAL asked. "Canada should be able to compete with other countries in the sale of manufactured goods, but she will have to do so by speeding up production. She also may have to be satisfied with a closer margin of profit," said Mr. Duncan.

Not only were enquiries coming to hand for many kinds of goods, but actual orders were received. Only Canadian-made products were considered by the Association, and it was the intention to develop business with this end in view.

In speaking of the cost of production, Mr. Duncan referred to the present high wages paid to labor. "But I am well aware that wages are also higher abroad," he continued, "and Canada need not fear because she has to pay high wages. Other countries have the same problem, and this outlay need not discourage the manufacturer."

An Important Point

Referring again to the sending of samples abroad, to be shown by agents to the prospective buyer, Mr. Duncan stated that a great deal of real carelessness was exhibited. He mentioned a case in point.

"One enquiry was made for samples of a certain kind of small nails. A few packages of these were sent forward to England. When they arrived in London the packages were only about half filled, and there were only a few of them. With twelve or fifteen wishing to see these, there were not enough to go around, and then there were none left to show other buyers." It was essential that a generous supply of samples be sent forward, and not a paltry handful.

Given the attention it merits, Mr. Duncan is most enthusiastic regarding the prospect for sales development abroad.

Many Opportunities to Sell Canadian Woodenware Reported

WRITING from London, England, in connection with the demand for Canadian woodenware and wooden goods generally, Harrison Watson, Chief Canadian Trade Commissioner, says:

"The chief articles required include handles of all kinds—broom, tool, implement, etc.—dowels, washboards, domestic and kitchen woodenware of all kinds, and small turned goods.

"While in the past Canada has occasionally sent consignments of some of these goods to Great Britain, prices obtainable here were often unattractive in comparison with those procurable in the home market, and another obstacle in the way of profitable trade is that, whereas factories in competitive countries, equipped with automatic or other perfected machinery, run upon a single article, or size of article, for a number of days, and thus are able to turn them out with the lowest possible cost of production, the majority of the Canadian factories make a large variety of articles in small quantities, which obviously increases the cost of same.

"For over two years the importation of almost every kind of manufacture of wood has been prohibited into the United Kingdom, and although some small production of certain lines has been carried on here, the quantities were quite insufficient to meet the requirements of the country, and at the time when hostilities ceased the country was practically bare of stocks, and prices had risen to an extraordinary level.

"With the withdrawal of the import restrictions in favor of Canada a few weeks ago, a unique opportunity has been created for Canada, because it is now impossible to import supplies of wooden goods from countries outside of the British Empire, and this office has for the past few weeks been receiving a constant stream of enquiries from firms of all kinds as to the possibilities of their being able to purchase from Canadian manufacturers almost every kind of wooden goods which were formerly bought from foreign countries."

Canadian Pioneers In The Metal Business

We have a Dominion-wide reputation for high grade metals. Harris Heavy Pressure maintains its SUPREMACY and for 30 years the Canadian trade has acknowledged the fact that this Babbitt Metal is without an equal.

A quick rub with Waxit will make it shine like a mirror

Every car owner has been in a predicament just like this man. Almost time to take the car out. He wanted to make a good impression. And he didn't know the car needed a polish quite so badly. Waxit saved the day for him. It will save the day for you too, time and time again.

The Perfect Polish

Waxit

Fine for leather fabric tops and upholstery, too.

You have no idea how quickly the dirt and streaks will come off and how quickly a brilliant polish will take its place by using Waxit. Just moisten a cheese cloth and apply lightly.

One application cleans and polishes. No odor. No hard rubbing. Waxit leaves a dry surface that does not catch dust like oily or greasy surfaces.

Waxit benefits the finish. It's used by the most particular people for their mahogany furniture and pianos. Used on your car it will prevent checking and keep the varnish live and elastic.

WAXIT SELLS AND REPEATS
BECAUSE CAR OWNERS FEEL SAFE IN USING IT

It benefits the finish, makes it live and elastic. Keeps the car new looking. Nothing else equals Waxit for quick results, for brilliancy of finish, for giving the kind of satisfaction that means REPEATS.

NUMBER ONE

IN 1896, Wilbur Wright and Orville Wright of Dayton, Ohio, decided to abandon several small business enterprises in which they were interested and concentrate their entire force and inventive genius on the perfection of a flying machine. Up to the time they entered the field no one had ever studied the subject with such scientific skill or such undaunted courage.

The Wright Brothers were masters in all their work. After years of concentration they gave to humanity a gift which ranks in importance with the noblest achievements the world has ever known.

The secret of Wright Brothers' success was

CONCENTRATION

The same principle of concentration, which enabled the Wright Brothers to perfect their Airplane, has enabled us to create the Victor Hack Saw Blade—which is recognized everywhere as the last word in Hack Saw Economy.

For twelve years we have focused all our force on the perfection of this one tool—the Victor Hack Saw. We have centered our powers on making exhaustive experiments and on the development of new processes.

Logic told us that by concentrating all our energies on one tool, we were more likely to produce a Hack Saw Blade which would excel all others, than if we tried to perfect a dozen or a hundred different tools.

As a result of this concentration, we have created the most enduring and efficient Hack Saw Blade known to science. There is nothing vague about the economy of the Victor Hack Saw Blade. It has been proven.

The Royal Fireless Cooker

A Profitable Line for Summer Sales

Here is a line that every Hardware Dealer can sell during the summer months. A splendid parallel to stove lines and just as profitable.

One of these cookers displayed in your store will attract the attention of every housewife-customer.

The Royal Fireless Cooker saves fuel, time and the annoyance of disagreeable odors. Cooks food better and at less expense. Its numerous and varied convenient features make it easy to sell.

Royal Fireless Cookers can be supplied with an **Electric Element** for attaching to any lamp socket.

It will also pay you to investigate our **Steam Cookers** that cook a whole meal at one time.

Write for catalogue, price lists and information regarding the wonderful selling possibilities of these FIRELESS COOKERS.

"ACME" SHEARS AND SCISSORS ARE STANDARD

For Low-Priced Cutlery

Canadian Buyers Can Increase Their Shears and Scissors Sales by Adding Our Numbers to Their Stock.

We are the leading and largest Scissor makers in the world, producing about 35,000 pairs daily.

"ACME" BRANDS, famous for their strength and durability, and with their specially hardened cutting edges, are being maintained to the high standards of quality and finish we have established.

Realizing the importance of prompt service to orders, we are now in a position, on account of improved manufacturing facilities, to give all Canadian orders special service.

Our Canadian representative at Toronto will be pleased to show our samples to you, or have his traveller call on you.

We would esteem it a favor to demonstrate through a trial order the excellent goods we furnish and their fast selling ability.

Have you seen our new No. 5 Catalogue? Let us mail one to you.

LANE'S HANDY AUTO RATCHET TOOLS

FORD SET

Contains—1 Handle, 7 inches in length; 2 Screw Driver Bits; 1 Extension Bar, 6 inches in length; 6 Sockets to fit all nuts and bolt heads on Ford cars, including the cylinder head. Put up in strong leatherette case. Weight, 22 ounces.

STANDARD SET

Contains—1 Handle, 7 inches in length; 2 Screw Driver Bits; 7 Sockets to fit all size nuts in U.S. Standard from ¼ inch bolt to ½ inch bolt; S.A.E. Standard from 5-16 inch bolt to 11-16 inch bolt. Cap screws from 5-16 inch bolt to ⅝ inch bolt. Put up in strong leatherette case. Weight, 18 ounces.

The **"Standard"** and **"Ford"** Sets of the Lane **"Unique"** Ratchet Wrench and the Lane **"Super-Unique" Ratchet** Wrench Set, together with the Lane **"Unique"** Off-Set Ratchet Screw Driver, present unusual selling opportunities for the dealer.

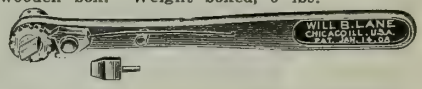
All Lane's Ratchet Tools are durable products. Machine-made, sockets turned from Grade "A" cold rolled steel, case hardened, Pawl and Ratchet Wheels milled, handdles drop-forged and case hardened.

Their ability to perform tasks, where other wrenches fail, make them easy to sell.

Your jobber has them.

Manufactured by

WILL B. LANE



180 N. Dearborn St.

CHICAGO, ILL.

SUPER-UNIQUE SET

Contains—1 Drop Forged Handle, 9 inches in length; 1 Extension Bar, 8 inches in length with thimble attached; 15 Hexagon Sockets to fit all size nuts within 7-16 to 1¼ inches **broached opening.** The sockets fit all S.A.E. standards from ¼ to ⅞ inches. U.S. standards from 3-16 to ¾ inches (bolt). Cap screw sizes from ¼ to 1 inch. Put up in strong wooden box. Weight boxed, 6 lbs.

OFF-SET RATCHET SCREW DRIVER

Consists of—1 Six-inch Drop Forged Handle, polished and case-hardened; 2 Size accurately milled Screw Driver Bits made from the highest grade screw driver steel and oil tempered. Bits are interchangeable and can be removed and replaced in one second. This article is fully warranted. Weight, in paper box, five ounces.

NORCROSS *GARDEN CULTIVATORS*

Have Revolutionized Gardening

These simple inexpensive little implements do more and better work than the old fashioned hoe, with decidedly less labor. They work the soil closer to plants without injury than any other type of tool known.

Suited to both men and women. Come in three sizes: 5 prong and 3 prong sizes with 4 foot handles, and the Midget (for flowers) with a 9 inch handle. **Quality the very best throughout**—detachable steel prongs, malleable head, finest quality handles. The sharp tapering shovels pulverize the ground thoroughly from one to five inches deep and leave it loose, level and untrampled.

More than a million in use in America—thousands are being exported. No garden is too large or small for the profitable use of a "Norcross."

We desire to make agency arrangements. Write for prices and sample direct or through your New York buying agents. Reference: Any Bank in America.

WILSON FEARED THE BRITISH

THE American President crossed the Atlantic in the first place with the idea in his mind that his ideals would be thoroughly in accord with those of the French statesmen; but he was rather afraid of a conflict with the British delegates. He found in reality that his plan for peace terms was as far removed from the French plan as the two poles. Then he crossed to London and was surprised to find that the ideas of the two Anglo-Saxon powers were identical.

This situation, according to J. W. Dafoe in the May issue of MACLEAN'S MAGAZINE, explains much that has developed at Versailles. Further, it contains the promise of a close *rapprochement* between the two great English-speaking democracies for all time to come.

Mr. Dafoe has contributed a remarkably interesting article to this number of MACLEAN'S, lifting the curtain on many of the puzzling situations that have arisen overseas. As the editor of the Manitoba *Free Press,* he is the dean of Canadian newspapermen; as the representative of the department of Public Information on the Canadian Mission to the Peace Conference, he was in a special position to learn what was transpiring. He tells of the really big part that Canada has played in the Proceedings and points out that Canada's status as a nation was firmly established in the eyes of the world when she was allowed separate representation.

A Dozen Other Features---Nationally Important

This May issue is full of articles of unusual significance for Canadian readers.

"SOLVING THE PROBLEM OF THE ARCTIC"
—By Vilhjalmur Stefansson

The second instalment of his remarkable story of the four years of exploration that he undertook for the Canadian Government in the region of the "Pole of Inaccessibility"—a harder place to reach than the North Pole.

"ORGANIZING FOR PEACE"
—By George Pearson

An article of the Great War Veterans' Association by a well-known author-soldier.

"THE CANADIANS IN SIBERIA"
—By Capt. W. E. Dunham

A graphic story of what our forces did in combatting the Bolsheviki, by an officer who has just returned.

"SAFE IN THE SADDLE"
—By J. K. Munro

A review of affairs at Ottawa in which the opinion is expressed that Union Government for the time being is safely entrenched.

The National Idea

The articles in this issue of MACLEAN'S reflect the national idea—Canada's part in the Peace Conference, the political situation at Ottawa, the exclusive report of Stefansson's national explorations, the national organization of our returned men, the work of our forces in Siberia. The reader of MACLEAN'S gets a broad idea of what Canada as a whole is doing. The value of this issue— and of all issues —is very great, therefore, from an educational standpoint.
MACLEAN'S is the one magazine that should be selected for young Canadians to read.

Four capital stories by famous authors—W. A. Fraser, Lloyd Osborne, Frederic S. Isham and C. W. Stephens.

The Review of Reviews

An unusually fine array of articles is given in this department, selected from the best in magazines and periodicals the world over. Some of the titles are:

Planned to Destroy British Fleet.
How Mackensen Was Caught.
Events of War Foretold by Stars.
What is Life Like Beyond the Grave?
A High-born Bolshevik.
The New Life in Dry America.
Germans Were Ready to Capitulate.
Japan's New Foreign Policy.
The Many Kings of Jerusalem.
Is British Foreign Office Against League?
Ambassador Tells Story of Peace Ship.
Hindenburg—After the Armistice.

REMINGTON
UMC

Customers' Satisfaction—Dealers' Profit

DID you ever get down on your hands and knees to clean floors? Any one who has had that experience can realize the joy of a housewife when she finds that, with the use of an O-Cedar Polish Mop she does not need to get down on her hands and knees; bend or reach, crawl under beds, move heavy furniture or use the step ladder. Imagine her delight when she realizes that she can actually do her work **better, quicker** and **more easily** than she ever could before.

O-Cedar Polish Mop

has many distinct advantages.

Foremost is the fact that it is treated with O-Cedar Polish—the Polish which contains no injurious substances and is used on the finest furniture and automobiles.

The best of materials and workmanship are used in the manufacture of the O-Cedar Polish Mop. The steel centre and fasteners make the Mop practically indestructible.

The position of the socket of handle gives the mop centre pressure and enables it to reach under very low places.

Every Polish Mop is placed in an attractive lithographed can which can be used when Mop is not in use.

Every O-Cedar Polish Mop is fully guaranteed which means if, through fault of materials, the mop should become broken, we will repair free of charge if the damaged Mop is sent direct to the factory by parcel post.

O-Cedar Products are good for you to sell and good for your customers to buy. Bring O-Cedar Products to your customers' attention and you will sell them in such quantities as to make the O-Cedar trademark an important feature of yours in the building of your business.

CHANNELL CHEMICAL CO. LIMITED

TORONTO

HARDWARE AND METAL, May 17th, 1919. Vol. XXXI., No. 20. Published every Saturday at Toronto. Yearly subscription price, $3.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under the Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.

—*the song of the mower*
—*the clink of the dollar*

The rainy spring means an abundance of grass to cut—lawn mower sales for you—good profits—if you sell the right kind.

We carry a good stock of the best makes — all styles — all sizes — prices to suit every call you will have.

Included in our range are such well-known makes as:

Taylor-Forbes "Woodyatt" in 12, 14, 16 and 18 inch.

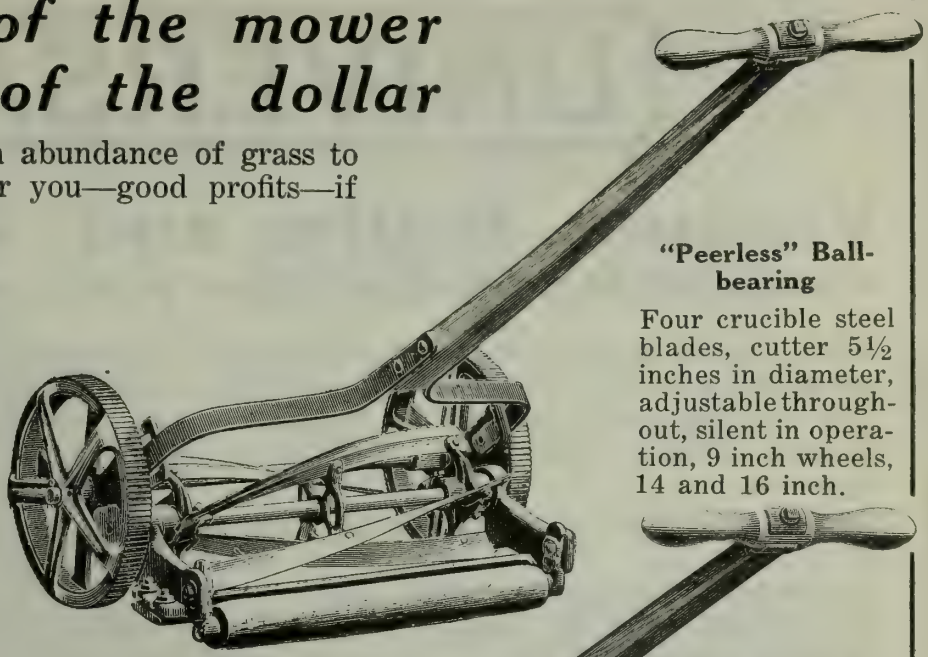
Taylor-Forbes "Empress" in 14, 16 and 18 inch.

Taylor-Forbes "Daisy" in 14 and 16 inch.

Pennsylvania in 17 and 19 inch.

Pennsylvania Keystone in 17 and 19 inch.

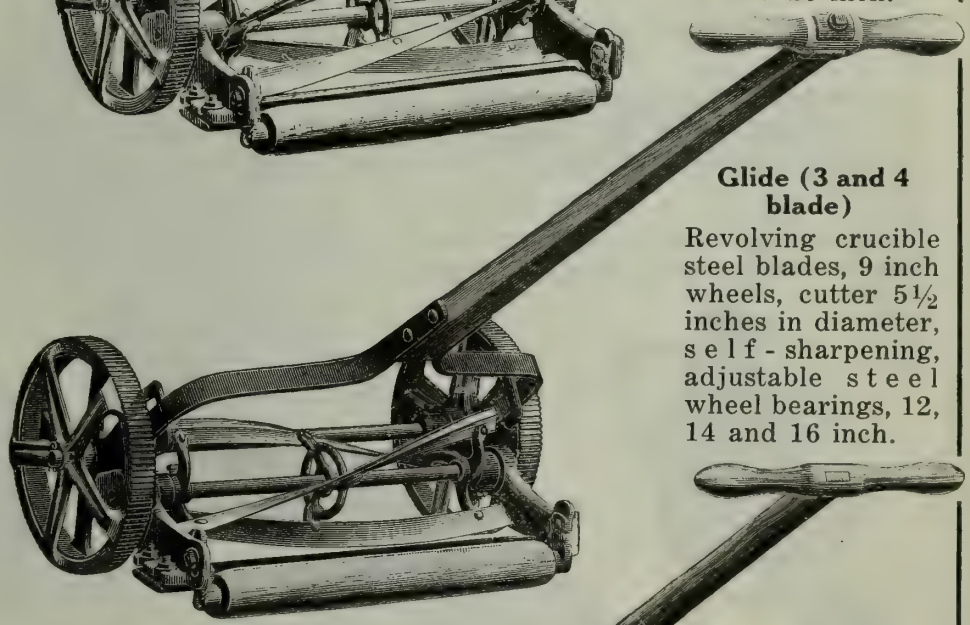
The **Dille & McGuire** line—popular imported mowers, including:



Perfection in 14 and 16 inch.

Glide (3 blade) in 12, 14 and 16 inch.

Glide (4 blade) in 12, 14 and 16 inch.



Peerless in 14 and 16 inch.

We recommend any of the above lawn mowers and advise the placing of sorting orders as early as possible.

"Peerless" Ball-bearing

Four crucible steel blades, cutter 5½ inches in diameter, adjustable throughout, silent in operation, 9 inch wheels, 14 and 16 inch.

Glide (3 and 4 blade)

Revolving crucible steel blades, 9 inch wheels, cutter 5½ inches in diameter, self-sharpening, adjustable steel wheel bearings, 12, 14 and 16 inch.

Perfection (Raised Gearing)

Eight inch wheel, 5½ inch cutter, high speed, light running, thoroughly adjustable, continuous cut, self-sharpening, 14 and 16 inch, moderate price.

We carry the Bateman & Wilkinson farm and garden wheelbarrows in sizes 1, 2 and 3.

This is a good time now to stock a few of these. Show them with your gardening implements.

We appreciate your enquiries and orders

UNIVERSAL

Vacuum Bottles and Accessories

FOR EVERY SEASON--FOR EVERY PLACE--ALL YEAR SELLERS

When you tell a customer that "UNIVERSAL" Vacuum Bottles are superior, you are not spinning selling fiction. You don't have to hedge, back down or hunt for an alibi. You can prove what you say as fast as you say it. Show the exclusive patented features of the "UNIVERSAL" line—supremacy will be evident without extended argument.

Show how the spring steel holder grips the filler firmly in place and absorbs all bottle-breaking shocks. Note the absence of insanitary felt pads, cork rings and cement fastenings. See how the rubber gasket around the neck of the bottle prevents leakage into the case. Bear in mind that thorough tests have shown the greatest temperature-retaining efficiency is found in "UNIVERSAL" Bottles.

"UNIVERSAL" Vacuum Bottle with extra cups is a patented UNIVERSAL feature. Whenever you sell a Vacuum Bottle, show the nested cup feature and you've added another selling point to your story.

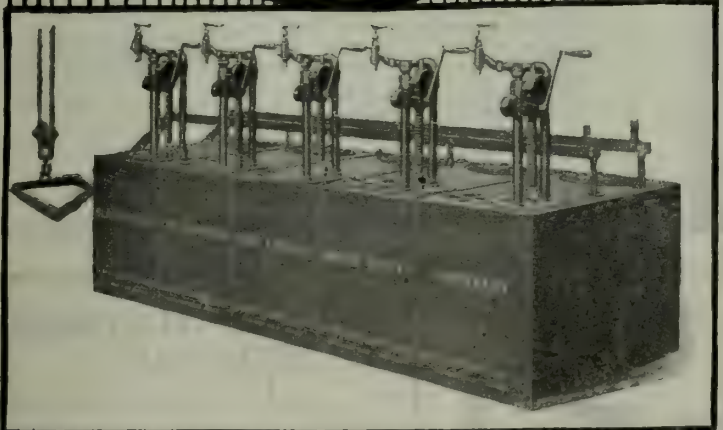
No. 1.



Modernize Your Store with a Gilbert & Barker Oil Storage System Save Oil and Money

For handling paint oils, varnishes and heavy, "gummy," non-lubricating oils our T221-H spells maximum efficiency.

This outfit may also be used for lubricating oils and units may be arranged in battery form as shown below.

They make an attractive and economical arrangement, and as they are fitted with chain hoist, barrel dash, track and cradle, the oil is easily emptied from barrel to tank by gravity, which allows thorough draining without waste and this operation can be completed by one man.

These units or batteries are nicely finished in green enamel baked on and the tanks are plainly lettered with the names of the oils when so desired.

Follow the Leaders

A safe, sane policy, especially when the leaders are the big, progressive men of the country, men who adopt an improved system only after they are thoroughly satisfied that it means greater efficiency and consequently greater profits.

The cost of installing Gilbert & Barker Oil Handling Equipment in your store is nominal and the saving in time, labor, and positive elimination of waste quickly pays for the installation.

For the rapid and economical handling of paint oils, varnishes, lubricating oils or kerosene, there is a Gilbert & Barker outfit just suited to your requirements, and if you are handling gasoline, remember that the G. & B. line of Pumps and Tanks is complete.

Bulletin 52 tells the story in a very comprehensive manner

To-day is a better day than to-morrow—write.

4 Good Reasons ---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

IMPORTANT ANNOUNCEMENT

"RELAX"

"TRIPLEX"

Chicago, May 15, 1919.

Gentlemen:-

IMPORTANT

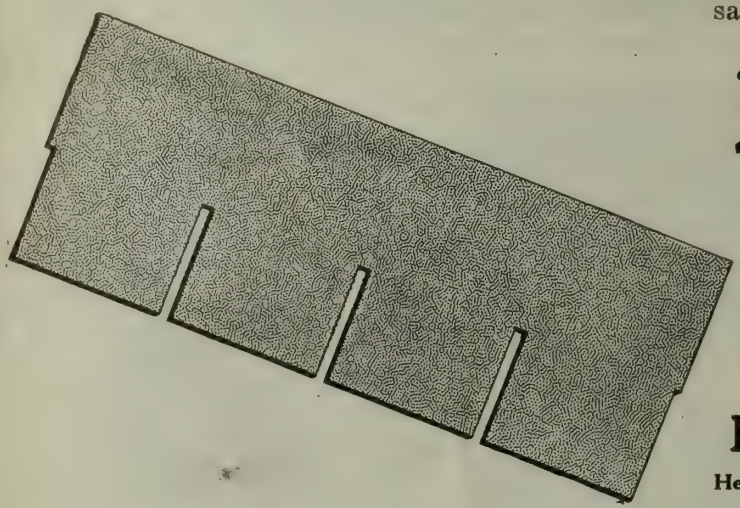
We have issued a complete catalogue No. M36.

This catalogue has many additions, as well as CHANGES IN LIST PRICES from our previous catalogue.

It is therefore important that you immediately DESTROY ALL PREVIOUS EDITIONS. It is furthermore important that everyone in your firm who has the old catalogue, be instructed to destroy it and request us to forward them the new catalogue.

Will you attend to it?

Very truly yours,



CHICAGO SPRING BUTT COMPANY

OUR NEWEST LINE

A MONEY MAKER

The Brantford Asphalt Slab Slate—FOUR Asphalt Shingles in one—has made a big hit.

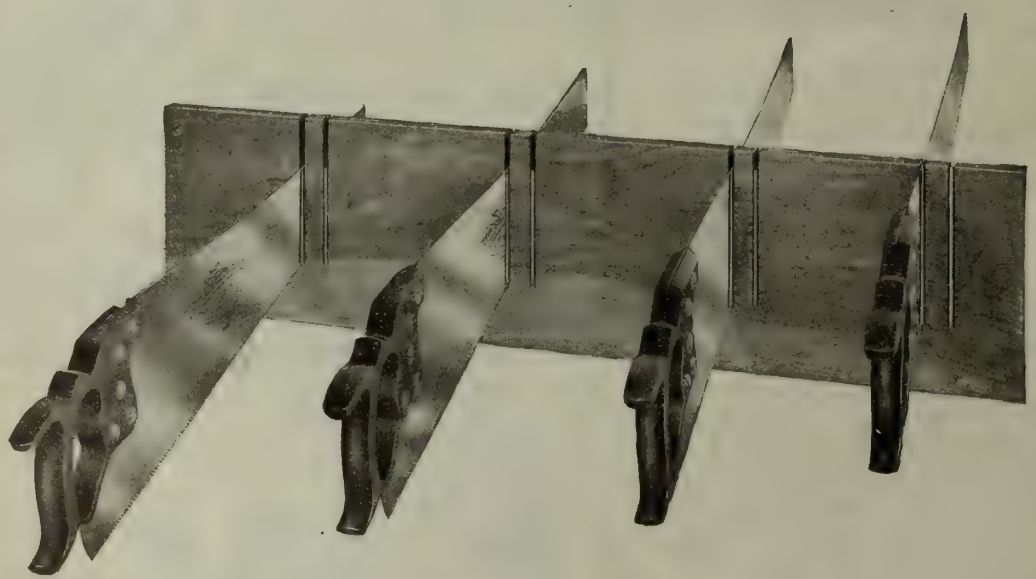
Progressive dealers see its selling possibilities at a glance. Roofers welcome it, because of the ease and speed by which it may be laid.

Brantford Asphalt Slab Slates are so cleverly designed that a roof laid with them has the appearance of being covered with individual Asphalt Slate Shingles.

For roofing big buildings, Brantford Asphalt Slab Slates are particularly useful, saving time, labor and requiring fewer nails.

Write for further particulars about the

Brantford
ASPHALT
Slab Slate



and our other lines of Brantford Roofing—a nationally advertised, big selling roofing, made by a purely Canadian company.

Budget—Budget—What's in the Budget?

Speculation Rife as to What Finance Minister Will Set Forth—Opposition Leader's Views Cause a Sensation—Low Tariff Element Seems to Have Subsided

OTTAWA, May 15.—Sir Thomas White recently announced that the budget would be brought down about the middle of May, and speculation as to what it will contain naturally grows keener; but expectations, as far as the low tariff wing in Ottawa is concerned, are not great. In fact, some of the most radical of the Western low tariff men are understood to be becoming reconciled to the fact that they will have very little to take back to their constituents in response to those telegrams which, during the session, have poured in on them thick as the leaves on Vallombrosa. Even Mr. Maharg who, during the early part of the session, in an interview with a MacLean representative declared that the War Tax of 7½ per cent. had to come off first shot out of the box, before attacking the main tariff, has now come around to the view that a reduction of the War Tax on necessaries will be about right; and he, like many other Western tariff reformers, will accept a considerable reduction from his early "ultimatum."

The Opposition Leader Speaks

When the Leader of the Opposition announced in the most casual way in the House on Friday, that he was a protectionist, he further added to the extraordinary mix-up which Parliament presents this session. Mr. McKenzie's exact utterance, which promises to become more or less historic in the annals of the Liberal party, was as follows: "While I am not a very high protectionist, I am not in favor of the tremendous wall which my friend from Peterboro (Mr. Burnham) would like to build; but I cannot help knowing that protection of certain industries has done much for this country. I cannot help knowing that in connection with this very plate industry we are talking about and the institution of the steel works at Sydney, those steel works have furnished a market for our Nova Scotia coal and employment for thousands of colliers who to-day would not be employed were it not for the assistance which the Government in the early stages gave to the development of our steel and iron industry."

Caused a Sensation

It is not too much to say that this utterance caused a sensation. It was a formal announcement of the well recognized fact that, so far as the tariff goes, there is little or no difference between the two parties. The only free traders now in captivity are the few doctrinaires who air themselves once a year at the Grain Growers' convention, where even their leaders no longer agree with them.. Mr. McKenzie's own following is divided, however, and apparently had no idea that he was about to make the pronouncement he did. One of them afterwards expressed the view that he thought his leader had temporarily lost his head; and that he certainly did not represent his—the speaker's—views. Officially, the Liberal party is still anti-protectionist, and old Liberals have to talk like this; but, actually, there is not much doubt that the two parties are to-day not very far apart on the tariff. Strong evidence of this is found in the fact that a paper like the Halifax *Morning Chronicle*, which has been known as the Liberal Bible in Nova Scotia, is now openly in favor of a reasonable protective tariff. The action of the Leader of the Opposition was, no doubt, considerably influenced by the fact that his constituency is located in the centre of the steel industry in Nova Scotia; but his personal hold on the constituency is so strong that he does not require to sacrifice his ideals, and he was no doubt speaking from considered convictions. It may indicate the line which the majority of Liberals will take at the convention called for next August; but, if so, there is likely to be a lively convention.

Poor Political Tactics

But, however it is looked at, it was a very poor exhibition of political tactics. It made the amendment proposed by

Mr. McMaster some time ago look more foolish than ever, and it was considered foolish enough when proposed. It materially strengthened the tactical position of the Government, which has been considerably embarrassed by the attacks of the Western members. It placed those members themselves, and also the member for Red Deer, Michael Clark, definitely in the class of political orphans. Dr. Clark has already moved away from the Government side, and over to the cross-benches; and it would not be surprising to see members like Mr. Maharg, of Moose Jaw, Mr. Read of Yorkton and Mr. Andrew Knox of Prince Albert soon follow him.

Low Tariff Men in Difficult Position

The position of the Western low tariff men like those mentioned has become very difficult. They seem to feel that their case for tariff reduction is practically lost, so far as the present session is concerned. They expect very little consideration from the Government, and have now little reason to cast in their strength with the Opposition.

What of the West?

From the experiences of the Western low tariff men in this Parliament, it would not be surprising if the future should bring about new political alignments in the West. The Western members are having the conviction forced on them that the low tariff sentiment is considerably less powerful in Canada than it seems at an enthusiastic convention of the Grain Growers in Saskatchewan. Apart from that Province itself, there is no part of Canada where protection is really in bad odor. Eastern people are sometimes inclined to think that the West as a whole is low tariff, but this is far from being the case. In British Columbia, sentiment is in favor of a protective tariff, with the lumbermen and the fruit-growers both favoring it. Alberta and Manitoba are far from being solidly anti-protection. Saskatchewan alone can be called a stronghold of the low tariff party. The Western members who were so vociferous in the early part of the session are beginning to realize that the East is a pretty big factor, and that there is mighty little purely free trade sentiment left in it.

In Alberta, I notice that the Grain Growers and Nonpartisan League is having a sort of rapprochement. Sometime ago the possibility of a union of forces on the part of certain Western electoral powers, such as the labor and agrarian parties, was suggested. If the West is to effect much in Parliament, some such union of forces will probably be necessary.

The time seems rather a crucial one for the West, nevertheless. There has been so much protest and threatening from that quarter all this session, that the House is rather interested to see just how much bluff there was in it. The high tariff men, who have been urging the Government to stand pat, have always minimized the sincerity and the seriousness of this Western agitation, claiming that it was largely froth, and would not be crystallized into action. If no substantial reductions are now made in the tariff and th West stands for it patiently, it is certain that the high tariff sentiment, both in the country and in the Government, will be greatly strengthened and heartened.

The Western men are, therefore, between the devil and the deep sea. The Opposition (which is nothing if not independent, so far as attempting to attack supporters is concerned) does not appear to care whether it adds to its members in the House or not. About the only thing the Western low tariff men can do to express their disapproval is to form a wing of their own in the House; and there is not a sufficient number of them to make much of a hit.

The longer this question is before the House, the fewer become the out-and-out low tariff men, even from the West. Mixing daily with members in the House who are either moderate or high protectionists, their attitude inevitably becomes affected to a certain extent by the company they keep. They feel somewhat like the obdurate juror, who holds out against the other eleven. Few men have the courage to maintain an extreme position to its extreme limit among men with whom they mix intimately every day for months.

Hence we see Mr. Maharg, the protagonist of low tariff, much more vociferous when in the West than he now is in Parliament. Perhaps this is due to some extent to the fact that while here he is not immediately under the eye of Mr. Musselman, secretary and moving spirit of the Saskatchewan Grain Growers, who has always influenced his opinions a good deal. Mr. Maharg is said to be a Tory at heart, and has a stout Tory brother at Brandon. At all events, if he does not receive more comfort from the budget than is now anticipated, and takes it without some emphatic action, the protectionists of the East will take fresh courage and the Grain Growers of the West are likely to get a new leader.—T.M.F.

MAY BE FIRST TO FLY ATLANTIC

Harry Hawker and Commander Grieve, after numerous tests, declare themselves perfe c t l y satisfied with the behaviour of this machine. In it they hope to be the first to cross the Atlantic and win the prize of $50,000 offered by the London Daily Mail. The machine has exceptionally powerful engines.

Seasonable Window Display Suggestions

Motorists' Supplies Window

Window display made by the Bond Hardware Co., Guelph, Ont.

The windows shown herewith were just recently put in by the Bond Hardware Co., Guelph, Ont. The goods shown are seasonable and the arrangement one that can be quite easily adopted by any merchant—even on a smaller scale. Details in connection with the windows are shown on the page directly following.

Spring Goods Requirements Window

Window display made by the Bond Hardware Co., Guelph, Ont.

Window Display Suggestions That Pull

Two Reproductions of Windows on Preceding Page Which May be Followed as Suggestions—Make the Appeal on Seasonable Lines — Seeing the Goods Loosens the Purse Strings

ON the preceding page are shown two reproductions of excellent window displays recently made by the Bond Hardware Company of Guelph, Ontario.

In the window display shown at the top of the page will be found a very attractive arrangement of automobile accessories. These lines are in great demand at the present time and it is to the hardware man that the motorist now looks for his needs in automobile supplies. Take the window which is shown and there will be found automobile tires, spark plugs, electric flash-lights, radiator cement, motor oils, automobile finishes, driving gauntlets, and many other lines which the hardware man is called upon to supply every day.

The background of the window is a most attractive one. In the centre is a mantel effect, before which steps are arranged giving somewhat of a pyramid effect. On each side of the central mantel, lattice work appears, a departure from the solid background so often used, which gives somewhat the appearance of gates.

THE SPRING GOODS WINDOW

In the window shown below of spring requirements is a fine assortment of garden tools and kindred lines which are used at the present time. This window is not unlike a similar one which appeared in the spring issue of HARDWARE AND METAL of March 22.

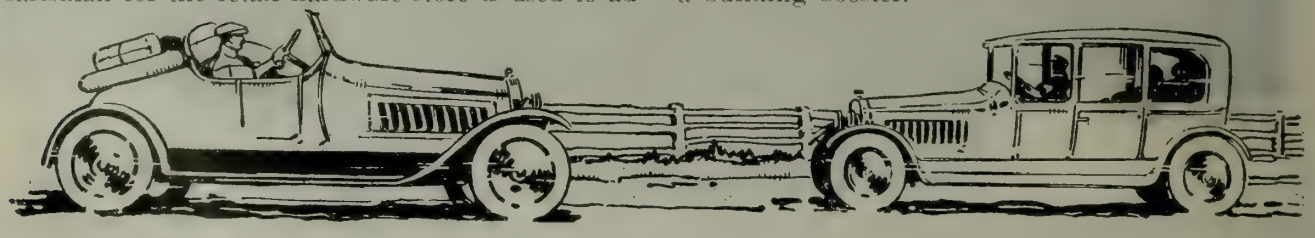
Forming the background is a lattice work effect, before which is arranged poultry wire and lawn fencing. These serve to finish a splendid background and before these appears a layout of forks, shovels, spades, lawn mowers, lawn hose, and wheelbarrow. In the immediate foreground of the picture are shown garden trowels, weeding forks, shears, lawn sprinklers, and similar tools upon which the aggressive hardware merchant is now making a big drive.

USE OF PRICE CARDS DESIRABLE

It will also be noted that there is another very desirable feature brought about in this window. That is the use of price cards, which serve to inform the public at once what value is placed on the various lines displayed. The practice of using the price cards consistently has been found to work out to advantage and this firm are sincere believers in showing the public what the price of the goods is.

These are window displays which nearly every hardware store can adopt quite easily and if there is not an equal amount of space such as this firm has, the arrangement could be cut down and arranged on a smaller scale. The windows are a powerful salesman for the retail hardware store if used to advantage and there is no great trick in arranging goods neatly and in such a way that the public will be interested.

It might be said that, to a large extent, the windows reflect the policy of the store. The public are interested in seeing seasonable goods and there is no easier method of reminding the passer-by of what is being offered than a window display attractively arranged.



Window displays should be changed frequently and can be arranged to work in nicely with the newspaper advertising which is being done. Getting the actual goods before the probable customers' eyes is easily possible through the medium of the store window. It is by seeing the lines offered at the right season that the purse strings of the public are loosened. There is money being spent freely to-day—make the window do its share in attracting the dollars to your till.

ARE YOU BOOSTING?

ON every side one hears the cry when building is mentioned that costs are too high, materials are out of all proportion to enable much construction work to be instituted. But does an investigation of the situation really reveal the fact that building materials are too high? Take the actual cost of the materials entering into the construction of a house. Should the cost of the hardware used be a deterrent factor—isn't the hardware bill really a comparatively small factor in the total cost?

What, then, is the main element to-day? Nothing more nor less than labor. With every branch of labor demanding more, does it seem reasonable to expect that prices can come tumbling down? Doesn't labor enter into manufacturing costs to a great degree, far more usually than the raw material? How then is it possible to sanction increased wages to labor and at the same time urge that cost of goods representing the fruits of labor should be reduced?

Putting off building is not going to help the labor situation. Nor is it likely to result in a saving of any great amount to the builder in the matter of the materials which he depends upon the hardware dealer to supply. It is better to face the situation fairly—look at every angle carefully. When you have done this you will be more inclined to urge that building be gone ahead with. The result will be that labor will be employed—it will be a business producer and will stamp you as a citizen who has the best interests of the community as a whole at at heart. If you are not already, start now being a building booster.

Welcome Customer; He'll Return

Create That Come-Again Atmosphere for the Customer to Breathe — Consider the Ladies' Viewpoint—Don't Block the Entrance—Accessibility of Goods Big Factor in Sales

JUST the very appearance of the store interior may extend the welcome your store should make to every customer. Whether he is a new one or one who has found your treatment such as to warrant a return to your store a pleasure makes no difference. The customer should breathe in the atmosphere of the store interior that "come-again" attitude which is associated with profitable business.

Consider the Ladies

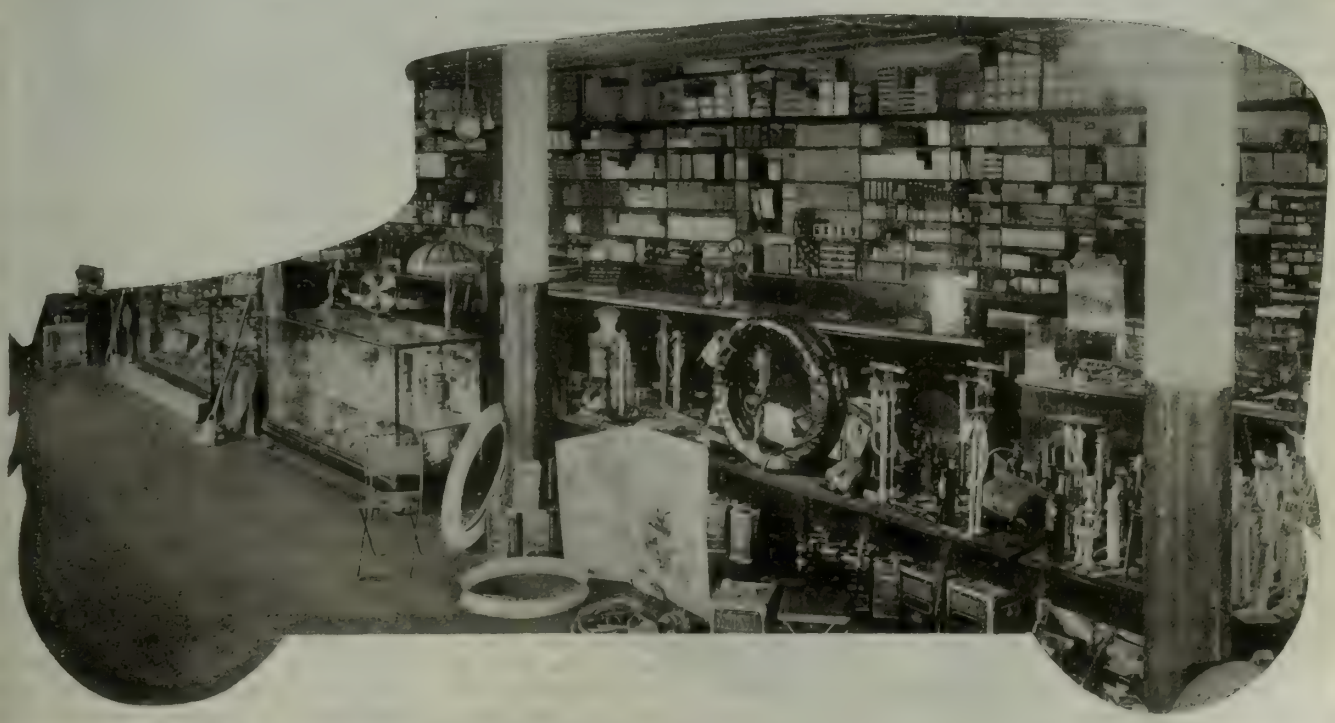
Perhaps the appeal should be made on behalf of the ladies who are becoming in greatly increasing numbers the customers of the hardware store. This should not be necessary for the men are just as keen on seeing goods arranged in an attractive manner as are the ladies. The customer of whichever sex has a sense of vanity that it pays to cater to.

Don't Block the Entrance

What, then, constitutes an attractive arrangement of merchandise? It is perhaps unnecessary to enumerate the things the merchant should do. One thing that should not be done is to block the entrance and aisles with pails, oil cans or washing machines which make it difficult to reach any single department. This may be obvious but it is nevertheless true that it is a practice employed in many stores, whether by design or accident, that should be eliminated.

Here is an Example

Take the interior display of automobile accessories shown below. Back of the counter and display cases, the various lines of shelf goods are arranged neatly on the shelves. They are in full view of the customer, but arranged in a manner to expedite handling and service to the customer. In the immediate foreground, display tables are placed on which such lines as tires, automobile pumps and jacks are shown.



The approach to the counter is free, the display is arranged attractively and with the idea that the customer cannot easily overlook same. Such a method of handling merchandise serves the customer well and enables the store to cash in on an effective showing of the goods.

Treat All Departments Alike

One might take any single department of the store and point out that the same conditions will secure similar results. It may be the housefurnishings, where stoves, washing machines and refrigerators are found. The successful merchants do not have pots and pans littered around on the tops of these articles—they are, rather, readily accessible to the buyer and the point of accessibility is one that should be borne in mind constantly in arranging the lay-out of the store interior.

Accessibility the Factor

Accessibility permits of rendering quick, efficient service to the customer. It also allows the buyer to "browse around" and see what is being offered. This brings one to the point that it is not always the individual article asked for on which the profit is made—the profit may result from the sale of other lines which are accessible and in view of the customer on his way in or out. The goods that are out on display are constantly working with the sales force—those hidden away under the counter do not have the same opportunity to register in the sales columns of the day. Arranging your merchandise where it will be seen and asked for is the desirable condition you should strive to obtain in your interior displays.

Canada's Great Opportunity

Business Must be Aggressively Sought if Totals Are to be Large — Vice-President Ramsay, of Canadian Paint, Oil and Varnish Association, Returns With First Orders

RETURNING from his special mission to London and other European centres, Walter B. Ramsay, vice-president of the Canadian Paint, Oil and Varnish Association, and President A. Ramsay & Son Co., Ltd., Montreal, spoke most encouragingly to HARDWARE AND METAL of the prospects that present themselves in Europe for the Canadian manufacturer. As a result of his trip, and through coming in contact with the actual markets of Europe, Mr. Ramsay was enabled to secure actual business to the extent of over a quarter of a million dollars. This business has already been distributed among the paint and varnish manufacturers of Canada, and it is but the beginning of orders that are expected to run into many millions.

Mr. Ramsay made it very clear when interviewed by HARDWARE AND METAL that the business must be sought, and that the best way to secure it was through close co-operation with the Canadian Trade Commission in London, of which Lloyd Harris is the head. Time will indicate, Mr. Ramsay stated, how necessary it is to work through this organization, and which is performing a most necessary and excellent service upon the part of Canadian industry, and for its general benefit.

Attitude to Canada

Making his headquarters in London at the offices of the Canadian Trade Commission, Mr. Ramsay had many opportunities of meeting and discussing matters of great moment from the trade standpoint with accredited representatives of some of those European countries which are known to be in great need of products such as Canada is in a position to supply. Being so closely in touch, therefore, with these men, he was enabled to size up the situation in a broad way that would have been utterly impossible from a distance.

"I believe that Canada will now be placed on the map of Europe with respect to exports," said Mr. Ramsay. "She is well thought of there. The Balkan States, in particular, are very kindly disposed towards this country. Canada's recent extension of credit to these countries is very much appreciated there, and this will, in itself, be a big factor in the future business relations that we may have with them."

Mr. Ramsay stated that this was the attitude also taken, in a general way by Greece. They appreciate what Canada has done. "Lloyd Harris has been in conference with Premier Venizelos of Greece, and received assurances that Canadian goods would be purchased by this country," said Mr. Ramsay.

WALTER B. RAMSAY
Vice-president Canadian Paint, Oil and Varnish Association and president A. Ramsay & Son Company, Montreal.

Referring to Roumania, Mr. Ramsay stated that the plans adopted by the Allies, relative to relieving the people of their actual distress, brought about through wanton destruction at the hands of Germany, were of great value when related to the future business possibilities. These people were naked and hungry now, and the food and clothing being sent them would mean much. For they are a thrifty folk, and will make rapid recovery, once their immediate needs are supplied. This food will offset any Bolshevist tendencies that may have been gaining ground and at the present time two ship cargoes of food and clothing are en route to Roumania from the Port of Montreal. This country suffered very sorely, in that the loot taken was that of actual food supplies.

Want Quality Goods

If there is one thing that Canadian manufacturers must learn right at the outset, it is that they must supply their very best wares to Europe, Mr. Ramsay said. Now, when they are so anxious to establish these connections, is the time to send our very best quality, it matters not what the commodity may be. It is quite clear that these people want something dependable, and that if poor goods are supplied in the first instance, the chance of establishing permanent connections may be lost, or at least, greatly injured. Mr. Ramsay stated that this was the expressed feeling of the Canadian Trade Commission and, having given the matter study for many months, their advice should be accorded the attention it merits.

With a footing obtained on this basis, that is, with our best products sent forward now, Mr. Ramsay is most confident that Canada can, and will, be in a position to meet competition. This has been one of the big points causing discussion from time to time, and if all comers can be met, then the way is clear for big things from the standpoint of export.

So much has been said as to the need of selling goods on a low price basis that this observation regarding high-class manufactured products is encouraging. It ought, at least to indicate clearly the need of sending abroad such manufactured wares as will do Canada lasting credit.

Matter of Credit

In speaking of credits, Mr. Ramsay stated that there was much encouragement. The first credits arranged for Roumania were practically used up. Others were being arranged with different countries, and they would be in a position to finance their own purchases when credits had been used up.

The Canadian Government and the Canadian Trade Commission, Mr. Ramsay believes, will be very useful in arranging credits, and in paving the way for extensive business abroad. Co-operation of this kind will be very essential, and the same will be available, for the Commission is most anxious to lend all possible assistance, that Canadian trade abroad may be secured in a most thorough manner. Credit is a first requirement.

For immediate business the Greek Government will very probably be the medium through which orders will be secured, and once the connection is properly established, transactions will be conducted direct with the buyers there.

Permanent Representatives

The Trade Commission may not be a permanent thing, as it now stands, but out of it should grow, at least, a permanent connection that can only be established by Canadian manufacturers banding together and having someone on the ground. This will entail considerable outlay, but it will mean very little when the total expense is pooled. This permanent representation would evolve from the present Trade Mission and permanent quarters ought to be established in London. Samples should be furnished and kept on display there, and nearly every line of manufacture should be represented."

Mr. Ramsay expects that Mr. Harris will discuss this matter more fully when he comes to Canada in June, and he is of the decided opinion that Canadian manufacturers and others should take a real interest in the program that Mr. Harris will have to outline. He will have facts and figures that all should become conversant with.

Various Goods Wanted

While Mr. Ramsay's mission was that of looking into the possibilities of paint and varnish sales abroad, he is enthusiastic regarding the whole prospect. There will be many lines of goods wanted, and it is up to the Canadian manufacturers to proceed along the lines already indicated, securing all possible business for the lines that they manufacture.

Asked as to the class of goods that are likely to be wanted, as pertaining to the paint and varnish trades, Mr. Ramsay stated that there was a general market. Mixed paints, enamels and varnishes of various kinds would all sell, and these would require to be of the best grade of the respective kinds.

The preference for Canada's goods in the Old Country is more than a sentimental one, Mr. Ramsay said. The Government heads there were expecting that some of the best English blood and fibre of British manhood would be migrating to Canada. There was an indissoluble band created by the war, and England was prepared to favor the Colonies in this connection, in the matter of trade colonization.

"Mr. Harris has had this matter of Canadian trade up with Premier Lloyd George, and arrangements were made to have embargoes against Canadian goods lifted.

Mr. Ramsay is confident, as he expressed himself before the Council of the Montreal Board of Trade on his return, that there will be no dearth of business for Canadian manufacturing plants if the export business available is properly gone after. This, added to the domestic output will, as he says, keep our factories busy, and enable us to place our returning soldiers in permanent positions.

MANITOBA R. M. A. CONVENES JUNE 17

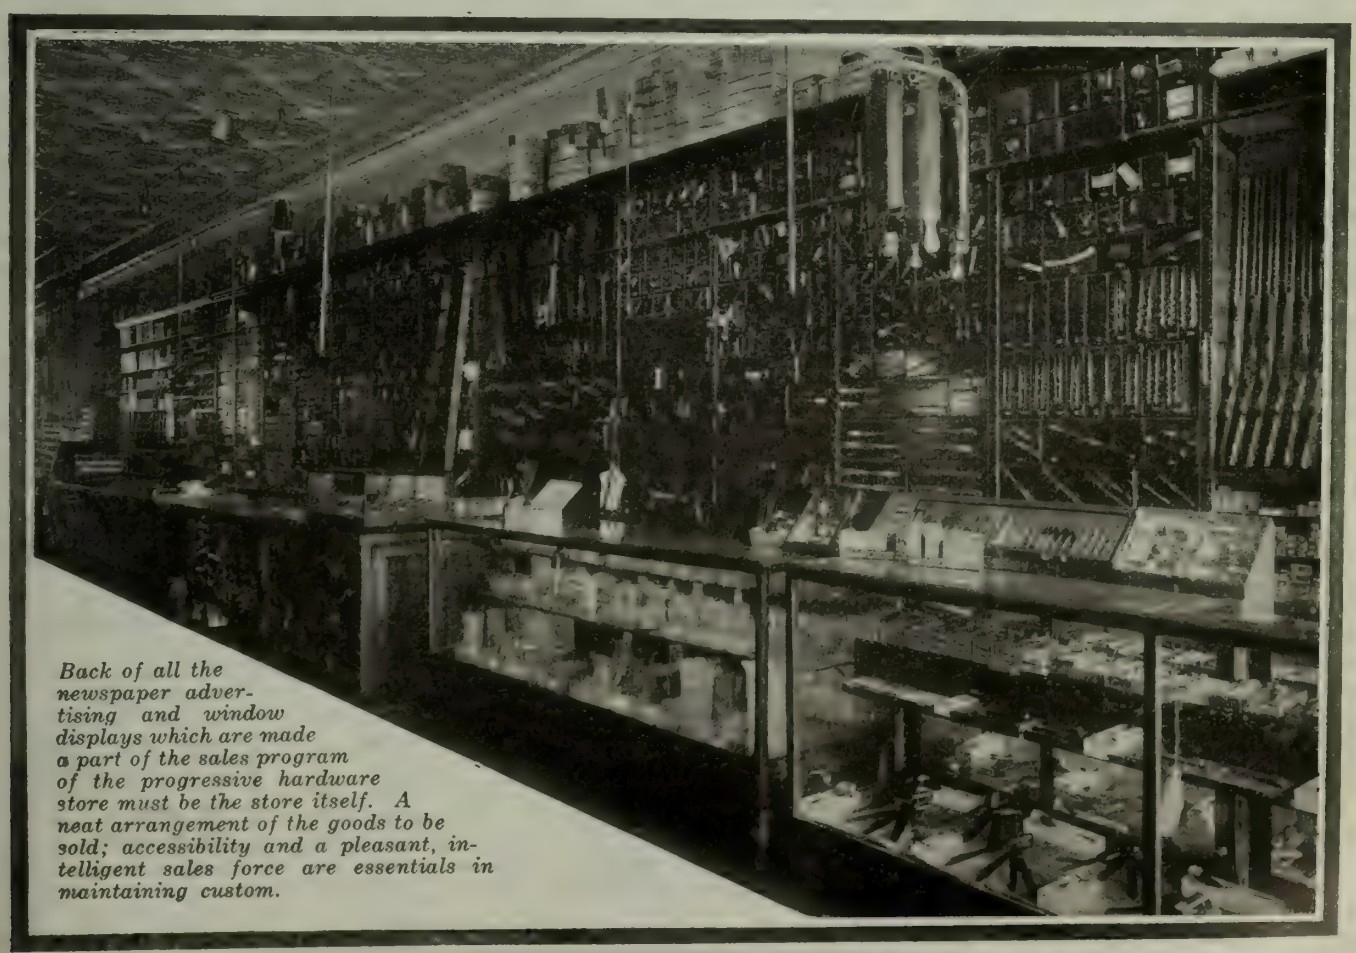
Session of Exceptional Interest Assured —Some Interesting Items Form the Program

The Manitoba convention of the Retail Merchants will be held in Brandon Monday, Tuesday and Wednesday, June 17, 18, 19. A number of the Brandon organizations are co-operating with the Brandon branch of the Retail Merchants' Association in making the convention the best that has been held in Manitoba.

The City Council, the Board of Trade, the Kiwanis Club, the Commercial Travellers, the Retail Clerks are all assisting in an effort to show the visiting merchants that Brandon is a good city for conventions. The speakers will be men well qualified to discuss the retail business and its problems. Every merchant and clerk who can get away June 17, 18, 19 should hear H. E. Hart, of James Hart & Sons, Long Prairie, Minn.

Mr. Hart was one of the leading speakers at the Business Builders' conference at Chicago in January. The business of James Hart & Sons in a town of 1,200 is a revelation. Come and hear him tell how they managed to increase their trade.

F. P. Mann, Devil's Lake, North Dakota.



Mr. Mann is president of the North Dakota Retail Merchants' Association. The business of Mr. Mann's store is, in many respects, like yours. Hear him tell how they are building up their business.

A. W. Gibb, C.A., Assistant Inspector of Taxation, Dominion Taxation Office, Winnipeg, will address the convention on "How to Make Out an Income Tax Return."

F. C. Middleton, secretary Community Organization of the Social Service Council of Manitoba.

Edwin Loftus, K.C., lecturer, Law School, Manitoba.

W. J. Keyes, of Winnipeg, manager printing dept. of Kelvin Technical High School. And additional plans are under way to introduce many attractive features.

Back of all the newspaper advertising and window displays which are made a part of the sales program of the progressive hardware store must be the store itself. A neat arrangement of the goods to be sold; accessibility and a pleasant, intelligent sales force are essentials in maintaining custom.

Co-operation Makes Campaign Winner

London Hardware Dealers Enlisted Services of Local Press, Other Merchants and Business and Social Organizations—"Clean-Up, Paint-Up" Week Proves a Record-Breaker—Many Excellent Window Displays and Advertisements

THE "Clean Up, Paint Up" campaign, which was carried on in London, Ont., last week, furnishes a striking example of what can be accomplished by co-operation. In spite of most unfavorable weather conditions the campaign was a success from start to finish and some of the hardware dealers were completely cleaned out of many lines, and cannot fill orders they booked until new shipments arrive. The dealers and those who were in closest touch with the organization work of the big campaign, predict that the effects of the publicity work will be apparent in direct sales for several months, and they plan to stimulate "Clean Up, Paint Up" from time to time, and perhaps make it an all year slogan instead of one in effect only in the spring time. It is planned also to go a step further and inaugurate a "Clean Up, Paint Up, Dress Up" campaign next year. This is an entirely new idea which has evolved from the success of the "Clean Up, Paint Up" campaign, and if carried out will mean that a large number of other merchants will co-operate in the general effort that is to be made.

Hearty Co-operation

In the whole merchandising history of the City of London there has not been a more outstanding example of the success of hearty co-operation than that of the "Clean Up, Paint Up" campaign. It demonstrated in a most forceful manner just what can be accomplished by team work, and the team work in this case included the local newspapers, the London Hardware Association, local business men, and practically every leading social and business organization in the city.

"The campaign was very carefully planned, and it certainly did produce results," said Thomas Jones, president of the Cowan Hardware Co. "Several months ago we got busy, and J. Birnie Smith, of the London "Free Press," came down to one of our association meetings and outlined a good deal of the work. We went carefully into the matter and as the work progressed we began to see the possibilities of what could be accomplished and new stunts suggested themselves and were promptly put into effect."

Sees Big Prospects

"We have done a lot and the campaign has been a splendid success," said J. B. Smith to HARDWARE AND METAL. "But all that we have done has simply served to show what we can do and we are planning much greater things. I have never, I believe, worked on a proposition that opens such unlimited possibilities. The campaign was a success because of the way those we got interested pulled together. It has shown us what can be done, and the next campaign will be bigger and more successful because we will have more people and more organization co-operating."

The London newspapers, the "Free Press" particularly, through its representative J. B. Smith, lent every assistance in organizing and helping the campaign along. It was realized before the work had gone very far, that if co-operation was going to make the campaign a success, this year's "Clean Up, Paint Up" campaign was going to smash all records. On every hand the move was adopted with enthusiasm. Much of the success of this preliminary work was undoubtedly due to the efforts of the press in stirring up interest and to the work of those behind the organization in quickly and closely following up the advantage they had won.

Everybody Interested

Other merchants joined the hardware dealers in the work and gave part of their advertising space in which special appeals were made to people to "Clean Up, Paint Up." This helped a whole lot and as it was continuous, kept up the enthusiasm that was aroused and helped along the general campaign which was conducted in the press. Before the campaign was very old such organizations as the Ministerial Alliance, the Board of Trade, Chamber of Commerce, the Mothers' Clubs, the School Board, the City Council, the Rotary Club, the London Advertising Club and the Board of Health all passed resolutions favoring the campaign and urging every citizen to stand behind it and give it his best and heartiest support. Many other smaller organizations also lent a helping hand and boosted for "Clean Up, Paint Up" in every way they could. All this was given lots of publicity in the local press, and the city council went even further than passing a resolution, by inserting at its own expense the half page ad. in the daily papers, shown in connection with this article.

Produced Results

"With co-operation and organization of this kind we could not fail to get results," said President Jones of the London Hardware Association. "Another stunt we did was to get the city fire department out during the day on which the campaign was inaugurated. The fire wagons went about the streets bearing streamers boosting "Clean Up, Paint Up." The only thing against us was the weather man. If we had had bright warm weather our sales would have been larger perhaps, but we did an exceptionally fine business and when the warm weather comes shortly, we will get a lot of business that will be directly traceable to our campaign. A lot of people who have been aroused by the publicity given recently, will paint just as soon as weather conditions are suitable, and we will cash in, I expect, for weeks on the campaign advertising. As it was we had all the business we could take care of during the week and are well satisfied." Every hardware firm in London had a paint window in and all report good results.

A Record Business

"We have done a record business," said T. M. Purdom, Jr., of the Purdom Hardware Co. "We are cleaned right out of many lines. That does

not mean that we did not have a good stock, because we always carry a good stock. Our paint business has been increasing every year. It is an all year round line with us and we figure on turning our complete stock twice a year. We put on a special advertising campaign and a special window display in connection with the "Clean Up, Paint Up" week. In our ads we inserted a coupon and during the week we have had more than 2,500 of these coupons turned into the store. We know the advertising produced the results because people would come in with the whole ad. clipped out and say, "I want that." In many instances we sold them a lot of other stuff as well. Our advertising and the campaign not only stimulated business in the city but it brought in farmers for miles around. The weather has been bad for painting, but business has been good and I guess maybe we could not have handled the trade if it had been bright sunny weather and people could have got right busy at the work. We will get a whole lot of business yet as a result of the campaign."

Put on Demonstration

The Purdom Hardware Company took advantage of the special week to put on a demonstration. It was a splendid success in every way. Mr. Purdom stated to HARDWARE & METAL that he always gets direct and immediate results from his newspaper advertising and window displays.

"The people come right in and ask for the goods in the window or the goods advertised," he said. "This 'Clean Up' Paint Up" campaign has been a wonder. We are completely out of many lines and have on our books a lot of orders to be filled as quickly as we can get the paint."

Every paint customer is a brush prospect for the firm, and not an order is filled without inquiry being made as to whether the customer has the brush required for the work in hand.

"We do a big business in paints over the telephone," said Mr. Purdom. "Any number of people who read our ads. simply telephone in their order. We sell paint every day in the year that the store is open. On some of the coldest, stormiest days in winter we get some of our best telephone orders."

Lot of Business

"We have done a good trade in connection with the campaign, but I see a whole lot of business ahead that will be a direct result of the publicity," said W. A. O'Dell. "There were a lot of people who are going to do painting this spring and would have started now if the weather had not been cold and rainy. Many of them bought their paint now, but many will come in during the next few weeks. Advertising is one of the best ways I know of to sell goods, and this big campaign has surely produced results."

In connection with their general advertising campaigns, both Thomas Jones and T. H. Purdom, Jr., stated to HARDWARE AND METAL that they are using practically double the space now that they used formerly, and both have always been consistent advertisers. Attractive illustrations are always a feature of their ads., and invariably the ads. are backed up by window displays.

Found Business Good

Ex-Ald. Chas. W. Summers, of London, has a store that is located in the heart of a new district that has grown up in the last few years. His trade is essentially with the workingmen, and he boosts business by arranging attractive window displays each week and by sending out handbills to every home in his territory. He put in a window display of paints, and right up in the front of his store arranged a display of garden tools, seeds, etc.

"I always get results from window displays," said Mr. Summers, "and this was no exception. My trade is exclusively with the workingmen and their wives and I find that when one studies their requirements and stocks accordingly, there is no trouble in turning over the goods. The workingmen in this district are certainly thrifty. I have noticed a big increase in the past three years in the sale of seeds and garden tools. Many of these men own their own homes, and they take good care of them and use paint freely. Their wives buy a lot of paint, too, for various work about the house. My paint business has been growing steadily."

Sold Garden Tools

While the London hardware firms largely centred their efforts in window displays on paints, they did not neglect, either in their ads. or in their store arrangement, to keep garden tools and seeds to the front. Many of the ads. referred to the necessity of keeping the lawns carefully tended, flower beds in good shape, and back yards clean and planted with a nice garden. Appeals of this kind resulted in many seeds, rakes, and tools being sold. More painting, cleaning up and gardening is under way, it is stated, in London than ever before, and the hardware men are planning to carefully follow up and encourage more work of this kind.

As stated previously, it is planned to make the next campaign a "Clean Up, Paint Up, Dress Up" campaign. The idea behind this is, that if people clean up their homes, they ought to have new clothes for themselves. Many of the dry goods stores, gents' furnishers, etc., who co-operated this year with the hardware firms by making special reference to "Paint Up, Clean Up" were so pleased with the results that they want to be included in the campaign next time, and as a result there will be a combination campaign put on to include them.

WELSH TIN-PLATE SELLING AGENCY

London.—It is proposed to open a Welsh Tin-plate Selling Agency in London for the control of all sales. It is stated that already this selling agency has been appointed as agents for twelve firms, and those works secured represented seventy-two mills, being less than a quarter of the mills in the trade.

At a meeting of the South Wales Association of Iron Steel, Tin-plate and Metal Merchants at Swansea, a resolution was passed disapproving of the scheme on the grounds that it tended to fetter the liberty of the merchants in the trade.

NATIONAL CASH REGISTER SALESMEN MEET IN TORONTO

At a recent meeting of salesmen of the National Cash Register Company for the Toronto district, at Toronto, the men were addressed by F. B. Patterson of the company, Dayton, Ohio, who has taken over the reins of management of the company. Mr. Patterson is very optimistic as to the future of Canada, believing that the war has done much to advertise the Dominion.

While here Mr. Patterson arranged a new schedule for the factory employees, which shortened the hours of work considerably, and also arranged for the general betterment of working conditions in their Canadian factory at West Toronto.

WILL PROSECUTE FRAUDULENT FAILURES

At a meeting of the executive committee of the Merchants' Association of Montreal held recently, a report from the committee of interested merchants was approved, and as a result, the association will undertake the prosecution of parties who defraud their creditors. The matter of fraudulent failures has always been a serious problem with merchants, and the Merchants' Association is now putting on foot a movement intended to effectively deal with it. A sum of $25,000 will be available to prosecute any fraudulent debtor. The fund will not be actually collected, but 500 merchants will subscribe $50 each, subject to call as required. The fund will not be called on until it has all been subscribed, but the committee in charge does not anticipate any difficulty whatever in this direction.

ELECTRICAL DEMONSTRATION

Sudbury, Ont.—The Cochrane Hardware, Limited, held a most successful electrical demonstration, which resulted in greatly stimulating business in vacuum cleaners, toasters, grills, washers, and other lines. An expert from the factory was in the store for a week, and in addition to many sales being made, a large number of prospects were listed and will be followed up.

The hardware merchants of Sudbury may shortly consider the question of arranging for a weekly half holiday during the summer months. It has been pointed out that local dealers are among the very few merchants in the province now who do not have the half holiday.

EDITORIAL COMMENT

RESULTS OF CO-OPERATION

ON another page will be found an account of how the hardware merchants at London, Ont., enlisted the co-operation of the local papers, the city council, their fellow merchants and a number of business and social organizations and made their "Clean Up—Paint Up" campaign a tremendous success. There is a lesson here for hardware merchants over the country. It simply shows what can be done by a little enterprise. The London hardware men got the press and a number of other forces working with them and the results were eminently satisfactory. As far as the press is concerned business men can generally rely upon hearty co-operation. Business men do not always give the press a fair chance to show what it can do. There is no question about the results to be obtained through publicity and the quickest and most satisfactory method of reaching the greatest number of people is through publicity. Business men and the newspapers have a great deal in common and a great deal in which they can and should work together. The business men need the press and the press just as surely needs the business men. By working together they can accomplish splendid results. The campaign just closed at London was easily the greatest of its kind ever carried on by the hardware men of that city. Aside from its splendid success from a business standpoint it has opened the eyes of the hardware men to the possibilities of co-operation and they are already making their plans for another campaign which they predict will be an even greater success because they will enlist more merchants in it than they did in the one just closed. There is another side to this question. Before they get through the merchants will probably discover that they have not been working together as they might have in the past. By helping the hardware men the dry goods merchants and the grocers will find that indirectly they are helping themselves and a spirit will be fostered which should make for better business all round and a better understanding between all the merchants. There is in too many towns and cities a tendency for one merchant to keep aloof from another. There is even a tendency for one hardware man to keep aloof from the hardware man on the next street. This sort of spirit never makes for the best results. Every merchant has his problems. By keeping to himself he may eventually work out a partial solution. But if he will get in touch with his fellow merchants he will generally find that they too have faced exactly the same problem and can give him valuable advice and assistance in solving it. There is nothing like co-operation among merchants for getting results. There is only one combination that can beat it; that is when merchants not only work together, but get social organizations and the press to work with them.

ON A SOUND BASIS

IT is rather gratifying from the standpoint of the trade in general to find so many hardware firms suffering from growing pains. At a time like this, the reconstruction period following nearly five years of the fiercest war that has ever been waged, it means a whole lot for the future of the Canadian hardware trade to find so many firms whose quarters are too small for them. Business has been and is so good with them that they need larger stores. They are awake to the possibilities of doing a bigger business and are laying their plans for taking on new lines and increasing their turnover in the line they are already handling. "I have never known the retail hardware trade to be on such a substantial basis as it is to-day," said the auditor of one of the largest firms in the Dominion to HARDWARE AND METAL. "The dealers as a whole have come through the war period not only in splendid shape, but better merchants because they have learned so thoroughly how to deal with business problems." There are no more aggressive merchants in Canada to-day than the hardware men. There are no finer and no better equipped stores in the Dominion to-day than many of the hardware store. There will be more stores to-morrow of this kind than there are to-day, because the hardware firms are not only aggressive, they are progressive. They are quick to see the chances that are open to them not only now but in the future that is spreading out before the Dominion. In the past two weeks the writer has visited a number of retailers. In a surprising number of instances these hardwaremen told of steadily growing business and of the need for larger quarters. In other cases it was obvious from the crowded condition of the store and the store rooms that larger quarters were required. Another gratifying feature was the number

of improvements that are being made. New fixtures, new show windows, store extensions and improvements. All these spell progress. The hardware men are not standing still. They are building for bigger and better business in the future and they are building on a solid foundation.

IT'S WORTH IT

MANY people, including merchants, imagine that it is an easy thing to sit down and write an advertisement. It is anything but an easy proposition to write the right kind of an ad, the kind that will produce sales. It takes time and thought but it is worth the effort every time. There are men who can sit down and write ads easily. There is one thing that makes it easy for them and that is that they know all about the goods. They tell all the good points there are about the goods and they tell them simply and directly. These are the kind of ads that pull. So many writers of ads imagine that in order to inject sales punch into an ad they must use a lot of highbrow words and classy language. There never was a bigger mistake. That sort of stuff goes right over the head of Mr. Average Buyer. He passes it by because he cannot see quickly what it is all about and he reads something that interests him. The most forceful ads are those that are simplest. To write good ads you must know all about the articles you expect the public to buy. The little details often carry the whole interest from the purchaser's standpoint. The best ad writers always make sure that the heading arouses interest. Then they try to make their general talk maintain that interest throughout. There are certain things every prospective buyer of the articles you are advertising wants to know. Tell them briefly and in simple language. Put in a few illustrations, give the prices, make a nice arrangement and there you are. Study the ads of the best advertisers, the mail order houses and other leaders in advertising and you will constantly get ideas you can adopt. It means work to do this and to keep your advertising message to the public newsy and interesting, but it can be done and the results are worth the effort.

PHONE RATES INCREASED

THE Railway Commission after going thoroughly into the request of the Bell Telephone Company for increased rates has tendered a decision in which the company is given permisson to inaugurate a new schedule for long distance and make an advance of ten per cent. in exchange rates. The Bell Telephone Company requested a twenty per cent. advance for exchange rates. Merchants all over the Dominion are keenly interested in this matter. While there has been considerable objection in many places to any advance in telephone rates it was mainly on the ground that the service rendered was not commensurate with the existing rates. One of the things which many merchants will probably demand if their rates are increased ten per cent. is a greatly improved service. The company in its arguments for making an increase pointed out that rates must be higher if the service was to be maintained. The rates are to be increased, so now the merchants and business men will certainly be justified in looking for improved service. The need for this in some of the rural districts need not be dilated upon. All those who have had any experience in trying to get connections have had reason to remember what occurred. It will now be up to the telephone company to see that these troubles are eliminated.

THIS SHOULD BE REMEDIED

IF reports regarding the handling of the British mails after they arrive on this side of the Atlantic are even approximately correct, a situation exists that should be remedied as quickly as possible. The postal service is so closely related to business that quick handling of all mail matter may mean large sums in actual money to many merchants and business houses. Delays are always annoying and costly. Yet it is reported that there is sometimes a delay of from four to five days in mails reaching their destination because they have after reaching Halifax to be sent to New York and then back again. One cause is cited where a steamer carrying British mails reached Halifax on a Saturday afternoon, but the letters from that boat did not arrive in Halifax for distribution until the following Saturday and then by way of New York. Things of this sort point to the need of a new head for the Canadian postal service. Dr. Coulter, who has been in charge for many years, was a village doctor without business or post-office experience. He was given the job over many capable men, men who had grown up with and were thoroughly familiar with the department. The appointment may have been a reward for political services rendered during elections. This sort of thing would not be tolerated for a moment in any progressive private business. The postal service is one of the most important departments that the Government has to deal with and if it were put in charge of a good business executive, and there are any number of good men in the postal service, there would be more efficiency.

THERE is a big difference between practising strict economy and being penurious.

* * *

LITTLE that is worth doing has ever been accomplished without the driving power of enthusiasm.

* * *

ONE of the greatest wastes in the world is the unused brains, the brains which might accomplish wonders, but are never given a chance to work.

EVENTS IN THE TRADE

Business Changes

Leamington, Ont.—Ivan Cook has been taken into the hardware business of H. Lendon as a partner.

Vulcan, Alberta.—McPherson Bros., of Medicine Hat, have purchased the hardware business of George E. Pettman.

Hamilton, Ont.—The Waterdown Manufacturing Co., Ltd., have applied for a charter and will absorb all the assets and liabilities of the Crown Manufacturing Co. The Waterdown Manufacturing Co., Ltd., will own and operate the Crown Stamp and Die Works.

Fire Losses

Fire caused a loss of several hundred dollars at the plant of the Hull Iron and Steel Foundries Ltd., Hull, Quebec.

New Firms

H. E. Hawkins, who for the past six years has been a member of the sales staff of the Cochran Hardware, Limited, Sudbury, Ont., is opening a general hardware business at Capreol, Ont.

Obituaries

Following a brief illness with pneumonia, the death occurred at Gananoque, Ont., of J. Stanley Meggs, of the Ontario Steel Products Co., Limited.

John Mennie Sr., Fergus, Ont., died at his home on Saturday, May 10, 1919, at the age of 87 years. Mr. Mennie was for many years in the hardware business in Fergus, selling out his interests to Imlah Bros. on January 1, 1917.

The death occurred in Calgary from toxic poisoning of James Lawrence, aged 54, for many years retail manager of the J. H. Ashdown Hardware Co., Limited, of Winnipeg. He was 54 years old and was with the Ashdown Company for 26 years, having been retail manager at Calgary and Nelson, as well as Winnipeg. About ten years ago he went to Edmonton, where he took charge of the real estate office of F. C. Lowes & Co. Mr. Lawrence was born at Cape Town. S.A., but came to Canada when a lad. He was prominent in Masonic circles.

Personals

Mr. Young, of the Collingwood Hardware Co., Ltd., Collingwood, Ont., is spending a few days in Toronto.

A. M. Smith, sales manager of the McClary Mfg. Co., London, Ont., was in Montreal recently.

Theodore Butler, manager of the London, England, office of the Whitman & Barnes Manufacturing Co., Akron, Ohio, has returned, following a tour of inspection of the company's factories at Akron and Chicago. Mr. Butler, while at Akron, was the guest of honor at a dinner tendered him by the company, at which a number of prominent business men were present.

A. Clark has returned from overseas and has entered the hardware business with his father, under the firm name of J. Clark & Son, 258 Main St., Toronto.

Gilbert Eldridge, formerly with the Northern Canada Supply Co. at Timmins, Ont., has joined the staff of the Taylor Hardware Co. at Cobalt, Ont.

H. S. Doan, who for the past seven years has been with the hardware firm of Hewitt & Black, Medicine Hat, Alta., has joined the staff of the Hall Hardware Co., of Calgary. He will look after the window-dressing and assist in the general buying.

W. Geo. B. Duguid, warehouse superintendent, McClary Mfg. Co., Toronto, returned this week from overseas and is back on the job once more. Mr. Duguid went away with the original Highland battalion in 1914. He was captured by the Germans at Ypres and for the past three years has been a prisoner in Germany.

Trade Notes

The Georgia Turpentine Co. has been registered at Montreal by Louis Normandin.

The Canadian Western Steel Corporation Ltd., of Calgary, has obtained a charter.

A. Beliveau has been appointed liquidator of the Three Rivers Pail and Box Mfg. Co., Ltd., Three Rivers, Quebec.

The Standard Cotton and Wool Waste Co. has been registered at Montreal by A. Finkleston.

Lamarre & Frere, hardware and furniture, Montreal, have dissolved. The business will be carried on by Joseph Lamarre.

Montreal News

M. Philbin Hardware Co. have opened their branch retail store on Park Avenue.

Archie MacFarlane, of A. MacFarlane & Company, Montreal, was in Toronto this week.

W. Bruce Morrow, manufacturers' representative, Toronto, called in Montreal this week.

F. C. Hatch, of the Hatch Mfg. Co., Whitby, was calling on the Montreal trade this week.

H. B. Colvey, of Geo. Wostenholm & Son, Sheffield, England, was in Montreal last week.

W. H. Bradley, with the H. B. Ives Co., New Haven, Conn., is expected in Montreal next week.

W. H. Newton, sales manager of the Canada Paint Co., Ltd., Montreal, went to Toronto this week.

A. C. Gibb, in the interests of Alexander Gibb, Montreal, was a visitor last week to Toronto and London.

W. S. Fallis, managing director of the Sherwin-Williams Co. of Canada Ltd., Montreal, was in New York this week.

W. Adler, of the American Thermo-Ware Company, New York, made Montreal a point of call this week.

John Richardson went to Toronto last week in the interests of his firm, Richardson and Bureau, Montreal.

E. L. Meadowcroft, travelling in the interests of the Miller Lock Co., Philadelphia, called on the Montreal trade this week.

S. P. Cloutier & Co. have purchased the hardware business of A. Jolicoeur, Ville-Marie, Quebec. This firm will be pleased to receive manufacturers' catalogues, they state.

F. W. Field, representative of the British Government as trade commissioner at Toronto, was in Montreal this week. Mr. Field was attending an organization meeting of the British Manufacturers (Canadian association), and particulars of which are elsewhere given.

Montreal store clerks are this week holding two mass meetings to consider the early-closing by-law proposed for Montreal. It appears that they are not in favor of this law, as now arranged. Several speakers are scheduled to address the clerks.

Winnipeg News

A. F. Lavercombe, sales manager for the A. S. Boyle Co., of Cincinnati, Ohio, spent a few days in the city, calling on the jobbers.

E. Grobb, of the Dominion Chain Co., Niagara Falls, Ont., spent the week in the city, calling on the jobbing trade.

A. F. Collins, manager of Ever-Ready Safety Razor Co., Ltd., Toronto, spent a few days in Winnipeg with their representatives, C. C. Craig Co. Mr. Collins is returning from the Pacific Coast and reports having an exceedingly good trip on all lines.

A. Lockwood, of the John F. Graham Co., New York, was in the city this week on his usual spring trip.

Chas. R. Thompson, representing C C. Craig Co., has returned to Winnipeg after a trip in the interests of the various factories they represent. Mr. Thompson leaves again for the West in a few days.

H. R. Manders, who has been connected with the Manitoba Hardware and Lumber Company at Reston, Manitoba, for the past nine years, has severed his connection with the firm and is succeeded by W. A. Deveney. Mr. Manders was a recent caller at the Winnipeg office of HARDWARE AND METAL and says business conditions are looking better all the time.

Incorporations

The Ottawa Iron and Metal Co., Limited, capital $50,000, head office Ottawa, Ont., plans to carry on the business of machinists, electricians, brass finishers, tinsmiths and plumbers.

Four Wheel Drive Auto Company, Limited, capital $100,000, head office Kitchener, Ont., plans to manufacture autos, tractors, motors, bicycles and engines.

Canada Tool and Engine Company, capital $200,000, head office Halifax, plans to manufacture and deal in these lines.

Hawbolt Gas Engines, Limited, capital $100,000, head office Halifax, plans to manufacture and deal in gas engines.

W. A. White Company, Limited, capital $30,000, head office Montreal, plans to manufacture and deal in rubber and rubber products.

The Measuregraph Company of Canada, Limited, capital $250,000, head office Toronto, plans to manufacture and deal in devices for measuring fabrics, textiles, leather and other products.

Vapor Car Heating Company of Canada, Limited, capital $122,000, head office Montreal, plans to manufacture and deal in devices and supplies for heating, lighting and ventilating cars, steamships and vessels of all kinds.

Corundum, Limited, capital $250,000, head office Ottawa, plans to manufacture and deal in mineral products.

Canadian Western Steel Corporation, Limited, capital $2,000,000, head office Calgary, plans to carry on the business of steel makers, sheet metal and rail rollers, wire drawing and iron and brass founders.

Regent Metal Goods, Limited, capital $75,000, head office Montreal, plans to manufacture and deal in machinery and equipment.

Ledoux Jennings, Limited, capital $250,000, head office Montreal, plans to take over the business carried on by the Ledoux Carriage Co. and A. Jennings & Co., and to manufacture various kinds of vehicles, including electric, steam and gasoline-driven

Maple Leaf Manufacturing Company, Limited, capital $500,000, head office Montreal, plans to manufacture and deal in motor trucks, motor boats, tractors and agricultural machinery.

Spedolene Refining and Manufacturing Co., Limited, capital $50,000, head office Montreal, plans to manufacture and deal in oils, grease and bi-products.

Petrol Oil & Gas Company, Limited, capital $500,000, head office Toronto, plans to prospect for and carry on a general business in gas and oil.

Rastall Lumber Co., Limited, capital $60,000, head office Toronto, plans to manufacture and deal in lumber and woodenware.

Mohawk Electrical Company, Limited, capital $20,000, head office Brantford, Ont., plans to manufacture and deal in electrical goods and also in automobile parts, accessories, tires, rubber goods and hardware.

Bernard Cairns, Limited, capital $40,000, head office Toronto, plans to manufacture and deal in rubber and steel stamps, stencils, brass and metal signs.

Victoria Turbine Mixer Company, Limited, head office Toronto, capital $100,000, plans to manufacture and deal in gasoline saving devices.

Wood Air Tight Valve Company, capital $1,000,000, head office Toronto, plans to manufacture and deal in automobile accessories and supplies.

See and Smith Motors, Limited, capital $100,000, head office Toronto, plans to manufacture and deal in automobiles, bicycles, motorcycles and motor trucks.

Manning Abrasive Company, Inc., head office Toronto, capital $10,000, plans to manufacture and deal in abrasives, flint, garnet, emery, etc.

Saskatchewan Retail Merchants in Session at Regina

THE sixth annual convention of the Saskatchewan branch of the Retail Merchants' Association was held in the City Hall auditorium at Regina on Tuesday, Wednesday and Thursday of this week. President H. D. Macpherson was in the chair and a warm welcome was given to the delegates by Mayor Black. The program included an address by the Dominion president, J. A. Banfield, of Winnipeg; an address by Premier Martin; an address by A. E. Fisher, Superintendent of Insurance for the Province of Saskatchewan; a number of discussions on matters of importance to retailers by various merchants and a short course in retail merchandising by Frank Stockdale of Chicago.

In the course of his address, President Banfield attacked the Canada Food Board, quoting especially some of the heavy expenses as taken from the official records.

The proposal to establish a Wednesday half holiday was given strong endorsation, and will become effective shortly, it is expected. Compulsory holidays in the summer were also favored.

A Halifax to Vancouver trip was suggested for some time in August.

A vote that was taken in connection with the question of revising the constitution favored the appointment of a Western Executive Board for four provinces.

A complete report of the proceedings will be published in next week's issue of HARDWARE AND METAL.

CEMENT MERGER RUMORED

The possibility of a new cement merger with a view to amalgamating all the independent cement companies now operating in Canada is an interesting report that is circulating in Montreal financial circles. It is understood that certain large financial interests representing British and Belgium capital have had a representative in Canada quietly at work obtaining an appraisal of these independent companies.

It is considered that European demands will occupy all the plants proposed to be merged during this period until a market has become firmly established in Canada and South America. HARDWARE AND METAL was informed that the recent incorporation of the Montreal Portland Cement Company Ltd. is supposed to have some connection with this contemplated merger, although Robert Dodd, the president, and John MacNaughton, the legal counsel for this company, were non-committal.

DU PONT CO. ELECTS NEW VICE-PRESIDENTS

It is understood that the directors of the E. I. Du Pont Powder Co. have elected the following new vice-presidents: Charles A. Meade, W. S. Carpenter, Jr., J. B. D. Edge, A. Felix du Pont, William C. Spruance and Charles A. Patterson. These are the recently appointed members of the new executive committee and their election as vice-presidents follows the custom of the company, which gives the title of vice-president to the active heads of departments.

STEEL MAN SECURES APPOINTMENT

W. F. Drysdale, B.S.C., McGill '04, mechanical engineer, who has been resident in Paris during the past three years representing the American Locomotive Sales Corporation, and who rendered valuable service to the Allied armies, assisting in transportation problems, sailed on Saturday from New York for Great Britain and France. Mr. Drysdale will return to Europe as European manager for the Worthington Pump and Machinery Corporation to help in the work of reconstruction. Previous to going across Mr. Drysdale was with the Steel Corporation of Canada.

NEW ASSOCIATION ELECTS OFFICERS

At a meeting of the Canadian Association of British Manufacturers and their representatives, the following executive council was elected:

President A. K. Drury, H. A. Drury Co., Ltd; vice-president, F. J. Spielman, Spielman Agencies; council: F H. Scott, Coristine Bldg.; H. W. Weller, Babcock and Wilcox, Ltd.; G. H. Bishop; T. Hampton, Edgar Allen & Co.; H. W. Smythe, Rose and Laflamme; W. T. Evans, Dingley Bros. (Export) Ltd., London.

Mr. Field, Trade Commissioner for Canada (Toronto office) was present, and stated that the Toronto branch of the new association had up to date a membership of over forty members.

The Montreal branch membership now stands at fifty-one.

SCARCITY OF WIRE

London, Eng.—The Government order consequent upon the fresh outbreak of rabies in the United Kingdom, which makes the muzzling of dogs compulsory in London and other districts, has set the Birmingham wire makers by the heels. Orders are pouring in on the manufacturers for wire muzzles which will take weeks to execute. The position is complicated by the lack of supplies of tinned wire and the scarcity of trained labor. Big orders are said to have reached Birmingham from official sources. The muzzling order is likely to be in force for some months, and should the disease spread, the wire trade will feel a corresponding activity.

MANY BICYCLE SALES DURING BICYCLE WEEK

Montreal's annual bicycle parade was responsible for an appreciated stimulus to the selling of these goods this year, and dealers report that many sales were made. The parade has the advantage of getting a certain enthusiasm worked up. The bicycle is looked upon as a most useful, inexpensive, and pleasure-imparting thing, and many are being added each year to those giving their support to this Canadian pastime of bicycle riding.

There is an added interest and advantage for the dealer, that of an opportunity to sell more accessories, which carry a good margin of profit. The season is progressing favorably.

BRITISH FIRMS

London, Eng.—Market reports and manufacturers' opinions convey a sense of depression existing in the British iron and steel industries. The changing over from war to peace conditions has not as yet been accompanied by anything like the brisk influx of trade which arrangements had been made to meet. Plenty of trade inquiries are reported from all sides, but do not materialize into orders as soon as might be expected because buyers are holding off in the vain hope that a lower quotation may arrive. The Government subsidies on iron and steel were removed at the end of April, and firms are faced with another rise, and possibly the necessity of importation from the States. American pig iron had already arrived in the Clyde, and quantities of strip are reaching the midland districts from the same source. Thus the uncertain labor conditions combined with the falling prices of American and Japanese materials, tends to hamper the expansion in British overseas trade.

The brightest aspect of the market at present is the good home demand for all classes of materials, but unfortunately this cannot be regarded in the light of new business to keep going the enormous extensions which have been added to all branches of the industry during the war.

GERMANS BLAMED

The British army, in the course of clearing up Belgium, took over enormous stores of hardware and machinery which the Germans had looted from the factories of Belgium and France and had collected in various places ready for redistribution directly the war should terminate in their favor. One outstanding instance is the systematic stripping of all the fire-making plant from the Belgian factories and the concentration of the machinery in one place for the production of files on a gigantic scale.

SHEET METAL TRADES

London, Eng.—There are signs of fresh activity in the British sheet metal trades. A new price list has been prepared by special committees for each section of the industry. It is hoped that by reaching an early agreement on prices that the labor and wage question may be definitely settled and that this will assist the resumption of normal trade conditions and allay the unrest which is stated to have existed amongst the employees since the reduction in working hours came into operation.

ADAMSON MANUFACTURING CO.

The Adamson Manufacturing Co., of Hamilton, Ont., has issued a folder of the vulcanizers, accessories and supplies which they make. The folder is attractively illustrated. Readers of HARDWARE AND METAL may obtain folders upon request.

GURNEY FOUNDRY COMPANY, LIMITED

Catalogue No. K 191, issued by the Gurney Foundry Company, Limited, 500 King Street West, Toronto, lists fifty-two pages of various lines of kitchen equipment. These lines include heavy duty hotel ranges, heavy duty ranges for soft coal or wood only, double oven steel ranges, army ranges, yacht and steamship ranges, gas ranges, dining car equipment, bake ovens, gas broilers, carving tables, hospital ward and diet tables, combination warmers and serving tables, urns, single and in batteries, roll warmers, galvanized sinks, sectional top cook tables and saucepan racks, service tables, upright steamers, cast iron steam jacket kettle and cooker, aluminum steam jacketed kettles, dish washing machines, potato and vegetable peelers, ice breakers, gas toasters and gas cake griddles. The catalogue is most attractively printed and is profusely illustrated. Copies of it may be obtained upon request by readers of HARDWARE AND METAL.

Woolworth—His Early Days; His Ultimate Successes

The Story of the Building up of the Greatest Retailing Organization in the World—He Built Men and They Built Business

Some months prior to the death of F. W. Woolworth, HARDWARE AND METAL *ran his story as told by B. C. Forbes in "Leslie's Weekly," dealing with his early struggles and his ultimate success. Since his death, early in April this year, G. A. Nichols, writing in "Printers' Ink," has added to the stories of Woolworth by telling "How He Built Up His Wonderful Distributing Machine." Woolworth's early days, his struggles, his reverses and ultimate success, and what contributed to the position he finally attained—it is all told here and forms an interesting story.*—EDITOR.

THERE are few names better known throughout the length and breadth of Canada and the United States than that of Woolworth—the man who has accumulated one of the new world's big fortunes by trading with nickels and dimes, who has made himself the largest retail merchant in the world by catering to needs and wants which the average retailer thinks hardly worth while. Here is the story of the magic career of the five, ten and fifteen cent merchant prince as told by B. C. Forbes in "Leslie's Weekly":

A barefooted American farm lad made up his mind that he would rather work behind a counter than behind the plow. He was so green and gawky and awkward, so palpably a "hayseed" that, try as he might, no merchant would engage him at any wage. But the boy had such determination and doggedness that he agreed to serve for nothing, living meanwhile on his painfully-earned capital of $50. So complete a failure did he prove at selling goods that in his next job his small pay was reduced instead of increased. But, though he agreed with his boss that he was a misfit as a salesman, he did not give in. He stuck.

To-day he is the largest retail merchant in the world.

Here are some of his last year's sales: 50,000,000 pairs of hosiery, 89,000,000 pounds of candy, 20,000,000 sheets of music, 12,000,000 pounds of salted peanuts, 6,250,000 neckties, 42,000,000 boxes of safety matches, 9,000,000 domestic toys, 21,000,000 sticks of chewing gum, 1,700,000 nursing bottles, 15,000,000 cakes of soap, 5,000,000 phonograph records, 5,000,000 papers of hairpins, 5,500,000 rolls of wax paper — enough to wrap sufficient sandwiches to feed 170,000,000 people; 5,000,000 papers of common pins, 2,250,000 boxes of crochet and embroidery cottons.

Also:

His customers last year exceeded 700,000,000, an average every day of over 2,250,000.

Sales—all over the counter; no orders are filled by mail—last year exceeded $87,000,000 and are this year running at the rate of $100,000,000, representing about 1,500,000 distinct and separate transactions.

He owns a store in every town in the United States of 8,000 population or more.

His stores in the United States and Canada aggregated 920 on January 1st, 1917.

He controls 75 stores in Great Britain and plans to establish hundreds throughout Europe.

He employs between 30,000 and 50,000 men and women in his stores.

His organization is capitalized at $65,000,000—and has a market value of millions more.

He is the sole owner of the highest building in the world, 792 feet high, for which he paid $14,000,000 cash out of his own pocket.

Now you know who this is.

"What is your ambition?" I asked Frank W. Woolworth, creator of the 5- and 10-cent store.

"To open a store in every civilized town throughout the world," was the Napoleonic reply.

And when Frank Woolworth sets his heart upon doing a thing he usually does it, no matter how numerous or how enormous the difficulties, how severe the discouragements or how complete initial failures.

Looking Ahead

"What is your guiding business policy?" I queried.

"I look always ten to fifty years ahead and plan accordingly."

"And your basic principles?" I next asked.

"Give the people such value that they will save money by trading with you; and treat your employees so well that they will give your customers satisfactory service."

"What was your first important discovery in your journey up the hill of success?"

"When I lost my conceit that nobody could do anything as well as I could myself and learned to entrust duties to other people."

"How do you keep in touch with 900 stores and how do you analyze where new stores should be opened?" I asked.

"We maintain our own census all over the United States and Canada. It is kept up to date so that we know continually just which towns are growing, which ones are standing still and which ones are dwindling. Every movement of people is reported to us and we try to diagnose coming developments. For example, when the United States Steel Corporation decided to build at Gary, Ind., we immediately went in, before fifty houses had been erected there, secured the most desirable location and waited for the population to come. To-day we have two very large and very successful stores there. It was easy to foresee what was coming. Then, by bringing together every month representatives from each of the nine districts into which the United States and Canada are divided we keep posted on what is doing throughout the whole territory. We maintain a sort of day-to-day history of the two countries. Organization and co-operation largely explain our success."

"Isn't your purchase of a large site directly opposite the Public Library on Fifth Avenue, New York, in the very heart of the fashionable district, a distinct innovation, an entirely new departure in the development of your business?" I remarked to Mr. Woolworth, touching a subject upon which the newspapers had been commenting, not to say criticizing, very freely.

"We do things as big as that any day," Mr. Woolworth replied somewhat impatiently. "The trouble is the people in New York don't take a sufficiently broad view. A few years from now Fifth Avenue will be like State Street, Chicago. There are more department stores on State Street and a greater volume of business done there than on Fifth Avenue. Our Fifth Avenue store will be less costly than some of the others. We established a store eight years ago in Chestnut Street, Philadelphia, the most exclusive high-priced street in this country; our store is right next to Caldwell & Company, the Tiffany's of Philadelphia, and it has been very profitable. The same thing applies to Washington Street, Boston; Market Street, San Francisco; and Washington Avenue, St. Louis. Many people imagine that only the poorer classes patronize the 5- and 10-cent stores. That was true up to about fifteen years ago, but since then all classes have come to our stores in increasing numbers.

Giving Service

"The other evening the wife of one of the best-known lawyers in New York told me that she visited our Sixth Avenue store every week and bought things for herself, her children and grandchildren, her purchases last year having totaled over $600. This is by no means an exceptional case. We can sell cheaper than the department stores because of the tremendous quantities we buy. More and more every year we are taking the complete output of manufacturers of different kinds of goods; by keeping their plants running on full time from beginning to end of the year on one thing, the cost of production is reduced to the minimum, so that there are many articles we can sell at 10 cents which cost 25 cents or more in other stores. Then our overhead charge, when distributed over 900 stores, becomes only a very small percentage."

How He Got There

How did Frank W. Woolworth get there?

This is the first time Mr. Woolworth has been persuaded to tell in detail his early struggles. He dislikes talking about himself, but was finally induced to relate his

early hardships. He portrayed neither hero nor martyr. He simply narrated just what he went through. Biography contains no more typically American experience.

"I did not have to overcome any handicap of inherited wealth," he began. "That usually takes all ambition for achievement out of a young man. I was born on a farm at Rodman, N.Y., but we moved to Great Bend, N.Y., when I was seven years old. We were so poor that I never knew what it was to have an overcoat in that terribly cold climate, I never knew how to skate because I hadn't the money to buy skates. One pair of cowhide boots lasted a year, or rather six months, for the other six months

I went barefooted. My parents and theirs, for I don't know how far back, were Methodists, and I was brought up under the strictest discipline.

"The station master at Great Bend kept a two-by-four grocery store in a corner of the freight shed, and I decided to work for him just to get the experience in selling goods and also selling tickets, making out reports and the other simple office work that had to be done there. I became assistant station master—without pay. That was the nearest I ever got to fulfilling my boyhood ambition of becoming a railroad man and an engineer.

"When I went into the store they told me Mr. Augsbury was at home, sick, but I asked where he lived and made straight for his house. He greeted me with 'Hello, Bub. What do you want—a job?' I was a thin, emaciated blonde in those days, and I was wearing farmer's clothes. He immediately fired such questions at me as: 'Do you drink?' 'Do you smoke?' 'What do you do that's bad?' I told him I went to church every Sunday and didn't live in a locality where they did very bad things. My heart fell when he declared: 'You are too green; you have had no experience.' He added, however, that he would be in the store in the afternoon and that I might go and see Mr. Moore. Mr. Moore proved very discouraging. Finally, they both cross-questioned me together. I imagine I was about the greenest fellow who ever came off a farm. They did not try to hide their opinion that I had probably no ability at all.

"'What are you going to pay me?' I asked.

"'You don't expect any pay, do you?' Mr. Moore flashed at me.

"'I don't see how I am going to live without pay,' I explained.

"'That doesn't interest us,' he snapped back. 'You should work a whole year for nothing, as a schooling. You have to pay tuition when you go to school. We will not ask you any tuition fee.'

"I asked him to wait until I could find out how little I could get board for, and back I came in an hour and told him that I could get a place for $3.50 a week and that in ten years I had saved $50—all the capital I had of any kind. I said I was anxious to meet them half-way, and that I would gladly work for nothing for the first three months providing they would pay me $3.50 for the second three months. Finally they consented, saying, 'We will give you a trial to see if you are any good.' They told me to come the next Monday morning, but I explained that I couldn't get to the store very early as I would ride down with my father, who was to bring in a load of potatoes, and thus save 33 cents railroad fare.

"After struggling to get a heavy load of potatoes through snowbanks, we arrived at Watertown about half past ten. I left my little bag of clothes at my boarding place—there were no such things as dress suit cases in these days — and reported for duty. Mr. Augsbury was the first one I encountered.

"'Bub, don't they wear any collars in your neighborhood?' was how he greeted me. I replied, 'No.' 'No neckties either?' I again replied, 'No.' 'Is this old flannel shirt the best you have to wear?' he next asked. 'Yes, sir,' I replied. 'Well, you'd better go out and get a white shirt and a collar and a tie before you begin work.'

"I went and got properly rigged up, and shortly after I got back to the store Mr. Augsbury went to lunch. Nobody told me what to do. I hung around, feeling foolish. Most of the clerks went to dinner—lunch, as we call it nowadays— and in came an old farmer and said to me, 'Young man, I want a spool of thread.' I didn't know where they kept the thread, so I went over to Mr. Moore, who was busy at his desk, and asked him. 'Right in front of your nose, young man,' he snapped without looking up from his writing. I pulled out a drawer directly in front of me and sure enough found it full of spools of thread. 'I want number 40,' said the farmer. I never knew till that moment that thread had a number. I fumbled all round the drawer looking for number 40, but could not find it. I appealed to Mr. Moore to know if we kept number 40. 'Certainly; right in the drawer in front of you,' he said quite sharply. I had to tell him, 'I can't find any.' 'Just as I expected,' he snapped as he got down from his desk and showed me the right kind of thread. He immediately returned to his desk.

"'How much is it, young man?" asked the farmer. I had to turn once more to Mr. Moore. It was eight cents. The farmer pulled out a ten-cent shinplaster. 'Mr. Moore, where do I get change?' I had to ask. 'Come right up to the desk and make out a ticket,' he ordered me. I picked up one of the blanks and studied it all over to see what I could do with it. But I was stumped. 'Mr. Moore, I don't believe I know how to make this out,' I had to confess. 'Hand it to me; I will show you,' he replied. Next I had to ask, 'Where do I get my change?' 'There's the cashier right there, can't you see him?' he said impatiently.

"No sooner had the farmer gone out than another came in for a pair of mittens. This time I knew how to make out a check and where to get change.

"But as time passed, never once did I receive one word of sympathy or encouragement from a single soul. The other clerks made my life miserable by constantly poking fun at my ignorance and by always keeping me in the back of the store. Only one treated me with any consideration, a young fellow named Barrett, who later became a wealthy merchant. We remained great friends right up to his death, a little while ago.

"At the end of two and a half years—the name of the firm meanwhile had been changed to Moore & Smith—I was getting only $6 a week, and when I heard of a vacancy in another store I went to apply. But when I saw how higgledy-piggledy everything was I decided to name a high salary, thinking to be turned down. I asked $10 a week, and was astonished when the proprietor, Mr. Bushnell, said, 'All right, when will you commence?' I took the job, and on this big salary I felt justified in getting married. However, I found this store very distasteful. I tried to make it look attractive and I also dressed the windows, but Mr. Bushnell reprimanded me, and told me to confine myself to selling goods. This was my weakest spot.

"After a couple of months he met me in the basement one day—I had to sleep in the basement with another young fellow, armed with revolvers, to protect the store from burglars. He unceremoniously told me there were boys getting $6 a week who sold more goods than I, and that he could not continue to pay me $10 a week. I asked if it would not be a good idea to keep the store in attractive shape and display the goods to the best advantage so as to attract customers. But he replied, 'I don't want you to do anything but sell goods,' and he cut my pay to $8.

"This was a terrible blow. I was almost tempted to give up. I became terribly depressed. I wrote a pitiful letter to my mother. She sent me in reply the most lovely letter anyone ever penned. She finished up many encouraging assurances with this sentence: 'Some day, my son, you will be a rich man.' Somehow the expression of her faith in me buoyed me up. I kept up the depressing struggle until I was near death's door from sickness. For a year I was at home unable to do a stroke of work. I became convinced that I was not fitted for mercantile life.

"About the time I recovered my strength a man sold me a four-acre farm for $900. I had no money, but I raised a $600 mortgage and gave him my note for the other $300. My wife and I began raising chickens, potatoes and everything we could see a dollar in, to make ends meet. After we had struggled along for about four months, Moore & Smith offered me $10 a week to come back and tone up the store.

"This was positively the first recognition I had ever received for the hard work I had put in. My wife remained on the farm until we rented the place and took a three-room home in Watertown. At the end of the first year we had saved $50 in addition to having lent my father, who was very hard up, $20, and also after having paid the bills incidental to the birth of our first baby. It called for frugal management. I worked from seven in the morning till ten every night. I kept on working in this store from then (1877) until I opened my first five-cent store at Utica, New York, on February 22nd, 1879."

How F. W. Woolworth Built His Wonderful Distributing Machine

He Built Men and They Built the Business

BY G. A. NICHOLS

THE early days of F. W. Woolworth are just briefly touched on by G. A. Nichols in the following story which appeared recently in Printers' Ink. Mr. Nichols gives more details as to how Mr. Woolworth attained the success which was his. "He Built Men and They Built the Business."

Every truly great merchant contributes something to the business of the country as a whole who builds up others as well as himself. He works against precedent and takes chances so as to execute some bold forward idea that others did not think of or were not courageous enough to attempt. When his idea has arrived, others take it up and add to it, helping the pioneer while the pioneer helps them.

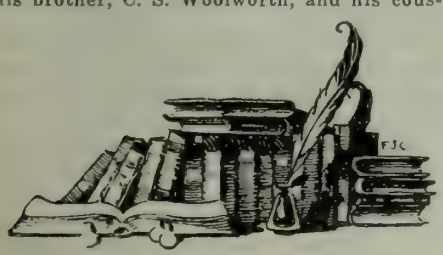
The contribution of F. W. Woolworth, who died last week at his home in Glen Cove, Long Island, was the establishment and consolidation for all time of the low-price principle in retailing. Out of this has grown a multitude of things promoting the prosperity of everybody engaged in the production, distribution and selling of merchandise.

Mr. Woolworth's career, which in forty years brought him up from an underpaid clerk to the world's greatest retailer, is such a study in contrasts as rightfully to be regarded as a business romance. When it is considered that his success is measured entirely by nickels and dimes, it is not remarkable that some people look upon it as a modern-day miracle. But there are few thrills in his story. There is little of the spectacular. There is on the other hand plenty of the hardest kind of constructive work, patient planning and courage that would not be denied. And behind all this lay Mr. Woolworth's ability

correctly to interpret the psychology of buying from the standpoint of the consumer.

Some way or other—just how he never was able to explain—he decided people would buy goods more readily if the goods could be displayed so they could be easily seen and handled. He thought the lesson of value could be driven home more strongly through placing at the disposal of buyers an assortment of merchandise at a uniform price. He reasoned if price was to be the selling point, then the price should be so plainly indicated by price tickets that the goods themselves would fairly shout out at the buyer what they could be purchased for.

Profited by Failure of First Store



This was as far as Mr. Woolworth could see his idea when in August, 1878, he induced his employer, W. H. Moore, a dry-goods merchant in Watertown, N.Y., to let him try it out.

Mr. Moore, like most other retailers even of this day, had a lot of odds and ends in his stock that seemingly would not move at any price. Mr. Woolworth grouped an assortment of them on a table one Saturday and put on a price card offering customers their choice at five cents each. It was something new, but the people responded and about one-third of the stock of leftovers was sold that day. From this it was a logical step to establish a department of five-cent goods in Moore's store—to display them openly and to have plenty of price tickets. Many items already in stock were placed in the new department and others were purchased especially for it.

A store selling nothing but five-cent goods was the next development. This Mr. Woolworth started in Utica, N.Y., in 1879. He had $300 worth of five-cent goods with which he had induced Mr. Moore to trust him. The venture fell flat. Something evidently was wrong. After the sales had dwindled down to $2.50 a day, Mr. Woolworth decided that his trouble lay in the fact that he did not have a wide enough variety of goods to give him sufficient volume of sales. People would buy if the goods could be had. From this grew the revolution in manufacturing methods which to-day places at people's disposal a multitude of lower priced items.

The Utica store closed and Mr. Woolworth induced Mr. Moore to back him again a few months later in Lancaster, Pa. Only five-cent goods were sold at first, but the range was wide enough to bring in sufficient volume. This store was a success, the sales for the first year amounting to $6,750. From it grew the present F. W. Woolworth Co., which sold last year in its ten hundred and thirty-eight stores, $107,175,000 worth of merchandise, all in nickels and dimes with the exception of some districts west of the Rockies and in Canada, where the 15-cent limit prevails.

After adding ten-cent goods to his Lancaster stock and calling to his assistance his brother, C. S. Woolworth, and his cous-

in, S. H. Knox, Mr. Woolworth established several other stores. It was here that came the parting of the ways. Should he go along and be just an ordinary success with a well-paying chain of five- and ten-cent stores or should he reach out and develop his idea in accordance with all its mighty possibilities as he saw them?

The other day in speaking of Mr. Woolworth's career some of the newspapers referred to him as a dreamer. It would be more correct to say that he was a man of vision and of vigorous action. He saw that his idea was sound. It had justified itself. But to develop it to the extent of its powers two things were necessary.

He needed men.

He needed merchandise—boundless quantities of it. The merchandise had to be low priced and yet of quality and of wonderful value. He could not afford to sell trash. Trash, he decided, was expensive at any price.

Upon the way Mr. Woolworth handled these two essential needs rests the present greatness of the F. W. Woolworth Co., and its still greater promise for the future.

As a trainer and finder of men, his achievements were more than remarkable. In addition to his brother and cousin he called in and trained such men as F. M. Kirby, Earl P. Charlton, Carson C. Peck and later men of the type of J. F. Nutting, H. T. Parson, C. F. Valentine and C. T. Newberry.

C. S. Woolworth, Mr. Knox, Mr. Kirby and Mr. Charlton went into the five- and ten-cent business with Mr. Woolworth in its infancy. They developed in it to a point where each felt justified in starting a chain of his own. In each of these chains the old Woolworth idea was worked upon and developed until it reached a point of near perfection. Each of the original five went ahead establishing new stores and training new men, all working absolutely independent of each other so far as management was concerned and yet in the closest harmony in method, policy and ideals.

This went along until 1912, when the five men were running 596 stores. Here it seemed best that another radical change should be brought about so as to force to its supreme consummation the idea—or perhaps the newspapers will call it a dream—cherished by Mr. Woolworth soon after his Lancaster store venture proved a success. The five merged their resources, their knowledge, their experience and their organizations into the present F. W. Woolworth Co. Into the new organization was taken the cream of the trained men that had worked each of the component companies so far up the scale of achievement.

The reason behind the organization was the need of centralized direction and of last word efficiency in operation on a large scale. The producing cost of merchandise was steadily advancing. It became necessary to offset this by more economical operation. The wisdom of the union is shown by the fact that since 1912 the number of stores owned by the company has nearly doubled and the yearly sales more than doubled. The joining together of the master minds of the five and ten cent business has at least brought about a perfected machine that can go right ahead with steadily increasing momentum even though death has taken the master hand off the wheel.

A couple of years ago Mr. Woolworth pronounced his finely geared operating machine complete. He said he could leave it for a day or forever and it would go on and on.

To bring about a condition of this kind is, as every business man knows, the crowning triumph of a truly great executive.

"Go in and make yourself at home," Mr. Woolworth once told a western manufacturer who called to see the Woolworth private office of which he had heard so much. "I can't stop to entertain you as I leave for Europe in half an hour."

He could go any time on the shortest of notice and the machine would not even falter.

High Morale Within Organizaton

A remarkable thing about the Woolworth organization is that the surviving founders and such employees as stenographers and clerks are the only ones that receive salaries. After the consolidation F. W. Woolworth, as president, received $25,000 a year. C. S. Woolworth, S. H. Knox, Earl P. Charlton and F. M. Kirby, vice-presidents, each received $10,000 per year. This was all the compensation the founders got with the exception of dividends upon their stock which they received the same as any other stockholder. Everybody else gets his pay on a commission basis and settlement is made once a year. The commissions paid the officials in the executive offices in New York are computed on the basis of the earnings of the entire organization. The earnings of the men in each of the eleven district offices are based on what the stores in that district earn. The managers and assistant managers of stores get commissions on their store's business. No one man in the company ever owned a controlling interest. No single stockholder in fact

controls even 25 per cent. of the capital. Every man from store manager up has begun at the bottom and in every position there are one or two understudies. Each place is won by merit and the rule is never to go outside of the organization for a man to manage a store or to take a higher position. All this brings about a condition of the highest industrial morale. Each man rightfully concludes that he is working for himself and that he is going to get the fruit of his efforts.

The merchandise production problem which Mr. Woolworth was called upon to solve—and which now has reached its triumphant consummation—involves the closest kind of constructive co-operation with manufacturers. In many an instance Woolworth buyers have shown manufacturers possibilities for their goods which they did not dream existed.

It has been said that Woolworth's low prices have been brought about by beating manufacturers' profits down to the vanishing point. The exact opposite is the case. Woolworth, in common self defense, wants the manufacturer to make a profit. Instead of trying to force him down, therefore, it shows him how he can increase his efficiency and save in his operating cost. This saving combined with the advantages of unlimited outlet afforded by the Woolworth stores enable the manufacturer to sell his goods profitably within the five and ten cent limit.

Mr. Woolworth related to a "Printers' Ink" representative just a few weeks ago how some of these seeming miracles in merchandising were brought about, and how a profit could be gained in selling remarkable items for ten cents without diminishing the quality.

A certain popular finger ring came on the market and was retailed at around fifty cents. A Woolworth buyer approached the manufacturer to get the ring as a ten-cent seller. The man pronounced the proposition as the last word in absurdity. His output was very satisfactory, he explained—more than four hundred and fifty dozen already that year. The Woolworth buyer offered to take 5,000 gross of the rings during the next year and made certain suggestions as to how they could be produced at a saving and of the same quality. The manufacturer quickly saw the idea and the result to-day is seen in the ten-cent gold-filled rings that can be bought at Woolworth stores.

When the war broke out Woolworth could no longer obtain from Germany a certain iron toy it had been selling at ten cents. An American manufacturer after the closest kind of figuring and taking into consideration the huge quantity ordered, declared he could not work his production cost down so as to make a profit on the toy as a ten-cent seller. The Woolworth buyer went over his figures with him and pronounced them all correct with the exception of the charge for painting. The

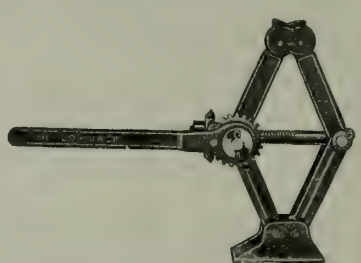
NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

TOP DRESSING

Mohair Top Dressing, manufactured by the Auto Specialties Mfg. Co., of 40 Elm St., Buffalo, N.Y., does three things, it is claimed, redyes, waterproofs and re-rubberizes the fabric, producing, it is stated, a silky and lasting finish. It is stated that it will not fade or brown out like an asphaltum paint, and that it leaves the top soft and pliable, giving

Mohair Top Dressing



factory-like newness to its appearance. It may be applied, it is stated, with an ordinary brush. The firm has a Canadian factory at Fort Erie, Ont., and agencies are being established throughout the Dominion.

STORE EQUIPMENT

The Toronto Plate Glass Importing Co., Toronto, Ont., has secured the manufacturing and selling rights for Canada, for the "Dosi" cases and display stands. The parts of these, it is stated, are interchangeable, and can be made into any shape or design. Plate glass shelving, racks and bins are, it is stated, easily constructed of polished plate-glass with the use of the "Dosi" bin clamp. The clamp consists of two metal clips, a bolt and a nut. It is stated that anyone can attach it quickly. All kinds of display stands and fixtures can be arranged, it is claimed, and the claim is also made, that by using the polished plate glass, sales are increased, because the goods shown are visible from all sides. By using plate glass, it is claimed, tidiness, order and arrangement are at once united with every refinement of convenience and beauty. The claim is made that plate glass window fixtures are among the handsomest ever designed, with the added advantage that the owner can take down and use the same plates for some entirely different "layout" in another part of the store, if he so desires. The plates, it is stated, are easily kept clean, will last a life time, and will soon pay for themselves. Beautiful color schemes, it is, stated can be made by blending deep and light tinted cartons, bottles and other goods. In case an accident occurs and a plate is broken, it is stated, that it can be instantly replaced with another without the necessity of rebuilding the whole stand, as is often necessary when wood and glass cases are used.

HI-LO JACK

The Hi-Lo Jack, manufactured by the Rowe Calk and Chain Co., of Plantsville, Ct., measures, when extended, 17 inches. It is so constructed, it is stated, that it starts to lift at six inches. Owing to its great leverage, it is claimed it steadily increases in lifting power as the load is raised. A specially constructed larged-sized ball thrust, it is stated, eliminates friction and assures easy lifting. A specially constructed handle is so arranged, it is stated, that applied lifting power is always central with the travel of the jack, assuring an even and easy lift at all times. The pins, toggie blocks and gears, it is stated, are of sample size and tested to carry the rated load. The action, it is stated,

Hi-Lo Jack "Raised"

Hi-Lo Jack "Folded"

is based on the principle of the toggle joint, giving it a range unexcelled by any jack on the market.

LAMINUM SHIMS

F. Sager, 35 Aikins Building, Winnipeg, has been appointed distributor for Western Canada, for Laminum Shims, manufactured by the Laminated Shim Co., Inc., 533-541 Canal St., New York. These shims are made of laminum, which, it is claimed, is the only metal made in layers, as solid as a single piece of metal, yet ready in an instant to be made thinner by .002 of an inch, or as many times this as is desired, and stand the micrometer test for accuracy. Laminum, it is stated, is simply a substance consisting of a number of sheets of brass .002 or .003 inches thick, firmly held together by a metallic binder. It is made thinner, it is stated, by simply lifting one corner of the top layer with a penknife and then peeling it off. There are, it is claimed, no loose leaves to slip and drop, and now way for dirt or grit to slip be-

Laminum Shims

tween the layers. None of the expense of filing, required often by brass shims, is necessary, it is stated.

BRITISH GOVERNMENT'S HOUSING SCHEME

The London, England, representative of HARDWARE AND METAL, writing under recent date, relative to the British Government's housing scheme, has the following to say:

"The Government housing scheme is the subject of much criticism from the practical-minded and those whose business it has been in the past to build houses for the people. Financiers, philanthropists, sanitarians and politicians have all solved the problem in theory, each according to his or her ideal home, and a legion of charming architectural suggestions have resulted. There is no famine in ideas.

The following are some of the main points brought out by a practical builder which will assist in grasping the situation from the trade standpoint:

The Government are not giving any encouragement to builders who wish to start building houses at once. The cost of materials is almost prohibitive and the scarcity and dearness of labor a serious handicap. Speaking generally, most of the materials required in house building have risen 180 per cent. Before the war cement cost about $4.50 per ton; to-day the price is sixteen dollars. Bricks, which used to cost from $4.50 to $6.50 a thousand, now cost about $12.00.

A house which cost £850 in pre-war days, could not now be built for less than £1,000."

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

A REACTION has occurred this week in prices of solder which is a direct reflection of the advance made in the quotations on ingot tin and the stronger feeling in lead. The advance on solder amounts to 2c per pound all the way around.

There seems to be a somewhat better feeling in ingot metals and the start of buying of tin has resulted in a price movement upward. Copper shows a stronger tendency at primary points though the situation locally is unchanged as far as prices are concerned. Spelter is just waiting for someone to start buying apparently and in its present sensitive state, this factor would probably contribute to an advance.

Changes this week have been made in a couple of lines of pipe wrenches, the decline ranging from 10 to 12½%. A lower scale of quotations has been named also on malleable wagon goods.

Flower guard has advanced in price and some lines of roofing paint show a slight advance in revised quotations just issued.

Another change has been brought about this week in steel, bronze and brass screws. Discounts named a month or so ago on the steel and a few days ago on bronze and brass, have been superseded by a new scale which provides for pretty substantial declines all the way around. The market seems to have receded to a pretty fair level now and indications point to a somewhat steadier basis being maintained.

Linseed oil shows a decidedly strong undertone this week with the markets tending towards somewhat higher levels. The factors which have contributed to a strong feeling in seed are still apparent and there seems to be no present indication that a marked recession from levels now ruling is a prospect for the immediate future.

Turpentine has shown increased strength in the markets in the South. Domestic demand and export demand are both large and replacement of stocks from new crop outturn is not proceeding very rapidly. Stocks here are not large and some difficulty in getting stocks through is being experienced. Prices have held firm and unchanged.

Business is very good and unless labor troubles assume abnormal proportions, there is every reason to believe present activity will show increases.

MONTREAL MARKETS

MONTREAL, May 15—Price changes made this week are in the nature of lower figures for malleable carriage and wagon hardware, wax, cotton rope, fuel oil, and enameled ware. Advances are made for various rifles made in the United States, while the undertone is stronger on ingot copper, but no change is made in its price.

General conditions in the hardware trade are reasonably satisfactory. The volume of business is made up, in many cases, of small orders, requiring a great deal of detail work, but which, in the aggregate, are very satisfactory. Country orders are not only better, but there has been a great improvement within the city itself.

Indications are favorable for a better business right along and shipping activity at this port is increasing daily. Markets are, for the most part, firm.

Rifles Go Higher; Malleables Lower

Montreal.

RIFLES, MALLEABLES. — An advance of about 5 per cent. has been effected here on various rifles made in the United States, and which makes a new high record for these goods. Various malleables, such as whiffletree ends, centre clips, hooks, etc., have been reduced in price. The changes will approximate about 10 per cent. of a reduction all around.

Wrenches Reduced; Screws and Wax, Too

Montreal

SCREWS, WAX, WRENCHES.—Reductions are again made for various screws. The following discounts now apply: Flat head, bright, 77½ per cent.; oval, 75 per cent.; round, 75 per cent.; flat head, brass, 55 per cent.; oval, brass, 52½ per cent.; round head, brass, 52½ per cent.; flat head, bronze, 50 per cent.; oval, 47½ per cent.; round, 47½ per cent. Various waxes, including parowax, have declined in price, the changes being from ½c to 1c per pound. Pipe wrenches of both Stillson and Trimont patterns are reduced. The discounts applying to Stillson are 55 per cent., and to Trimont, 50 per cent. This is the discount basis of one jobber, while another gives the reduction as 10 per cent.

Cotton Rope Down; Cordage Basis Holding

Montreal

ROPE AND CORDAGE. — Little change is reported on rope. Price changes are entirely lacking on manila and sisal. There is not a big sale for the product, a fair and seasonable selling being all that the manufacturers report. Buyers are not inclined to take more than their near requirements. Price basis here remains as follows: Pure manila, 34c; British manila, 30c, and sisal, 27½c per pound base. Cotton rope is reduced by one jobber to 64c per pound for 3-16 inch and to 63c for ¼ inch and larger.

Enamelled Ware Less; Stoves Move

Montreal

STOVES, WARES.—Prices have held steadily on most wares but there is a decline for one-coat RK enamelled ware, the discount being 50 and 10 per cent. now. Other lines are unchanged. There is a good movement. Stove sales are satisfactory, the manufacturers state, the dealers sending in fair orders. Of oil and gas stoves there is an especially good sale, prices being firmly held on all these lines.

Fuel Oil Down; Gasoline; Coal Oil

Montreal

OILS, GASOLINE.—There is but one change this week, that of a decline for fuel oil, and which is now quoted at $8.75, in barrels. Coal oil is unchanged and is selling still at 20 to 23 cents per gallon, while there is no change in the price of gasoline. This sells at 34 cents per gallon, and there is an increasing demand for the same.

No Fault With Nail Turnover

Montreal

NAILS AND WIRE.—Prices remain the same on wire and cut nails, the basis being $4.75 per 100 pounds. Orders received are very satisfactory in the light of the past season or two, and the country output is better than that for the city, indicating a healthy outside condition. Wire products are going very well, too, and the undertone is unchanged, with smooth steel wire basis holding at $5 per 100 pounds.

Bars Move Steadily And Without Change

Montreal

STEEL AND IRON.—Much iron and steel pass out from jobbers' stocks from week to week and there is little complaint in this respect. A steady undertone applies to both commodities and there is probably less likelihood of revisions being made than there was a week or so ago. Of course it will take a little time to test the result of the removal of Governmental restrictions in the States. Some anticipate a firming of the basis rather than declines, and the next few weeks should define the position more clearly. In any event steel stocks are ruling particularly strong at this writing.

Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75
Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22

Some Price Cutting On Steel Sheets

Montreal

STEEL SHEETS.—The market is rather unsettled and unsteady, and this is attributed to the desire of some interests to dispose of supplies at prices suited to themselves. The market conditions, relative to price are therefore quite nominal. A fair amount of trading is reported and stocks of iron here are quite satisfactory.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$5 25	$6 25
12 gauge	5 30	6 30
14 gauge	5 35	6 35
16 gauge	5 45	6 50
18-20 gauge	6 00	6 35
22-24 gauge	6 05	6 40
26 gauge	6 10	6 50
28 gauge	6 40	7 00
GALVANIZED SHEETS—		
10¾ oz.	$8 35	$9 25
28 gauge	8 30	8 85
26 gauge	....	8 50
22 and 24 gauge	7 70	8 35
20 gauge	7 50	8 35
18 gauge	7 50	8 35
16 gauge	7 30	8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Plumbers Make Use Of Lead Products

Montreal.

LEAD PRODUCTS.—A fair volume of trade has been developing for lead products in this market. Plumbers are getting more business, and, not having carried a great deal of stock over the winter they have to protect themselves now for various lines. Chances for the week are nil, and the basis is continued as under:

Lead pipe	0 11½
Lead waste	0 12½
Lead traps and bends	15%
Lead wool, lb.	0 14
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	0 10½
Lead sheets, 4 to 8 lbs, sq. ft.	0 09½
Cut sheets ¾c lb. extra, and cut sheets to size, 1c. lb. extra.	
Solder, guaranteed, lb.	0 33
Solder, strictly, lb.	0 29
Solder, commercial, lb.	0 27
Solder, wiping, lb.	0 25
Solder wire (8 gauge)—	
40-60	0 34
45-55	0 35¾
50-50	0 39¼
Zinc sheets, casks	0 17
Do., broken lots	0 18

Still Hopeful of Old Metal Movement

Montreal.

OLD MATERIAL.—Dealers in old metals are confident of better markets opening up here. This will be a welcome condition and prices should then strengthen to some extent. In the meantime, and pending the activity of the mills after the removal of Government control in the steel markets of the States, a more encouraging outlook is held. There are no changes.

Dealers' Buying Prices—		
Pipe scrap, ton	9 00	10 00
Stove plate, ton	....	15 00
No. 2 busheling	....	5 00
Old rubbers, boots and shoes	0 06½	0 07
Overshoes, lumbermen's rubber boots	....	0 03½

Automobile tires	....	0 03
Yellow brass	....	0 08½
Red brass	0 12	0 12½
Light brass	0 06	0 07
Scrap zinc	....	0 04¾
Heavy copper	0 13	0 13½
Wrought iron, No. 1, per gr. ton	....	11 00
No. 1 machinery cast	....	18 00
Heavy melting steel	....	10 00

Copper is Stronger; Tin and Lead Steady

Montreal.

INGOT METALS.—Little new interest has developed this week in the ingot markets. Of course it is somewhat satisfactory to the trade that restrictions on steel trading have been lifted in the United States, and this, it is hoped, will have a gradual salutary effect on business.

COPPER.—This is firmer at primary points, but no local change has been

BRIEFS FROM THE WEEK'S MARKETS

Stillson wrenches underwent a revision downward this week, the decline amounting to about 12½ per cent.

* * * * *

Flower guard has reached higher levels in new prices issued for present season.

* * * * *

Everjet roofing paint advanced 25c per dozen to $9.50 in 1-gallon tins.

* * * * *

Steel, brass and bronze wood screws have again undergone a further revision downward this week. New discounts provide for quite a substantial decline.

* * * * *

Markets in the South remain very firm on turpentine. Even higher prices seem to be a prospect.

* * * * *

Reports from the mills in the Pittsburgh district indicate that sheet prices have reached the bottom in line with to-day's costs.

* * * * *

Solder advanced 2c per pound in Toronto as a reflection of advances in tin and stronger feeling in lead.

* * * * *

Ingot tin has advanced from 2c to 4c per pound. The tendency seems to be still upward.

* * * * *

White lead in oil is moving much better and market is showing much firmness.

* * * * *

Winnipeg reports a decline in tee pipes, ridge and side roof pipes and kindred lines.

* * * * *

Bright tinners' wire showed a decline this week at some points.

made. A fair sale is had for the material at 18c per pound.

TIN.—This metal has interest for many in that the Government price of 72½c per pound is still effective in the States. So long as this continues none will buy any but the smallest quantities that their requirements call for. Local price is held unchanged at 56c per pound.

LEAD.—Changes are entirely lacking in the lead market, which is as dead as possible here, and seemingly the same outside. It is hoped that business will revive after peace is signed. Price holds at 6½c per pound.

ANTIMONY.—A rather firm market obtains. Trading is not heavy, and what business is transacted is on the basis of 8½c per pound.

SPELTER.—Tendencies are easier in an effort to induce buying, but there is a dearth of orders. Price remains at 8½c per pound.

ALUMINUM.—Without change. Average sized orders are filled at 38c per pound.

PIG IRON.—Interests are looking for business to improve, now that the Government has released its control. Price stays still at $45 per ton.

TORONTO MARKETS

TORONTO, May 15—Price changes this week show a reaction in tin to higher levels, a firmer feeling in lead and a revision upward in solder quotations. Carpet felt has declined 50c per 100 pounds. A further decline has occurred this week in wood screws, steel, brass and bronze all being affected. Stillson wrenches are lower, but other changes are not numerous, the markets seemingly having steadied down somewhat.

Further Decline in Wood Screws

Toronto.

WOOD SCREWS.—A further decline has been recorded in the prices of wood screws, as is shown by the new scale of discounts just issued by the manufacturers. This follows in the case of bronze and brass screws very closely on a change made a couple of weeks ago. Steel screws are included in the list that has dropped this week. Prices are in line with decline just named in the U. S. markets. The new discounts, with the ones that are replaced, are shown for comparative purposes:

Discount from List

	To-day	Before
Flat head, bright	77½%	75%
Oval head, bright	75%	70%
Round head, bright	75%	70%
Flat head, brass	55%	47½%
Oval head, brass	52½%	45%
Round head, brass	52½%	45%
Flat head, bronze	50%	42%
Oval head, bronze	47½%	40%
Round head, bronze	47½%	40%

Lower Prices on Pipe Wrenches

Toronto.

PIPE WRENCHES.—A decline has occurred this week in the price of Stillson wrenches, amounting to about 12½%.

Rifles Selling at List Plus 10%

Toronto.

RIFLES.—In reporting the revised quotation on Winchester rifles last week, it was stated that these were being invoiced at list plus 7%. Jobbers indicate that the correct figure for these should be list plus 10%, the earlier quotation not including all the elements of cost.

Summer Stoves Active; Wares Hold

Toronto.

STOVES, WARES.—Summer lines of stoves are commencing to work forward freely, some manufacturers reporting that retailers are urging delivery of orders which have been held back for some time past. Coal oil, gas, gasoline and electric stoves are all enjoying a much better sale.

No new developments are reported in respect to the sale or prices applying on the various lines of wares. The movement of the various lines is not heavy but considered quite satisfactory.

SAYS HANDLE PRICES

There is little likelihood of any reductions being made in the prices of handles or wooden goods in the opinion of W. H. Braddon, general manager of the Columbia Handle Company of London, Ont. Discussing the situation with HARDWARE AND METAL, Mr. Braddon stated that prices of raw materials are high and wages are perhaps the highest in the history of the business. There is a fair volume of business offering.

"We have secured some export business," said Mr. Braddon. "The first carload of goods for overseas went last week, and we will send another this week. The orders are for medium-priced goods. We are looking for other export orders and expect to build up a nice overseas trade. One of the troubles just at present is in getting shipping space, owing to the scarcity of boats."

Carpet Felt Declines 50c

Toronto.

CARPET FELT.—Prices on carpet felt show a revision downward this week, the new quotations which have been named representing a decline of 50c per 100 lbs. The present quotation on 16 oz., 20 oz. and 24 oz. is $4.50 per 100 lbs.

Oils Selling; Gasoline Too

Toronto.

OILS, GASOLINE.—There have been few new developments this week from a market standpoint, prices being firmly maintained all the way down the line on oils and gasoline. Activity marks the sales columns and the trade reports orders coming along freely. Coal oil is increasingly active; prices remain unchanged at from 19½c to 22½c per gal., according to grade. Gasoline is steady at the unchanged figure of 33c per gal.

Business in Nails Better; Wire Too

Toronto.

NAILS, WIRE.—There is a somewhat better feeling apparent in the trade as regards volume of business being done in nails. The volume is not enormous as yet, but indications are that a cessation of labor troubles would do much to start orders coming along quite freely. Quotations are unchanged, the wire nails selling at a base of $4.70 per 100 lbs., and cut nails at $4.75.

Galvanized wire and fence wire seem to be enjoying a somewhat better sale also, with prices steadily held. Smooth steel wire base remains at $5 per 100 lbs.

Trade in Iron and Steel Opening Up

Toronto.

IRON AND STEEL.—Indications are that business is opening up a little better and altogether the outlook is one that has a better tone. Prices have held without change and market seems fairly steady at following figures:

Common bar steel	4 25	4 50
Common bar iron	$4 25	$4 50
Refined iron	4 65	4 90
Angle base	4 50	4 75
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel, No. 10	4 50	4 75
Do., No. 12	4 75	5 00
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 22	0 90

Sheets on Very Fair Basis

Toronto.

SHEETS, SLATES.—One large factor, in talking to HARDWARE AND METAL this week on the situation in sheets, said: "I have just returned from Pittsburgh, where I was in touch with two very large mills in respect to sheets. These mills took me over their cost

sheets and the figures I saw have convinced me that the market is about as low as it will go. I have been a consistent bear on the market some months and it has taken this actual insight into production figures to bring to me a feeling that present figures were not too high. I feel now that little, if any, further decline can be made. Most certainly the buyer is not risking much in covering for his requirements for some little time ahead." An open market might create a temporary flurry and bring about lower prices, but the feeling is that no substantial drop can be or will be made effective. Quotations for the week reveal no change. Sales are reported excellent.

BLACK SHEETS.	Per 100 lbs.	
10 gauge	$5 00	$5 45
12 gauge	5 05	5 50
14 gauge	....	5 10
16 gauge	....	5 20
18-20 gauge	5 80	....
22-24 gauge	5 85	....
26 gauge	5 90	....
28 gauge	6 00	....
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 50	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS.		
10¾ oz.	$7 80	$8 10
U.S. 28	7 40	7 70
U.S. 26	7 10	7 40
22 and 24	6 95	7 25
18 and 20	6 80	7 10
16	6 65	6 95
12 and 14	6 50	6 80

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Corrugated Sheets Holding Firm

Toronto.

CORRUGATED SHEETS.—Sales of corrugated sheets are being made in increasing numbers and the outlook seems very good beyond the point where labor may upset things appreciably. Barring abnormal labor troubles, there seems to be every indication that business will sail along at a good clip. Prices are firm at levels shown below.

Kindred lines are moving fairly well, including eavetrough, conductor pipe, ridge roll, etc. Prices are firmly held at figures shown in current market quotations.

Corrugated Sheets—	Per 100 sq. ft. Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Wrought Pipe, Boiler Tubes Holding Firm

Toronto.

WROUGHT PIPE, BOILER TUBES.—The market on wrought pipe is holding quite steadily. More activity is noted, orders coming through in fairly good quantities and prices shown in current market quotations being maintained.

Similar conditions may be said to apply to boiler tubes. Stocks are in very good shape, and prices ruling at following unchanged levels:

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	.....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

Solder Goes Up 2c lb.; Lead Products

Toronto.

LEAD AND ZINC PRODUCTS.—Prices on solder reacted this week, going up 2c per lb. as a reflection of the stronger feeling in lead and advances made in quotations on tin. Figures now being quoted on solder range as follows: guaranteed, 35c to 39c; strictly, 33c to 35c; commercial, 30c to 33c; wiping, 29½c to 32c; wire, 36c to 42c.

No change has been made in manufactured lead products, but a better tone to the market is apparent as a result of the improvement in the metal. Business is reported very good. Range of prices follows:

Lead pipe, lb.		$0 11½
Lead waste pipe, lb.		0 12½
Lead traps and bends		15%
Lead wool, lb.		0 14
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½

Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.

Solder, guaranteed, lb	0 35	0 39
Solder, strictly, lb.	0 33	0 35
Solder, commercial, lb.	0 30	0 33
Solder, wiping, lb.	0 29½	0 32
Solder, wire, lb.	0 36	0 42
Zinc sheets, per lb.		0 17

"Nothing Doing" Sign Still in Evidence

Toronto.

OLD MATERIALS. — Scrap yards have had a poor season of it. In fact, since the signing of the armistice there has been nothing worth while in the business, and some of the dealers with large overhead expenses have probably lost money. Range of quotations which can be termed only nominal, follow:

Dealers' Buying Prices—		
Tea lead		0 03
Heavy lead pipe		0 04
Pipe scrap		8 00
Stove plate, per ton		10 00
No. 2 busheling		8 00
Yellow brass		0 06
Red brass		0 08½
Light brass		0 05
Scrap zinc		0 05
Heavy copper		0 15
Wrought iron, No. 1, per gr. ton		15 00
No. 1 machinery cast		14 00
Heavy melting steel		9 00
Old rubbers, boots and shoes	0 06	0 06¼
Overshoes, lumbermen's rubber boots		0 04½
Bicycle tires		0 04½
Automobile tires	0 03½	0 04

Cordage Outlook Remains Same

Toronto.

CORDAGE.—The cordage outlook remains about the same. Dealers have pretty well taken delivery of spring orders for rope and the present is just the interval before real business can be expected. The prices remain quite steady, the pure manila being quoted at 34c per lb., base; British manila, at 30c; New Zealand hemp, 30c; sisal, 27½c, and sisal lath yarn, 27½c. No new developments in the twine outlook are shown.

Cement Sales Show Improvement

Toronto.

CEMENT, PLASTER OF PARIS.—Cement sales show a marked improvement during the past week, dealers report, and the situation is one that looks quite encouraging at the moment. Prices remain at unchanged levels as shown in current market quotations.

Plaster of Paris has been moving very well also, and indications are that the season will be a pretty active one. Prices are firm and unchanged.

Waste Holds; Oakum Unchanged

Toronto.

WASTE, OAKUM. — There is little new to report in the situation on waste. Sales are not large but the outlook is not considered discouraging by any means. Prices remain at levels shown in current market quotations.

The situation in oakum is on a parallel with that of waste. A fair amount of business is being handled at firm and unchanged prices.

Tin Moves Up; Lead Firmer

Toronto.

INGOT METALS.—Tin moved up from 2c to 4c per lb. this week, and seems to be on the upward trend again. Lead, after a period of dullness and weakness, has stiffened, and it looks as though a revision in prices upward may result.

COPPER.—The market at primary points is firmly held, and there seems to be more interest in the metal. Locally, the price has held unchanged at 18c per lb., but the undertone is strong.

TIN.—This metal has reacted as a result of some buying which has developed in U. S. markets after a period of little activity. It looks as though even higher levels may be reached than the 58c to 60c per lb. price now asked.

SPELTER.—There is a better feeling, and it is felt that any buying would result in a stiffening of values, the metal being quite sensitive to any such factor. Price holds at 8¼c per lb. locally.

LEAD.—A reversal of feeling is noted in lead, the undertone to the market strengthening appreciably, though no quotable change has occurred locally, 6½c per lb. being figured ruling.

ANTIMONY.—There is only a fair amount of business being done, but the market is quite firm. The price here to-day is 8½c per lb.

ALUMINUM. — Still uninteresting and little activity reported. A price of about 40c per lb. fits the situation as it exists to-day.

LONDON MARKETS

LONDON, Ont., May 15, 1919—A further decline has been recorded this week in the price of wood screws. New discounts are now available and show quite an alteration from recent figures. Advances have been recorded in flower guard and automobile pumps and an advance of 25 cents per dozen is shown in one line of roofing paint. The markets as a whole remain quite steady with business showing a marked improvement.

Downward Move in Wood Screws

London, Ont.

WOOD SCREWS.—Discounts have again been revised on wood screws, and the present scale of quotations provides for another decline. The new prices which are now being named to the trade are as follows:

Flat head, bright .....77½% off list
Oval head, bright 75%
Round head, bright 75%
Flat head, brass 55%
Oval head, brass 52½%
Round head, brass 52½%
Flat head, bronze 50%
Oval head, bronze 47½%
Round head, bronze 47½%

Hammer Prices Undergo Revision

London, Ont.

HAMMERS.—New prices have been issued this week on the Maydole adze eye hammers. It is indicated that these have been higher for some time past, but new stocks are now arriving, and this is resulting in the present revision of prices. Figures which are now being quoted to the trade are: for the No. 1, $19 per doz; No. 1½, $17.50; No. 11, $19; No. 11½, $17.50; No. 12, $17; No. 13, $16.

Activity Develops in Tie Out Chains

London, Ont.

TIE-OUT CHAINS.—There has been a marked improvement in the sale of tie-out chains during the past week or so, and activity is expected to be maintained for the next few weeks in this line. There has been no change in prices, the list prices shown below remaining at unchanged figures, and the discount applying to same holding at 37½% from list.

No. 1-0 x 20 ft., $16.50 per doz. list; 30 ft., $23; 40 ft., $30; 50 ft., $37.

No. 2-0 x 20 ft., $17 doz. list; 30 ft., $26; 40 ft., $33; 50 ft., $41.50

Net Prices Named on Stove Boards

London, Ont.

STOVE BOARDS.—New prices have been worked out in line with the revised discounts issued last week on stove boards, and the net figures prevailing are shown below. The present discount on the wood-lined stove boards is 30 and 5%, and the discount on the paper lined is 40 and 5%.

	Wood Lined Dozen	Paper Lined Dozen
24-inch square	$12 30	$ 7 41
26-inch square	13 97	8 55
28-inch square	15 63	9 41
30-inch square	16 96	10 83
33-inch square	21 28	12 25
36-inch square	24 60	
18 x 28-inch	12 64	8 27
24 x 32-inch	16 62	10 26
26 x 34-inch	17 67	11 97
26 x 38-inch	18 95	14 25
28 x 44-inch	26 60	17 10
30 x 48-inch	33 25	

Roofing Paint Registers Advance

London, Ont.

ROOFING PAINT.—An advance of 25c per doz. is shown in the price of Everjet Roofing Paint, in one gal. tins, which is now being quoted to the trade at $9.50 per doz. tins.

Flower Guards Show Higher Price

London, Ont.

FLOWER GUARD.—New prices issued for the present season on flower guards show an advance over figures which were in effect last year. The present scale of quotations is for the 12 in. galvanized, $9 per 100 ft.; 12 in. painted green, $10 per 100 ft.; 18 in. galvanized, $10 per 100 ft.; and 18 in. painted green, $11 per 100 ft.

QUESTION OF TIRE PRICES UNDER DISCUSSION

Price reductions in some lines of American tires, approximating from five to fifteen per cent., became effective this week. This was the result of action taken by some of the large firms in the United States, who decided upon a price revision, and instituted a sliding scale. Smooth treads and tubes are reduced by these firms approximately fifteen per cent., while the revision downward on non-skids is from five to ten per cent.

Canadian-made goods, it is stated, are not likely to be reduced.

"During the last year of the war," said one manufacturer to HARDWARE AND METAL, "American-made tires were boosted and boosted. Canadian firms did not increase their prices, and so now there is no reason why they should make any reductions. For some time past it has been possible to buy Canadian-made tires cheaper than American goods for the reason that Canadian firms did not raise their prices."

Business, it is stated, has been very fair, but an improvement is looked for as soon as warmer weather comes and the touring season starts.

"There is every indication that business will be good," said one manufacturer to HARDWARE AND METAL. "As soon as car owners can get out it will mean that business will come with a rush."

Builders' Hardware Selling Better

London, Ont.

BUILDERS' HARDWARE.—Jobbers report a somewhat better movement of the various lines of builders' hardware, with prices being steadily maintained. Peterboro lines are being quoted at 12½% off list. Net prices on some of the familiar lines to the trade are: cheap rim locks, $2.70 per doz.; jet rim and mortise knobs, $2.50 per doz.; porcelain rim and mortise knobs, $2.50 per doz.; and cheap mortise inside sets, antique copper or dull brass finish, $6.50 per doz.

Auto Pumps Move Upward

London, Ont.

AUTO PUMPS.—A change has been made in the price of the Inland IXL auto pumps. The new price which is now being quoted to the trade provides for an advance, this line now selling at $7 each.

Nails Move Well; Rope is Quiet

London, Ont.

NAILS, ROPE.—A steady market is being maintained in nails this week, the wire selling at a base of $4.70 per 100 lbs., and the cut at $4.75 base. There is a very good sale reported and jobbers seem to be quite satisfied with the volume of business that is being done.

There is very little doing as far as rope is concerned, there being a light sale reported since booked orders have been completed. Prices are holding at unchanged figures, the pure manila being quoted at 34c per lb. base, British manila 30c; New Zealand hemp at 30c, and sisal at 27½c.

Floor Wax Selling; Paris Green Moves

London, Ont.

FLOOR WAX, PARIS GREEN.—Activity is manifest in sales of floor wax, which is moving forward with other clean-up lines, and prices are well maintained. The old English wax is selling here at 33c per lb.; Johnson's at 63c per lb., and Edwards at 40c per lb.

Booked orders are now being shipped out on Paris green, and it will not be very long before the necessity for this may become apparent. Retailers again show a disposition to take their booked orders somewhat ahead of the actual demand, which would indicate a return of confidence in market conditions. The prices have undergone no further change from those announced some time ago, and seem quite steady at the following

base; Canada Paint Co. make in one-half pound packages, 54c per lb.; one pound packages, 52c; 25 lb. drums, 50c; 50 lb. and 100 lb. drums, 49c.

Linseed Oil Firm; Turpentine Scarce

London, Ont.

LINSEED OIL, TURPENTINE. — Jobbers report a very good sale of linseed oil, and there seems to be no present indication that there will be any revision of prices downwards. The flax seed market is holding at levels which preclude any possibility of any sharp decline, and whereas variations of a wide nature occur sometimes from day to day, there is very little disposition to get below the levels which have existed during the past few weeks. Quotations below show no change this week.

Locally the demand still exceeds the supply, but hopes are entertained that this condition will be overcome within the next few days. There has been a marked influx of orders, and this has cleaned up the jobbers' stocks fairly well, but these are under course of replacement, and little delay is expected in making shipment of orders now on hand. The markets in the South are very firm, showing an advancing tendency. Whether this will affect the situation locally is yet to be seen, but there is no indication at any rate that lower prices will be an immediate development. Prices are firm at the levels named last week, which are shown below:

Linseed Oil:

	Raw Gallon	Boiled Gallon
1 to 2 barrels	$2 00	$2 03
3 to 5 barrels	1 99	2 02
6 to 9 barrels	1 97	2 00

Less barrels, add 10 cents per gallon.

Turpentine:

1 barrel lots	$1 17 per Imp. gallon
2 to 4 barrel lots	1 16 per Imp. gallon
5 gallon lots	1 27 per Imp. gallon

Firm Prices For Wrought Iron Pipe

Winnipeg.

WROUGHT IRON PIPE.—Prices on all sizes of wrought iron pipe continue firm, and stocks which have been low for some time owing to the shortage of steel to make certain sizes, are now fairly well assorted, and shipments are coming through from the mills more promptly. To-day's ruling prices are confirmed as follows:

WROUGHT IRON PIPE

	Black Per 100 feet.	Galvanized Per 100 feet.
¼ inch	$4 91	$7 20
⅜ inch	5 00	7 34
½ inch	6 66	8 37
¾ inch	8 33	10 71
1 inch	12 33	15 95
1¼ inch	16 65	21 29
1½ inch	19 94	25 43
2 inch	26 82	34 25
2½ inch	43 07	54 77
3 inch	56 40	71 70
3½ inch	73 86	....
4 inch	87 25	....
4½ inch	100 26	....
5 inch	116 82	....
6 inch	151 52	....

WINNIPEG MARKETS

WINNIPEG, May 15—Markets in general have been very quiet during the past week, showing very few changes of importance. Among the lines affected are tee pipes, taper pipes, side and hedge roof pipes, and bright tinners' wire, all of which have been revised to slightly lower levels, while advanced prices are conspicuous by their absence.

Business is reported brisk in all quarters with the exception of builders' supplies, which are tied up owing to the strike now in force amongst carpenters, bricklayers, etc. Particular activity is noticed in baseball and auto accessories.

Coil Chain Prices Still Holding Firm

Winnipeg.

COIL CHAIN.—Prices on coil chain still hold firm on the local market, with the usual spring demand, while stocks are reported adequate to take care of all orders. Prices are confirmed herewith: 3-16 in., $19.20; ¼ in., $16.25; 5-16 in., $13.75; ⅜ in., $12.75; 7-16 in., $12.35; ½ in., $12.25; 9-16 in., $12.25; ⅝ in., $12; ¾ in., $11.65; 1 in., $11.40 per 100 lbs.

Lower Quotations on Bright Tinners Wire

Winnipeg.

TINNERS' WIRE.—Prices on bright tinners' wire have been revised to lower levels during the week, new prices being based on to-day's American markets plus the lake and rail rates to Winnipeg. New railway prices, f.o.b. Winnipeg, are given as follows: No. 5 to 9, $6.20; No. 10, $6.30; No. 11, $6.30; No. 12, $6.40; No. 13, $6.50; No. 14, $6.60; No. 15, $6.75; No 16, $6.90 per 100 lbs.

Tee Pipes, Taper Pipes Revised Downward

Winnipeg.

TEE PIPES.—Following last week's revision on the price of stove pipes and elbows, new prices have been named during the week on kindred lines, such as tee pipes, taper pipes, ridge and side roof pipes, etc., all of which are reduced to lower levels. To-day's selling prices on the various lines are as follows: tee pipes, 6 in., $3.60 doz.; 7 in., $4; taper pipes, 6 to 7 in., $2.35 doz.; 7 to 6 in., $2.35; side roof pipes, 6 in., $8.65 doz.; 7 in., $8.65 doz; ridge roof pipes, 6 in., $9.45 doz.; 7 in., $9.45 doz.; roof pipe caps, cone top, $3.50 doz. Bookings are now being accepted on the above lines for fall shipment at to-day's market prices.

SEES NO PROSPECT OF LOWER STOVE PRICES

"Business is steadily improving," said Col. W. M. Gartshore, of the McClary Mfg. Co., London, Ont., in discussing with HARDWARE AND METAL the outlook in regard to stoves. "Dealers who were holding off buying because they had it in their minds that prices were going to come down, are getting over that idea now and are placing their orders. As far as I can see there is not the slightest chance of stove prices being lower. Higher wages and shorter hours are being demanded, and that means not only smaller production, but increased cost of production. Business in the West has been developing nicely."

In regard to overseas business, Col. Gartshore stated that while the stove manufacturers as a body had decided not to continue their efforts to secure orders, any business that offers, or is obtainable for Canadian firms, will be looked after.

Poultry Netting in Great Demand

Winnipeg.

POULTRY NETTING. — Winnipeg jobbers report a large demand for poultry netting during the past month, with the result that stocks have become depleted in some lines. This demand is no doubt due to the extremely high prices asked for poultry and eggs, and has resulted in many of the citizens going in for poultry raising. Prices on this line still hold firm at former prices which are given below:

Poultry Netting, 1 inch Mesh—24 inch, $6.30 roll; 30 inch, $7.65; 36 inch, $9.

2 inch Mesh—24 inch, $3.05 roll; 30 inch, $3.60; 36 inch, $4.20; 48 inch, $5.60; 60 inch, $6.95; 72 inch, $8.30.

Banner or Blue Ribbon Poultry Netting.—24 inch, $4.75 roll; 36 inch, $6.10; 48 inch, $7.25; 60 inch, $8.50; 72 inch, $9.75.

Lawn Mowers Holding Firm

Winnipeg.

LAWN MOWERS.—Lawn mowers are in good demand at present, with stocks well assorted. Prices ruling to-day are as follows: Empress, 14 in., $11; 16 in., $11.50; Woodyatt, 14 in., $8.50, 16 in., $9; Daisy, 14 in., $6; Star, 14 in., $7.50; 16 in., $8.

Linseed Oil Prices Are Remaining Firm

Winnipeg.

LINSEED OIL.—With the approach of the paint-up, clean-up campaign paint dealers report a very brisk trade, with the result that good sales are reported by the jobbers of linseed oil. The price is still holding firm. To-day's market price is confirmed as follows: boiled linseed oil, $1.96; raw linseed oil, $1.93 per gal., in single bbl. lots.

No Changes in Price Turpentine

Winnipeg.

TURPENTINE.—A very brisk trade is reported in turpentine during the week, due to the usual spring decorating

which is now in full swing. Prices still hold firm on the local market, with no indications of any immediate change. To-day's selling prices are herewith confirmed: barrel lots, $1.35 gal.; half barrel lots, $1.38 gal.; 5 gal. lots, $1.40 gal.; 1 gal. lots, $1.40 gal. plus the usual extras for containers.

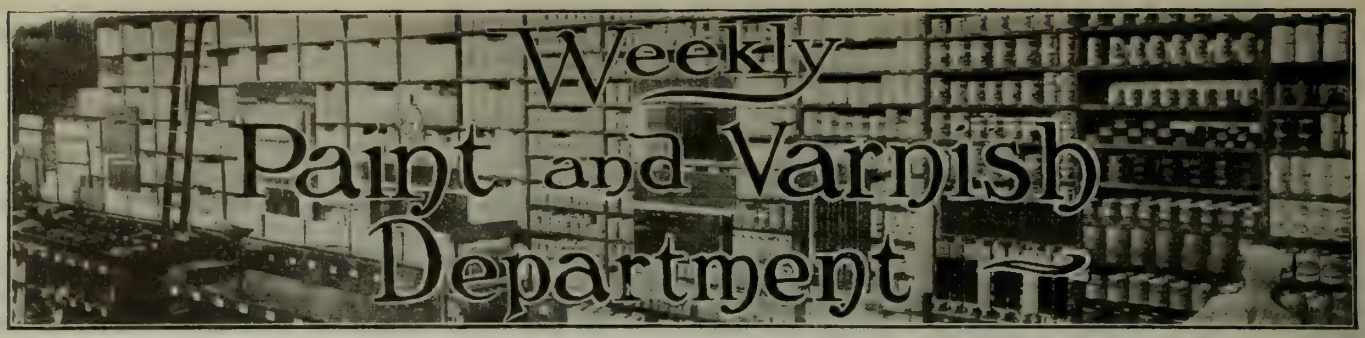
PITTSBURGH MARKETS

PITTSBURGH, Pa., May 15.—The resignation of the Industrial Board at Washington, announced last Friday evening, causes the steel market, technically, to enter a new chapter in its history, but practically there is no material change. The Industrial Board had practically been dead since the very publicly-announced refusal of the Railroad Administration, about April 1, to take part in the programme the board sought to force upon the various purchasing agencies of the Government as well as upon the public.

The program announced for the board before it was actually appointed received general approval and was an excellent one. The trouble of the Industrial Board arose from its departing from the program. This departure was caused by the board being hypnotized, or deceived, as some have expressed it, by the representatives of the steel industry. The object the board was expected to attain was the immediate deflation of prices, that is the development at once of the prices in which buyers would have confidence, and at which they would be willing to take hold. Otherwise, left to themselves, the markets for the various building commodities, including steel, would decline but slowly, as prospective buyers waited, and the return of activity would be correspondingly delayed. This program the board did not carry out, as the reductions it secured for steel products, announced as effective March 21, were not sufficient to create confidence in the minds of buyers. The basic idea was to make prices so low that buyers would expect advances rather than declines, but the Industrial Board endorsed prices that did not create any such expectations.

Columns of newspaper space have been used up in the discussion of the "controversy" over steel prices without the simple and fundamental difficulty being explained. That difficulty was simply this, that the prices the steel producers proposed were based on costs which were inflated by heavy overhead, caused by light operation. The steel producers desired that the heavy overhead per ton (they are now operating at about 55 per cent. of capacity) be represented in the prices. If they had full operation they admitted, privately, that they could be content with lower prices. Buyers take the opposite view. When the law of supply and demand has full play, the lighter the demand the lower the price. Light operation was made an excuse for high prices, while buyers feel it ought to be a reason for low prices. That is the reason the Industrial Board failed. Furthermore, seeing that the reductions of March 21 were relatively small buyers, including the Railroad Administration, felt that what was in force was an agreement to maintain prices. It was well known that the approval of the Department of Justice was sought by both the Industrial Board and by the steel producers, and was refused. That such approval was applied for was interpreted as meaning that the parties to the arrangement felt that the approval was needed.

With the Industrial Board out of existence, by reason of the acceptance last Friday, by Secretary Redfield, of the resignations that had been tendered two or three weeks earlier, the steel producers have no means whereby they can establish the market on a lower level, hence their alternatives are only to maintain existing prices or to throw the market open to competition, allowing prices to settle where they will. As the producers are much afraid of competition, more afraid than they need be, in the judgment of many observers who are not steel producers, they choose the former alternative, and will maintain the March 21 prices as best they can until something fresh turns up. While as a rule the steel producers are unwilling to admit it, they know that it is altogether improbable that buyers of steel will take hold in liberal fashion until the market is thrown open. It is not that buyers have certain definitely formed ideas as to the prices at which they should be able to buy, their feeling rather being that there should be an open market, whereby whatever prices were developed would be such as would command confidence. The producers feel that it is too early for liberal buying to develop, at any prices, hence they wish to defer abandonment of the present price maintenance understanding. There are many observers who do not agree with this judgment, believing on the contrary that if the market were thrown open liberal buying would develop within a short time, perhaps in less than three months, and that thereupon prices would show an advancing tendency.



Production Decreasing

The monthly report of the American Iron and Steel Institute shows that in April there was produced 2,239,711 gross tons of ingots, by 30 companies which in 1918 made 84.03 per cent. of the total output. This means that the industry produced ingots in April at the rate of about 31,900,000 gross tons a year, which is 65 per cent. of the capacity, estimated at 49,000,000 tons. For preceding months the proportions were: March, 77 per cent.; February, 85 per cent.; January, 87 per cent. There was a sharp decrease from March to April, and this decrease has continued to date, whereby the present rate is only about 55 per cent. After all, even 55 per cent. represents a large tonnage, considerably greater than the output in 1906, when existing capacity was pushed to the utmost and mills were nevertheless falling behind in deliveries. To the producers, however, the idle capacity of 22,000,000 tons a year is much more impressive than the operating capacity of 27,000,000 tons, the fear being that nothing could be done, by way of making attractive prices, to engage the 22,000,000 tons, so it is better to make as much profit as possible out of the 27,000,000 tons. According to the present market trend, however, production is in line for further decreases, as new bookings are relatively light and old orders are being completed, with not enough new business to take their place.

The Steel Corporation's unfilled obligations decreased during April by 629,887 tons, leaving 4,800,685 tons on books at the end of the month. This is a slightly larger decrease than was shown for March, but is a smaller decrease than shown for any of the three months preceding March. What makes the showing particularly unfavorable, however, is the fact that shipments during April were much smaller than shipments in March, probably at 70 per cent. of capacity against more than 80 per cent. in March, and the April bookings, therefore, must have been much lighter than the March bookings. The April loss in unfilled tonnage was equal to about 48 per cent. of the capacity.

There has been an "open market" in pig iron since about April 1, but prices have been declining very slowly, partly because there has been little inquiry to tempt furnacemen to cut prices, and partly because costs are so high that there is not much room for cutting, it being preferable to go out of blast. In the past ten days various sales have been made in the local market, involving lots of 200 to 500 tons of foundry iron, and cuts averaging in the neighborhood of a dollar a ton. Southern iron, for May delivery, has sold at $24.50, Birmingham, for silicon 1.75 to 2.25 per cent., and at $25 for silicon 2.25 to 2.75 per cent., these being cuts of $2.25 and $3 respectively from the prices that became effective March 21.

Selling Service with Can of Paint

Consider Values in Gallon of Paint—The Decorative Viewpoint—Preservation as a Factor—Upholding Property Worth—Pays Customer to Use Paint and Varnish—What Better Talking Point Wanted?

HOW much is a gallon of paint worth? There are several possible answers to this question. To the paint dealer, a gallon of paint, sitting on his shelf is only worth its invoice price, plus accumulated overhead charges.

When a paint consumer asks for it, it is worth these charges, plus a reasonable profit.

That profit is the "why" of your getting rid of it. The customer's request for it increases the value.

As the customer gets it, it is worth your retail price to him.

But the customer doesn't buy paint just to accommodate you—by no means ! He doesn't bother his head about your profit.

In his purchase, he must see some advantage or profit to himself or he doesn't buy.

He may see in that gallon of paint, decorative value, sanitary value, or protective value, otherwise he has little desire for it.

How Many Values in a Gallon of Paint

The more values you can make him see in that gallon, the easier you can make a sale to him.

Now, when he applies that gallon of paint for any of these reasons he may have in mind, its value becomes many times greater than his original purchase price.

Its greatest value is when it is applied for the purposes of protection and preservation. When applied for these purposes, the consumer receives decorative and sanitary value as well.

A gallon of paint is worth most when it is applied to the surface. Unused, and in the can, it possesses only the value of its cost and the potential value of giving service.

Paint, properly applied, acquires many times its retail value in the service that it renders.

Selling Service in Paint Can

Paint selling involves vastly more than receiving money for a can containing pigments, color and oils. It involves selling service in protection, preservation, decoration and sanitation.

These are by far the biggest factors in the sale, for they are the ultimate function of paint.

Paint sales will become easier, and greater in volume when the retailer causes his trade to realize that what they get out of their purchase in such services, is vastly greater in value than the money they have paid for it.

The Decorative Viewpoint

The following incident illustrates the point from a decorative standpoint. It occurred in Ottawa:

A real estate man had a row of six houses on his list to sell. Try whatever way he could, he was unable to effect a sale.

A friend of his in the painting and decorating business put a proposition up to him, which he said he thought would sell them. He gave the agent a price of $250.00, to paint and decorate one of the houses. If the house did not sell within a month after the work was done, the painter said he would only charge the cost of the material and labor. If it sold within that time, he would expect his full figure.

Before the painters had finished the job, the house sold at $700.00, above the price originally asked.

Needless to say, the painter got a job for the other five houses, and every one sold at a business margin over and above the original price asked, plus the cost of the painting.

Here is a case where the value of the material and labor expended on those houses returned itself in increased value on the house. This bears out the contention that the greatest value of paint or any decorative material rests in the fact that it is applied on the surface of the property.

Getting at Figures

To give some idea of this increase in more or less exact figures. It is usually estimated that material constitutes 25 per cent. of a painting job. On a contract of $250.00, this would mean that material to the value of $75.00 was used. A return of $700.00, in increased value, would mean that that $75.00 had made an increase of 933 per cent. Based on the whole cost of the work, it showed a return of 280 per cent.

Painting pays then, from a purely decorative standpoint.

Preservation as a Factor

Taken from a preservative standpoint. There are frame buildings in the New England States and in the older parts of Canada, to-day, that are in as good a state of preservation as they were two hundred and fifty years ago, because they have been kept properly and adequately painted. Many of these are rendering excellent service as comfortable homes to wealthy families who prize their homesteads beyond price.

The careful preservation of these Colonial houses began, and was carried on through the days when lumber had by

SELLING SERVICE WITH EACH CAN PAINT

Continued from page 60

no means the value that it has to-day. Taking the present-day condition of our lumber supply, and its market value into consideration, there is vastly greater reason for advocating the use of paint than there ever was before. This consideration of paint and painting is growing more important every year, and it should be impressed on the mind of the property owner with increased effort and earnestness.

These samples of houses, built one and two centuries ago, and still existing in good service, chiefly through the protection, and preservation of paint, demonstrate that paint has an economic value to the property owner greatly in excess of its cost price.

If, when A No. 1 lumber literally grew in the back yards of our Colonial forefathers, and was thought enough of to receive the protective service of paint, how much more should the property owner of to-day be made to realize the value it can render him under present-day conditions?

Service Value Large

Apart from the fact that property can be enhanced in value largely from a decorative standpoint, as in the instances we have cited, a house well preserved with paint has also an increased economic value. There are many of these New England Colonial homes, built one or two centuries ago, which the present owners would not part with at any price. The fact that an old family homestead, or a house of historic connections, has been preserved for such a length of time, places a value upon it which cannot be measured in or met with money. To such, paint gives a service value far in excess of its actual cost, and which they absolutely would not dispense with. Indeed, if paint cost four times its present price, it would not hinder them from using it regularly as has been done in the past.

Upholding Property Worth

However, coming down to the average everyday conditions of 1919 in which we are now living. What is paint and painting worth to us? Houses that were built five, ten or fifteen years ago are worth anything from 25 per cent. to 50 per cent. more in the actual material of their construction than at the time of erection. Property owners have been favored with an increased increment that they cannot afford to neglect. Even property unprotected with paint has increased in value. Depreciation in value has oustripped depreciation by deterioration. But this will not always be the case. Continued deterioration will soon overtake this increased value, then values begin to go down the toboggan slide.

Properly painted property can be made to retain its original value, plus this appreciation, to the actual benefit of the owner. The probable continued stringency of the lumber market will assist to maintain this increased value. We shall never again be able to call across lots to the lumber mill to fetch us over a load of lumber. Our timber resources are receding farther back every year, and transportation adds to costs.

The longer the property owner neglects painting, the more actual value he throws away every year.

One might go on ad infinitum, seeking economic and other reasons for the encouragement of painting, and the use of paints and varnishes. As the conditions described above increase in intensity, just in proportion do good, sound arguments develop for the paint dealer. The service that he can render to his trade also increases in the same proportion.

From Applied Relationship

Let him detach himself, for the time being, from prices, costs, overhead charges, etc., and let him view the value of paint or varnish, as it becomes when properly applied, and it is safe to say that he will be enlightened with a new viewpoint of the value of his stock. It will open up a new insight into the possibilities that exist for his paint department.

Let him also detach himself from his sales as they concern himself alone, and look upon them as they concern the consumer, whether he be property owner or tenant. Face the question frankly. Does painting pay the property owner? There is only one answer, from whatever angle the question is viewed. When a dealer can be fully satisfied that he is selling something of actual worth to his customers, it promotes confidence to plan and carry out aggressive selling and advertising efforts.

These efforts can be put forth from the standpoint of individual, communal and national benefit. Certainly few products have behind them the wealth of argument and economic need that can be put forth to advance the sale of paints and varnishes. The resourceful, energetic saleman, with initiative and enterprise, will find in his community plenty of opportunity for cultivating his sales.

Pays Customer to Use

Aside from the purely monetary profit of the paint and varnish business, there is a good deal to be said for the satisfaction to be had in selling a product that it pays the customer to use. When it pays him, and he realizes that it does, it creates permanency of trade that is well worth while. Taking a customer's viewpoint, and making an endeavor to advance sales on the basis that it pays him to buy a product that increases in value after it is applied, and preserves the value of the surface on which it is applied, will undoubtedly help to round many a difficult corner in advancing sales in the paint department.

OPENING IN CANTON FOR CANADIAN HARDWARE GOODS

An official report from Canton, China, regarding prospects for business in hardware lines, says:

"High-grade pocket knives, files of different sizes, iron and brass screws, padlocks, drawer pulls, planes, spoke shaves, and in fact all classes of hardware have found an excellent market in Canton.

Prior to the war considerable quantities of enamelware, such as wash basins, pots, plates, and dishes, spoons, bowls, soap dishes, etc., were imported from Germany, Austria, and England. These were entirely replaced by Japanese goods of inferior quality which appeared to be specially manufactured for this market, and on accounut of their cheapness a large deman was created. This likewise applied to cash boxes, which were sold in large quantities at prices ranging from 80c to $3.50 Mexican (64c to $2.80 Canadian currency.)

As a result of the great advantage in the erection of modern buildings and consequent increased rentals derived therefrom, many large old-style buildings in Canton were sold and demolished during recent years, and new semi-foreign dwellings of two to four stories erected, in consequence of which there is an excellent demand for builder's hardware. Building contractors and owners, realizing the rapidly advancing ideas of the Cantonese in improving the sanitary condition and ventilation of the residences, invariably planned a greater number of windows and doors than here-

OPENING FOR CANADIAN SCALES

There is a great shortage of scales of all kinds in South Africa, particularly counter and outside platform scales, with the result that merchants have been extending their enquiries for them in both Canada and the United States. However, it may be well to bear in mind the various types for which South Africa exhibits a well-defined partiality.

According to W. J. Egan, Trade Commissioner for Canada at Cape Town, a good-selling counter line has a 16-lb. capacity. The price asked for it before the war was $8.75, without weights and $11 with iron weights, both being subject in former times to a 40 per cent. discount. Funnel scoops, in brass or tin, are popular with all counter scales, and when these were furnished with this counter scale the extra cost was about $1.50. Another counter scale which had a big sale all over South Africa, is used for weighing by either the scoop or platform, the capacity being from one-half ounce to 240 lbs. The single-beam type was that usually imported. Before the war, this, japanned, sold at $6.25 or $6.50 less 40 and 10 per cent. The size of the platform was 10½ x 13½ inches. For the funnel-shaped scoop an extra charge was made of 4s. Grocers' trip scales were imported in three sizes, 8, 12 and 16 lbs.. the last mentioned being sold, with tin scoop, at a pre-war price of about $14.50, less 50 and 10 per cent., weights being included from one-half oz. upward.

Welsh Tin Plate Makers Are Looking to Toronto

From *The Financial Post*

THERE is a chance of the British Forgings—the large Imperial Munitions Board plant in Toronto—passing to Baldwins, the Welsh tin plate manufacturers. Mr. Davies, their representative, has been in Canada for some time, and left for the States yesterday on a mission connected with the project, but will return shortly. The Baldwins have been investigating the possibilities in Canada and seem to regard them favorably. If the proposals go through it would mean a big industry for Toronto. But will the Bolsheviki press let it go through? Will they not be afraid someone is going to make a profit? They killed the attempts to start here what is now the Steel Corporation of Canada, promoted by that public-spirited citizen, the late Senator Jaffray.

At present tin plate is on the free list save for the war tax. About twenty years ago "Colonel" J. Wesley Allison succeeded in interesting some politicians and capitalists—including the late Sir James Whitney, Premier of Ontario, and formed a company. Promise of a heavy protective tariff was given by the Dominion Government, some help from Ontario, and a plant was to be erected at Morrisburg, in Whitney's constituency. Sir Albert Kemp, M.P., now our overseas Minister of Militia, then head of the Kemp Co., making tinware, organized a strong opposition,but Allison, like most fakirs of his type, had a strong following, and it was not until a trade newspaper, HARDWARE AND METAL. uncovered his unsavory business and financial career that the prospect was dropped, and Allison left the country, not to reappear until 1914, when he unfortunately mesmerized Sir Sam Hughes and wormed his way into his confidence, with results disastrous to Sir Sam—who well deserved much better treatment—and the country.

The story of tin plate development in the United States is a strong argument for a protective tariff. It is also one of the most romantic business stories, and it has not yet been written. The Government guaranteed a fair but not unreasonable protection. Inspired by the Pennsylvania Railway, anxious to develop industries along its route, local capital was put into a plant. It was a failure, as were several subsequent efforts, and the capitalists lost all their money. Finally, about thirty years ago, the control passed into the hands of a banker in Indiana. Country town bankers in the United States are different from their contemporaries in Canada. This keen Indianian used to do business on the hot summer days on bare feet, with only shirt and trousers held up by one gallus, fastened with a nail. He, too, saw nothing but the loss of his entire capital, but Daniel G. Reid, a bright young man of the village, who helped him to run the bank, had faith in the future of the industry. After much persuasion he induced the banker to give him a chance. He got in more capital and associated with him Mr. Leeds. Under Reid's intelligent, efficient management and hard work—he never worked less than sixteen hours a day, and sometimes twenty—he put the business on its feet and paid all its debts. He brought over thousands of poorly-paid workmen from Wales, where they were living almost in poverty, gave them good homes and big wages, and got big production. In time they were able to undersell the Welsh makers in foreign markets—including Canada. Leeds got out with over $50,000,000. and died soon after, leaving only $500,000 to his only heir, a son, of whose conduct he did not approve, and the remainder to the widow who career has been more or less sensational. Mr. Reid, on the other hand, has continued to work extremely hard. His doings in connection with the Rock Island Railway have brought him much criticism. Whether deserved or not, time will tell. The fact remains that Reid, a man of great ability, like some of our own industrial leaders, has been responsible for the upbuilding of great industries, employing thousands, paying out millions in wages. All he gets is three meals a day. He lives in an apartment in New York. His whole life is given to the further improvement and development of these enterprises, providing more employment and adding to our comforts.

Common-sense suggests that we encourage and honor such men. Yet most of us are so short-sighted that we uphold instead of condemning the efforts to hamper their work.

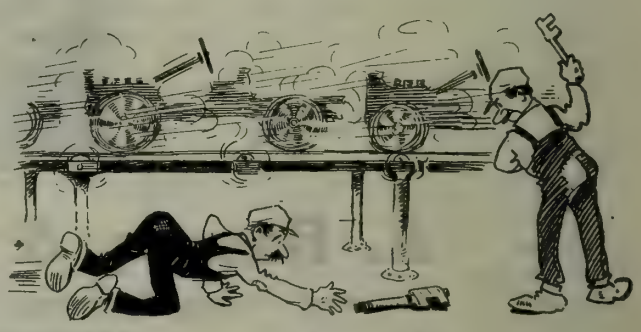
HE DROPPED THE MONKEY WRENCH

HE sauntered into the office of the employment person. Lots of folks do the same thing. In fact the man in the employment office is some pumpkins these days. For the last three or four years folks haven't paid much attention to him, but things are a bit different just now.

However, this chap in question was looking for a job. He didn't have one—in fact that's the reason why he was lookin' for one.

Of course it's proper now to ask a few questions. For some time it's simply been a case of going in and having the employment person hug you and pass you on to the boss. He, in turn, hugged you and advised you not to work too hard. But they're gettin' more particular now.



"Where've you been workin'?" was the first query.

"Ford's."

"How long?"

"Year."

"Quit or fired?"

"Canned."

"Why?"

"Dropped my wrench and seventeen machines went past before I could pick it up."

Getting Varnish Wise

The man who pays the finishing bills,—the ultimate consumer, is becoming more and more discriminating when buying varnish or specifying its use. The unvarying dependability of Berry Brothers' Varnishes, Enamels and Stains has created a confidence in all Finishes bearing the "Berry" label that promotes their sale and makes permanent customers.

Liquid Granite Floor Varnish, Luxeberry Enamels in white, ivory and shades of gray, **Luxeberry Wood Finish, Luxeberry Wall Finishes, Luxeberry Spar Varnish, Berrycraft Stain Finishes** and **Household Enamels** are a few of the many Berry products whose names have been household words for many years.

Make a leader of Berry Brothers' line and increase your varnish business.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, May 15.—Every indication points to an active season in the paint field. Manufacturers are in a good position to take care of demands, and, judging from the present volume of orders coming to hand from the travelers and also by mail, there is no need to worry about the present season's outturn of goods. Markets are generally steady, linseed oil being particularly firm and up one cent, while turpentine also is so firm as to indicate a near change to higher levels. The white lead and putty basis are unchanged, and there is a firm undertone to paints, varnishes, and many of the specialties. Changes are not looked for in the immediate future on manufactured lines.

Less Price Spread; Linseed Oil Up 1c

Montreal

LINSEED OIL.—There is less spread of prices on linseed oil in this market, the range being from $1.84 to $1.88 per gallon on single barrel lots. This means an advance of one cent from last week's low point. This does not, however, show clearly the trend of the seed market, for spot seed has hovered around the $4 mark. It is not expected by any of the crushers, as far as can be ascertained, that there will be reductions at this time. "Seed is scarce, and we do not expect that there will be much relief until the next crop matures," is the way a crusher put the matter this week. Orders are being received from United States centres for supplies of Canadian oil, and this is not a usual thing. India is far away. Argentine seed will not be forthcoming, perhaps, in large quantities. It is anticipated that there will be enough oil to take care of domestic requirements, but supplies may not be excessive, and oil may even be temporarily hard to get as the busy season approaches. Two dollar oil is a possibility ere long.

Raw—	Imp. Gal.	Gal.
1 to 4 barrels	$1 84	$1 88
5 to 9 barrels	1 83	1 87
10 to 25 barrels	1 82	1 86
Boiled—	**Imp. Gal.**	
1 to 4 barrels	$1 86½	$1 90½
5 to 9 barrels	1 85½	1 89½
10 to 25 barrels	1 84½	1 88½

Turpentine Short Yet; Will Be Higher

Montreal

TURPENTINE.—Shipments are exceedingly hard to obtain, and delays are experienced by the paint men. Orders placed by them are delivered in a very slow manner, and this makes the outlook anything but satisfactory from time to time. Price tendencies are decidedly of a firming character, and there need be no surprise if quotations are advanced at any time. There is a good movement.

Turpentine—	Imp. Gal.	Gal.
1 to 4 barrels	$1 10	$1 12
Small lots	1 17	1 28

(Packages extra.)

Putty Reveals An Active Demand

Montreal

PUTTY.—Activity characterizes the putty markets, and all grades are moving out in the usual seasonable quantities. In fact, orders are most encouraging, and the retailers are stocking up for the needs of their trade, which is becoming more and more active every week. Prices are maintained, but there has been no change in quotations.

Standard Putty	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do. 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Much Lead is Sold But Prices Steady

Montreal

WHITE LEAD IN OIL.—A great deal of demand exists for white lead in oil, and there is a steady movement from the corroders to the retailer. Supplies are in good shape and the tendencies of the market are unchanged, lead being held on about the same basis as for several weeks, the changes of price on pig lead being rather minor. Quotations remain as follows: Five ton lots, per 100 lbs., $15.50; ton lots, $16; and less quantities, $16.35.

Paint Men Report Excellent Outturns

Montreal.

MIXED PAINTS, SPECIALTIES.—There is a splendid volume of business these days, and the warehouse staffs have been working overtime to take care of orders received. When the painting season swings into place, it is expected that there will be better and bigger business than ever, and there are the best of reasons for feeling that 1919 will take its place in the forward movement of industrial progress. The undertone of prices is a decidedly firm one, and one manufacturer points out that the matter of advancing prices has already received consideration in the United States, although nothing has been done here. It is not anticipated that declines will at all be considered, he said.

TORONTO

TORONTO, May 15.—Strong and very firm markets for both linseed oil and turpentine are likely for some time. Flax seed has advanced nine cents during the week and advances in linseed oil prices are expected at any time. Argentine seed is being absorbed as fast as it comes in, in fact some firms could handle shipments faster than they are getting them. There has been a brisk demand for turpentine and in some cases shipments are being sold ahead. "Buyers can well afford to lay in good supplies for the next six weeks," is the way one importer summed up the situation. The rate of exchange against Canada is a factor in making prices higher than they would be otherwise. At the present exchange basis it means an addition of 2½ cents on every gallon of turpentine that comes into the country. A splendid volume of business is being handled in mixed paints and many repeat orders are being received.

Linseed Oil Prices Expected to Advance

Toronto.

LINSEED OIL. — Higher prices for linseed oil are expected as a result of the advancing market for seed and the brisk demands. Many orders for July and August are already being placed by firms who apparently do not wish to risk being caught with low stocks. The general volume of business has been very satisfactory and is expected to continue so. Shipments of seed from the Argentine, while coming a little more freely, are not keeping pace with the demands in many instances. The quotations have narrowed towards higher levels and are as follows:

Linseed Oil—		Raw	
1 to 2 barrels, gal.	$1 90	$1 98	$2 00
3 to 5 barrels, gal.	1 89	1 97	1 99
10 bbls. and over	1 87	1 95	1 97
		Boiled	
1 to 2 barrels, gal.	$1 92½	$2 01	$2 03
3 to 5 barrels, gal.	1 91½	2 00	2 02
10 bbls. and over	1 89½	1 98	2 00

Lowe Brothers Paints

How Many Houses In Your Neighborhood Need Repainting?

HAVE YOU MADE A LIST OF THEM?

THESE are excellent prospects—do you follow them up?

Many Lowe Brothers dealers who have made a special success in selling paints have proven that the methodical following up of a good paint prospect usually lands the business.

This is how they go about it.

A careful list is made of all good paint prospects—owners of unpainted houses, of buildings in the course of erection or which need repainting. A copy of this list is given to each clerk to commit to memory and whenever any of these prospects come into the store they are given a quiet little selling talk on paints with special reference to their individual needs.

To back this up their names are sent in to Lowe Brothers and are put on their follow-up list. This means a number of personal letters and a continual stream of high class advertising matter. This follow-up of Lowe Brothers, supplemented by the efforts of the local dealer and his clerks usually secures the order for paint.

Are you taking advantage of the strong selling helps which Lowe Brothers offer you? Are you getting all the paint business to which you are entitled?

Remember every house painted with Lowe Brothers Paints is a constant and compelling advertisement for the paints and the dealer who sells them.

Lowe Brothers, Limited

Toronto, Ont.

Dayton Boston New York Chicago Kansas City Minneapolis Atlanta

Prices shown are those ruling on Thursday of current week and subject to daily fluctuations of the market.

Turpentine Market Remains Very Firm

Toronto.

TURPENTINE.—While no advances have been made this week, some importers are being advised that they cannot secure supplies at the prices formerly paid. This may mean an advance shortly but at any rate indicates a very firm market. There has been considerable difficulty in getting some of the shipments through from the South lately and with the large volume of business that is offering stocks are not too plentiful. Quotations are as follows:

Turpentine—	Imp. Gal.	
1 barrel (barrel included)....	$1 14	$1 17
2 to 4 barrels (barrel included)	1 13	1 16
5 gallon lots	1 24	1 27

Orders Pouring in To Paint Manufacturers

Toronto.

MIXED PAINTS.—"Working overtime to try and get our orders out promptly," sums up the situation as far as the paint manufacturers are concerned. A splendid volume of business is reported, and repeat orders are coming in steadily. Many firms are looking for an extended season and a lot of business throughout the entire period. Indications point to one of the best years in some time. No changes have been made in prices.

White Lead in Oil Remains Unchanged

Toronto.

WHITE LEAD IN OIL.—While no changes in quotations have been made in white lead in oil, a most satisfactory volume of business is being handled, with prospects that this will continue. Quotations are as follows: 5-ton lots, $15.80 per 100 pounds; 1-ton lots, $16.30; and less quantities, $16.65.

Glass Prices Firm; Putty Unchanged

Toronto.

GLASS, PUTTY.—The volume of business being handled by window glass firms is beginning to show slight improvement. This is not particularly marked as yet, but is expected to develop slowly, as construction work proceeds. Reports from all parts of the country indicate that the early estimates of construction work were not exaggerated and that a lot of building will go ahead this season. Glass prices show no change from the discount shown in the current market quotations.

A steady improvement in the sales of putty is noted, and this is expected to increase. Quotations show no change and are as follows:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above

HOW MR. WOOLWORTH BUILT HIS WONDERFUL DISTRIBUTING MACHINE

(Continued from page 51)

manufacturer insisted that this, too, was down to bedrock.

The buyer then went out into the workshop to investigate. He found long rows of girls seated at benches painting the toys with brushes.

"I see now why your cost is so high," he said. "You can't afford to use brushes. Throw the toys into vats. Dip them. Then you can leave off this little red stripe and this little yellow stripe."

The change was made and the production cost reduced to a point where the manufacturer could sell the toys at a profit, so Woolworth in turn could sell them for a profit at ten cents each.

For quite a while after the war-time merchandise situation began to grow acute Woolworth kept on selling the well-known D.M.C. crochet cotton at ten cents a ball. When the war shut it out entirely from this country it induced an American spinner to duplicate it under the name of Woolco. The spinner at first objected, saying it could not possibly be done. But the Woolworth man who had bought D.M.C. cotton abroad instructed him to a point that gave him confidence. A big factory has grown where they began spinning Woolco only four years ago. Many people are employed. The prosperity of that district is enhanced. And, most important of all, the women of America can continue buying the highest grade of crochet cotton for ten cents a ball.

Enabled to Hold to Low Prices During War

The solidity of the merchandising principles originated by Mr. Woolworth was strikingly demonstrated during the war, when the Woolworth stores were the only ones in the country adhering strictly to the ten-cent limit. Others, including both chains and independents, increased their price limit because production costs had so seriously decreased the number of items they could afford to sell at ten cents. There was much speculation at the time as to what Woolworth would do. Every now and then some presumably authoritative statement would be made to the effect that Woolworth was preparing to go up to a fifteen-cent limit all over the country, the same as in the West and in Canada. Mr. Woolworth would say nothing for publication, but he strenuously declared privately and to his associates that the company would continue selling goods for five and ten cents—that it would keep faith with its customers.

This war-time merchandise situation was the last crisis of Mr. Woolworth's career. He handled it with the same promptness and absolute lack of fear that characterized his earlier decisions.

F. W. Woolworth was ambitious. From his earliest boyhood he wanted to run a store. He even played store while other boys were playing baseball. He wanted wealth and power. He got them in a measure more abundant than most men even aspire to. Perhaps it was a desire for display that induced him to erect the highest building in the world—that "cathedral of commerce" that rears its majestic spire far above New York's already wonderful skyline.

But great as were F. W. Woolworth's accomplishments for himself they are at least duplicated by what he brought about for others. No man can succeed in the highest sense and live unto himself alone. Mr. Woolworth believed in this truth and practised it to the limit. The wonders he accomplished in retailing brought additional prosperity to every retailer in America within the sphere of influence of his stores. He made selling easier for everybody who had things to sell. His advertising methods increased the demand for variety-store merchandise. This is why an up-to-date variety retailer who sells variety goods without regard to price limit always prefers to have his store as near as possible to a Woolworth five-and-ten-cent store. Manufacturers all over America owe their larger development to the great advance variety retailing made under the leadership of men like Woolworth. Volumes could be written of how the great outlet brought about by the five-and-ten-cent store changed methods of manufacture so as to put worthy goods at the disposal of people at prices that before had been regarded as impossible.

It was in this fact and not in his other material achievements that F. W. Woolworth's greatest pride lay.

"We have accomplished some surprising things," he said not long ago, "in bringing merchandise within the ten-cent range. This influence has permeated the entire field of manufacturing and retailing and has been a powerful aid in keeping down all prices. To have had a prominent part in performing this service which has increased the purchasing power of the people's money is a distinction and an honor that cannot be measured in mere monetary terms."

Mr. Woolworth was overly modest in his presentation. The type of store of which he was so notable an exponent was and is the country's leading factor in reducing the cost of living. These stores are what they are to-day because they waged such a successful fight to keep down, rather than increase, prices.

EXPECT AMERICAN COMPETITION

LONDON.—English pottery manufacturers in Staffordshire expect the Americans will make an attempt to capture the Canadian trade. Before the war Canada is said to have been the best of the overseas markets for the British potter, but the economic situation is now in favor of the United States producers. The latter can now get their goods to the market both quicker and cheaper, while English manufacturers have to add to the cost of production the heavy sea freights, and, when the St. Lawrence is frozen, overland charges as well.

Fuel is much cheaper in the States, natural gas being available for firing and coal situated nearer the surface.

American pottery is inferior to British, but is improving all round. In ordinary lines the American potters are increasingly winning their home trade, but there will remain a market for the highest classes of English goods. It is in the big demand for middle class and the cheaper wares in Canada that the competition of the States is feared.

A DEMONSTRATION OF VARNISH STAIN

At the hardware store of Kilpatrick Bros., in St. Thomas, a demonstration of varnish stain was held during the week. The proprietors report a noticeable increase in business, as a result. Every customer purchasing a 25 cent brush was given a 25 cent tin of the enamel.

"It certainly drew large crowds, and our sales beat records," declared Mr. Kilpatrick. The announcement of free tins of enamel was made in the usual advertisement and the store was specially arranged for the occasion with a striking window display.

UNIVERNISH

The One Varnish For All Uses

FOR Inside; For Outside; For Floors; For Table Tops and Furniture; For Boats; for freshening up and giving a clean, sanitary effect, you can safely prescribe UNIVERNISH simply because UNIVERNISH will bear you out in your recommendations.

Why Not Get Full Benefit from Bicycle Week by selling

C·C·M· Bicycles

The Principal C.C.M. nameplates are:

Massey
Gendron
Columbia
Ivanhoe
Perfect
Cleveland
Brantford
Red Bird

THE "Big Push" of Bicycle Week has made still more people think of getting a bicycle.

Now is the time to go after bicycle sales—hard.

Naturally, you want to handle a bicycle that will give the greatest satisfaction—bring goodwill instead of kicks.

In other words—C.C.M. Bicycles.

A few desirable agencies are still open.

TRADE SIMMS MARK
SET IN RUBBER

Clinches the Painter's Trade

You can get—and keep—the custom of every painter within miles of your store, when you let them know that you stock Simms' Better Brushes—set-in-rubber by our own exclusive patented process.

Simms' Set-in-Rubber Paint and Varnish Brushes are guaranteed to hold their bristles firmly in the setting, no matter what usage they are subjected to. The harshest paint-remover, boiling water, crude oil—everything that usually destroys the ordinary brush—have no effect whatever on Simms' Paint and Varnish Brushes. Their setting is perfection. The bristles **never** come out.

Get a good supply in now. There is a good profit on every brush you sell. We will send price-list by return of mail.

T. S. SIMMS & CO., LIMITED

ST. JOHN, N. B.

Branches: Montreal, Toronto, London

"Save the Surface and you save all" Paint & Varnish

GOOD PAINT IS A NECESSITY.

Poor Paint is an expensive Luxury—not even the "wealthy" can afford. When you sell your customers

Maple Leaf Paints

you sell them good paints—paints that wear, protect and preserve. The most economical paints they can buy.

Maple Leaf Paints being high grade are excellent preservatives. They have the necessary protective and lasting qualities combined with appearance to satisfy the most careful paint buyers. It is these qualities that build permanent business—appreciated by the man that wants full protective value for his money.

Write for our proposition.

Built to Stand the Severest Test

The "Royal George" Range has a Superabundance of Value and Merit

There is such a lot to be said about this excellent range that space won't permit. We can but mention facts such as these:—High quality heavily coated nickel finish; large, roomy oven that is certainly a guaranteed baker; deep fire-box that assures a desirable heating; a range with a most attractive appearance generally, that invariably captivates the prospective customer into a satisfied purchaser. Get to know more about this very serviceable range and also remember that the "Canada Family" stoves and ranges have no equal on the market to-day. Let us tell you why:

Note these details that belong to the "ROYAL GEORGE"

Oven	Wood Fire Box	Coal Fire Box	No. of Lids

DOMINION TIRES

ARE **GOOD** TIRES

Dominion Tires
For Your Delivery Rigs

If you deliver by automobile or drive a car for pleasure, equip your car with Dominion Tires.

You probably handle other Dominion Rubber System products in your store—Dominion Garden Hose, Bicycle Tires, Rubber Gloves, Rubber Mats, perhaps Rubber Belting; and you know how satisfactory is the quality of all these Dominion goods.

You surely have worn one of the Dominion Rubber System brands of Rubbers or Fleet Foot Shoes and know their good quality.

You can count on the same high-grade quality and workmanship in Dominion Tires.

There are six Dominion Tires:

"Royal Cord" "Nobby" "Chain"
"Dominion" "Grooved" "Plain"

for every type of car; each designed to meet a particular need or a particular condition of work, road or climate.

You can get the right tire for your cars, to give you the right kind of service for business and pleasure, in Dominion Tires.

You can also get DOMINION INNER TUBES of the same superior quality as Dominion Tires.

Dominion Tires and Accessories are distributed through Dominion Rubber System Branches, and sold by the best dealers throughout Canada

Paints, Oils, Varnishes, Glass, Etc.

If You Knew—

THE economic reasons, alone, as a motive for housewives in selecting "Silkstone" as a wall covering, are a big factor in promoting sales.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Silkstone is cheaper than wall-paper (and decidedly more sanitary), lasts longer than other wall finishes, can be washed often, and won't rub off. It gives a beautiful soft, silky finish that will outwear any other wall covering. The economy of a finish that costs little to apply and lasts so long will forcibly appeal to all.

Set "Economy" to make sales of Silkstone for you. If there is no Stephens' Agent near you, write for our good proposition.

Wire Stretchers and Hoists

The Giant, a strong, heavy wire stretcher weighing 10 lbs., and equipped with 23 feet best ½-in. Manilla rope, is easily operated by one man. We also carry smaller Plain and Roller Bearing Stretchers, same quality as the Giant, and like it, held by loose pin and cotter pin so that new sheaves may be added without difficulty. These pins are of too high-grade steel to rivet.

MEHASCO

ANOTHER MEHASCO MESSAGE
32

We carry Hoists with capacities from one to three tons, in double or triple block of the same quality as the stretchers. Get our quotations on these lines.

When Writing Advertisers Mention this Paper

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index facing the inside back cover, after having secured advertisers' names from this directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Talk No. Two Hundred and Eight

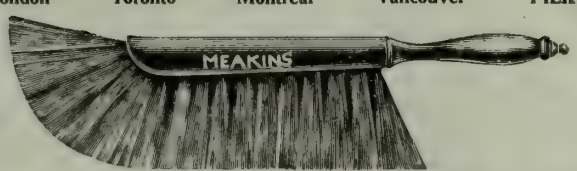
This talk ends our fourth year. Talk No. 1 was dated May 22nd, 1915, and believe me the future looked "scary" enough then. We ought to feel pretty good now. No Hard Times for Little Old Canada! Here's to your good fortune for another year.

TINKER TOM.

Look for Talk No. 209 next week.

DOMINION SHEET METAL CORPORATION, Limited
HAMILTON, CANADA

Meakins Brushes



—are **quality-brushes,** made of high grade materials, by experts in the art of Brush making. We make brushes to fill every requirement in the commercial and private world. Prepare for the spring "clean up" trade. Complete your stock early. Send for a Meakins catalogue, then order through your jobber.

MEAKINS & SONS, LIMITED, HAMILTON, ONT.

Warehouses: Winnipeg London Toronto Montreal Vancouver PILKINGTON BROS., Calgary, Alta.

CARTER'S

Carter's Genuine Red Lead Means Good Business for You

It is needed constantly by your painter-customers, by railways, ironworks, shipbuilders.

Carter's Genuine Dry Red Lead

is pure, uniform, economical. Mixed with pure linseed oil, it is the best protection for metalwork, steam pipes, etc. It is highly oxidized, ground very fine, made from the highest grade of Canadian pig lead.

We also make Carter's Genuine Orange Lead. Dry White Lead and Litharge.
Make sure you have ample stock on hand.

The Carter White Lead Company of Canada, Limited, 91 Delorimier Ave., Montreal

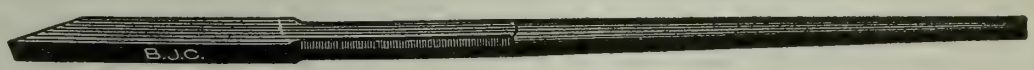
Gloves and Mitts

A R C BRAND

We are pioneers in the manufacture of Workmen's Gloves and Mitts.

The "A.R.C." Brand has been the High Quality Canadian standard for 50 years.

The "A.R.C." Trade-Mark is your guarantee of customers' satisfaction and splendid profits.



We tan our own leather and share the middleman's profits with you.

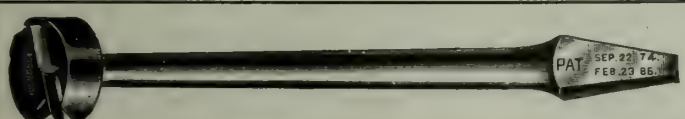
Dealers find the "A.R.C." Brand an extraordinary profitable line to handle. May we send you particulars?

A. R. Clarke & Co., Limited, Toronto

Manufacturers—Gloves, Mitts, Moccasins, Shirts, Sheep Lined and Mackinaw Clothing

CROWBARS

No. 102-A—C HISEL POINT



We offer you bars made of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Send us a trial order.

B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for Machine. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

TENTS — CANOES — PADDLES — PACK SACKS — CUSHIONS

These lines find ready sale through the hardware trade. Your stock need not be large—just a few standard size tents—as we carry a large, well assorted stock for prompt shipment. Canoes and paddles of all kinds can be supplied, but should be ordered as far ahead as possible to ensure delivery when required. Various kinds of canoe cushions as well as launch cushions made to order. Can be supplied on short notice. Pack Sacks of every kind and style. Send for catalogue.

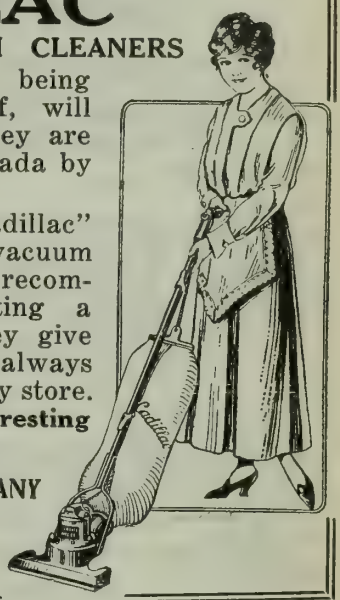
Good Men

DO you need the services of a good retail salesman, traveller, or manager? The best of them read HARDWARE AND METAL each week from cover to cover. Incidentally they also note the condensed ads. in the "Wanted" section. You can use space in this section at a cost of two cents per word for the first insertion, and one cent a word for subsequent insertions. Add five cents for box number or address.

A Household Necessity

A Cadillac Electric Vacuum Cleaner is a necessity in every house. It enables the housewife to do the maximum of work with a minimum of labor. Housecleaning is done much more thoroughly than is possible with an ordinary broom and without the fuss and dirt attached to the old-fashioned method of sweeping.

CADILLAC



ELECTRIC VACUUM CLEANERS

are well made, and being practically fool-proof, will last a lifetime. They are manufactured in Canada by Canadians.

Dealers find the "Cadillac" an excellent electric vacuum cleaner to stock and recommend; besides netting a handsome profit, they give customer-satisfaction, always a valuable asset to any store.

THE FINANCIAL POST in the House of Commons

IN the House of Commons the other week the attention of the Government was drawn to the article in THE FINANCIAL POST containing a reference to the financing of Roumanian orders through an agency established in London by Sir Clifford Sifton. Sir Thomas White, who is familiar with THE FINANCIAL POST, stated his opinion that the reference was to the private marketing of bonds.

This is merely a small item from THE POST of April 26th, but it goes to show that

POST BUSINESS NEWS HAS THE ATTENTION OF MEN WHO COUNT.

THE FINANCIAL POST is a paper which you can recommend to your customers enquiring for a good service of Canadian business news. THE POST is a paper which you can read yourself, and profit by. Send for sample copy and see if it will not pay you to interest alert business men amongst your customers in THE FINANCIAL POST. A liberal commission is paid on new subscriptions which you can quickly secure. Use this form in ordering samples.

THE FINANCIAL POST, Dept. "S"
143-153 University Ave., Toronto

Kindly send me a couple of sample copies of the current issue of THE FINANCIAL POST, and let me know your terms for new subscriptions secured, also for a regular supply of THE POST for counter sale.

WINDSOR QUALITY
ENAMELS · DRY COLORS

Windsor Solvent Stain meets the Hardware Dealers' need of a popular-priced, fast-selling line. The fact that it does more than any other stain has made it the general favorite with customers everywhere.

Windsor Solvent Stain is both a flat stain and a wood dye combined. May be applied over any finish without losing the attractiveness of the finish. Easy to apply—dries hard in two hours and dust-proof in fifteen minutes.

May we explain the money-making value of this stain. Write us to-day for our splendid proposition.

PUSH

S-W Preservation Shingle Stains

For Greater Profits

S-W Preservation Shingle Stains are giving *real* satisfaction. They are made according to exclusive formulas worked out as the result of years of tests and observation.

If you sold them last year, you will need to stock up extra well this year, for one customer tells another—and the goods sell themselves.

You will want to have a good range of the colors in which S-W Preservation Shingle Stains come.

If you are not already an agent for S-W Products we will be glad to lay the proposition before you at once, so that you can meet the demands of the great "Brighten Up" year with the best line ever sold.

"Save the surface and you save all" *Paint & Varnish*

We can show you how other dealers have pushed S-W Preservation Shingle Stains and found it profitable. Write to-day!

WILSON FEARED THE BRITISH

THE American President crossed the Atlantic in the first place with the idea in his mind that his ideals would be thoroughly in accord with those of the French statesmen; but he was rather afraid of a conflict with the British delegates. He found in reality that his plan for peace terms was as far removed from the French plan as the two poles. Then he crossed to London and was surprised to find that the ideas of the two Anglo-Saxon powers were identical.

This situation, according to J. W. Dafoe in the May issue of MACLEAN'S MAGAZINE, explains much that has developed at Versailles. Further, it contains the promise of a close *rapprochement* between the two great English-speaking democracies for all time to come.

Mr. Dafoe has contributed a remarkably interesting article to this number of MACLEAN'S, lifting the curtain on many of the puzzling situations that have arisen overseas. As the editor of the Manitoba *Free Press,* he is the dean of Canadian newspapermen; as the representative of the department of Public Information on the Canadian Mission to the Peace Conference, he was in a special position to learn what was transpiring. He tells of the really big part that Canada has played in the Proceedings and points out that Canada's status as a nation was firmly established in the eyes of the world when she was allowed separate representation.

A Dozen Other Features---Nationally Important

This May issue is full of articles of unusual significance for Canadian readers.

"SOLVING THE PROBLEM OF THE ARCTIC"
—By Vilhjalmur Stefansson

The second instalment of his remarkable story of the four years of exploration that he undertook for the Canadian Government in the region of the "Pole of Inaccessibility"—a harder place to reach than the North Pole.

"ORGANIZING FOR PEACE"
—By George Pearson

An article of the Great War Veterans' Association by a well-known author-soldier.

"THE CANADIANS IN SIBERIA"
—By Capt. W. E. Dunham

A graphic story of what our forces did in combatting the Bolsheviki, by an officer who has just returned.

"SAFE IN THE SADDLE"
—By J. K. Munro

A review of affairs at Ottawa in which the opinion is expressed that Union Government for the time being is safely entrenched.

The National Idea

The articles in this issue of MACLEAN'S reflect the national idea—Canada's part in the Peace Conference, the political situation at Ottawa, the exclusive report of Stefansson's national explorations, the national organization of our returned men, the work of our forces in Siberia. The reader of MACLEAN'S gets a broad idea of what Canada as a whole is doing. The value of this issue— and of all issues —is very great, therefore, from an educational standpoint.
MACLEAN'S is the one magazine that should be selected for young Canadians to read.

Four capital stories by famous authors—W. A. Fraser, Lloyd Osborne, Frederic S. Isham and C. W. Stephens.

The Review of Reviews

An unusually fine array of articles is given in this department, selected from the best in magazines and periodicals the world over. Some of the titles are:

Planned to Destroy British Fleet.
How Mackensen Was Caught.
Events of War Foretold by Stars.
What is Life Like Beyond the Grave?
A High-born Bolshevik.
The New Life in Dry America.
Germans Were Ready to Capitulate.
Japan's New Foreign Policy.
The Many Kings of Jerusalem.
Is British Foreign Office Against League?
Ambassador Tells Story of Peace Ship.
Hindenburg—After the Armistice.

WHY NOT BENEFIT BY THE LIGHT WHEN IT IS LET IN?

Our Cash Carriers will enable your selling staff to devote more time to customers, and to serve them more promptly. In other words, the staff can do more business when Gipe-Hazard Carriers are used than it is possible to do without them which, when properly interpreted, means greater profits for the merchant and better satisfied customers.
Too, there is not to be forgotten the saving of labor, and the avoidance of the disagreeable feature of salesmen having to crowd between persons when going to and from the place of change making.

Write for that circular.

Keep Your Stock Spotless

THERE is no feature of your store service more important than the cleanliness of your merchandise. All customers prefer to trade with the cleanest store. You cannot keep dust out of your store, but you can effectively control it and keep it off your goods by using—

STANDARD Floor Dressing

When you use the old-fashioned duster you merely displace dust, whereas Imperial Standard Floor Dressing definitely *lays* and *holds* 90% of all atmospheric dust. Dust cannot rise where Imperial Standard Floor Dressing is used.

Imperial Standard Floor Dressing cleans and preserves the surface of wood, linoleum and oil cloth. A single gallon suffices for 500-700 square feet of space and lasts for several months. It may be applied with an ordinary floor sprayer.

Imperial Standard Floor Dressing will not only help you to keep a brighter and more attractive store, but it will also bring you a new source of business. Your store and stock will demonstrate to neighboring merchants its cleansing, dust-preventing qualities, and they will want some, too.

Imperial Standard Floor Dressing is sold in one and four-gallon cans, also half-barrels and barrels.

IMPERIAL OIL LIMITED

BRANCHES IN ALL CITIES

DUNLOP TIRES —EVERYWHERE

¶ Dunlop Traction Tread can be bought in a greater number of garages than any other tire. Same with all the rest of the "Two Hands" Tire family: Dunlop Cord — "Traction" and "Ribbed;" Dunlop Fabric—"Traction," "Special," "Ribbed," "Clipper," "Plain."

¶ Any place that is good enough for you to drop into in search of a casing, tube or some gasoline, oil or free air, is a good enough place for us to sell Dunlop Tires. In these days when tire service is priceless—it is something to know that Dunlop Distribution is of the most far-reaching character—the most successful "Tire-When-It's-Wanted" co-operation ever achieved in Canada.

Toronto. Ont.

Gentlemen:-

On the 18th., of last December we placed a pair of your Royal Oak tires on the drive wheels of our ford delivery truck. This is an ordinary touring car Ford with a box for delivery placed on the rear. After running these tires 5,750 miles we find one tire in perfect shape and looks as if it would run a few more thousand miles without giving any trouble, the other tire is just as good, but met with an accident in having the rubber cut with a piece of glass, which necessitated us sending this to be repaired by a vulcanizer. This vulcanizer is not interested in these tires and quite unsolicited said," I do not know where you got that casing, but that is the best casing I ever had in my moulds."

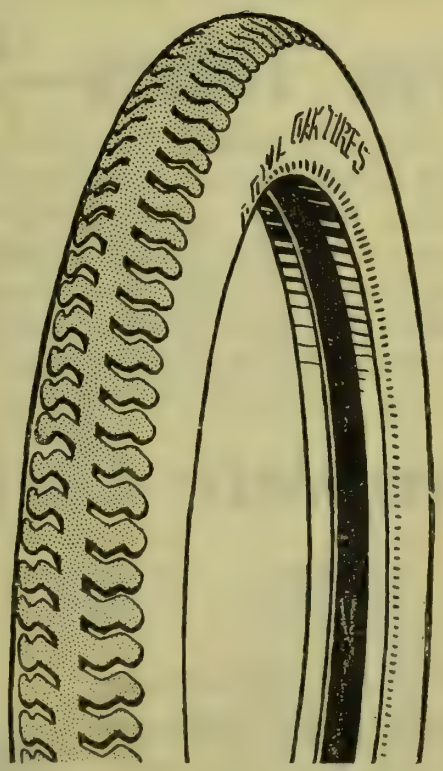
We feel so delighted with the results we are having with these casings, we cannot help expressing it and letting you know our experience with the Royal Oak tire. Those we have sold to Consummers and Retail stores, we have had no report on as they have not been out long enough to get this.

We have much pleasure in letting you know the favorable results we had with these casings, as we feel it is due to every manufacturer to hear some of the bright side of his manufactured products as well as hearing some of the faults.

Yours very truly,
Hewitt & Black Limited.
R C Black

RCB/T.

ROYAL O



Hardware-Man Got!

WHEN a hardware man without solicitation says, "5,700 miles and looks like a few thousand more" and a Vulcanizer—"the best casing I ever had in my moulds," you can rest assured that Royal Oaks will serve well both you and your customers.

Sell them—and you will surely profit.

If you are not familiar with Royal Oaks, drop us a line to-day. We will endeavor to explain every feature about them.

Now is a good time to get acquainted. Write to-day to our Head office.

AK TIRES

Repairs Punctures in 5 Minutes

Over 1,000,000 Motorists now use the Shaler 5-Minute Vulcanizer for repairing tube punctures, cuts, etc. Every Motorist should carry this convenient tube vulcanizer in his tool box, for emergency use on road or repairing tubes at home.

Saves Tubes—Saves Repair Bills

Repairs tubes—as good as new. It's easy and inexpensive. *The Shaler works automatically*—and without fail. Just touch a match to the non-flaming chemical fuel. In five minutes you have a firm, flat, "feather-edge," permanent repair—stronger than any "stuck on" patch—stronger than the tube itself. No gasoline, cement or flame, and no danger of injuring the tube. It works in the wind, in any weather, anywhere. The heat is applied directly to the pure gum patch and does not extend to the tube itself.

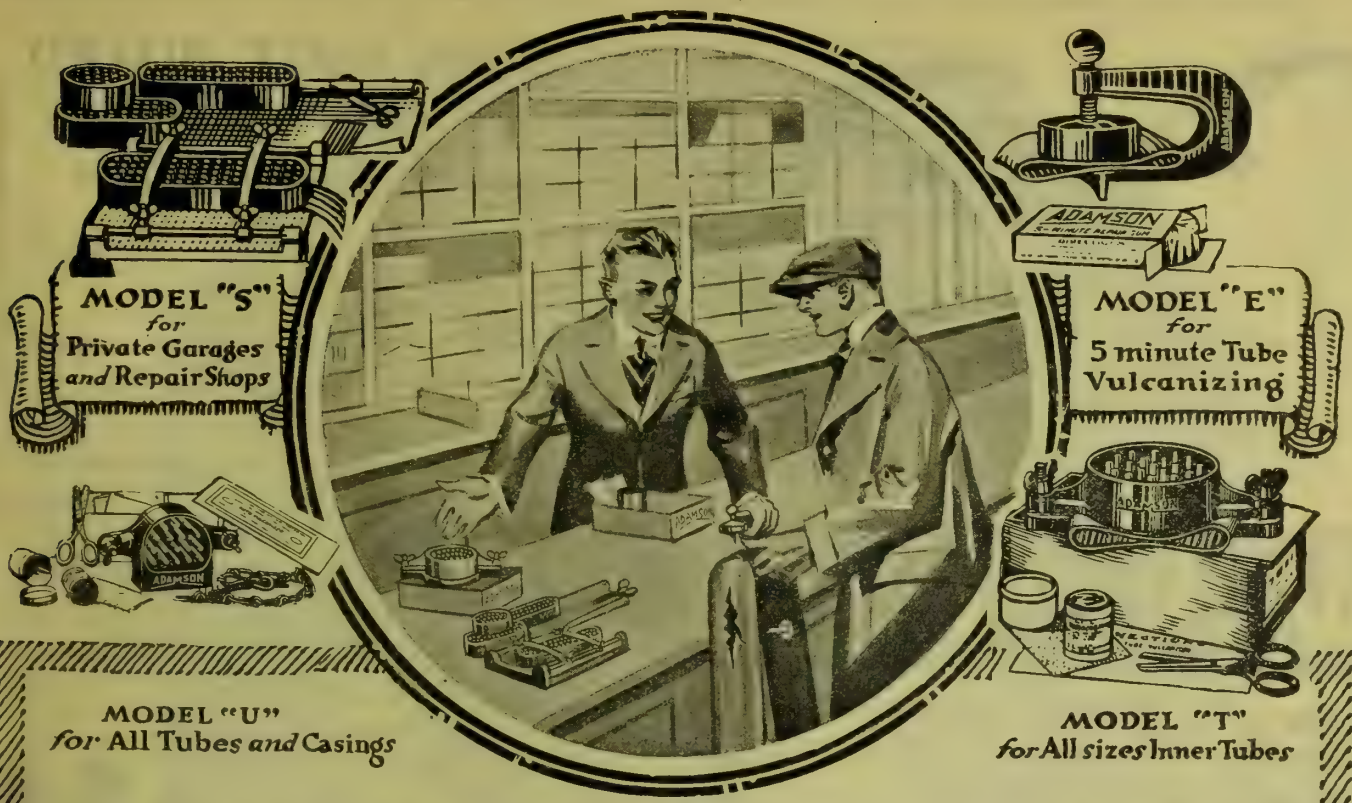
Complete Outfit Only $2.00

The outfit includes, the Vulcanizer—12 Patch-&-Heat Units (6 round for punctures, and 6 oblong for cuts)—complete $2.00. Extra Patch-&-Heat Units $1.00 per dozen.

SHALER

5 Minute Vulcanizer

Sold By All Accessory Dealers and Jobbers



To Dealers To insure shipments—it is advisable to order from your jobber now. The great demand has exceeded our factory capacity, and shipments will be made according to priority in receipt of orders.

Catalog of the Complete Shaler Line of Vulcanizers for Motorists Repair Shops and Garages mailed on request.

First Line of Defense for the Motorist

Let us send you this store display and other Sales Helps

Loose treads, blow-outs and short mileage are caused by cuts in the tread and side-wall, which let moisture and dirt into the fabric to rot and weaken it.

Help your customer to stop tire waste and increase tire mileage, by selling him an Adamson Model "U" to heal these injuries and protect the fabric, the only sure and lasting way —by vulcanization.

We are telling your customers that you sell Adamson Vulcanizers—are we right?

The new Ribbed Tread

The above diagram is a part of the new Thermoid Brake Inspection Chart

Making brake inspection simple and easy

AS the result of the Brake Inspection Movement last year, many thousands of motorists were induced to go to their dealers and have their brakes inspected at regular inter.als. This year, because of the growth of the movement, there will be thousands of additional motorists having their brakes inspected.

When a motorist comes to you and asks you to inspect his brakes, you know how to do it, of course. But do you know the simplest and best way to test and inspect them?

We have prepared a new chart, carefully worked out by our engineers, and in consultation with practical garage men, that answers just the question your repair man may be asking.

This chart contains a simple diagram and brief instructions for the quickest and most efficient method of inspecting brakes. The diagram of the brake mechanism shown in the above illustration appears on the chart. It will be welcomed by your employees and will assist them to save time.

Shows the structure of Thermoid Brake Lining

This chart also shows in detail the difference between Thermoid Brake Lining and ordinary woven brake lining. A microscopic photograph contrasts the close compact texture of Thermoid with the loosely woven texture of ordinary lining. This close compact texture is the reason why Thermoid has such an ideal gripping surface; it is the reason why Thermoid wears down slowly and evenly while still retaining that same ideal gripping surface until worn to wafer thinness.

The Brake Inspection Chart is mounted on card-board and strung so that it can be hung on your wall. It will be valuable to your employees and interesting to your customers. Free to any garage man or dealer who sells brake lining. Send for your copy to-day.

STARRETT TOOLS

Do You Believe?

Do You Believe that Paint and Varnish are great aids to Economy?

You **will** after you've read a few of the ads prepared by the Paint and Varnish Association.

Do You Believe that a Paint-protected surface is an impassable barrier to rust, rot, friction or disintegration? You **will** before long—for the big co-operative campaign of the Paint and Varnish Houses will surely convince you.

Do You Believe that the average man should do more painting—use more varnish—than he does? You **will** and so will Mr. Average Man—before another year rolls by—the advertisements of the P.&V. Association will convince your customers that it's to their interest to do more surface-protecting with paint products.

Do You Believe in co-operation? You **must,** when you see the fruits of it on every hand. You surely **will** when you see people buying three cans of Paint and Varnish for one they bought before. And you **will not stop** with just believing. You'll co-operate with us and the other paint and varnish manufacturers to make a great big co-operative success of the campaign we have instituted to drive home **this** big, vital fact.

"Save the surface and you save all" *Paint & Varnish*

It's a fact that **must** be realized before Paint will move over your counter and the other paint dealers' counters, as fast as it **should** move. To make it sink in, we need the help of **every** dealer.

How to help?

Well, one way is to display on your counter and in your window, cards bearing the above slogan—and to put the same slogan in all your newspaper advertisements.

And—speaking of co-operation — if you're not a B-H Agent — and if B-H Products are as yet unrepresented in your locality, write and obtain particulars of the splendid co-operation we give our dealers. Let us tell you about the unique battery of dealer helps and the wonderful advertising which we employ, to help our dealers sell B-H "English" Paint. It's a paint that is **worth** the effort we put into the popularizing of it. It's the paint that's guaranteed as to its important basic ingredients—a brand that reflects credit on its maker and on all dealers who sell it.

COW-EASE

KEEPS FLIES OFF CATTLE AND HORSES

And what's more, I guarantee it to do just that so you can safely guarantee it to your customers.

For some eighteen years Cow-Ease has been doing its work faithfully and thousands of merchants and farmers everywhere know it to be the best product of its kind.

My faith in Cow-Ease is not just idle talk for my ten-day free trial offer backs my words with deeds. You take no chances. In the best farm and dairy papers I advertise Cow-Ease with my liberal ten-day free trial. It makes new customers for you and friends for me.

I will supply you with sales helps as well. A lithographed steel sign that shows the way to use Cow-Ease. It will identify your store to the farmer who has seen my advertising. Besides I will furnish you with folders that give letters of recommendation from people who have used Cow-Ease for years.

Send to your nearest jobber for my special Trial Offer. If you want more information about Cow-Ease and my selling campaign for 1919 before ordering, write to me to-day.

M. ELTON VOSE, *Vice-President*

CARPENTER-MORTON CO.

Established 1840

77 Sudbury St., Boston, Mass.

Distributing Branches—CHICAGO and SAN FRANCISCO
Canadian Distributor—A. RAMSAY & SON Co., Montreal

The following assortment No. 15 makes a satisfactory trial order of Cow-Ease for a starter:

10 one-gallon cans of Cow-Ease.
6 one-half gallon cans Cow-Ease.
4 quart cans Cow-Ease.
1 dozen Cow-Ease Sprayers.

With this assortment we pack a very handsome steel display sign and a generous supply of Cow-Ease circulars.

Write to your jobber for prices.

RELIABLE
TRADE MARK

Canadian Products
"Lively and Lasting"

OPPORTUNITY LIES HERE

Reliable Flashlights and Reliable Batteries present an unusual opportunity for dealers. These are **live sellers**—bought by a rapidly increasing number of people of all classes.

Our carefully planned advertising campaign in magazines, newspapers and farm papers, will popularize Reliable products with thousands of new users. It reaches more than 8,000,000 people, many of whom need flashlights and batteries.

Reliable Tubular Flashlights are made of metal, enameled in red, brown, blue and green. Their selling field is unlimited. There is no other line like them—none so attractive. Reliable Batteries sell and repeat because they are "Lively and Lasting."

All Reliable products are of genuine Canadian make and stand foremost in quality and service.

You get bigger profits than on competing lines, and a trade that sticks. Get a Reliable Flashlight or a Reliable Battery for your own use and you will be glad to recommend them to your customer.

Your jobber can supply you.

Sanitary -- Odor-Proof -- Sturdy

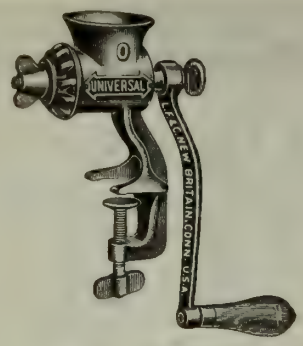
That's the story of Eddy's Indurated Fibreware in a nutshell.

In the Home On the Farm Anywhere Everywhere

Eddy's Indurated Fibreware finds a place and makes friends. There's no great selling argument required when you handle this line. It sells itself. Its very appearance suggests cleanliness. Moulded, pressed and baked, its glass-like surface at first sight impresses your customers with the fact that dust or dirt simply cannot lodge in it, for the very good reason that there's no crevices or cracks in it for dust or dirt to lodge in.

EDDY'S INDURATED FIBREWARE

is an all year 'round proposition. The better your stock of it, the more you'll sell.



Get ready for big summer business.

Have it when it's asked for.

Plymouth Rope

is an honest rope, both in construction and workmanship. Under proper working conditions it will give superior service in any field of endeavor, insuring safety, satisfaction and economy to the user.

Rope—like everything else—wears out. Its length of service depends on two things—the **quality** of the rope, and the **treatment and care** it receives. The quality of Plymouth Rope goes without saying. Dealers can help their customers obtain **extra** service in the use of Plymouth Rope by handing them a copy of our booklet, "How to Take Care of Rope." A supply of these booklets will be sent to Plymouth dealers on request.

PLYMOUTH TRADE MARK 1824

The Moment of Opportunity *for* Retail Merchants

THE next few years will mark a tremendous change in the business of retailing.

Here and there out of the mass of small businesses, big retail establishments will spring up.

Every community will see some few stores rise rapidly above Ordinary Success to Big Success.

Opportunity is knocking now at every merchant's door.

For, to-day the handicap that once set a limit to a store's expansion no longer exists. The trading area, which is the area to which goods may be delivered profitably, has been greatly extended.

The store in the centre of the town can serve customers on the outskirts. The east-end store can deliver goods in the west end.

The whole community is laid open to competition.

And in this fair field the live merchant must win.

Railway Transportation revolutionized trade. It made Big Business possible. By opening up distant markets, by moving goods rapidly at comparatively low cost, Railway Transportation built up big central successes.

Motor Transportation, now reduced to a low-cost basis, will produce, in local trading, results similar to those effected in national markets by Railroad Transportation.

As men everywhere grasp this idea, as they seize the opportunity for business growth that now presents itself, the retail business will be operated on a higher, more efficient plane. The public will be better served. Larger and more varied stocks will be offered for sale. Better and bigger stores will appear.

The Ford One-Ton Truck makes available this opportunity. It is motor transportation at low cost—low first cost, low maintenance cost, low operating cost.

A large investment in equipment is not needed. Every business that is paying cartage bills or maintaining a delivery system can employ Ford Trucks economically.

A small outlay will motorize your deliveries and open to you the opportunity for business expansion.

Complete Ford Trucks in Two Standard Body Types Now Ready for Immediate Delivery

The Ford Truck Chassis is being used with hundreds of special body types in every line of business. But, ordinary hauling and delivery work can be best adapted to two standard types—the Stake Body and the Express Body.

These two body types are kept **in stock** by Ford Dealers and Ford Branches, ready for immediate delivery. They insure the maximum efficiency from the Ford Truck. They give the buyer of a Ford Truck the recognized benefits of Ford production

Both types have the Enclosed Cab with the two-way windshield which gives the driver proper protection from the weather. This Cab—a Ford feature—is warm in winter and cool in summer. It may be ordered with or without doors as desired.

See These Complete Trucks

No question affecting the future of your business is quite as important as this question of motor deliveries. Can you afford to evade it? Will you wait until your competitors force it on you as a defensive measure?

Seize the opportunity to enlarge your field of business. Consult the Ford dealer. Let him solve your delivery problem. Act. To-day.

Ford One-Ton Truck (Chassis Only) $750.00 f. o. b. Ford, Ont.

Freight charge to London, $15.00; Toronto, $17.00; Montreal, $22.00; St. John, $31.00; Winnipeg, $47.00; Regina, $63.00; Saskatoon, $66.00; Calgary, $77.00; Vancouver, $93.00.
